Carlton IVA Phase-Loaded 4-Way Speaker System
as Low as Distinctively styled by skilled craftsmen to blend $\$ 25970$ beautifully with any furnishing mode. The Carlton IVA in handsome, low-bóy design, employs acoustically correct "Tapatone" grille cloth to add a touch of colorful accent to its graceful lines. A complete phase-loaded system, it features Model 1178 4-way speaker system components for superior bass response, natural mid-range and ultra-clean treble reproduction. Includes: 15BWK "K" type low-frequency driver, MT30B coaxlal mid-bass and treble driver-horn assembly, T35B very-high-frequency driver, X336 crossover network, and two AT37 level controls. Handles 20 watts of program material; 40 watts peak power capacity. Size, $33-1 / 2^{\circ}$ high, $26-1 / 4^{\circ}$ wide, 19-1/2" deep. Shpg. wt., 124 lbs.

EXCITING NEW SPEAKER SYSTEM ACHIEVEMENT... For Superior, In-Phase Bass Response from Along-the-Wall Speaker Enclosures

Unlike treble and mid-range tones, which are directional, bass tones are non-directional and ordinarily travel along two routes on the way to your earsresulting in partial cancellation. One portion of a bass tone iravels directly to your ears from the wooter, while another portion of the same tone travels first to the wall in back of the wooter, and then is reflected to your ears. Since the sound laking this second route travels further, it reaches you later than the sound that comes directly from the woofer-it is out of phase. "Phase Loading" corrects this bass-cancelling time lag by using a specially designed woofer in a sealed cavity, facing the wall. With this unique arrangement, all of the bass is "bounced" back from the wall at the same time-and is in phase. You hear the entire audio spectrum in phase, the bass tones plus the mid-range and treble. With "Phase Loading", the bass tones are augmented by 3 times-and you can place the enciosure anywhere along the reflecting wall.

HERE IS HOW IT WORKS

15BWK wooter "bounces" Two-way mid-range sound comes irom MT 308 horn; tre. ble from T35B tweeter. bass tones directly off re-
flecting wall.

Duchess IVA Phose-Looded 4-Way System aS LOW AS A perfect example of elegant $\$ 25676$ contemporary design, the Duchess IVA 4 -way system complements anx roam in which it is placed. Expert personal help, intelligent service and the full resources that have made us America's $\mathrm{Hi}-\mathrm{Fi}$ Center, enable us to provide you with the high-fidelity music system best suited to your personal taste and budget-at the lowest prevailing prices.

## THIS IS A BASIC MI-FI PHONO SVSTEM

## THE AMPLIFIER

The amplifier is the "heart" of a highfidelity music system. It "builds up" or amplifies the very small voltages which are fed into it by the phono cartridge, tape deck, or radio tuner, into electrical energy sufficient to operate the speaker. A hi-fi amplifier does this with maximum fidelity.

## THE SPEAKER AND SPEAKER ENCLOSURE

The actual sound-reproducing unit. The speaker converts the electrical energy received from the amplifier into sound waves which are radiated from its cone. A proper enclosure, the "other half" of a speaker, is a vital factor in good tonal reproduction.

## THE RECORD CHANGER AND CARTRIDGE

The turntable of a record changer or player "spins" the record. The pickup arm contains a cartridge with a needle (stylus). The needle follows the record grooves, and the cartridge converts the side-to-side movements of the needle into stnall voltages which are then fed into the amplifier.

## AOD THESE OOMPONENTS NOWOR LATER

RADIO TUNER. Performs the same function as your radio but does not contain an amplifier or speaker. It simply "tunes in" the radio signal and feeds it through the amplifier and speaker of your hi-fi system.

## TWEETER AND CROSSOVER NETWORK.

A tweeter or high-frequency speaker, can be added to your single speaker system. The crossover network sends the right frequency to the proper speaker.
TAPE DECK. Most hi-fi amplifiers have an input for a tape recorder or deck. A tape deck allows you to play your own tape recordings or commercially recorded tape through your hi-fi system.
STEREO. By using a two-channel sound source, such as a stereo tape deck, plus two amplifiers and two speakers, you will be able to enjoy breathtaking 3-D stereophonic sound. You can start out with stereo-or add the tape deck, extra amplifier and extra speaker whenever you wish.

## the ALIIED RECOMMENDED SYSTEM PLAN gives you the most for your money

On pages 6 through 25, we present on outstanding selection of Allied High-Fidelity Systems-the fomous, ready-to-play systems that give you the most for your hi-fi dollor. Each of these systems is a best buy in its price range-and each has been carefully selected by Allied's staff of audio experts.

## YOU SAVE MOST

## ON A COMPLETE SYSTEM

Every system is priced to save you money over the total price of the same individual components if purchased separately. The amount you save is clearly indicated in our descriptions-you can actually save up to $\$ 100.00$ when you buy a complete system!

Whatever system you choose, you will discover the pleasure of enjoying music with all the exciting realism of the original performance. And whatever your taste or budget, there's a bolanced, perfectly matched Allied High-Fidelity Music System woiting for you. Check our "bonus" features below.

## YOU GET MATCHED COMPONENTS

System components are always selected on the basis of comparable quality and carefully evaluated by comparative listening tests on our renowned Auditioner Control Console - your assurance

YOU GET A MUSIC SYSTEM THAT'S EASIEST TO CONNECT

Connect the speaker to the amplifierspeaker coble and amplifier terminals are color-coded too, for easy motching.

FULL INSTRUCTIONS

Bell T-202 Stereo Deck

Knight KN-632 Basic Amplifier

## Allied's advanced knight hi-fi

## BUILT TO ALLIED'S OWN SPECIFICATIONS TO SAVE YOU MONEY

Knight high-fidelity components are created and designed by Allied and laboratory-checked to confirm that they meet our rigid specifications-and the critical demands of music lovers. All Knight hifi units are unconditionally guaranteed for one year. For economy and highest quality, Knight equipment leads the field, giving you top performance at lowest cost.

## NEWEST features for TRUE HI-FI PERFORMANCE

## RUMBLE AND SCRATCH FILTERS

These switches provide you with ultimate control of recorded or broodcast delects with a minimum loss of musical quality; old, worn records become ployablel

## VARIABLE LOUDNESS CONTROL

At low volume levels, the humon ear is less sensitive to the lowest and highest frequencles; the loudness control compensates for this insensifivily.

## TOP FLEXIBILITY

You can use your Knigh 30 -watt amplifier with a tape deck, complete tape recorder, phono playback unls, $F M$ or AM tuner, for hisfi TV sound, and other opplications.

GUARANTEED FOR ONE FULL YEAR
KNIGHT KN-530 Deluxe 30-Wat Hi-Fi Music Amplifier

ONLY

$\$ 9.45$ Down

# - Effective Scratch and Rumble Filter Switches 

- "A-8" Speaker Selector Switch On Front Ponel
- DC on Filaments of Praamplifier Tubes
- Accurate, Continuously Varioble Loudness Control
- NARTB Equalization for Tape Head Playback

New features-new styling-higher output power, combine to make the new Knight Deluxe 30-watt amplifier the year's outstanding high-fidelity value! It is the finest amplifier in the Knight line, matched in quality, and case and color styling, to the Deluxe FM-AM tuner on the opposite page.
The Knight 30 -watt amplifier offers the flexibility necessary to meet the needs of any high-fidelity music system. The new "A-B" speaker selector switch provides for independent playback through either or both of two speaker systems. Scratch and rumble, on records or broadcasts, are effectively suppressed by separate panel switches; hum is reduced to inaudible levels by DC operation of all preamp tube filaments. Equalization controls correct both magnetic and ceramic cartridge inputs. Variable damping permits exact matching of amplifier to any speaker system, while new 6CA7 output tubes provide greater power output at exceptionally low distortion levels; new circuitry prevents overload automatically.
SPECIFICATIONS: All measurements at full 30 watts output. Frequency Response: $\pm 0.5 \mathrm{db}$, from 20 to $40,000 \mathrm{cps}$. Harmonic Distortion: $0.5 \%$ at mid-frequencies; never exceeds $1.5 \%$ from 30 to $20,000 \mathrm{cps}$. Intermodulation: less than $2 \%$ at full rated output. Hum Level: 80 db below full output. Sensitivity (Input required for full oulput): 4 mv at Tape Head input; 8 mv at Mag Phono input.
Inputs: G.E. magnetic phono, Pickering magnetic phono, Tuner or Crystal Phono, Ceramic Phono, Tape Head, Tape Amplifier, Microphone; level control on Tuner input. Controls: Input Selector/Turnover (Aux, Tape, Tuner, Eur, FFRR, RIAA, Tape Pre, Mic); Rolloff (Eur, FFRR, RIAA, Flat); Bass; Treble; AC Off-On/Volume; Loudness; A-B Speaker Switch: Rumble Filter Switch; Scratch Filter Switch. Output Imp.: 4, 8 and 16 ohms . Rich leather-tone finish; brass finish escutcheon. $4 \times 151 / 2 \times 11^{\prime \prime}$. U.L. Approved. For $110-120$ volts, $50-60$ cycle AC. # NEW knight HIGH-FIDELITY COMPONENTS 

These new Kınight high-fidelity components are created and designed by Allied, and precision-built to rigid specifications-your positive assurance of brilliant hi-fi reproduction and the ultimate in dependability. All of the Knight hi-fi components listed on these pages have been closely controlled front their conception. through every step of design and construction, to give you, the customer, maximum value for your hi-fi dollar! As proofpositive of our confidence in Allied's own Knight components, they are all unconditionally guaranteed by us for one full year.

New KNIGHT FM-AM Tuner-Preamplifier<br>ONIY<br>s/3950<br>- Tuning Eye for FM and AM<br>- 12 Equalization Combinations<br>- Tuner Filaments Are Off<br>During "Phono" Operation

Model KN-200. A brilliantly styled and engineered combination unit, integrating a deluxe preamplifier section and a highly sensitive FM-AM tuner. A complete hi-fi system control unit and tuner in one case! Use it with any high-quality basic amplifier (such as the Knight 32-watt unit at right) and speaker to have a truly outstanding music system! Best of all, you'll save many dollars by choosing this superb tuner-preamplifier.
Tuner operation is totally independent of preamplifier section-when not in use, tuner tube filaments are switched off, prolonging tube life. The preamplifier section, in addition to controlling volume and tone for the tuner, provides a scratch filter, rumble filter, loudness control switch, bass and treble controls and full equalization for phonograph records. It's functionally styled for easy operation-and strikingly handsome, too.

PREAMPLIFIER SPECIFICATIONS. Frequency Response: $\pm 0.5$ $\mathrm{db}, 20-40,000 \mathrm{cps}$. Controls: Input Selector/Turnover (Aux. Tape, Tuner, Eur, FFRR, RIAA. Tape Pre, Mic); Rolloff (Eur, FFRR, R1AA, Flat); Selector Switch (FM, FM-AFC, AM, Tuner Off); Tuning; Volume; Bass; Treble; Scratch Filter; Rumble Filter; Loudness. Inputs: G.E., Pickering, Aux, Ceramic, Tape or Crystal Phono, Tape Pre, Mic. Outpuls (Impedance 40,000 ohms): Recorder Output, Main Output.
TUNER SECTION SPECIFICATIONS. FM Sensitizity: $31 / 2$ nicrovolts provides 20 db quieting. A M Sensitivity: 10 microvolts for 20 db signal-to-noise ratio. IF Bandwidth $(F M): 200 \mathrm{kc}$. Meets FCC radiation specifications. 10 tubes plus rectifier; EM81 tuning indicator.
No custom mounting accessories required. Deluxe color styling in rich, leather-tone finish, brushed brass and black trim. With F 11 dipole antenna and $36^{\prime \prime}$ output cable. Size, $45 / 8 \times 135 / 8 \times 9^{3} 4^{*}$. For $110-120 v ., 50-60$ cycles AC. U.L. Approved. Shpg. wt., 15 lbs.

## UNEQUALLED FOR VALUE

What goes into a Knight high-fidelity component? First, information gained during Allied's long leadership as a supplier of hi-fi units and systems to music-lovers the world over. Second, skilled engineering and styling aimed at bringing you the highest quality at the lowest price. Third, carefully selected, thoroughly inspected components, assembled to produce the unit you want. There's greater value, finer performance in every Knight unit-and you can hear the difference!

KN-700

New KNIGHT KN-700 Stereo-Monaural Preamp

$$
\begin{array}{cl}
\text { ONLY } & \text { : For Stereo or Monaural Use } \\
\$ 50 & \text { 2-Channel Tape or FM/AM } \\
\text { : Channel "Reverse" Switch } \\
\text { - DC On All Tube Filaments }
\end{array}
$$

A superb preamplifier for use with any monaural-or stereo-high-fidelity music system! Start by using it in your present hi-fi system, and add stereo later, or take advantage of the money-saving combination offers at right and on page 24 to start with stereo now-for far less than you thought possible!
The Knight stereo preamp will work perfectly with stereo tapes or phonograph records, and even with stereo broadcasts, already transmitted in some communities. A finger-tip control will instantly switch your entire system to monaural or stereo, and also reverse left and right channels. In addition to independent gain controls, a Master Volume control simultaneously controls both channels. There is full phono and tape equalization and control for monaural use.
SPECIFICATIONS: Frequency Response: $\pm 1.0 \mathrm{db}, 20$ to $20,000 \mathrm{cps}$. Hum Level: 50 db below full output on tape channel; 70 db below output on high-level input. Sensitivity: Mag Input, 8 mv for 1 volt output; Tape Head Inputs, 4 mv for 1 volt out put. Conirols: Selector (Aux, Tape Head, Tuner, EUR, FFRR, RIAA, Tape Pre, Mic); Volume "A"; Volume "B"; Bass; Treble, Master Volume; Scratch Filter; Rumble Filter: Loud ness Switch: Monaural-Stereo and Channel Keverse Switch. Inpuls: G.E., Pickering, Ceramic Phono, Aux. A, Aux. B, Tape Head A, Tape Head B, Mic, Tuner, Tape Pre or Crystal. Outputs: A \& B Recorder Out puts ( 20,000 ohms imperdance), A \& B Main Outputs (Cathode Followers). Size: $41 / 2 \times 15 \times 71 / 4^{\prime \prime}$
6-Knob kit required for custom mounting (see below). DC operation of all filaments. Tube complement, 4 ECC83/12AX7, 1-ECC82/12AU7; 2 selenium rectifiers. U.L. Approved. 2 auxiliary AC outlets. For $110-120$ volts, $50-60$ cycles AC. Shpg. wt., 10 Ilss. 92 SX 406. NET
79.50

CUSTOM MOUNTING KIT. Knobs and hardware to adapt stereo preamp above for mounting in custom cabinet or wall panel, etc. Shpg. wt., 5 gz .

D8130

## DB1 30 35-WATT AMPLIFIER

This 35 -watt amplifier offers exceptional versatility plus full-toned, perfectly-balanced reproduction. Ample anced reprone for the most elaborate home music entertainment systems. Extremely uniform output. low distortion and high power handling capacity assure faithful sound reproduction. Loudness contour selector assures correct tonal contour even at very low listening levels. Variable damping control provides cleaner bass response by precisely coupling amplifier to speaker system.
Out put: 35 watts with $1.5 \%$ IM distortion. Harmonic Distortion: $0.3 \%$ at 35 watts. Restonsf: $\pm 0.5 \mathrm{db}, 15-30,000 \mathrm{cps} . ~ H \mathrm{xm}$. (Relow raled ouf pul): Magnetic Inputs. - 60 db; other inputs. - 80 db . Oni pui Inipedance: 4. 8 and 16 ohms. In puss: High-level magnetic phono. Low-level magnetic phono: Tuner; Tape; Tape monitor: Auxiliary; Crystal phono. Controls: On-Off; LoudnessContour: Bass: Treble: Input Selector (Phono, Radio, Tape. Aux.): 7-joe. Equal izer (Eur 78. U.S. 78, AES. RIAA, COL-LP. NAB, POP); 3-pos. Low Filter; 3-pos. High Filter; Gain; 3-pos. Sjeaker Selector. Size. $41 / 1 \times 1424 \times 10 \frac{1}{4}{ }^{\prime \prime}$. Less case (below). For 110 120 v. 60 cycle A.C. Shpg. wt., 24 lbs .

## 2660 BASIC FM-AM TUNER

ONIY
$\$ 1 \% 50$
Morierately priced FM-AM tuner for those desiring a high standard of reception. It's an ideal companion for the DBI30 (at left) or any other high-quality amplifier that has tone and volume controls. Extreme sensitivity and high selectivity assure clear reception of even weak or distant stations. Has excellent response characteristic with very low distortion. FM circuit employs dual limiters followed by Foster-Seeley discriminator. AFC (automatic frequency control) circuit assures utmost ease in tuning. AFC can be momentarily switched off to permit tuning weak or distant stations. A cuning meter (indicates signal strength), simplifies tuning of $\mathrm{A} M$ as well as F M stations. Cathode-follower output.

Audio Outpul: 1.5 volts AM and FM. Sensilivily: FM ( 300 -olm input) $5 \mu \mathrm{~V}$ for 30 db quieting: AM $5 \mu \mathrm{v}$ for 20 db signal-to-noise ratio. Hum: 60 db below full output. Controls: Selector (Off-On, AM, FM with AFC FM without AFC); and Tuning. Built-in line cord antenna for FM and ferrite loop for AM. 9 tubes plus rectlifer. Meets FCC radiation specs. Size. $41 / 4 \times 113 / 4 \times 101 /{ }^{\prime \prime}$ deep. Less case (see below). For 110.120 volts. 60 cycle Ac. Shps. wt., 13 lbs .
93 SX 720. NET
119.50

## FM50 BASIC FM TUNER

ONIY An exceptionally fine basic FM tuner for high-fidelity music systems. Economically priced, it offers many outstanding features. Can be
 used with any amplifier that has volume and tone controls. Features extreme sensitivity for clear reception of weak or distant stations. Excellent selectivity eliminates Interference from strong or local stations Limiter and Foster-Seeley dlscriminator circuits assure high signal-to-noise ratio AFC (automatic frequency control) for simplified tuning-as dial setting of FM station is approached, AFC takes over and tumes to exact frequency AFC can be mo then to mentarily turned of to permit cuning weal stations. Temperature compe
tor plus AFC eliminate drift.

Sersitivity: $\mathbf{3 0 0}$-ohm input. $5 \mu \mathrm{v}$ for 30 db quieting. Out put: 1.5 volts. Comerols: Tuning and Selector (On-Off FM ; AFC-out). Size. $41 / \times 118 \times 101 / 207$ tubes plus rectifier. Built-in line cord antenna provides excellent FM reception in most locations. Attractively styled. brushed gold and white panel illuminated dial pointer. Meets FCC radiation specifications. Less case (see below) For operation from $110-120 \mathrm{v} .60$ cycle AC. Shpg. wit., $113 / 2 \mathrm{lbs}$.

## ST10 "ADD-ON" STEREO AMPLIFIER

Makes it easy to convert your hi-fl system for use with stereophonic sound equipment. Has 2 equalized tape preamps to handle the 2-channel output of a basic stereophonic tape mechanism. The output of 1 preamp is fed into your hi-fi system to provide one channel of sound. Second preamp drives the buitt-in 10 -watt amplifier-you need add only a speaker.

## HF1OAG "CHALLENGER"

Provides true hi-fi performance and control flezibility at low cost! Employs controlled positive feedback: circuit for remarkably flat frequency response with low hum and distortion. Has a built-in preamp, separate bass and treble controls, and 2-position record equalizer. Oniputs: High-imp. tape jack for feeding recorder and 4, 8, 16 ohms for speaters Response: +1 db 20 to 20,000 cps. Distortion: $1 \%$ at 10 watts output.

Also has 2 auxiliary inputs for stereo tuner or separate AM and FM tuners. Responsei $\pm 2 \mathrm{db}$ for $20-20,000 \mathrm{cps}$. Disfarfion: $1 \%$ at 10 watts. In puls: Tape 1. Tape 2, Aux. 1. Aux. 2. $61 / 2 \times 53 / 4 \times 12^{\circ}$. Less case. For operation from $110-120$ volts, 60 cycle AC. Shpg. wt.. 11 lbs .

## AM90 BASIC AM TUNER

ONLY

$\$ 744^{50}$
Top-ruality basic AM tuner clesigned to provide the utmost in reception of standard $\mathrm{A} M$ broadcasts. Can be used with any high-fidelity anuplifier that has volume and tone controls. Modern superhet circuit has important refinements for greatly improved selectivity and sensitivfty.

Tuned RF amplifier provides $\mathbf{3} \mu \mathrm{v}$ sensitivity with 20 dh signal to noise ratio. Choice of wide or narrow passband for excellent reception of local or long-distance stations. Built-in 10 -kc filter eliminates adjacent station whistles. Cathode-follower output permits use of long learls between tuner and amplifier. Highly efficient ferrite loon-stick indoor antenna with provision for adding outside antenna. Owiput: 1 volt-ample to outside antenna. Onfory hightidelity amplifier. Frequency Krive any high-fidelity amplifier. Froqurncy onsition: $30-3500$ cps in narrow (long range) position. Consrols:- Selector (On-Off, AM Wide. AM Narrow) and Tuning.
Altractive brusbied gold and white manel. Sizf: 4 bex $113 \times 10 \frac{1 / 4 " .4 \text { tubes plus rectifier. }}{}$ less case (see listing on page 32). For operation from 110120 volts, 60 cycle AC . ation from

## R620 BASIC FM.AM TUNER

ONLY The R620 FM-AM high-
 firlelity tuner offers topnotel coverage of the FM and AM broadcast bands at
very monlerate cost. Designed for use with the IJB115 (at right) or any other high-fidelity amplifier witls tone and wolume controls. An excellent choice for the budget-couscious ligh-fidelity enthusiast. Compactly styled to occupy a ininimum of space on shelf, table top or bookease. Triode RF amplifier and triode mixer for excellent sigual-to-noise ratio. AFC (alltonatic frequency control) circuit assures inaximum tuning rase as dial setting of desired station is approached. AFC takes over and precision tunes to exact frequency then "locks" in. AFC can be turned off to fermit easy cuming in of weak or distant stations.
Has built-in line cord FM antenna and loonstick AM antenna: urovision for externat antenna. Controls: Tuning; Selector (Off-On, $\lambda M, F M$ with AFC. FM without AFC). Sensitivity: FM, $10 \mu$ y for 30 db signal-to-noise ratio; $1 \mathrm{M}, 5 \mu \mathrm{v}$ for 20 db signal-to-noise ratio. ${ }^{7}$ tubes blus rectifier. Size: $41 / \times 118 / 4 \times 101 / 4{ }^{n}$. Less case (see jage 32). Meets FCC radiation specs. For 110 120 volts. 60 cycle AC. Wt.. 11 lbs.

## RR550 FM-AM TUNER-AMPLIFIER

Deluxe FM-AM turer-25 watt amplifier combination with built-in preamp-all on a single chassis. The tuner incorporates double limiters, a Foster-Seeley discriminator and AFC. A tuning meter assures pinpoint tuning accuracy. The amplifier delivers a full 25 vatts at only $0.3 \%$ distorison, with response of $\pm 0.5 \mathrm{db}$, from 15 to $30,000 \mathrm{cps}$. Has 4,8 , and 16 ohm speaker outputs. Extreme versatility is provided by the preamplifier section. It features 3 position loudness control, 5-position record erpalizer, high and low-frepuency filters, separate bass and treble controls, and 5 position input selector. Sensitivity on FM, $2.5 \mu \mathrm{v}$ for 30 db quieting; AM, $5 \mu \mathrm{~V}$. Size, $41 / 4 \times 143 / 4 \times 1134^{\prime \prime}$. Tuner meets FCC rarliation surecifications. Less case (see page 32). For operation from $110-120 \mathrm{v}$., 60 cycle AC. Shipg. wt., 25 lbs.

# Deluxe Tuner and Amplifier "Twins" 

## MODEL FA-540 BASIC FM-AM TUNER

## ONLY <br> 50

A compact hasic FM-AM tinter featuring ex cellent performance and dist inctive appear ance, at a moderate price. All ideal companion unit for the AA-920 (at right) or anly other hi-fi amplifier having volune and tone controls. The entire unit is housed in a beautifully styled metal case in burguncly and brushed brass

Hum Level: 70 db below 1.0 volt. Maximum Autio Output: 5 volts. Outpul Impedance: 500 olins (cathode follower). Conirols: Selector (Off-On, Aux, AM, FM with AFC, FM without AFC), Tuning. FM Frutures: Automatic frequency control (AFC) for simple, dsifi free tuning, with disabling switch for tuning weak stations adjacent to strong stations: temperature-compensated oscillator for maximum stability of tuning; tuned RF amplifier stage for excellent seusitivity and selectivity; 3-kang tuning capacitor: built-in line cord artenna, with 300 -ohn terminals to matel external diumbe. FM Sensitivity: 3.0 microvolts for 20 db of quieting. A Af frafurrs: Tuned KF amplifier stage; 10 -ke whistle filter; efficient, built-in ceramic powdered-iron antenua; 3-gang tuning capacitor. AM Sensitivity: 3 microvolts for I volt i) C at detector.

A cathode follower output permits installation of the FA-540 up to 100 feet from the amplifier without deterioration of sigual quality. Flywheel tuning for smooth, precise station selection, blus "Beacon" tuning eye provide pin-point accuracy. Tuner can be easily removerl from metal case to permit custom installation. FM and AM band calibrations are legibly markerl on the illuminated slide-rule dial. A switched input is provided for crystal or ceramic fhono or TV somind. 7 tubes, plas KM81 tuning eye and 6.X4 reetifier. Size, $4 \frac{2}{2} \times 13 \times 83^{*}$. For operation from $105-120$ volts, 60 cycle AC. Shing. wt. It lbs.

## FM-100 "COUNTERPOINT II" BASIC FM TUNER

Custom styled, professional-type basic FM tuner. Represents the successful fulfillment of just one assignment-the most effective reception of the FM broadcast signal. A perfect match for the A-120 hi-fi amplifer (above, right). Outstanding features include High sensitivity; variable AFC (automatic frequency control) for optimum reception in any area; variable ANG (automatic noise gate-squelch circuit) for reducing noise between stations; rumble filter for suppressing turntable rumble originating at the FM station; tuning meter and flywheel loaded tuning mechanism for simplified tuning;

Armstrong FM circuit with dual limiters (mentorle and diode); low noise front-end consisting of tuned triode, grounded-grid RF amplifier and triode mixer. Two outputs -cathode follower and high impedance Sensitivity: $2 \mu \mathrm{v}$ for 20 db quieting. Controls Tuning; and concentric AFC Squelch Power switch. Meter balance, rumble filter and output level controls on rear panel. 8 tubes: selenium rectifier, and crystal diode. Brushed copper and black styling. $31 / \times 121 / 3 \times 71 / 4^{\prime \prime}$. For $110-120$ v., $50-60$ cycle AC. Shpl. wt. 12 Ibs.

#### Abstract

## Deluxe High-Fidelity Combination

## 80-T FM-AM TUNER

s19950A new high in inasterful design, the 80-T FM-AM tuner includes complete, professional audio control facilities. Offers absolute

Less Cobinet command over listening conditions, extreme sensitivity, and virtually flawless response. Separate tuning meters for $\mathbf{F M}$ and $A M$ allow tuning with extreme accuracy. Builtin preamp-equalizer consists of two cascaded triode stages. Six record equalization settings. Fully equalized, separate tape head playback input. Two cathode-follower outputs: 1 for tape recorder (independent of volume and tone controls); 1 for amplifier. DC on all audio tube filaments mininizes hum. Meets FCC radiation specifications.

Sensilivity: FM, 1.5 microvolts for 20 db of quieting: AM, better than 1 microvolt. Distortion: Below 0.04\% for 1 volt output; $.5 \%$ for 5 volts output. Hum level completely non-measurable with volume control at minimum (better than 72 db below 2 volts minimum (better than 72 ab below 2 roits AFC, Selector (AM Broad. AM Sharn, FM. Phono, Aux 1, Aux 2): Tuning; Hass: Treble; Tape and Phono Equalization (Eur. AES, RIAA, LP, NAB, 78, Tape); Off-OriVolume; Loudness Balance. 15 tubes; $6 \mathrm{~K}_{4}$ rectifier. Brushed brass panel. $61 / 8 \times 123 / 2 x$ $911 / 16^{\circ}$. With indoor FM and AM antennas. Less cabinet; see below. For 105-125 v., $50-60$ cycles ÁC. Shipg. wt. 22 lbs . 98 SZ 533 . NET

## 80-AZ 30-WATT BASIC AMPLIFIER

$\$ 99^{50}$
A moderately priced unit of conspicuous quality, this superbly designed, 30 -watt basic amplifier is the perbasic amplifier is the Fisher Model 80-T FM-AM tuner described al left. Traditional Fisher workmanship and design includes such refinements as the Z-Matic variable damping control for perfect matching of amplifier to your speaker system. Pleasing in appearance, and excellent in design, the $80-A Z$ handles 60 -watt peaks to assure thoroughly authentic repro. duction of even the most powerful lowfreguency passages.
Three separate feedback loops for low distortion levels and superior transient response. Unique cathode feedback circuit provides triode performance with the efficiency of tetrodes. Output transformer las interleaved windings and a grainoriented steel core. Ruggerlly handsome appearance permits installation on shelf, table-top, etc.; sufficient cable is provided table-top, etc.: sulticien
for built-in installation.
Power Output: 30 watts; handles 60-watt peaks. Distortion: Less than $0.5 \%$ at full rated output; less than $0.05 \%$ at 10 watts. Frequency Response: Uniform from 10 to $50,000 \mathrm{cps} ; \pm 0.1 \mathrm{db}$ from 20 to $20,000 \mathrm{cls}$. $H u m$ and Noise: Better than 95 db below full output. 2 Controls: Z-Matic and Input Level. Tubes: 12AT7, 12AU7A, 2-EI 37: 5 V 4 G rectifier. Outpud $/ \mathrm{mpedance}: 4,8$ and 16 ohms. Size, $67 / 6 \times 151 / 2 \times 41 / 4^{\circ}$. For operation from to5-125 $\mathrm{N}, \quad 50-60$ cycle AC. Shpg. wt., 23 lbs .

NEW "500" FM-AM TUNER-AMPLIFIER

A modern classic in design and elegant styling, the " 500 " combines a highly sensitive FM. AM tuner, powerful 30 watt amplifier, and master audio controlon one compart chassis! FM Section: Dual on one compart chassis?
trionle. cascode circuit with tuned RF stage for extreme sensitivity and maximum signal-to-noise ratio. 3 IF stages followed by a wide-band detector for maximum capture ratio. Highly sensitive; operates on signals as low as 1 microvolt. Includes FM dipole antenna. AM Section: Tuned RF stage: efficient ferrite-bar antenna; diode detector circuit for minimum distortion. Sensitivity is better than 3 microvolts for full output.

Professional meter for micro-accurate tuning on both FM and AM. plus flywheel tuning mechanism. Audio Section: 4 highimpedance inputs; low-impedance tape recorder output; phono and tape head preamperualizer. Response is $\pm 1 \mathrm{db}, 16$ to $32,000 \mathrm{cps}$. Harmonic distortion is less than $0.5 \%$ at 30 watts; 1 M , less than $1 \%$ at 30 watts. Ilum and Noise, -80 db . Controls: Tuning; Off-On; Volume-Loudness; Bass; Treble; Selector-Equalizer (AM, FM, AES, RIAA, LP, NAB, Tape, Aux 1, Aux 2). Output Impedances: 4, 8 and 16 ohms. 12 tubes; 2 rectifiers; 2 crystal diodes. Size, $6 \frac{1}{6} \times 13 \frac{1}{6} \times 13 \frac{1}{2}$. Brushed brass panel. Les cabinet; see below. For $105-125$ v., $50-60$ cycinet; AC. Shpelow. Wt. 26 lbs. 98 SZ 506 NET

## NEW FM-90X "GOLD CASCODE" BASIC FM TUNER

$\$ 16^{\text {ONLY }} 9^{50}$Precisely designed for the most exacting FM listener, the new. FM-90X is easily one of the finest FM tuners available. Employs a unigue gold cascode RF amplifier tube and highly specialized circuitry to reach the theoretical limits of sensitivity- $1 / 1 / 2$ microvolt! Two meters. plus the lock-in, drift-free characteristic of its automatic frequency control, assure extremely accurate tuning even by an unskilled user. Outstanding features: Exclusive gold-cascode RF amplifier: silver-shielded front end with dual-triode, cascode-tuned RF stage; 4 IF stages; full, wide-band detector for maximum capture ratio; balanced antenna inputs for maximum signal transfer; variable interstation noise suppressor; etc. Sensifivity: Full limiting on signals as low as $1 / 2 \mu \mathrm{v} ; 3 / 2 \mathrm{v}$ for 20 db of quieting; $11 / 2 \mu \mathrm{v}$ for 30 db . 3 Out. puts: Main, Recorder, Multiplex. 2 Conirols: Variable AFC/Of-On \& Variable Interstation Muting (dual-concentric); Station Selector. 2 Melers: Signal-strength, for orienting antenna; Tuning, for center-of-channcl 8 tubes; 4 germanium diodes; $6 \mathrm{X}_{4}$ rectifier. Size. $61 / 4$

## PR-6 LOW-COST PREAMPLIFIER

A self-powered unit of excellent quality and moderate cost. RIAA equalized for phono; NARTB-equalized for tape head playback. Accommodates any low level magnetic cartridge, basic tape player mechanism or microphone. Circuit employs two higli-gain triode stages. Exclusive feedback design permits the use of long output leads. Fully shielded construction. Gain: Pliono, 1 volt output for 10 millivolt input; Tape, 1 volt output for 5 millivolts input. Frequency Response: $\pm 2 \mathrm{db}, 30$ to $20.000 \mathrm{cps} . H \mathrm{um}$ Level: Better than 60 db below 1 volt on phono and tape; 70 db below 1 v . on mike. Size, $34 / 832 / 4 \times 3 \frac{3}{8}$. For $105-125 \mathrm{v} ., 50-60$ cycle AC. Shipg. wit., 1 1/2 lbs.

## NEW MODEL 2325 20-WATT AMPLIFIER

## ONLY

All-new exceptionally well-designed, 20 watt amplifier with controls. Offers outstanding Bell quality and precision engineering. The unusual reserve power-handling capacity of the Model 2325, plus hislaly flexible controls, make it an excellent choice for use with other custom components. Includes the ultraconvenient. single-dial "Magic Touch" control. Alter setting the loudness control to the desired volume, all you need do is pull the knob to start the music playing. and push it in to ston. There's no firther need to rearjonst the volume or loudness when using the system at another time!
The Model 2325 also includes a 3 -position speaker selector switch for hi-fi ensembles using two speaker systems. Switch allows you to play either of the speakers separately, or both tokether. Other features include separate rumble filter and scratch filter switches. 4 positions of record equalization, equalized tape head input. etc. Space-sparing design permits installation anywhere. Low silhouette. with illuminated control panel. adds a dramatic touch to any room. Enclosure is attractively finished in saddle tan; may be dismantled for fast. easy custom installation.
Pineer Ontput: 20 watts; handles 40 watt peaks. Frequency Response. $\neq 0.3 \mathrm{db}, 20$ to 20.000 cps . ## NEW knight MONEY-SAVING HIGH-FIDELITY SPEAKERS

MORE FOR YOUR MONEY! Allied's $12^{\prime \prime}$ and $15^{\prime \prime}$ Knight 3-way highlidelity speakers offer superb sound reproduction. Each unit is manufactured to the exacting specifications of our audio experts. Allied's great volume of sales enables you to own these remarkable speakers at low cost-dollar for dollar, they are your best buy!

## New KNIGHT 12" and 15" 3-Way Precision Speakers

- 3 Independent Radiating Elements for Uniform Response $\$ 49^{50}$
- Full $13 / 4$-Pound Alnico V Magnet with High Flux Density
- Genuine Compression-Type Horn-Looded Tweeter
- Built-in Electrical Crossover; L-Pad Tweeter Control

The hi-f event of the year! Allied's own 3-way high-fidelity speakers, designed and manufactured to the strictest audio specifications. and brought to you at an outstandingly low price. These speakers are of the new 3 -way design. and have a large cone for low frequency reproduction. a speclally constructed conical radiator for midfrequencies, and a built-in compression tweeter for high-freguencies. An L-pad level control, pre-wired to the speakers with a $30^{*}$ cable. lets you adjust high-frequency response to satisfy personal listening tastes and match room acoustics. Amplifier output wires connect to binding posts on the speaker frame-no soldering is necessary.

Heavy. $13 / 4$-pound magnet insures effective reproduction of even the most thunderous bass passages. The rigid frame used in the Knight 3 -way prevents rattling and distortion. A mechanical crossover separates bass from mid-ranke at 2000 cps ; an electrical crossover smooths the transition from midrange cone to tweeter at 4000 cps . These speakers are ideal for use in the Klipsch-designed Knight corner enclosures.

## Electrozorics <br> HI-FI SPEAKER SYSTEMS

## Pafrician 4-Way Speaker Systems

Famous as one of the most distinguislied of high-fidelity loudspeaker systems, the Patrician by Electro-Voice is offered in a choice of two cabinet styles-the traditional Patrician IV and IVD systems. and the richly modern Patrician 600 and 600D systems. The IVD and 600D systems use the revolutionary "Ionovac" high-irequency unit, in which ionized air replaces the conventional diaphragm (see page 49), while the IV and 600 systems use the new T350) driver with the Avedon Sonophase horn (also on page 49). Other components of patrician speaker systems are detalled in the listing at the bottom of this page.
Beautifully hand-crafted Patrician enclosures are of Klipsch-licensed indirect radiator design; each is carefully assembled from selected hardwood veneers and inlays, and exquisitely finlshed. Power-handling capacity is 35 watts; 70 -watt peaks. Supplied with components installed. Size: (IV and IVD) $62^{\circ} \mathrm{H} .39^{\circ} \mathrm{W} .29^{\circ} \mathrm{D} . ;(600$ and 600 D$) 581^{\circ} \mathrm{I}$ H. $38^{\circ} \mathrm{W} .30^{\circ} \mathrm{D}$. Shipped F.O.B. NEW MODEL 3350 VERY HIGH FREQUENCY DRIVER. For use in deluxe multi-way speaker systems having extended bass range. Provides extended treble response beyond audi bility. Employs diffraction horn principle with spreial Avedon Sonophase throat design tor $180^{\circ}$ dispersion pattern. Capacity. 50 watts; handles 100 -watt peaks. Impedance, 16 olims. Frequency reaponse: $\pm 2 \mathrm{db}$ $20(1) 1021.000 \mathrm{cps}$. Magnet wit. 2 lbs . Kecommended crossover, 3500 cps . Horn is $71 / 2^{2}$ long, $27 / /^{\prime \prime}$ wide. Pot dia.: $31 / 2^{\prime \prime}$. Overall depth. $41 / 2{ }^{\prime \prime}$. Shpg. wt., $91 / 2$ lbs.
82 D× 337. NET
58.80

NEW MODEL T3500 "IONOVAC" IONIZED AIR, VERY HIGH frequency driver. For dazzling reproduction of treble frequencies. Employs radical new approach to reproduction of high frequencies. A glowing violet "cloud" of ionized air replaces the speaker diaphragm. This cloud is then modulated by the andio signal. producing rarefaction and compression of the air to form sound. As a result. the reproduced sound is unrestricted by properties of mass-not only does it reproduce audible sounds with amazing elarity. but its smooth, crystal clear high response reaches well into the intrasonic range! Frequency response: $\pm 2$ db. 2000 to 40.000 cps. Recommended cross over. 3500 cps . Dispersion pattern. $180^{\circ}$. Power capacity, 50 watts; handles 160 watt peaks. 16 ohms. Driver assembly, $9 \times 31 / 2 \times 7^{\prime \prime}$; electronic unit. $51 / 2 \times 5 \times 131 / 2^{\prime \prime}$. Baffle open ing. $11 / 2 \times 6^{\prime \prime}$. W/. . 22 lbs

## $\$$ NEW ELECTRO-VOICE品 PHASE-LOADED ENCLOSURES

A radical departure from conven tional apeaker enclosure design. f t-V's new "Phase-linaded" puclo-Fi-V new
sures emoloy a unique acoustis principle to overcome the non-directional characteristic of bass sound. I'rlike treble and mid-range tones, which are directional. base tones are non-directional and or dinarily eravel along two rontes on the way to your ears-resulting in partial canrellation. One portion of a bass cone goes directly to your ears from the woofer, while another protion of the same tone travels first to the wall in back of the woofer, and is then reflected to your ears. Since the sound taking this second route travels further. it reaches you later than the sound that comes directly from the woofer-il is out of phuse. "Phase-Ioadius" corrects this bass-cancelling time lag by using a specially designed woofer placed low in a sealed cavity, facing the wall. With this unique arrankement, all of the bass is "bounced' back from the wall at the samie time, and in phase with mid-ranke and treble tones-you hear a per fectly balanced audio spectrum! With "Plase-Loading", not only are bass tones augmenter by 3 times. but you can place the enclosure any where along the retlecting wall.

## Electrozorics

3303

A 20 Cl

EN-12 ENCLOSURE. Popular "cornerless corner" horn-loaded enclosure. redesigned with attractive new front panel and grille. May be used against a wall or in a corner. with equal effectiveness. Combines the best features of rear horn-loading. phase inver sion, and direct radiator design. Speaker mounting board has pre-cut openings and mounter board to allow progressive expansion of speaker system.
Openings permit easy installation of mid range and high-frequency tweeters. Interior panels are strongly braced for maximum rigidity, to eliminate rattling and "buzzing" at higli-amplitude low-frequency signals. For any $12^{\prime \prime}$ extended-range speaker; or multiple speaker systems using $12^{\prime \prime}$ woofer $\mathrm{H}-600$ horn with $\mathrm{T}-30$ mid-range or T-50 mid- and higla-range driver, and 4401, UXT -5 or HF- 206 tweeters. 291/2" high. $211 / 2^{-5}$ wide and $151 / 2^{*}$ deep. Choice of 3 handsome finishes. Shpg. wt., 48 lbs.

## UNIVERSITY EN-15 SPEAKER ENCLOSURE AND SYSTEM

EN-15 ENCLOSURE. Improved version of an advanced design folded-horn enclosure. For use with $12^{\text {\# }}$ or $15^{\text {\# }}$ speaker. Mounting board is pre-cut for $15^{\circ}$ speaker, with removable adapter cut for $12^{*}$ speaker. For mid-range it accommodates an $8^{\prime \prime}$ speaker or the H-600 horn with T- 30 driver; for treble. the 4401, UXT-5 or HF-206 tweeter. or the H-600 horn with the T- 50 driver. Internal construction is similar to EN-12. combining horn loading, phase inversion and direct radlation. Projects maximum available output of speaker at low frequen cies, without srreening or blocking radiation ot bighs. Inclined front panel and unusual shape lend a distuctive appearance to the EN-15 and eliminate resonances. Carefully finished in accordance with the highest standards of furniture manufacture. Choice of 3 finishes. Size: $37^{\prime \prime}$ high, $28^{\prime \prime}$ wide. $191 / 4^{\prime \prime}$ deep. Shpg. wt. 96 lbs.

## UNIVERSITY "KWIKIT" 12" AND 15 " SPEAKER ENCLOSURE KITS

Enclosures of superior acoustic design in kit form. complete with attractive front panel trim and grille cloth. Selected wood panels are cut exactly to size. of $3 / 4^{\prime \prime}$ fully cured lumber, ready for furniture finishing. Kabbeted grooves provide positive air-tight construction for maximum enclosure efficiency. Design combines direct speaker radiation, reflex principle and new rear horn loading construction, to produce uniform response in all parts of the listening area. Self-contained folded horn extends to front of enclosure, projecting low frequencies ont into the room. Small slot in base equallizes woofer diaphragm excursions in the compression chamber. "Kwikits" are independent of room placement. and may be used againgt a flat wall, in a corner, or above floor level. Heavy wood panels provide high rigidity. Esterior and Interior parts fit snugly together: smooth. professional finishing is
assured by absence of protruding edges or irregularities in edges of panels. KEN-12 has baftle board for $12^{\prime \prime}$ wide-range speaker or woofer; pre-cut for University 4400 or $11-600 / \mathrm{T}-30 \mathrm{mid}$-range components; and 4401. UXT-5 or HF-206 tweeter. KEN-15 accepts a $15^{\prime \prime}$ (or $12^{\circ}$ speaker with adapter listed below), and same mid-range and highfrequency components as KEN-12. With grille cloth.

## University 2-Way, 3-Way, Mid-Range and High-Frequency Speaker Packages

Carefully matched combinations of speaker components, available in a variety of sizes. Include "add-on" groups of components for modernizing existing installations, and complete sets of components. Especially suited to custom installation in walls or doors, or in specially designed enclosures. Each set includes all necessary drivers and horns. wiring harness, balance controls as indicated, and full instructions for quick, simplified installation.

Each full-range speaker component package offers superior coverage of the andible range, when properly bafled. High frequency and mid-range packages add new brilliance to older hish-fidelity systems. Crossover networks are furnished as required eliminating any necessity for further matching of components. May be used with all high-quality amplifiers and other playback equipment. binding post terminals for simple installation; no soldering required.

Top-quality hi-fi speakers, famous for SPEAKERS their authentic reproduction of sound

University's diffaxial design. Most of the speakers listed below employ Univer sity's famous Diffaxial design. This feature assures outstanding tonal balance by providing exceptionally smooth, wide-angle dispersion of treble frequencies. These frequencies are normally projected straikh are not heard at the proper volume at all points in the room. However. University's Diffaxial speakers overcome this problem by using a special diffusing-type cone (Diffusicone) at the apex of the main cone The Diffusicone disperses the treble frequencies to provide extremely even distribu tion throughout the listening area.

MODEL 315-C SUPER $15^{\circ}$ DIFFAXIAL. New, greatly improved version of earlier 315 . Woofer cone features ligh excursion, dualspider piston and anti-breakup, low-resunance diaphragm, for rich natural bass. Mutt-element Diffusicone mid-range section, crosses over at 1000 cps . Treble is covered by new, heavy-duty T-50 Hypersonic driver and axially mounted, wideinaudibility. Includes balance control with tweeter adjustment. Magnet wt.. $61 / 2 \mathrm{lbs}$. Capacity, 50 watts. Impedance, $8-16$ ohms. 12" deep. Shug. wt.. $341 / 2 \mathrm{lbs}$ 81 DZ 947. NET

Diffusicone-15

## NEW G.E. VR II SERIES HI-FI MAGNETIC CARTRIDGES

New variable-reluctance cartridge featur ing extended irequency response, sperial anti-hum coils, higher output than previons types. and new plug-in design. The new VR 11 cartridge is much smaller than earlier models; fits practically any arin. It is fully shielded in mu-metal. and incorporates coils specially wound to suppress hum. Increased compliance provides improved tracking, with less record wear. Tracking pressure is only 4 grams. in professionaltype arms; 6-8 krams in record changers. Output (nominal) is 22 mv at $10 \mathrm{~cm} / \mathrm{sec}$. Extremely smoolh frequency response from 20 to 20.000 cycles. Uses independently replaceable "Clip-In-Tip" styli of new design. Fits either standard $1 / 2^{\prime \prime}$ or $7 / 16^{\prime \prime}$ mounting centers; adapter listed below for "Baton" arms. "S"-Sapphire: "I"- Diamond. Shipk. wi.. 3 or

STYIUS FACTS: Magnetic cartridges are supplied with sapphire or diamond styli. Either will outlast the osmium stylus used in ordinary plonoxraphs by many times. This is important, because a wurn stylus will seriously damage your records, permanently distorting their sound. In the long run. diamond
styli are most economical. If sapphire styli are used. replace them at the first sign of wear. The diagram at left shows comparative uear of diamond and sapphire styli. It shows that diamond styli last far long er than sapplire styli; taken over a period of a yeat or so. the cost of diamond styli is considerably tower.

## MODEL 1940 ARM AND CARTRIDGE

New "Unipoise" arm of unusually effective desisn and striking appearance, with integral "Fluxvalve" cartridge. The entire unit Is only a fraction of the weight of conven tional arms. High compliance of "Fluxvalve" stylus assembly and single friction-free pivot bearing are ideally suited to distortionless tracking of all types of recordings. Frequency response, $\pm 2 \mathrm{db}, 10$ to $3 \mathrm{C}, 000 \mathrm{cps}$, Tracking force is easily adjusted throngh range from 1 to 6 grams.
Supplied with .001" diamond stylus; also accoinmodates replacement styli listed in column at left. Recommended load resistance for flat response, 27,000 olims. Easily mounted for use with any high quality turntable. Supplied wlits arm rest. Length $113 / 4^{\text {n }}$. Slipg. wt., 8 oz 99 RC 663. NET

## PHONO CARTRIDGES

AND
PICKUP ARMS

## NEW SHURE STUDIO MODEL M-16

 DYNETIC ARM AND CARTRIDGE(A)Magnificent new pickup arm and cartridge for professional broadcast use and deluxe hi-fi systems. Reproduces recordings with a needle torce of only 1 to 2 grams 1 Takes records to $16^{\circ}$ in diameter. Employs M-1 moving magnet cartridge and N-1 diamond stylus for $331 / 3$ and $45-$ rpm recordings. Unique moving magnet design provides extreme Inearity and freedom from distortion. Arm made of lightweight aluminum in a tapering column; absolutely free of resonance. Jewelled loadbearlng pivots throughout. Arm is brought into playing position on any portion of a record by means of a stylus control button which lifts the cartridge. When button is released. the cartridge is lowered, and the released. the cartridge is lowered, and the
stylus gently contacts record grooves with a force of 1 to 2 grams (depending on counterbalance adjustment) - eliminates all chance of damage to record or stylus. Sensitivity: Output at 1000 cps .14 millivolts. Response: $\pm 2 \mathrm{db}, 20$ to $20,000 \mathrm{cps}$. Overall length. $143 / 4^{\prime \prime}$. Height adjustment range, $15 / 3^{"}$. ## ACOUSTIC RESEARCH

## SPEAKER SYSTEMS

(D)MODEL AR-1. Radically different system featuring air-damped, $12^{n}$ woofer, plus $8^{\prime \prime}$ midrange and high-frequency unit and crossover network. Mounted in a sealed. fiberglas-filled cabinet of braced $1 / 6^{\prime \prime}$ hard wood veneer. Dimensions are conveniently woor veneer.
small-only $14 \times 113 / 8 \times 25^{\prime \prime} 1$
Provides extended, ultra clean bass response; greatly reduces bass harmonic distortion. New principle of operation employs the sealed-in air of the cabinet as a pneumatic spring for the speaker cone during large excursions on very low bass notes-does not use conventional elastic suspension. Frequency Response: $\pm 11 / 2 \mathrm{db}, 38$ to $1000 \mathrm{cps} ; \pm 5 \mathrm{db}, 30$ to $13,000 \mathrm{cps}$. Impedance: 4 ohms. Amplifier Power Requirements: 20 clean watts for moderate level in an average room; at least 30 watts for high levels and large rooms. Shpg. wt., 60 lbs .

## JANSZEN ELECTROSTATIC TWEETER

(1)Impressive new, electrostatic high Irequency tweeter system. Includes power supply. crossover network, and four plastic radiating elements, all housed in a single hardwood cabinet. Extremely low harmonic and intermodulation distortion

Unique electrostatic principle of operation completely eliminates the heavy paper cone of conventional speakers. In its place, a micro-thin plastic diaplragm, so low in mass as to be almost imaginary. is suspended between two parallel plates. Thls push-pull capacitance transducer replaces the ordinary vibrating mechanical system-since the flexible diaphragm is driven uniformly over its entire surface. there is no cone breakup and no uncontrolled excursion. Lack of high-frequency resonances greatly reduces apparent record scratch without attenuating highs.

Employs four separate radiators for vastly improved horizontal and vertical coverage through $120^{\circ}$. Frequency Response: 500 cps through $\mathbf{3 0 . 0 0 0} \mathrm{cps}$. Pouer Handling Cas pacily: Up to 60 watts. Impedance: 8 ohms. Electrical Crossover Frequency: 500 cps . Recommended for use with the Acoustic Research Model AR-IW Woofer System described above. Built-in high-pass filter prevents low frequencies from entering tweeter. Size. $71 / 16 \times 213 / 4 \times 121 / 4^{4}$. Connects to $110-120$ v.. 60 cycle AC source. Shpg. wt., 16 lbs.

## STYLUS PRESSURE GAUGES

Correct stylus pressure is necessary to assure fine reproduction and minimum stylus and record wear. Insufficient pressure will result in poor tracking, loss of bass response. and often cause the stylus to skip across the record. Excessive pressure will result in shortened stylus and record life, and loss of high. freguency response. The stylus pressure gauges below will allow quick. accurate adjustment for optimum performance.

G WEATHERS STYIUS GAUGE. Accurately measures force with stylus in record groove. Hook gauge under pickup arm, lift. and as sound reases, gauge slows tracking force. Slipg wt., 5 oz .

Four Speakers 8- Waft Push-Pull Amplifier

Two Cooxial Speakers Genuine leather Covering

Hond-Rubbed Finish Modern Siyling

## Portable Automatic Phono

\$8350Feature-packed, portable automatic phonograph designed to provide clear, natural audio reproduction. Multiple speakers are employed for extended frequency range and added depth. Utiizes two $6^{\circ}$ woofers and two electrostatic tweeters. Mounting of speakers in acoustlcally balanced enclosure provides smooth, distortion-free bass response and widelydispersed "highs." Creates rich "roomfilling" sound. Use of a powerful 8 -watt push-pull amplifier, allows fuil orchestral passages to be reproduced with amazing realism. Circuit utilizes negative feed-back design for greatly reduced distortion and surprisingly clean sound.
Smooth-operating 4-speed record changer provides automatic playing of $7^{\prime \prime}, 10^{\prime \prime}$ or $12^{* \prime}$ records at $16^{2 / 3}, 331 / 3.45$, or 78 rpm speeds. $10^{\prime \prime}$ and $12^{\prime \prime}$ records of same speed can be intermixed. Automatically shuts-off after last record has been played. Rubber mat on turntable cushions records, prevents damage or slippage. Uses wide-range ceramic cartridge with separate sapphire needles for standard and microgroove records. Cartridge is unaffected by heat or moisture. 45 rpm spindle is supplied.
Separate, continuously varlable bass and treble tone controls are mounted on top of cabinet for easy adjustment to suit personal taste and room acoustics. Handsome, lug-gage-type cabinet is constructed of heavy laminated wood covered with finest scuffresistant simulated leather. Matching handle and gold finish speaker grille and cabi net. All vibration-proof hardware. Measures $9^{\prime \prime}$ high. $21^{\prime \prime}$ wide, and $16^{\prime \prime}$ deep. For operation from $110-125$ volts, 60 cycle AC. Shpg. wt., 33 lbs .

## General Industries Phono Motors

MODEL DSS. J-speed phonograph motor with $10^{\prime \prime}$ turntable. Features 4 -pole. shadedpole motor. For high-fidelity phono systems For use with all types of phono cartridges. including magnetic. Plays $331 / 3,45$, and 78 rpm records. Turntable is rim driven by idler wheel. Spered selector moves idler idler wheel. Sperd selector moves idler
wheel to appropriate step on inotor shaft for desired speed. Turning speed selector to "off" position automatically turns off motor and disengages the ider wheet from turntable. Other features include: Constant speed; oilless motor and turntable bearings: dynamically balanced rotor. Supplied complete with speed indicator dial. $10^{\prime \prime}$ turntable. $45-\mathrm{rpm}$ record adapter, and "Onoff ${ }^{\prime \prime}$ switerh. Size, less turntable: $43 / 8 \times 65 / 8 \times$ 61/10". Requires $2^{21} / 32^{\prime \prime}$ below mounting plate. For operation from $110-120$ volts, 60 cycle AC. Slipg. wt., $61 / 2 \mathrm{lbs}$
85 R 275 . List. $\$ 24.50$. NET
14.70

MODEL SS. 3-speed phonograph motor with $8^{\prime \prime}$ turntable. Induction-type, 2 -pole motor features oilless bearings and balanced rotor. Plays $331 / 3,45$ and 78 fpn records. Idiet wheel is disencaged in "off" position. With speed indicator dial, turntable. and $45-\mathrm{rpm}$ record adapter Size, less turntable: $315 / 16 \times$ $413 / 3 x+3 / /^{\prime \prime}$. Requires $215 / 82^{\prime \prime}$ below mounting plate. For operation from $110-120$ volts 60 cycle AC. Shing. wh. 4 tbs.
85 R 276. List. $\$ 10.95$ NET
6.57

MODEL TR. 3-speed phono motor with $9^{\prime \prime}$ turntable. Constant-speed. 2 -pole motor provides yuiet. dependable operation Spreeds of $331 / 3,45$, and 78 rpm from sep arate pilleys. With speed selector in "off" position. pulleys are disenkaked from motor shaft. With speed indicator dial. 45-rpm record adapter. and $9^{\prime \prime}$ turntable. Size. less turntable: $311 / 2 \times 5 \frac{1}{4} \times 53 / 4^{\prime \prime}$. Requires $17 / 3^{2}$ belos monnting plate. Fnr $110-120$ volts 60 cycle . IC. Slipg. wt.. 4 lbs 96 R 367. List, \$12.45. NET
7.47

BATTERY-OPERATED PHONO MOTORS. NEW, high-quality phono motors for portable use. Perforn on 4 flashlight cells (below)! Have $6^{\circ}$ plastic turntable. Constant speed 2 pole motors are rubber grommet mounted for extra cushoning. Enctosed motors have self-lubricated bearings. Type HX has speed shift (lever can be located on either side of turntable) and weutral "off" position. Size. $61 / 2 \times 41 / 2 \times 23 / 4^{\prime \prime}$. Require $2^{\prime \prime}$ below mtg . sur face. Shpg. wt.. I lb.

## ALL-GROOVE CARTRIDGES

Convenient single-needle cartridges play 78, 45 and $331 / 3 \mathrm{rpm}$ records. All have . 002 sapphire needle for both standard and microrecords. All have $002^{\circ}$ sapphire needle for both standard and micro-
groove records. except $\dagger \dagger .002^{*}$ osmium needle. fless needle-have screw-type chuck for conventional needle. See page 85 for suitable eype. All are designed for $1 / 2^{*}$ mounting centers. Model 51-2 fits RCA $45-\mathrm{rpm}$ changer arms. Model $310-2$ is for new Astatic " $B$ " arm; crystal is chemically treated to resist heat and moisture. "Has heat and humidity-resistant ceramic element; all others have Rochelle-salt crystal element. Needle pressure, 10 grams, except Rochelle-salt crystal element. Needle
$\$ 6$ grams. $\$ 8$ grams. Av. shpg. wt. $\$ 0$.

## MICROGROOVE CARTRIDGES

Carefully-coustructed microgroove cartridges for dependable per formance and very clean reproduction in record changers and play. ers. All are crystal type, except "ceramic type, unaffected by heat and humidity. With .001" sapphire needle for 45 and $331 / 3 \mathrm{rpm}$ records. Model $51-1$ fits RCA $45-\mathrm{rpm}$ changer arms. Model 44-1 equalized for Columbia $331 / 3 \mathrm{rpm}$ records; has adapter for RCA 45 rpm changer arma. Model 414-1 used in RCA players. Has specially treated crystal to resist heat and moisture. See page 85 for listings of replacement needles. Needle pressure, 10 grams, except $\$ 8$ grams, to grams. Av. shpg. wt. 4 oz .

## STANDARD-GROOVE CARTRIDGES

Popular Rochelle-salt crystal and ceramic cartridges for $78-\mathrm{rpm}$ changers and players. All are high-output crystal types, except "ceramic type unaffected by heat or moisture. Use .003" needles. With sapphire needle; sosmium. All others are supplied less needle; have screw-type chuck for conventional needle. see page 85 . Model 12-U used In Admiral, RCA, and Webster; Model 2 used in Magnavox; 12 in Webster; 402 in Admiral. tOutput with condenser. 4.0 volts less condenser. Needle pressure: Models 2 and 4-21/4 oz. Models 6. 24 and $26-11 / 4$ oz.; Models 12 and 12-LY-1 oz. Model 32-11/2 oz.; Model 44-3-10 grams; and Model 402-12 grams. Av. shpg. wt., 4 oz.

## CARTRIDGE-NEEDLE COMBINATION

MODEL 81TB. New Astatic "Soundfo" cartridge. Utilizes highly sensitive ceramic element to provide clear, wide-range audio reproduction. Movement is precision engineered for high compliance; permits accurate tracking of wide lateral groove varicurate tracking of wide lateral groove varis and low distortion. Frequency response extends from 30 to 15.000 cps . Tracking force is 6 grams; assures long needle and record llfe. Cylindrical slaped housing accommodates "plug-in" replacement cartridge-needle combination, below. Greatly simplifies changing of styli. Flip-over mounting bracket changing of styli. Flip-over mounting bracket allows quick change to proper stylus. Has
sapphire $.001 "$ stylus for 45 and $331 / 3 \mathrm{rpm}$, long-play records and sapphire $.003^{\prime \prime}$ stylus for 78 rpm, standard play-records. Black housing has universal mounting bracket. Shpg. wt., 4 oz.

ASTATIC PICKUPS

## ARMS WITH TURNOVER CARTRIDGES

Lightweight pickup arms for playing stand ard or microgroove records. Lever at front of pickup arm selects proper needle for 78 $45,331 / 3$ or 16 rpm records. Adjustable spring permits setting needle pressure for maximum protection of records, proper tracking and long needle life. Models 7D and 7-CAC-D for records up to $12^{\prime \prime}$. have threaded bushing $3 / 4^{\prime \prime}$ long. $1 / 2^{\prime \prime}$ dia. Model $400-44 \mathrm{~T}$ for records up to $16^{\circ}$. laas threaded bushing $11 / /^{\prime \prime}$ long. $1 / 2^{*}$ diameter. Supplied with several spacer washers to permit ad justing height of arm to matcl that of turntable. All equipped with dual sapphire needles. Av. shpg. wt., $11 / 2 \mathrm{lbs}$.

## ARMS WITH CARTRIDGES

Pickups featuring Type Parms for records up to $12^{\prime \prime}$ diameter. Arms are made of alu-inum-alloy for light weight. All have threaded bushing $3 / 4^{\prime \prime}$ long. $1 / 2^{\prime \prime}$ diameter. Model P-12 supplied less needle; cartridge has screw-type chuck which takes any conventional phono needle. see page 85 . Model P-441 has sapphire .001" needle for microgroove records. Model P-L.T-4AG has .002" osmium all-purpose needle for standard and microgroove records. Needle pressure can be precisely set by means of adjustable tension spring at rear of arm. With arm rest. Av. shpe. wt., 1 lb.

## TURNOVER-TYPE CARTRIDGES

High-quality ceramic cartridges. Used as orlginal equipment in many modern phonographs. Will substantially improve sound guality when used in older players. Easily installed; do not require cut-out for turn over niechanism. Models 2T-S and 2T-SD have hracket for $1 / 2^{\prime \prime}$ or $5 / 8^{\prime \prime} \mathrm{mtg}$. centers; 2T-LB-S and 2T-L.B-SD less bracket for narrow pickup arms. Response, $\pm 3 \mathrm{db}$ $30-15.000 \mathrm{cps}$. Output 1 v . Needle pressure. $8-10$ grams. Models 2 T-S and 2T-LB-S have 001 ", microgroove and $.003^{\prime \prime}$. standard sapphire tips; 2 T-SD and 2 T-LB-SD have $001^{\prime \prime}$ diamond and .003" sapphire tips. ## WIDE-RANGE CARTRIDGES

Deluxe. Series " 3 " cartridges. Provide unusually clean, oatural reproduction. Response is within $\pm 1.5 \mathrm{db}$ from 20 to $15,000 \mathrm{cps}$ with a gradual roll-off to 20.000 cps. Lack of resonant peaks and low distortion provide exceptional ease of listening. Highly compliant movement assures accurate tracking and low needle and record wear. Tracking force is only 6 grams. Cartridges are self-equalizing; automatically match modern (RIAA, LP. NARTB, AES, etc.) recording curves without using external record compensators. Also. have sufficient output ( 0.5 v .) to eliminate need for preamplification
Ceramic elements are unaffected by heat or moisture. Have standard $1 / 2^{\prime \prime}$ and $5 / 8^{\prime \prime}$ mounting centers $t 0$ fit most phonos. Single-needle types: 3P-IS has . 001 " sapphire stylus; 3P-1D has .001" diamond stylus. Turnover-stylus types: 3T-S has $001^{\prime \prime}$ and $.003^{\prime \prime}$ sapphire styli; 3T-SD has 001 " diamond and .003" sapphire styli. Slipg. wit.. 3 oz .

## TURNOVER CRYSTAL \& CERAMIC CARTRIDGES

An excellent selection of high-quality replacement cartridges for most record changers and players. All are equipped with sapphire needles; .001" needle for microgroove records and .003" needle for 78-rpin records. W9. W22T. W22, and W22 are crystal cartridges. WC10 and WC25 are ceramic type for use in locations where temperature and humidity are high. W9 and WC10 incorporate the newly designed "Twin Lever" needie shift systen--flipping the needie tever puts proper needle into playing position-cartridge remains stationary. W9 and W72 are supplied with a "slip-on" capacitor which permits convenient reduction of output voltage to balt of that shown. W72 replaces Webster-Electric Type FX and Scries F14, F15, F16, F18, F19. F20. and F21 cartridges. Av. shpg. wt.. 4 oz.

## STANDARD GROOVE CARTRIDGES

Ruggedly-built Rochelle-salt crystal cartridges. Model W78 can be used to increase the volume of many 78 rpm phonographs; supplied with "slip-on" capacitor which permits convenient reduction of output voltage to half of that shown. W68 and W78 are supplied with an extra weipht-slug to permit increasing the needle pressure if necessary, All cartridges require 28.5 grams needle pressure. except Model W70 which reguires $10-15$ grams. W56N is used in WilcoxGay disc recorders; supplied with stellite $.003^{*}$ cutting needle and .003" osmiun playback needle. Models W68 and W70 are equipped with osiniun needles. "Less needle; uses conventional shank type (see next page). W70 replaces Webster-Electric Type CX and the entire C series. Shpg. wt.. 4 oz .

FOR SHURE CARTRIDGES

# NEW knight Arigh Fidelity TAPE RECORDER 

Model KN-4010 With Microphone, Tape Take-up Reel, and "Roving" Speaker

Complete

- Transistorized Preamp Lowers Hum and Noise Level - Digital Tape Index Locates Selections Quickly - Dual-Speed Operation- $71 / 2^{\text {" }}$ and $33 / 4^{\text {" Speeds }}$

It's easy to make thrilling. lifelike recordings with this remarkable new tape recorder, You'll be dellghted with its smooth. effortless push-button operation and the exceptional richness and clarity of its tone. Anyone can be sure of outstanding results-simply press the appropriate push-button and it's at your full command. Five pusi-buttons let you select Record, Playback, Rewind, and Fast-Forward or Stop. One of the important new highlights of this fine unit is its transistorized preamp which makes possible better-thanever home recordings by greatly reducing hum and noise. High-frequency AC erase, usually found on more expensive recorders, assures a silent background when re-using tape. Another deluxe feature is the new digital index counter which lets you "pin-point" specific portions of a recording. Included among the array of "plus" features is an automatic safety shut-off which protects tape by stopping the machine the instant you come to the end of a tape. Also includes new, safety interlock to prevent accidental erasure.
OTHER DELUXE FEATURES. Has 8 -watt push-pull amplifier and a 3 -speaker system featuring 2 built-in speakers-plus a "roving" speaker which adds new depth and realism: A volume control with loudness compensation assures full-range response at any volume level. Dual neon-bulb indicators show when volume is just right for recording.
SUPERIOR SPECIFICATIONS. Response: At $71 / 2^{\prime \prime}$ speed, $65-12.500 \mathrm{cps}$; at $31 / 4^{\prime \prime}$ speed, 65.8500 cps. Recording Time: ( $1800-\mathrm{ft}$. reel): $71 / 2$ speed, 45 min . continuously and $11 / 2$ hours overcps. Recording i $31 / 4$ " speed, $11 / 2$ hours continuously, 3 hours overall. Wow and Flulter; $0.3 \%$ at $71 / 2$ " speed. Signal-to-Noise Ratio: 50 db . 8 -watt push-pull output stage; ZN 132 transistor in preamp. Inputs for recording from mike, radio or TV; separate output for "roving"' speaker or any other external speaker. Provision for feeding output from preamp directly to hi-fi system. Case attractively styled in charcoal gray with smart woven Saran center band. Supplied with microphone, roving speaker, $5^{\prime \prime}$ reel of tape, and take-up reel. Size, $151 / 2 \times 141 / 4 \times$ $101 / 2^{\prime \prime}$. Drain. 110 wates. For $110-120$ v., 60 cycle AC. Shpg. wt., 40 lbs.

# new knight KN-4020 DUAL SPEED RECORDER 

- Transistor Preamp For Hum-Free Performance
- Dual Speeds-7 $1 / 2^{\prime \prime}$ and 33 " Per Second
- Push-Button Automatic Keyboard Control a Light Weight For Easy Portability

An outstanding tape recorder for all-around use of home, school or office records up to 3 hours on a single 7" reel of "Plus-Ploy" rapeexceptionally simple push-button operation assures perfect recordings every time.

Designed for exceptional ease of operation and unusually fine tonal quallty, this new Knight tape recorder performs brilliantly in every recording application. The new transistor preamplifier greatly improves tape recordings by reducing hum and microphonics; a high-quality 3-watt amplifier provides excellent tone, and rich, room-filling sound. Compact and lightweight, the new Knight Dual-Speed Tape Recorder can easily be carried from place to place. The push-button keys greatly simplify use-just push down a key for record. play back, rewind. stop or fast-forward operation!
Dual speeds of $33 / 4^{\prime \prime}$ and $71 / 2^{\prime \prime}$ per second provide for both long playing time, when recording speech or dictation, and best fidelity, for recording music. At the slower speed, up to 3 hours can be recorded on a single 7" reel of "Plus-Play" tape! Any type of program comes through clearly when played back through the carefully designed $4 \times 6^{\circ}$ speaker: speaker jack permits playhack through an external speaker, if desired. Recordings may be made with the microphone supplied. or from radio or TV.

## Only <br> <br> s $944^{95}$

 <br> <br> s $944^{95}$}With Mike, Tape and Extra Reel

A new safety interlock on the recording control makes it virtually impossible to erase a recording accidentally, while retaining fully automatic, push-button operation. The volume control is compensated for the varying.characteristics of the human ear at different loudness levels; a tone control is provided for exact adjustment of sound qualliy to match room acoustics or personal preference. The recorder may be used as a P.A. system, too, with speeches or entertainment recorded at the same time. Dual neon-glow level indicators clearly show when the volume is set just right for recording.

SPECIFICAIIONS: Frequency Response: At 71/2" speed, 65-10,500 cps; at $33 / 4{ }^{" \prime}$ speed, $65-8000 \mathrm{cps}$. Recording Time: ( 1800 -ft. reel) $71 / 2^{\circ}$ speed, 45 min . continuously and $11 / 2 \mathrm{hrs}$. overall; $33 / 4^{\prime \prime}$ speed, $11 / 2 \mathrm{hrs}$. continuously and 3 hrs . overall. Wow and F/utler: $0.3 \%$ at $71 / 2^{\circ}$ speed. Signal-To-Noise Ratio: 50 db . Case is attractively finished in charcoal and gray. CARRYING CASE. Professional-style carrying case for Bell tape transport and preamps. Covered with charcoal gray pyroxylin; contrasting frim. $83 / 8 \times 171 / 4 \times 161 / 2^{\circ}$. Shpg. wt. 13 lbs.
91 RX 770 . NET
29.95

TAPE DECKS. Well-designed durably constructed transports fitted with precision Dynamu record, playback and erase heads. Ideal for addition of tape playback and/or recording facilities to hi-fi systenis. All decks require area $121 / 3 \times 93 / 3^{*}$; and $11 / 4^{\circ}$ above, $31 / 2^{\circ}$ below mounting board. For $110-120 \mathrm{v} .60 \mathrm{cycles} \mathrm{A} C$
SPECIFICATIONS, Frequency Response: $=2 \mathrm{db}, 30-14,000 \mathrm{cps}$. Signal-toNoise Ratio: 55 db or better. Fluller: $0.2 \%$ average. Lonf-lerm Speed Regulation: Within 0.5\%. Tape Speed: $71 / 2$ ips; convertible to $31 / 4$ ips from underside of mounting plate. Maximam Reel Sise: $7^{\prime \prime}$ Playback Head Otiput: 2.5 millivolts. Gap Width: $0.00015^{\prime \prime}$.
FOR MONAURAL PLAYBACK ONLY. If your hi-fi amplifier has a tape head input, you need only an FF75RLP deck to add tape to your system. Otherwise add a PB60 preampllfier also.
FOR MONAURAL RECORDING AND PLAYBACK. Use FF7SRLP deck and RPGI record-playback preamplifier with a hi-fi system.
FOR STEREO PLAYBACK ONLY. If your hi-fi amplifier already has a tape head input, use the FF7SSR deck and a PB60 preamp; of course, two amplifiers and speaker systems are necessary for stereo. If you own a stereo preamp already, you need add only the FF7SSR deck. If your hi-fi system provides no tape preamplification, use the FF7SSR deck and two PB60 preamps. These conmponents will also allow you to play monaural tapes.
FOR STEREO RECORDING AND PLAYBACK. Use the FF7SSK deck, one RP61 and one RP61S preampllfier. These components also record and playback monaurally. When making stereo recordings, use new or bulk-erased tape (see tape eraser on page 94).
NOTE ON STEREO SYSTEMS. All stereo systems require two complete and independent playback channels: dual preamplifiers equalized for tape playback. dual basic amplifiers and dual speaker systems.

RECORD AND RECORD-PLAYBACK PREAMPLIFIER§. High-fidellty units offering NARTB equalization for both recording and playback. MODEL PBGO PLAYBACK PREAMP. For use when tape playback is added to a hi-f system lacking tape head equalization. Two PB60's and the FF75SR deck are used in stereo playback system. Includes power switch on volume control; auxiliary AC outlet from which to operate tape deck; and hum balancing adjustment. Tubes accessible from exterior of case. Response: $30-14,000 \mathrm{cps} . \pm 2 \mathrm{db}$. Variable equalization control. Size, $65 / 8 \times 33 / 8 \times 21 / 3^{\circ}$. For $110-120$ v.. 60 cycle AC.
MODEL RP6I RECORD-PIAYBACK PREAMP. Playback characteristics are the same as those of the PB60 above; also provides fixed equalization during recording, erase bias oscillator and level monitoring indicator. Distortion at full recording level is'less than 2\%. 121/ox $21 / 4 \times 61 / 4^{\circ}$. For $110-120$ v., 60 cycles AC.
MODEL RPG1-S RECORD PIAYBACK PREAMP. For stereo use with RP61; bias furnished by RP61. Otherwise, same as RP61.

## COMPLETE MONAURAL RECORDERS INCLUDING STEREO PLAY MODELS

NL-1 "MERCURY". Dual-speed monaural tape recorder with buitt-in 4 -watt amplifier and 6-inch PM speaker; tape deck features automatic braking and precision-built 4 pole, shaded-pole motor, of self-starting induction type. Single rotary control knob sets unit for record, play, fast forward, or fast rewind operation; interlock button prevents accidental recording or erasure. Lever on control panel instantly changes speed from $71 / 2$ to $33 / 4 \mathrm{ips}$.

SPECIFICATIONS: Frequency Response: 40 to $11,000 \mathrm{cps}$ at $71 / 2 \mathrm{ips} ; 40$ to 7000 cps at $31 / 4$ ips. Controls. Selector (Play, Record, Forward, Rewind) i Interlock; Speed Change Lever; Volume; Tone. Signal-io-Noise Ratio: 45 db . Fast Forward: ( $7^{\prime \prime}$ reel) 75 seconds. Rewind: ( $7^{\circ}$ reel) 90 seconds. Inputs: MikeMag Phono; Tuner-Aux. Ouiputs: 1 -for external amplifier; 1 -for external speaker. Neon bulb recording level indicator. Size. $14 \times 17 \times 11^{\prime \prime}$. For $110-120$ volts, 60 cycle AC. $14 \times 17 \times 11$. For $110-120$ volts,
With mike. Shpg. wt., 29 lbs.

## FACTS ABOUT STEREO TAPE PLAYBACK

A stereo playback system consists of stereo tape deck, two preamps equalized for tape head, $t$ wo amplifiers. and two speakers. The Pentron stereo recorders NL-1S, NL-2S and $\mathrm{NL}-3 \mathrm{~S}$, Include a second preamp in addition to the steren deck and one complete highfidelity preatnp-amplifier-speaker channel. Any one of these three recorders may be used to convert your hi-fi system to stereo. as well as monaural, tape playback. The recorder serves as one channel, and its second preamp and your present hi-fi system as the second channel.

NL-2 "CHAMPION". High-quality dual-speed tape recorder for monaural recording and playback; built-in 5 -watt amplifier and woofer-tweeter speaker system, with crossover. Controls and speeds same as "Mercury" model at left. but with separate off-on switch for motor. "Magic Eye" level monitor and digital footage counter.
SPECIFICATIONS: Frequency Response: 40 to 13.000 cps at $71 / 2 \mathrm{ips} ; 40$ to 7000 cps at $31 / 4 \mathrm{jps}$. Signal-to-Noise Ratio: 48 db . Inputs: 1-high-impedance for microphone or magnetic phono cartridge; 1 -high-impedance for radio, TV, crystal or ceramic phono cartridge. Outputs: 1-for external amplifier; 1for external speaker. Size: $14^{\prime \prime}$ w.. $161^{\prime \prime}$ d.. $103 / 4 \mathrm{~h}$. For $110-120 \mathrm{v}, 60$ cycle AC . With mike. Shpg, wt., 33 lbs .

## Hilagnecord Professional Recorders

MODEL $\$ 36-8 \mathrm{X}$. Dual-speed, full-track tape recorder designed for rack or case mounting. For studio and other professional use or custom hil-fi installation. Has hysteresis synchronous drive motor for close timing accuracy. Knob control with interlock to prevent accidental erasure. Has separate erase and combination record-playback heads. Handles $101 / 2^{\prime \prime}$ reels with reel adapter kit listed below
Operates at $71 / 2^{*}$ and $15^{\circ}$ speed. Response: $15^{\prime \prime}, \pm 2 \mathrm{db}$ from $50-15.000 \mathrm{cps} ; 71 / 2^{\prime \prime} \pm 2 \mathrm{db}$ from $50-10.000 \mathrm{cps}$. Recording Time ( 1200 ft reel): $71 / 2^{\prime \prime}, 30$ minutes; $15^{\prime \prime}$. 15 minutes. Rewind Time: 40 sec for 1200 ft . Signal-toNoise Ratio: 54 db . Flutter: less than $0.3 \%$ at $15^{\prime \prime}$. 2 Inpurs: 1-high impedance mike; (use Shure A86A transformer, page 349 for 50-250 ohms) 1 -unbalanced bridge for radio. phono or TV. 2 Outpuls: 1-monitor output on front panel: $1-600$ ohm unbalanced output for external amplifier.
Has illuminated VU meter for record and playback, straight loading, printed circuit construction and full track heads. Ano-dized-aluminum panel with gray trim. Size. dized-aluminum panel with gray trim. Size.
$7 \times 19 \times 12^{\prime \prime}$. For $110-120$ v., 60 cycle AC. $7 \times 19 \times 12^{*}$. For 11

MODEL N35-B. New, single-case, dual-track recorder containing tape deck, record-playback preamplifier, and 8 -watt power amplifier and speaker; an excellent "on-thespot" unit for recording and playback. Illuminated VU meter accurately indicates recording level. Phone jack on front panel permits continuous monitoring of program being recorded. Interchangeable capstans for operation at either of two speeds. Furnished with high-impedance microphone. Rugged and stable printed circuit recording amplifier includes NARTB equalization modified for $71 / 2$ ips speed. Interlock button prevents accidental tape erasure. Specifications similar to S36 above, but speeds are $71 / 2$ and $31 / 4 \mathrm{ips}$. and has 4-pole shaded-jole motor. Extended frequency response to $12,000 \mathrm{cps}$ for clear, natural recording of speech and music. Dual-track heads permit up to 3 hours of recording on a single $7^{\prime \prime}$ reel of "Plus-Play" tape at $33 / 4^{*}$ speed. High and low-impedance outputs for attachment to external amplifier or speaker system for playback. Self-contained $6 \times 9^{\prime \prime}$ oval speaker provides excellent tone quality. oval speaker provides excellent tone qualicy.
Panel size. $81 / 2 \times 15^{\prime \prime}$. For $110-120$ v.. 60 cycle AC. Shpg. wt.. 40 tbs.

## QUALITY MAGNETIC RECORDING TAPES

## New Mylar-Base "Plus-Play" Tape

An ideal combination of qualities: The exceptional toughness and break-resistance of the wonder-plastic. Mylar, plus the extra playing time of Knight "Plus-Play" recording tape-both offered at exceptional savings to you in the new Knight Mylar base "PlusPlay". It is the most permanent medium yet developed for mag. netic recording. Recording characteristics meet the most critical of professional recording requirements and include wide frequency response, extremely low noise level and excellent uniformity of oxide coating. Your cost is far below that of regular recording tapes, at no sacrifice in ferformance quality!
The remarkable ditnensional stability of Mylar. together with its other physical properties, results in an extrenely durable bond between oxide and base. The Mylar base is unharmed by heat, cold or humldity. Mylar makes Knight "Plus-Play" Indisputably superior to ordinary recording tape; its price makes "Plus-Play" your greatest tape-recording value! Each reel factory-sealed in cellophane.

## Standard-Play Plastic Base

Knight standard-play, plastic-base tape meets the most critical professfonal recording reguireinents, because rigid manufacturing controls protect its high quality. When you use it, you are assured of noise-free reproduction and exceptionally uniform output. The surface upon which the recording is made is precision-coated with pure red oxide. providing excellent high-frequency response and minimum abrasive action on recording heads. You can depend on the quality of Knight recording tape; its performance is easily comparable to other brands of regularly-priced recording tape. It is similar in every respect to tape used throughout the recording industry. and radio and TV work.

## Rek-O-Kut "Imperial" Professional Recorder

Precision Rek-O-Kut disc recorder equipped with the M-12S overhead recording lathe. Unit will accommodate all standard verticalmounting cutting heads. Supplied with 120-line leadscrew; interchangeable with leadscrews up to 270 lines (see below). Lathe can be hand-cranked for run-in and run-off spiral grooves. Callbrated for critical timing. Model A-160, $16^{\prime \prime}$ playback pickup arm accom modates records to $16^{\prime \prime}$ in diameter. Supplied complete with new cutting head (Model R-56); frequency response, $50 \cdot 10,000 \mathrm{cps}$. Less microphone. Uses standard short-shank cutting needle. For 105-125 .. 60 cycle AC. Slipg. wt., 80 lbs.
95 RZ 742 . NET
599.95

MODEL M.12S OVERHEAD RECORDING IATHE. Used in "Imperial" professional recorder listed above. Interchangeable with M-12 mechanism. Less head. Shpg. wt., 20 lbs .

MODEL TR-43H DUAL-SPEED RECORDING TURNTABLE. Dual speed. $12^{\prime \prime}$ aluminum turntable. Plays $331 / 3$ and 45 rpm . Tapped for M-12S cutter. With heavy-duty, hysteresis synchronous motor. Includes 78 -rpm idler. Less cutter. Shpg. wt., 21 lbs.
91 RZ 749. NET
149.95

## G. I. Recorder-Phono Assembly

MODEL GI-RB5L-LP. Low-cost recorder-phono assembly for cutting and playing recordings. Easily mounted in cabinet, carrying case etc. Cuts discs up to $10^{\prime \prime}$ in diameter at 160 lines per inch (std groove). Two speeds ( $331 / 3$ and 78 rpm ., or 45 and 78 rpm . using adapter spring included for that purpose). Weiglited pickup arm provides proper needle pressure for both standard and microgroove records. Steel turntable is rim-driven by 4 -pole motor. Convenient depth of cut adjustment. An ideal unit for replacement of older disc recorders. Slze. Base plate $15^{\prime \prime} \mathrm{W}, 111 / 2^{\prime \prime} \mathrm{D}_{\text {; }}$ height, $6 \frac{1}{6 "}$, $23 / \mathrm{m}^{\prime \prime}$ above, $31 / 3^{*}$ below plate. Requires high-gain amplifier or radio with 3 watts or more output. Cutter head must be connected to high impedance source. Supplied complete with crystal cutting head less cutting needle (requires short shank type) and playback styli. For operation from $110-120$ volts, 60 cycle AC. Shipg. wt., 17 lbs . 96 RX 106 . List, $\$ 56.50$. NET

## WESTINGHOUSE 8XP4 8＂

Here＇s an extremely versatile $8^{\prime \prime}$ rectangular universal picture tube－a great aid in tele－ vision servicing．An exceptionally valuable， time－saving accessory－permits testing tele－ vigion set without using the original picture tube．Eliminates the necessity for taking the original picture tube to service slop and pro－ vides positive substlution test for question－ able picturetubes．Light weight and compact． Can be used In virtually all electromagnet icaliy defected television sets regardless of the deflection angle．For $53^{\circ}, 70^{\circ}$ ，and 9$)^{\circ}$ deflection circuits．No ion trap required． Automatic self－focusing．Ideal for electro－ static or magnetic－fochs sets．A＂must＂for every＇TV service shop．Shpg，wt．． 6 lhs． AX5 $8 \times P 4$ ．NET

75 c

1 picture tube equals 35 receiving tubes
on RCA service aids or literature orders．

## RCA Receiving Tubes

RCA RADIOTRONS - THE GREAT NAME IN ELECTRONIC TUbES. Premi-unn-quality tubes, universally known for their absolutely dependable performance. Purchasers of tubes in quantity lots may obtain RCA service aids, tube literature and promotion displays at no cost-see page 97 of this Catalog. *Not made by RC. - -other well-known brands.
guaranteed for one full year. You can be sure of complete satisfaction when you order receiving tubes from Allied. We will replace any tube listed on these pages that does not give efficient performance for 12 months from date of purchase. This does not apply to burned-out or broken tubes. Av. shpg. wt. per tube, 4 oz ; per 10 tubes, $21 / 2 \mathrm{lbs}$.

## You Save If You Buy More Than 5 Tubes

The first net price column ( 1 to 5 ) is for orders of less than 6 tubes. If you buy 6 or more of any one type or assorted types (up to a total of 49), use the second net price column ( 6 to 49). For 50 tubes and over, use the third prise column.

| Tube Type | List Price | NET EACH <br> In Quantities of: |  |  | Tube Type | $\begin{aligned} & \text { List } \\ & \text { Price } \end{aligned}$ | NET EACH <br> In Quantities of: |  |  |

## TUBE LISTINGS CONTINUED FROM PAGES 98 AND 99

## You Save If You Buy More Than 5 Tubes

The first net price column (1 to 5) is for orders of less than 6 tubes. If you buy 6 or more tubes of any one type or assorted types (and up to a total of 49), use the prices in the second net price column ( 6 to 49 ). For 50 tubes and over, use the third price column ( 50 or More).

| Tube Type | $\begin{aligned} & \text { List } \\ & \text { Price } \end{aligned}$ | NET EACH <br> In Quantities of: |  |  | Tube Type | List Price | NET EACH <br> In Quantittes of: |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1 to 5 | 6 to 49 | 50 or More |  |  | 1 to 5 | 6 to 49 | 50 or More |

Headphones. 2000 ohms. Shpg. wt., 12 oz

## MINI-SPRING TUBE HOLD-DOWNS

Hold tubes securely in place. Pre vent breakase and assure greater where tubes are mounted uusid down or horizontal; also excellen for portable radios, moblle gea and other enulpment subject to vibration and sliock. For use with 7 or 9 pin miniature tubes. Mount vith nut bolt, or rivel. Av, shoge wt., 3 oz. 3 per packago.

## Transistors For Every Use

## EXPLANATION OF COLUMN HEADINGS

In the tabular headings, unless otherwise specified, $P_{I}$ is the Total Power Dissipation in milliwatts; $V_{c}$ is the Collector Voltage in volts; Ic is the Collector Current in milliamperes. All ratings given, including Cut-Off Frequency, are maximum rat-
ings. Av. slipg. wt., 2 oz

## TEXAS INSTRUMENT TRANSISTORS

Germanium and silieontransistors for every use. Meet ugged commercial and MIL specs. Av. slipg. wt., 2 oz.

## GENERAL ELECTRIC TRANSISTORS

2 N107. Low-cost PNP transistor for low-power audio applications,
including hearing ald use. With booklet of circuits. Cut-off frequency,

2 N170. A rate-grown high-frequency NPN transistor intended for low power, low-voltage applications. Collector dissipation, 25 miv at $35^{\circ} \mathrm{C}$
7 E 441 . NET, 2.5 me . Shpg. wt.. 2 oz .

RCA TRANSISTORS

## Special Purpose Tubes

Immediate Delivery From Stock. The listing on this and the following pages is a complete selection of tubes for broadcast, industrial and research use. Included are power tubes, rectifiers, cathode-ray, photo-electric and miniature tube types. Almost 700 types of special-purpose tubes are listed, representing the products of leading manufacturers in the electron tube industry (see next page for table of manufacturers). Each tube will provide maximum efficiency and dependable service. Allied supplies all tubes at the lowest current prices from the largest distributor stocks in the country. MP after tube lype indicales matched pair.

Easy to Order-Specify Deportment and Tube Type. This tabular presentation enables you to locate the tube types you want, quickly and easily. When ordering, give the full Stock Number, which consists of the Department Number and the Manufacturer's Type Number. The Department Number represents exact location of the tube in Allied stockrooms-speeds up your shipment. Give stock Number thus: E3-1B85. The chart at left shows the full names of the manufacturers whose tubes are listed on these pages. For technical literature, see page 105. You can depend on Allied for prompt shipment of all special purpose tubes.

PHOTOCELL-SUN BATTERY HANDBOOK
An excellent handbook for techniclans, ex perimenters and engineers. Thoroughly ne scribes the applications and basic circuts in which photocells and sun batteries can be effectively used. Typical chapters include: Liglit-Powered Devices. Photometers, ousua Relays, bight $\frac{\text { Beam }}{}$ $37^{\text {K K }}$ K 29. Post pald in U.S.A

## SYIVANIA CRYSTAL DIODES

These compact. highly efficient crystal diodes have hundreds of applications. Silicon type are used in radar, industry, and microwave instruments such as test probes. power ind cators, etc. Germanium types are used 200 mc power rectification of frequencies up to 200 mc ceivers. Appations communications receivers. transmitters, test and control circuits, standing wave indicators, etc.

## GERMANIUM DIODES

A Type 1 N35. Consists of two electrically A matched iN 34 dlodes in mountling hracket $11 / 2 x^{7 / 0} x^{3 / 4}$. Shpg. wt.. 4 oz.

G.E. DIODES AND RECTIFIERS

Complete line of general-purpose and specialtype G.E. crystal diodes and rectifiers for use in electronic and electrical power circuits renuir ing detection or rectification. Feature welded foint between platinum whisker and crystal for high strength and rigidity. Whehstand shock and v!bration. Free from microphonic effects Low shunt capacitance for eftcient rectification of AC sigials. Lxcept Symbols in Column tion. Explanation of Symbols in Column Heads: H-peak ward current in ma.

## GERMANIUM JUNCTION RECTIFIERS

Aloy junction germanium rectifiers. Extremely ow forward resistance and correspondingly ligh reverse leakage resistance gives
these rectifiers an efficiency of over $90 \%$ I Applications include signal corps switchboards. computers, masnetic amplifiers, experimental computers, maxnetic ampliners, fifermetically sealed construction. Cads attached for soldermg to Types $1 \mathrm{~N} 315,1 \mathrm{~N} 368$, 1N91, 1 N 92 , and IN93. Types 1Ni51. IN152, INi53 and iN 158 are attached to mounting brackets. Will operate in ambient temperatures up to $65^{\circ} \mathrm{C}$, except Type 1 N 315 -designed for ligh operat ing temperat ures up to $85^{\circ}$ C. All specifications viven are for operation at 60 cycles, with resistive load. "Average forward current to average reverse current ratio is 700 at $53^{\circ} \mathrm{C}$.
$\mathbf{3 0 0}$ at $71^{\circ} \mathrm{C}$, and 200 at $85^{\circ} \mathrm{C}$. Av. wt., 2 oz .

## SILICON JUNCTION RECTIFIERS

Alloy junction silicon rectifiers. Designed for maximuin forward conductance at high temperatures. No lieat dissipators required on axial-lead types (Fik. F). Stud-mounted types Fig. G) have $10-32 x 3 / 8$ thread to permit con venient mounting on heat-dissipating place or in. Feature low reverse current at maximum other low ieakage or magnetic ans. Minimun forward voltage drop. Operates at ambien temperatures up to $165^{\circ}$ - specifications listed below for operation at $150^{\circ} \mathrm{C}$. Av. shpg. wt., 2 oz .

## RAYTHEON SILICON POWER RECTIFIER

Type CK776. A silicon power rectifier capable of handling up to 15 amperes. Hermetically sealed. and desikned to withstand ambient temperatures from $-55^{\circ}$ to $+175^{\circ} \mathrm{C}$. At an
ambient temperature of $+75^{\circ} \mathrm{C}$ one $\mathrm{CK} 776^{\circ}$ can deliver 5.1 ambient temperature of $+75^{\circ} \mathrm{C}$. one CK776 can deliver 5.1
amps. wlthout overheating. Higher currenty are possible at amps. whthout overheating. Higher currents are possible at lower temperatures. Overall length is $17 / 4$ maximum diameter is $7 / 8^{\prime \prime}$. Cathorle connection is $1 / 4-28$ bolt $5 / 6^{*}$ long; anode
connection is terminal lus for an $8-32$ bolt. Maximum operating voltage lan 141.5 voles rms. Shpg. wt., 5 oz
28.60

## HUGHES GERMANIUM DIODES

Point-contact germanium
diodes. Fusion-sealed in one-piece glass envelope Highly resistant to shock
and vibration. Each dlode tested to insure stability. Diode body dimensions, $265 \times .130^{\circ}$ maximum,
Shunt capacitance. .5 mm maximum. Ambient operating termperature runge, $-78^{\circ} \mathrm{C}$. $10+00^{\circ} \mathrm{C}$ All specifications below are at $25^{\circ} \mathrm{C}$. except (1N128. IN198 are JAN types. 11D2051, electrica equivalen

## HUGHES SILICON JUNCTION DIODES

Standard Type. New standard diodes for high-temperature applications. Highly efficient operation throughout wide temperature range.
from $-80^{\circ} \mathrm{C}$ to $+200^{\circ} \mathrm{C}$. Feature excellent forvard conductance high from $-80^{\circ} \mathrm{C}$. $10+200^{\circ} \mathrm{C}$. Feat ure excellent forward conductance, high back resistance and extremely low saturation current. Maximum powe dissipation at $25^{\circ} \mathrm{C}$. is 200 mw . Av. shpg. wt., 2 oz .

NEW SILICON RECTIFIERS
Outstanding new development in the field of power conversion and semi－conductors．Espe－ may be subjected to extremes of heat and cold－or where high power $100^{\circ} \mathrm{C}$ ．without derating．Forward resistance less than one ohm；reverse resistance in the order of 1000 ohms－－gives rectification efficiency
 pigtanleads；Type Q：st ud－ $5 / 1$ s $^{\prime 2} 24$ thread．Note：All DC current ratings loads also）．On all other types derate DC current by $20 \%$ for capacitive． motor，or battery loads．Type $Q$ current ratings based on proper heat sink design to limit heat of
$100^{\circ}$ C．Av．shpg．wt．， 3 oz

## Rectifiers and Diodes

## G.E. GERMANIUM RECTIFIER STACKS

These germanium power rectifiers feature cornpact size, very low forward resistance, ezvery pugied construrtlon. Have $1 / 3$ lower forward resistance and are $1 / 4$ smaller in size than conventional seleniurns. No forward aging effect-output reInains constant through long, contlnuous service, without compensating devices. Meet military vibratlon requirements. Specifications below are for single-phase bridxe operation with capacitive filter. No load; tmaxinnum. With mounting bracket and hardware. Av. shpg. wt., 9 oz.

## RCA SELENIUM RECTIFIERS

RCA selenium rectifiers. Ideal for general replacement use in TV, radio receivers. phonograplis, and other electronic equipment. Available with current include-corrugated spacers for greater heat dis-aipation-frame work of tie bars for more riyid support of cells. Also have integral mounting stud for quicker installation. The smaller size for given current is achieved by unique design utilizing entire plate surface. Maximum input rms volts, 130. Maximum peak laverge volts, 380 . Operating temperature 85 degrees $C$. Types 210 G 1 and 211 G 1 are extra thin (for use in applications where types 203G1 and 204 Gi will not fit). Av. shpg.wt., 5 oz.

## IRC SELENIUM DUAL DIODES

Exact replacement. highly stable, selenium dual diodes. For use in horizontal phase detectors in television receivers. Simplifies serviceman's replacement problems. Available in two basic types-common cathode and series connected, All units rectangular-shaped with three leads, molded in moisture-resistant plastic. Av.
shpg. wt., 4 oz. Type D4. For television receivers requiring the common cathorle type 7 dual diode. 752 . List. $\$ 1.65$. NET

97c
Typo D. For TV receivers requiring series connected type
.975
INTERNATIONAL RECTIFIER HIGH-VOLTAGE SELENIUMS

High-voltage, cartridge-type selenium rectifiers. For replacement in TV cameras, Geiger counters, computlng machines, etc. For applications requiring lifh DC voltages at comparatively low current. Handle up to 5 ma. Cartridge terminals fit in standard 30 -ampere aize fuse ellpa. Meet JAN specifications to withstand humidity, altitude, vibration and shock. De-
signed for long life, extreme dependability. Dia., \$/t. Av. shpg. wt., 8 oz.

## MINIATURE SELENIUM RECTIFIERS

Miniature selenium rectifiers. Used for small power applications where relatively low voltage is requilred. Uses include bias supplies, DC fiament supplies, solenoid and relf-charging portables 2 and 6 -volt battery chargers for ypes rated at 25 volts RMS battery chargers, etc. 4. which is rated at 130 volts RMS max. "H' in type num-
ber indicates single plate half wave rectifier; " $B$ " in type
number indicates full wave bridge rectifier. "Series "H" rated for minimum resistive load shown. Av. shpg. wht., 2 oz .

## SILICON "UNISTACK" TV500 RECTIFIER

## Universal replacement silicon rectifier-directly replaces any

 present radio or television power supply requiring up to 500 ma. Complete with stud, nut, and universal mounting bracket or convenient mounting in any receiver. Absolutey no conversion is necessary for Installation. Enables the servicemanto centralize stocks of TV rectifers into a stock of just one ty pe, thus making possible quick replacements without waiting. Easily lenda itself to various power supply applications,
Maximum RMS AC input voltake, 117 volts. DC output voltage, 13 volts. DC output current, 500 milliamperes maximum. Eyelet convolts. DC out put current, 500 milliamperes maximum. Eyelet con-
struction; with locking luk which may be bent out of the way or clipped off If not meeded. Also useful for Amateur and experimental applications. Positive terminal lug clearly marked for easy identification. Size $2 \times 2 \times 15 / 16^{\circ}$ Shpg. wt. 2 orm

## WUERTH SURGISTOR

Type 100-2. A component which combines the functions of a currentlimiting resistor and time-tlelay
relay. It is connected directly into relay. It is connected directly into the power line circuit of any eleccurrent until the sube filaments are warm enough to take full voltage 00 ohms normal res., 0.2 ohm; circuit power range. 100-300 watts; time delay. 10 80 G 144 . NE T

## ADC TERMINAL BLOCKS

Especially useful in design of telephone circuits computers, and other applications with very piece moided phenolic base. Individual termina separators are also of molded plenolic. Polished surface makes for easy removal of solder flash after wiring. Terminals are 040 Inch plated brass. Kows of terminals are graduated in length, and identified by numbering along the top row. Avallable with $1-6$ rows, 20 terininals per row. Base dimensions: $3 \times 61 / 14$ inclies. Height depends on number of rows. Av. shpg. we., $11 / 2 \mathrm{lbs}$.

## EL-TRONICS HUMIDITY SENSER

- Extremely Fast Response
- Highly Stable to $140^{\circ}$ F.
- Simplifies Humidity Control

An extremely reliable humidity sensing element. Made of a conducting plastic which cltanges resist ance In the presence of water vapor. Easy to wire in-only 2 connections. Very stable in ambient temperatures to $140^{\circ}$ F. Reailitgs are $100 \%$ repeatable and accurate within $3 \%$. Fast actingresponse in 1 minute for $20 \%$ humidity change; 3 minutes for $90 \%$ sistance graph and sample circuitry. Operates from o-20 volts AC. 7 STSI. NET.

## Industrial Quantifies-Substantial Savings

Industrial quantities-to provide tremendous savings on IRC $10 \%$ resistors. Supplied in boxes of 100 -the minimum quantity of any one value that you may order.

Values may be assorted for 500- and 1000-lot prices -but only in boxes of 100 per value. For example, if you order 1000 resistors, select up to 10 different values.

## BT AND BW $\mathbf{5 \%}$ INSULATED TYPES

Type BT Filament Carbans. Fixed composition, filament carbon $5 \%$ resistors. Dependable low-cost units for use in circuits requiring close tolerance values. RETMA color coding. Fully insulated.

Type BW Wire-Waund. Highly stable, low-cost units, completely insulated. Similar in appearance to carbon resistors, but have double width first color code band. Withstand shock, vibration and temperature changes.

## WIRE-WOUND PRECISION RESISTORS

Extremely dependable precision resistors widely used in instruments, calibrated controls, etc. All except WWIOJ are wound with adjacent sections in opposite directions to minimize coupling effects. Tolerance is $\pm 1 \%$. All have lug eerminals, except WW10J, which has wire terminals.
Type WW2J. 1 Watt. Enameled windings on ceramic forms. Maximum volts. 2000. Long ter-

Type WW4J. $1 / 2$ Watt. Special impregnant for complete humidity protection, as on others of series. Type WWEJ, t/2 Watt. Similar to type WW4J. but rated at 1000 volts maximum. Tolerance is $=1 \%$.
Type WW10J. 0.15 Wast. Extremely smalt wire-
wound resistors. 25 wire leads. Maximum volta, 200 . wound resistors. $2^{\circ}$ wire leads. Maximum volts, 200.

## POPULAR RESISTOR ASSORTMENTS

IRC RESIST-O-KITS and RESIST-O-CABINETS help the serviceman keep lais resistor stocks complete and accessible at all times. Save benchate compartment. All resistors have Each value stored in a KeSisT-0.KITS have 10 resistors have $\pm 10 \%$ tolerance. Metal Meral RESIST-O-CABINETS have 4 drawers, and a total of 28 compartments which hold nearly all commonly used resistance value隹 extra charge for metal cabinets or kit boxes. Pay only for resistors.

## (A) METAL RESIST-O-KITS

Assortment No. 7. A versatile selection of often-needed composition resistors. Assortrnent includes 45 type BTS $1 / 2$-watt resistors. Consists of 6 each- 0.1 and 0.47 mess; 5 each- 47,000 ohnss, 0.27 and 1.0 meg; ${ }^{4}$ each- 1000 ohms, 10,000 ohms and 2.2 mess; 3 each- 4700 ohms and 0.22 mes. Shpge
2 M 758 . NET.
4.41

Assortment No. 8, Contains 30 BTA 1 -watt $10 \%$ resistors in flat. pock-at-size metal kit. Consists of 4 each- 1000 and 47,000 ohms 0.1 and 27.000 ohms, 0.27 mes. Keep and 1.0 mes; 2 each-2200, 4700 . and Slipg. whms, 0.27 mes. Keep one of these kits handy at all times. 2 M 759. NET.

Combinatlon Assortment No. 6A. Consists of a complete resistor stock for AM. FM and TV-all in one landy cabinet. A real time and money saver for the serviceman, kit-builder and experimenter. Exact values are marked on each resistor, to gupplement the RETMA color code. The assortment consists of 1391 KC insulated and Type DCF resistors, in the following values: $1 / 2-$ Watt. 4 each: $1000,47 \mathrm{~K}, 100 \mathrm{~K}$,
$270 \mathrm{~K}, 470 \mathrm{~K}, 1.0$ meg; 3 eaclu: $4700,10 \mathrm{~K}, 27 \mathrm{~K}, 33 \mathrm{~K}, 39 \mathrm{~K}, 68 \mathrm{~K}, 150 \mathrm{~K}$ 4.7 mek. Watt. 4 each. $1000,10 \mathrm{~K}, 27 \mathrm{~K}, 100 \mathrm{~K}, 1.0$ meg: 3 each: 47 K ,
 100. $150,220,270,470,1500,2200,2700,4700,33 \mathrm{~K} .39 \mathrm{~K} .220 \mathrm{~K}, 4.7$

## AXIAL-LEAD POWER RESISTORS

Wire-wound ressistors, with glass fiber core. Molded in tan, high temperparticularly recommended for circuits where a ceramic housings), are with an actual wattage dissipation of 7 or 10 watte or less A sial lured $11 / 2^{\circ}$ long 4,7 and 10 watts. $\pm 10 \%$ tolerance. Sizes: PW-4, $11 / x^{21 / 4}{ }^{2}$;
 values whenordering.

## FUSE-RESISTORS

Type FR 7.5. Plug-in type resistor with characteristics of a slow-blow fuse. For series-string filament circuits in television sets. Has ingulated ceramic body. Kenistance, 7.5 ohms. Shpe. wt. 3 oz.
2 M 771.1 to 9 EACH

TH.
Type FR 5.6. Similar to above, but 5-6-ohin resistance. Shpg. wt., 3 oz. $2 \mathrm{M} 772 .{ }^{1}{ }^{2} \mathrm{t}^{1} 9$, EACH
10 or Mor, EACH....

## IRC WIRE-WOUND POWER RESISTORS

thige, non-porous ceramic cores, and chick cement coatings. All have lugs, and types $1 \frac{1}{4}, A$ and 2 , also watts and higher imclude mounting brackets. All have $\pm 10 \%$ tolerance excepe fixed types of 50 ohms and higher, which are $\pm 5 \%$. NOTES ON ADJUSTABLE TYPES: Unitg of 25 watts and higher have silver contacts. Wattage rating applies only if total resistance is used. Where range of values is given in individual Itstings, consult table for specific values avaitable; e.g., 1 to 1000 means all values listed in table between and including 1 and 1000. Specify resistance value when orderins. Av. slipg. wt., 1050 watts, 4 oz ; $100-200$ watts, 116.

## SPRAGUE "KOOLOHM" WIRE-WOUND RESISTORS

Feature high-voltage insulated resistance "ire windings; will
withstand 10.000 volts from surface of iacket to resistance element. KT types are inductively wound; NIT types have non-inductive winding. Ceramic jackets and special end-seals provide complete protecdon against high humidity and heat-ceramic conting insulation stands temperatures to $1000^{\circ} \mathrm{C}$. Accuracy within ${ }^{\circ}$. Av, shpg. wt., 202 SPECIFY VALUES DESIRED

## OHMITE TYPE FR FUSE RESISTOR

A highly dependable $71 / 2$-ohm fuse resistor. May be used to replace many fuse resistors used In television circuits. $11 / 2^{\circ}$ tinned wire leads make replacement application easy and quick. Supplied with convenient. plus-inbakelite mounting strip-or can be wired directly into circuit of TV get. Widely taed in sets employlng series-string filament circuits. Length. 13/4". Shpg we. 3 oz .

38 c

## HANDY OHM'S LAW CALCULATOR

Easy-to-use calculator. Solves problems in Ohm's Law and DC power. Shows power. roltage and current when resistance is nown. By setting to two known values rewistance can te determined. Also has parallel resistance calculator.
Size. 9x.3". Shuse wh. 3 oz.

## BOURNS "TRIMPOT" SUBMINIATURE POTENTIOMETERS

Precision-made, multi-turn miniature potentiometers used to control al types of electronif circults. Widely used in airborne and instrumentat on equipment. Ideal for use in printed circuits and a wide variety of portable equipment. Ideal for use in primted circuits and a wide variety of portable and mobie applications. Mining resstant to ybration, shock and violest nroof. Self-locking adjustment holds any setting under extreme conditions. Interchangeable mounting for easy substitution in experinsenta circuits. All except Model 120 15 are wire-wonnd; all except Model 220-1 have 25-tirn screwdriver adjustment. Model 130 has solder lug connec tors; all ofliers have wire leads. Un'ts mount easily in stacked assemblie -twenty Model 120 "Trimpots" fit into a $1 / 4-i n c l$ cubel All metal part are fully corrosion-resistant; contacto and collector strips are platinum alloy. Units are $100 \%$ inspected; Total keslstance Tolerance; $\neq 110 \%$ except Model 12015 . $=20 \%$. Features of various models are briefly ex plalned below. Av, mipg, wt. 2 oz. ## OHMITE "AB" POTENTIOMETERS

The Ohmite "AB" type potentioneter is a high-quality two-watt variable resistance control unit designed especially for industrial laboratory, TV service and other uses Feare reiability is particularly important struction molded resistor elemph safety factor. For complete protection this resistor element is sealed in a metal enclosure to make each unit dust-proot and splashproop carbon siding coatact and terminals imbedded in the resistor element assure smooth, noise-free operation.

TYPE 76 ATTACHABLE SWITCHES FOR a CONTROLS
Blue bakelite enclosure. Easily and quickly 30 M 359 . Type 76-1. SPST. NET
attached. U.L. Approved. Slapy. wt., 2 oz.

## EXPLANATION OF TAPERS

Taper A. Linear.
Tapor C. Logarithanic curve for audio circuit control or antenna shunt control
Tapor D. Tapered at both encls to provide control of grid bias and antenna circuit. Used where control of grid bias is of prime import where in controlling kain.

Taper H. Tapped iogarthmic curve. Audio level control for automatic bass compensation. Taper P. Semi-logarithmic curve with reverse taper. For use in contrast and picture control circuits in television.
Taper O. Same applications as Taper ${ }^{P}$ above, but has slishzly steeper curve.

## IRC TYPE Q CONTROL KIT

Assortment No. 9. An aswortment of versatile Type $Q$ metal Controls plus switches and shafts, in a handsome , andle over $90 \%$ of afl AM. FM and TV standard control replacements.
Coutains 18 controls. 6 switches and 5 special shafts. as follows: $1-011-116$ ( 10,000 ohms). $1-011-123$ (50.000 ohins). I-013-123 ( 50.000 olims). 1-0 1-128 (100.0100 (1ms). I-Q13-130 ( 250.000 olims ), 1- $013-130$ ( 250.000 ohins), $1-Q 11-133$ ( $1 / 2 \mathrm{meg}$ ). 2 Q13-133 ( $1 / 2$
 ${ }_{6}$ meg) ${ }^{1-Q 13-139 X}(2$ mug), $1-Q 18-139 X$ ( 2 mex).
 $2-\mathrm{HQ}$ shaft. and $1-\mathrm{NQ}$ shaft. Cabinet is included at no
extra charge. Contains drawers for shafts. switches and spare parts. Convenient hinged metal pane keeps contents of drawers dust-free. An excellent addition to the weil-equipped serviceshop. 30 M 297 . NET

## INDUSTRIAL CONTROLS

$P Q$

ROL

M

These versatite industrial－tybe controls have a smooth carbon base element and＂two－finger＂ wiper arm of thin，high－stress alloy－assures good contace and low noise for years of service．Type M multi－sections can easily be atded to either $\mathcal{P Q}$ ． KQ or KQL types；Permit exact tailoring of Anal，triple and quadruple units to meet individual requirements．Special－purpose controls can be made thp Types IOS RO and KQL have a is．${ }^{\circ}$ maximum；body diameter including terminals is $13 / 6^{\circ}$ maximim；dept ${ }^{\circ}$ behind panel， $31{ }^{\circ}$ ． Each Type M multisection adds $19 / z^{*}$ to depth．Type PO，KO．ROL and M sections feature 300 degree arc of rotation－with or without switch．Power rating is $1 / 2$ watt， 500 volts maximum．
$P Q$ types have a round fixed shaft， $3^{\circ}$ long， $1 / 4^{\circ}$ cliameter．Shaft can be cut to any desired length with a hacksaw．Where a longer ghaft is required，use the extension fittings on page 160 ．RQ and KQL，types have a short shaft with a screwdriver slot for use where adjust ment is semi－permanent bushing and locking nut－for permanent，vibration－proof settings．Tolerance of all types is $\pm 10 \%$ ．All have terminals that are tinned for easy soldering and firmly riveted to the body of the control．Terminals may be bent for a variety of applications without causing noise in the circuit Ground plate on Types PQ，RQ．and RQL has two locating tabs ether or both of which way be bent dowa if not needed．Av．slipg．wt．， 4 oz

## EXPLANATION OF TAPERS

Taper $A$ ．Linear curve for uniform resistance change．
Taper C．Logarithmic curve for audio circuit control or antenna slunt control．
Taper D．Tapered at both ends to provide control of erid bias or antenna circuit．Used where control of the grid bias is of prime importance in regulating the gain．
Taper Q．Logarithraic curve with reverse taper for TV contrast and picture control

## TYPE 76 ATTACHABLE SWITCHES

## FOR Q，PQ，RQ，RQL AND M CONTROLS

Can be casily attached to control by bending down four metal tabs．Switch housing is marle of are resistant material．Terminals are hydraulically staked－no openings for solder to rusi into switch Contacts are silver－plated alloy－maintains low contact resist ance to assure long life．Type 76－1 handles up to 5 amps at 125 v ．Type $76-2$ rated at 1 amp at 125 v．Shpg．wt．， 2 oz ．
30 M 359．Type 76－1．SPST．NET
38c

## TYPE HV－15 FOCUS CONTROL

Carbon control especlally designed for high－voltage control with TV pic－ ture tubes requiring electrostatic focus．Resistance， 15 megoloms．Kated at 2 watts．Lincar taper characteristle．Equipped with $3^{*}$ long＂Knob Master＂shaft－lnurled，flatted and grooved to fit most knob require－ ments without any modification except cutting to leugth．Size， $211 / 4^{*}$ dia．${ }^{25 / 4 z^{\prime}}$ depth．Slipg，sut．， 402 30 M 274 ．NETEACH
Type HV－25．Same as focus control above，but 25 megolins resistance 30 M 286．NET EACH

## UNIVERSAL WIRE－WOUND CONTROLS <br> Rugged 4－waticon－ rols．Replace $4 W K$ and $4 W S$

Have linear taper，excent＂left－hand logarith mife taner for TV focus and tright－hand loga rithmic taner for picture contrast．Kotatlon． $300^{\circ}$ ．Size： $11 / 4^{\circ}$ dia．， $23 / x^{*}$ deep；threaded bush ing is $3 / 0^{*}$ slia．and $3 / 8^{\circ}$ long．Nickel－plated brass ong Type Wi＇r has $3^{*}$ long＂Knob Master＂ haft－fits a wide variety of knobs．Type WPS has $1 / 4$ F long shaft，knurled at end and slottet Type WM multisections can be attached to all controls．Shpg．wt．， 4 oz ．

## General-Purpose and TV Controls

## IRC EXACT-DUPLICATE TV CONTROLS

TYPE QJ
A wide selection of exact-duplicate controls for TV receivers. All duplicate the orixinals in every detailthere s never any installation prob ensineered replacement units No no modifications in wiring are required
In cases where the orlginal control has a switch, the IRC exact-duplicate control is equipped with an identical switch-no additional parts are ever required. All controls are inade of finest matertals and constructed quality is always equal or superior to the originals.
Simply locate the name of the manufacturer and the part number of the orisinal control in the table you'll see the exact-du
replacement in the adjoining column. Av. shpg. wt., 3 oz.

## G. W. BORG ‘MICROPOTS' AND 'MICRODIALS'

Model 205 "Mleropots." High-precision, ten-turn lincar potentiometers. Widely used in electronic instruments. Industrial and aircraft controls, electroniccomputers, radar and sonar sear. etc. Resistance is directly proportiongh to the shaft rotation. Extremely ing
 accuracy. Wire and terminala are imuide Fine suicle. Fine resolution. Meclianical and electrical rotation, $3600^{\circ}$. Lincarity, $0.1 \%$. Torque. not over 1.5 inch-oz. running; not over 3 inch-oz. tarting, "ower dissipation. 5 watts all $40^{\circ}$ Centigrade. Shaft extension length. $7 / \mathrm{m}^{\prime \prime}$. Life is more than 1 million revolutions. Av. shpg. wt., $11 / 2$ I lus.

29 M 697 . MODEL 1327. EACH
5.85

MODEL 1307 DIRECT READING MICRODIAL For use with Micropots listed above. Tince digit readings allow extremely accurate indexing. Designed for rapid peration-may be hand or servo-operated at speens bp to in finger-tio brake continuons in either direction. Built signed for wide-angle reading. Rigid shaft connection eliminates possibility of backlash or lost motion Knob is finished in hlack, willi brake panel in satin chrome. Neopren terts all working parts for life against dust. clirt and moisture stal proaccuracy, part in 1om . size, $1 \% \times 2^{\prime \prime}$ diameter. Shpg. wi., 4 oz 29 M 678. NET

## SELECTOHM POTENTIOMETER

100,000 olım, 25 watt, calibrated, wire-wound potentiom eter of laboratory quality. An ideal precision resistance substitute for use as a decade box, voltage divider or a bridge circuit component. Very usefill for determining the value of a burned out resistor. Dial calibrated in 200 divi sions. 15.8 ma capacity. $6^{*} \times 31 / 4^{*}$. Slipz. wt., 2 lbs 8A M 323, NET...

## Cornell-Dubilier Capacifors

"BLUE BEAVER" TUBULAR ELECTROLYTICS
Blue Beaver" twular electrolytic capacitors are specifically designer for service replacement applicatlons. All are sealed in aluninuin cans for outer sleeves. Single-section Type BR has solid, timped-copper leads with negative terminal grounded to can. Type BBR is a miniatnre version of Type BR. for limited-space applications. Type BRHV is similar to Type

## TYPE BR SINGLE SECTION

Radio and TV replacement units. Ideal for bypars, filter, etc. Hermetically sealed.

TYPE BBR SINGLE SECTION
Miniaturized units for hearing aids, transistor ratios, Gw-voltage circuits, etc

 -ET plies. Surge voltage of Type BRIIV is 150 volts above working voltage. Types BBRD, BBRT. and BHRQ have $7^{\circ}$ flexible vinyl covered leads with color coded positive and cominon negative. All "Blue Beavers" are rated for operation up $2085^{\circ} \mathrm{C}$., except 500 -volt types, which are for up rated or operation up to $85^{\circ}$
to $65^{\circ} \mathrm{C}$. Av. slipg. wt., 4 o

## Cornell－Dubilier Capacitors

TYPE TAN＂SUB－MINIATURE＂ TANTALUM ELECTROLYTIC

## CAPACITORS

Remarkably small sub－ miniature size Tanta－ Iumelectrolytic capaci－ rors．Especially well in transistor circuits and other uses demanding combact plysical ize． 16 long： 216 diameter．From $-55^{\circ} \mathrm{C}$ ．to $+85^{\circ}$ C．Standard capacitance tolerance is $\pm 20 \%$（except＊maximuin capacitance for that voltage）．Power factor and frequency charac－ teristics are ercellent even at their lowest rated 07 microamperature．Leakake current：Max．， perature．Terminer mid per volt at room tem－ $11 / 2^{\circ}$ long．Av shpg wt solid，timned－wire leads

## GENERAL－PURPOSE DISC CERAMIC CAPACITORS

Exeeptionally small，liglitweight，disc－type ceramic capacitors．An excellent choice for a wifle variety of equipment and particularly suited for limited－ypace applications．Provide highly dependable performance in transmitters，receivers． amplifiers，test instruments，industrial electronic equipment．etc．Carefully en－ gineered，and constructed to rigid standards to assure low inductance，mimimeed eddy current losses．and high stability．All types listerl below are rated to operate

## Cornell-Dubilier Capacitors

## MOLDED MICA CAPACITORS

Molded units with India ruby mica dielectric; special wax-treated stack, brown bakelite case. Desinned for wide range of applications. inividually tested for accuracy. Tinned brase wire leads. Values are $\neq 20 \%$. Rated at 500
WVDC. 1000 v . DC test, except $\$ 300$ WVDC WVDC. 1000 v. DC test. except 300 WVDC, 600 v. DC test. Shps. wt., 2 oz.

## Sprague Capacitors

## TVA AND TU ATOMS—MIDGET ELECTROLYTICS

Very compact，metal－cased dry electrolytics．Enginecred especially for re－ placements in tough TV applications－such as power supplies，decoupling ircuits，cathode bypass circuits，etc．Will withstand the high surge voltages te efficiently at temperatures as high as $85^{\circ} \mathrm{C}$ ．Peparate negative lead．

## SpRact

## TYPE 1020 TUBULAR

 TANTALEX CAPACITORSFor $-55^{\circ}$ to $+85^{\circ}$ C. Operation
Mindature tantalum-foil electralytic capacltors. Designed for reliable operation over the wide temperature range of $-55^{\circ} \mathrm{C}$ to to 150 working volte DC in military or inrustrial equipment including control ervip ment, computers, airborne radar and communication erupment. Can be used In low temperature conditlons where alumalnum-foil capac itors are Inoperative, llave extremely low leak age current. Valuable for une where small physical size, stable electrical character atics, and long service lise are imporant Consists of a rolled capacitor rection sealed in a silver-plated metal case with molderable wire leads. P'olarized; shell should be inswiated from chassls unless classis is negative potential Av. shpe. we 2 oz.

## DOORKNOB CAPACITORS

High-voltage, $\quad \mathbf{5 0 0}-\mathrm{mmf}$ plastic capacitors for replacement use in resistant. thermosetting moistureplastic. Molded guard rings increase surface leakige path. Capacitor body has threaded ends and can take a wide variety of
screw-in terminals. The 20 KK T5's are supplied with 14 terininals (2 of each type illustrated). Type
$30 \mathrm{DK}-\mathrm{T} 5$ is aupplicd wit) 30DK-TS is supplied with 2 terninals. "(See illustration).
Typo 20 DK -T5. Rated at 20 KV . Size, I*
 Typo 30 DK -T5. Rated at 30 KV . Size, $15 / 16^{\circ}$ diameter. NETOME. Shpg. wt.. 4 oz. 1.76

## "T-C" CALCULATOR

Handy slide-rule. Determines values of NPO and N750 ceramics to be connected in parallel to equal a capacitor of desired intermeniate Shpg. wt.. 40 oz
37 K 103. NET
15c

## "CERA-MITE" DISC CERAMIC CAPACITORS

Ultra-compact ceramic disc capacitors. In popular values as well as RETMA values. High by-past efficiency in critical circults. Moisture-proof coating. Tolerances: 1000 thru 68 mmf, $\pm 10 \%$. thru $500 \mathrm{mmf} \pm 20 \%$ All ate " "arged" for casy identification All ratings are DC working volts. Shpg, wi., 2 oz .

## MINIATURIZED DISC CERAMICS

 Excellent for Transistorized Circuits
## Typo TG. Designed for circuits

 requiring extremely sinall components. Ideal for printed circults, tran-sistor-type radios. ete. Provides very dependable service in bypass and are covered with an exceptionally lough, protective coating that assures top periormance despite conditions of heavy humidity. All rated at 50 working volts, DC. Tolerance of $+80 \%$ to $-20 \%$ except $+80 \%$ to $-30 \%$| No. | Typo | Mid | Dla. | Wt. | EA. |

## NEW CERAFIL MINIATURE CERAMIC CAPACITORS

## Actual Size (C.80V 102AM)

The last word in miniaturization-ceramic ca pacitors so small that over 350 of them will fit in a cubic inch of space! "Cerafil" miniature capacitors now permit designs of a compactness heretofore impossible. These rugged ceramic units operate from -55 to $+85^{\circ} \mathrm{C}$, at 100 voits. in capacitance values from 001 to 11 mid. All cordance Cerafil capacitors are tested in acrequirements of this specification. Capacity tolerance, $=20 \%$. Av. shpg. wt., 2 oz .

AEROVOX MICA CAPACITORS

Extremely stable mica capacitors. Types 1468 1467. 1469. 1464: Made to MIL C-5 specs rated 500 WVDC, except ${ }^{* 300}$ WVDC: have $\pm 20 \%$ tolerance, excent 1464 and 1469 which are $+5 \%$. Types 1650, $1651,1652,1445,1446$
and $1447: \pm 10 \%$ tolerance. Types 1445. 1446

## FP AND WP ELECTROLYTIC CAPACITORS

For use in filter circuits, audio by pass circuits and IV applications. Capacitors feature complete stability under heavy ripple current, Iilgh atrge voltages and high temperatures. Units are encaser in compact, rubher-sealed alumiFabricated Plates-anodes specially construct ed of metalized cotion gauze. WP types have
etched-plate anodes. Special internal degign lowers RF impedance and nermits a minimuln of coupling between plates. on to 150 WVDC canacity tolerance is $-10 \%$ to $+100 \%$ Above
150 WVDC. tolerance $1 \mathrm{~s}-10 \%$ to $+50 \%$ Can is negative except Insulating waslier

HIGH-TEMPERATURE WAX TUBULARS Electrolytics for TV chassis and other applications requiring high capacity and high voltageratings. All units below are singleended type, except*
double-ended. Av. wt.,

5 oz .

HIGH-CAPACITY ELECTROLYTICS Plastic-case electrolytics for all high-capacity, low-voltage uses dry disc rectifier filters. movie equipment, etc. Type 1060A has aluminum case and is especially designed for feace control. Nonpolarized types - for intermittent AC use only. All others are polarized type HC. For photoflash. Have acrew terminals at one end arn as
excent lugs. Av. wt. 10 oz except
No. Typ. Mid W.V. Size NET

ALUMINUM CAN THREADED-NECK DRY ELECTROLYTICS
Threaded-neck units for replacement of wet or dry electrolytics. Upright mounting types. With special hardware to facllitate replacement of original units. For sub-chassis mount ng. see Universal clips (page 138). RS, HS and RM types have $8^{\circ}$ leads. Has common positive and separate negative terminals. Type
SR638 is Jug-type dual. Av. shpg, wt., 7 oz .

## INDUSTRIAL BUYERS ATTENTION!

In addition to maintaining the most complete stock of electronic components in the world, Allied can and will deliver industrial quantities of any electronic item you may need.

We are prepared to offer rapid, accurate quotations and delivery schedules upon receipt of your request.

Address your inquiries to:
Industrial Division,
allied radio corporation 100 N. Western Avenue

Chicago 80, Illinals

# Mallory Capacitors 

## MALLORY

## ACE SINGLE ENDED CAPACITORS

Single－end tubular paper capacitors．Con－ structed of molded bakelite and scaled with resin．For replaceinent applications in radio and TV printed circuits and alltomation equip ment．Voltage ratings provide substantial sare－ ty factor over that of original equipment．Capac－
Itors rated 600 lVVDC Cases $1 / 2^{\prime \prime}$ dia．and smaller have No． 20 wire leads； $\mathrm{C}^{2}$ dia and smaller have No．18．Leads are double－ leads；larger have No．

## CAPACITORS FOR TRANSISTOR CIRCUITS

## NEW TI TRANSISTOR CAPACITORS

Extremely small．aluminum－case，dry efectro－ Iytic capacitors．Available in a wide variety of popular values．Will provide outstanding per－ formance when used in transistorized circuits and other types of miniaturized equipment re－ quiring utmost economy of space．Highest quality materials and construction assure de－ pendable service．Typical applications include use in portable radios，hearing aids，portable cations equlpment．Excellent for replacement． cations equipment．Excelient

Capacitors incorporate etched－foil design and high－purity aluminum construction，to assure optimum efficlency and exceptlonal stabillty． A special silicon rubber hermetic compound is used to seal capacitor ends．Units have very low leakage current．All capacitors have an operating temperature from $-20^{\circ} \mathrm{C}$ to $+6{ }^{+}$ C．The capacity tolerance is from $-10 \%$ to
$+250 \%$ Leads are 22 gause，bare tinned cop－ $+250 \%$ ．Leads are 22 gauge，bare tinned cop－
per wire， $13 / 4^{\circ}$ long．with a tolerance of $1 / 4^{\prime \prime}$ ． Av．slipg．wt．， 2 oz．

## SILVERLYTIC CAPACITORS

Subminiature electrolytic capacitors for transistor outer case and tantalum anode．Carefully con－
structed to providestable．
dependable service．Per－
formance is equal to standard electrolytica of conventional size．Excellent low－temperature characterlstics．Operating temperatures for TAW type ranges from $-55^{\circ} \mathrm{C}$ to $+65^{\circ} \mathrm{C}$ ；for he TAP type．$-55^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ ．DC leakage is less than I ma after ten minutes of rated soltage，Capacity tolerance for the TAW type is $-15 \%$ to $+100 \%$ for the TAptype，－ $15 \%$ to $+75 \%$ ．With tinned axial lears $11 / 2^{\circ}$ lons． $7 / 4 \mathrm{x} \times 1 / \mathrm{b}^{\text {．A }}$ Av．shpg．wt． 5 oz ．

FEED-THRU HI-KAPS
Tiny ceramics, designed for single-hole mountins. Permit convenient feedilig of leads through chassis or shields and at the same time provide exceptionally effective RF by-passing. Special construction virtually eliminates lead inductance. Ratings. 500 WVDC. FT has $12-28$ mounting nut; MFT has $1 / \mathbf{M}^{\prime \prime}$ dia. flange, mounts in $3 / 2^{2}$ dia. hole and is attached by. -20 to $+50 \%$; $\xi=100 \%$; value. Av. slipg. wt., 2 oz.

## Printed Circuits and Capacitor Hardware

## SPRAGUE BULPLATE PRINTED CIRCUITS

The new, quality-constructed line of Sprague Bulplate printed circuits offers the radio-television serviceman a time-saving electronic aid. Each printed clrcult unit. consists of a self-contained. extremely compact "package" containing capacitors, resistors and, in certain units, inductance. With these units, there is no need to waste time on excessive wiring and funding operations or in tracing circuitentire clrcuit eoction with a Bulplate unit

A molsture sealed, shock-resistant ceramic base firmly holds the printed circuit wiring and all components in place. Capacitors are rated at voltage to be applied acroas the resistors is 250 v . DC; except D-1 where all elements are rated at 100 v . DC. Av. shpg. wh., 2 oz .

18 L 860. New Printed Clreuit Guide No. $K-350$. An informative catalog listing complete Information on Sprague's Bulplate printed circuiss. Contains diagrame of all circuits fisted below. Includes replacement information on seta produced by leading radio and television manufacturers. NO C
with your next order.

## TELEVISION POWER TRANSFORMERS

Power transformers for replacement use in standard television receivers. Carefully designed to assure dependable. eficient service. Plate windings are CT. With coppes shorting band to reduce external maguetic field. +Pri. for $117 / 107 \mathrm{v}$. For 117 volts, 60 cycles.

## HIGH-FIDELITY TRANSFORMERS

C 1 li-fi output transformers; irequency response of $20-20,000$ cycles at cif vatts, $\pm 1 \mathrm{db}$. Maximum rating: 50 watts. Have inter-leaved "trifilar" windings and are well balanced. Types A8054 and A8072 may
be used whin Williamson amplifiers. Size: $45 / 16 \times 3 \% / 16 \times 4 / 4$. Shps. wt., 7 lbs .

## 塱

VIBRATOR TRANSFORMERS
-volt DC and 115 -volt AC or Nary. Others 6 -volt DC primary only. All are similar to Fig. N. except P6166, Fig. TC.

Primaries tapped for 125.115 and 105 v . with 115 V . secondary (except P-6415). Excellent for correction of high and low line voltages. P-o has 105,115 and 125 v ; built-in electrostatic shields are grounded internally to core.

## 230-TO-115 VOLT AUTOTRANSFORMERS

Well-built step-down transformers for reducing 220-250 volts, $50-60$ cycles AC to 110-125 volts. For operating tane recorders, radios, amplifiers, household appliances. etc. Shielded construction. Smooth black enamel finish. Wlth $8-\mathrm{ft}$. cord and plug. Female outlet on case.

## UTC Transformers

(A)

## TYPE LS LINEAR STANDARD TRANSFORMERS

Type LS units fulfill the most critical specifications established for broad cast equipment. Each is guaranteed to meet or exceed the frequency respor-leaved windings in a semitoroidal coil cores. plus multiple-section, methods and insulations assure minimum leak ructure. Special winding uted capacitance. Minimum hum pickup is achieved by the use of high-conductivity outer case and hum-balancing coil ruct the use of a

## INTERSTAGE AUDIO TRANSFORMERS

Designed for coupling sinsle plates to PP grids. L.S-19: $=1 \mathrm{db}, 20-20.000$ cps; relative hurn, -50 db . LS-2 $1: \neq 1 \mathrm{db}, 10-20.000 \mathrm{cps}$; relative bum, for coupling simgle plate to PP grids. LS-1 case.

| No. | Type | mp.. Ohms | 1-24, EA | 25 or Mor |
| :---: | :---: | :---: | :---: | :---: |
| G 835 | LS-19 | Ratio, | 7.64 | 14.99 |

## OUTPUT TRANSFORMERS

$\pm 1 \mathrm{db}, 7-50,000 \mathrm{cDs}$, except $\$ 10-50,000$ for push-pull output tubes LS-35 and LS-36 are lifil typea; LS-35: for class AB feetback; $43 \%$ screen tap; LS- 36 : for class AB1 feedback; $40 \%$ screen tap. All in LS-2 case, except in LSS 3 case.

## Thordarson Transfarmers

## UNIVERSAL-MOUNT POWER TRANSFORMERS

AGF High quality, universal-mount powet Able transformers. Easy to install-adjust tal mounting. RETMA color-coded. 117 -volt

50-60 cycle primaries. All Fil. 1 wiadings center tapped. Has additional 2.5 -volt. 3.5 -ampere center-tapped winding. $t \mathrm{Has}$ additional 2.5 vole, 5 -ampere, center-tapped winding

## OSCILLOSCOPE TRANSFORMER

GGV Type 22 R40. For use in oscilloscopes primary in applications and est equipment. AC ar $\mathrm{m}^{2}$. Plate, 1800 volts Acmat ma. Rectiner fiament. 2.5 volts at 1.8 at 2.5 volts, 2.1 , 0.3 volts at 0.6 amps ; tapped at 2.5 volts, 2.1 amps. Overall size: $3514 \times 33 / 4 x$ Slipg. We., $53 / 4$ lbs. 63 G $717.1 / 809$ 10 to 24, EACH. NET EACH

## UNIVERSAL TV POWER TRANSFORMER

A GF TYpe 26 R00, Extremely versatile, high Aransformaty replacement undt for powe rets. Ideal in over 2000 popular selevision helps keep dow- item for in service-shopsma secondary. Primary: 117 volts, $50-60$ cycles Ac. Tapped high-voltage secondary: 850 vole center-tapped, 720 voits center=tapped, 600 voits center-tapped. Filament windings: Two S-volt@3 and rour 6.3-volt @ 3 amperes. Dual ectrostatic shielding. Univergal mounting fo ease of installation. Overall size: $31 / 4 \times 41 / 2 \times 47 /{ }^{\circ}$ 63 G 220 . 11 bs 10 to 24 , 1 \&OC 9 , NET EACH
17.96

## PLATE TRANSFORMERS

GGV Primaries for 115 volts, $50-60$ cycles amplifier and modulator power supplies. Ril units listed are static shielded

Typo 21P87. Has tapped primary to provide 670 of two output voltages. Delivers either 070 voles CT or 1312 volts CT at 200 ma , desending upon primary tap used. Secondary -650-0-656-835 volts @ 220 ma . Mounting enters. $31 / x^{3}$. Overall size: $45 / 8 \times 37 / 1 \times 41 / 2^{\circ}$ 63 G 657 . 1 to 9 , NET EACH
12.73

Typo 21P89, Secondary, 550-0.550 volt 175 ma. Mounting centers, $3 \times 21 / 2$. Size, $3 \%=31 / 4 x$
 10 to 24, EACH

Type 21P93. For two full-wave rectifier sys tems. or one rectifier at combined current out-$1075-0-1075$ \& 125 ma . Mis. centers. $35 / \mathrm{ma} 3^{\circ}$

## DUAL TONE CONTROL COMPONENTS

Type 20C74. Roactor. For tone compensating ystems to boost or attenuate bass or treble ndependently, Similar to Fis. RTV above, but ire leade. Hum-bucking. Inductance, 22 hys. DC resis63 G 734.1 so 9. NETEACH....... 7.94 10 to 24, EACH7.94

Type R1068X. Dual Conerol. Use with reacor above. Size. $1 / 16$ dia, $x 13$ overall length Shaft, $3 / 4$ long. With hardware and dlagram. Two required for complete bass-treble system Shpg. wt.. 802
$\begin{array}{ll}63 \text { G } 165 \text {, } 1 \text { tO } 9, \text { NET EACH } \ldots . . .4 .12 \\ 10 \text { to } 24 . & 4.12\end{array}$

## TUBE-TO-LINE TRANSFORMERS

Low-level tube-to-line transformers for a wide variety of applications. Units listed are rated three watts. Primary may be used with $60-15,000$ cps-pull plates. Frequency respouse, 60-15,000 cps.

FGV Type 22590. Tube-to-line audio output er-tapped. Secondary, 125, 200, 500,600 ohras $@ 10 \mathrm{ma}$. Mounting center, $21 /{ }^{*}$. Overall gize, 63.6740 . 10 9. NET EACH . . . . . 3.76 0 to 24. EACH. NET EACH 3.76
3.39

8AH Type 22591. Tube-to-lime audio out put ter-tapped. Secondary, 125,200, 500 , 600 ohms @ 10 ma . Alounting center, $27 \%$. Overall gize $Q^{0} 10 \mathrm{ma}$. Alounting center, $27 \%^{\circ}$. Overall size.

## TRANSISTOR TRANSFORMERS

BAH Transistor Transformers. Highwluality transistor transformers BAH designed for input, bridglag, interstake and output applications. Many of the units listed can be used for various applications. Need not necessarily be used at their stated impedance-hey may be used efinciently at any practical impedance, provided that the racio of the windings is maintained. All leads are RETMA color-coded. $300 \mathrm{mw} .11 /$ mig. centers; all other types, $150 \mathrm{mw}, 13 / 16^{\prime \prime}$ mtg. centers Applications. A-input; $B$-bridging; $D$ driver; is-interstake; $O$-ontput. Av. shpg. Wt., 2 oz .

Highly efficient, constant-duty voltage resulators. Used as step-up or step-down transformers to correct for either low or high line 7-position rosy adjusted by manuailt-in volt-7-position rotary switch untid Type T8394M meter reads ils voits output. $9,100,105,110$. 115,120 . 125 voles, at $50-60$ cycles. Type T. 10306 is for $65,75,90,100,115,130$ and 145 volts. Features simple, "plug-in" installation. (built-in $A C$ receptacle and 8 ft . line cord), Ideal for localities with fluctuating suplies, to assure correct performance of elecsupplies, to assure correct perrormionce aliceman trical appliances. Also for the radiocation of infor over-voltage test
Type T8394M. Especially designed for use with television sets. Rated. 300 watts. Size. $43 / 4 \times 4 \times 5 \circ$. Shpg wt.. 9 lbs.

## "SUPERIOR" VARIABLE VOLTAGE CONTROLS

## POWERSTAT VARIABLE AUTOTRANSFORMERS

Delivers adjustable output voltage from AC line-output variable from zero to above line voltage. Negligible voltage change from no load
to full load. Current ratings apply over full range of output voltage. Zero waveform distorrange of output voltage. emp wavere rise under fuil load *For $110-120 \mathrm{v}$. AC inputs. $\dagger$ For 240 volt iupuis, For $50-60$ cycles, except $\$ 60$ cycles ouly. 21'F 136 has standard 2 -blade plug and receptacle. 3 PF-136 has 3 -blade plug and receptacle; third wire is connected to powerstat frame. Gans assemblles: 1156-2P and $1256-2 \mathrm{P}$ consist of two paralleled units operated
from a common shaft. 1156-3P and 1256-3P consist of three units operated from a coininon frant. 1156-3Y consists of three units operated wye-conmon shat, wired for own gang types are height and diameter. Mountings: P. pancl; and U, seneral utility. Sizes shown: P types, distance back of panel and diameter; U types, overall height and diameter. Types 2PF10, 116 and 216 have on-off switch. line cord and plug, fuse and output receptacle. \#Also 105-135 v, and 225-255 vo output for line-voltage correction.

## MODEL UCIM VOLTBOX

[E]For industrial and electrical, chemical and Dhysics laboratory installations and radtoTV servicing. Provides AC source for variable AC voltage testing. Ias a variable voltage transformer, voltmeter, fuse, ine switch, two hiveContinuously adjustable output voltage up to $17 \%$ above line voltase to all output recepta$17 \%$ above hine voltase to at output recepta-
cles and binding posts. Rated at 7.5 amp . Input 120 v . $50-60$ cycles. Output $0-140$ volts. $3 \times 8 \times 6^{\circ} \times$ Shpg We. $^{2} 17 \mathrm{lbs}$.
65.00

Model UC2M. As above but for 240 voles input. Output, $0-280$ volts at 3 amps. 62 GX 542. NET

## OTHER "SUPERIOR" EQUIPMENT

Allied can supply Superior Powerstat equipment for commercial. industrial, laboratory and special-purpose applications. Available on special order are motor-driven, oil-cooled, explo-slon-proof powerstats and powerstat line correctors; Stabillie automatic voltage regulators. including instantaneous electronic and electromechanical regulators; Varicell DC power supplies; etc. Stabiline regulators are ideal for voltage regulation in radio and $T V$ stations. When ordering special items be sure to mark order "Special" and slve manufacturer's type number, voltage and current as well as all information recuired for motor drive, etc. Allow four weeks for delivery. Write for free Bulletin (No. 37 G 102).

## RAYTHEON VOLTAGE REGULATORS

Stobilize Varying Line Voltages to Within $\pm 1 / 2 \%$ Fully autonatic magnetic-type AC line voltage stabilizers. For applications requirlng accurate voltage stabilization. Maintain absolutely constant output of 115 volts. witl3in $1 / 2 \%$ desplte input voltage fluctuations as great as $15 \%$. Quick response corrects for fuctuations so rapidy that no indication can be noticed on an ordinary AC voltmeter. Can be used in paralthan greater power-handling capacity where load is greater *Case has flat top instead of style filustrated. H1n 2 sectlons, mounted as sinsle unit. For 95-1.30 v., 60 cycle AC. Arailable in ratings to 2000 watts on spocial order.

# Chicago Transformers <br>  

TRANSFORMERS AND CHOKES

A complete selection of power transformers, flament transformers and filter chokes deaigned for electronic erguipment. All units have high-grad magnet wire cpils wound on non-aging silicon-steel cores. All have onemoisture resistance. Types PSC, PSR, and RS (Fig. S) are semi-sealed
units with steel base covers fitted with phenolic terminal boards and numbered solder lugs. Types PCC, PCK, and RC (Fig. C) are compoundsealed units swith fiberboard base covers and $10^{\circ}$ color-coded leads. Have extra filament winding; 6.3 V . at amp. THas extra filament winding; 5 v . at 2 amps. All units have 117 volt. $50-60$ cycle primarles

## STANDARD ELECTRIC

## ADJUST-A-VOLT VARIABLE AUTOFORMERS

Type 100 BU Autoformer. For low-power equip-ment-tube testers, power supplies, model rallroad controls. etc. Has special sliding brush and low-resistance alloy-plated brush track-allows high inttial surge current and temporary overloars. Permits smooth control of output voltage rom V rounts tho Max volts. Mounts on any pane up to 10 cycle 165 VA . For $110-120$ volts, $50-60$ cye.

> ase

Type 300 BU Autopormer. Ideal for light con-
trol, small ovens, speed regulation of brusheconnectet AC motors, etc. Several may be ganged for operation from the same shaft. Unit is easily set and has dial plate for clockwise or countertlock-
wise operation. Specially desikned brush and at-loy-plated brush erack eliminate arcing. Can be Maxithum load. 400 VA. Maximums current. 3
from 110 to 120 voles. $50-60$ cycles AC. $311 / s^{4}$

## TYPE SOOB AND SOOBU AUTOFORMERS

For laboratory and industrial voltake control. Type 500B is cawed. $61 / 2 \times 4 \frac{5}{6}$ dia. Supplied with line cord, plug, receptacie pilot light, on-off switch and fusc. Constructed of diectast a amminum, fenished in gray wrinkle. Type soondies pilog light voltage; adpancl mounting-supplies pilot ight voltage; ad 60 cycle AC input. Av. shpg. wt., 12 lbs.

## TYPE CV TRANSFORMERS

Static-magnetic voltage regulators. Designed to provide constant output voltage ivithin $\neq 1 \%$. even with llne voleake changes (transient or continuous) of up to $\pm 15 \%$. No manual adjustment neressary-regulation is fully automatic. Adjusts quicky to chankes-usually within a cime range of 1.5 cycese or less. Current-hmiting characteristic protects transformer and oad equipment from excessive current. Has yranolit. oflled capacitor with mountink bracket. 60 cycle AC, 25 and 50 cycle units available on special order. Write for quotation, giving full details abous your requirements.

## RF Chokes-Transistor IF's and Coils

## POPULAR RF CHOKES FOR EVERY PURPOSE

Chokes below may be used in transmitters, receivers, test equipment, etc. 71 H 160 is recommended for transmitters with plate supply of up to 3,000 volts modulated or 4,000 volts unmodulated. It may be used on all bands from 80 through 10 meters. R-33 series chokes are two-section; R-50 series chokes are 3 and 4 -section. 71 H 149 choke is hermetically sealed in glass. National suftix " $U$ " following type number indicates removable stand-off insulator at

## IRC INSULATED HF CHOKES

Insulated wire-wound chokes for use in receivers, transmituers and other high frequency circuitry. Compact size simplifies installation; wide cholce of inductances. A!] are fully insulated in molded phenolic housings against high humidity, abrasion and physical damage. 1000 volts insulation breakdown to ground. Color coded. All values are RETMA preferred and have $\pm 10 \%$ tolerance. Type CLA units have resistance tolerance of $\pm 20 \%$. except $0.47,0.56,0.68$ and 1.0 micro-henry units which are $\pm 30 \%$. ## Shields, Caps, Coil Forms, Capacitors

## RECEIVING AND TRANSMITTING GRID CAPS AND SHIELDS <br> receiving tube grid caps and shields <br> TRANSMITTING TUBE CAPS

A complete selection of grid caps and slaields for receiving-type tubes. Shields are sturdily constructed of durahle, 11 ghtwe ght aluminum; ace curately formed to assure casy installation. Used extensively for shielding high-gain RF and audio amplifier tubes to reduce microphonics, eliminate tubes to avoid radiation. Tube caps provide positive, dependable contact. Aves slopg, wt., per pkg., 3 oz .

## AMPHENOL COIL FORMS

Low-loss, miniature transparent polystyrene coil forms. Excellent for receivers, low-power transmitters. VHF equipment, etc. All are plug-in type except Type 24 which has raised hole in center of base for mounting with self-tappink screw. Prongs of plug-in types are spaced to fit Amplienol Series 78 S standard and miniature sorkets page 160 ). Cois can be coated after Rigidly anchored prongs; sturdy construction. Av. shog. wt,, 2 oz ,

## CAMBRIDGE THERMIONIC

## CERAMIC SLUG-TUNED COIL FORM KIT

This kit of ceramic, slug-tuned coil forms meets almost every slug-tuned coil requirement encountered by developnent labs, engineers. Amateurs and exferent types), 19 powdered iron slugs. $S$ silver-plated brass shngs. and complete set of mounting liardware. Coils covering 200 ke to 200 me can be wound with coil forms and slugs supplied. Forms are silicone-inpregnated ceramic. Powdered iron slugs are colorcoded. All coil forms included in kit incorporate the ranges from $3 / 16^{\circ}$ to $1 / 2^{\prime \prime}$; overall mounted heightes from $19 / 2^{\prime \prime}$ to $11 / 16^{\circ}$. Shpg. Wt.

## MORRIS COIL WINDER

You'll be able to wind efficient, commerciallooking honeycomb, spiderweb and solemoid coils with this very versatile, but economical coil winder. It's a real time saver for the Amateur and experimienter and givea your work a more professional appearance. Just set
un the winder for the type of coil you regulre un the winder for the type of coil you reguire arns for you. May be used for winding RF turns for you, May be used for winding RF
coils. oscillator coils, loop antennas, coils for coils, oscilatior coils, loop antennas, coils for tors, parasitic suppressors. TV1 traps. etc. Handles up to No. 16 wire, making it suitable test equipment and small transmitters. Unit is supplled with two-plece wood spool for holding honeycomb and solenoid eoils, plus cast pegholders and four $61 / 3^{\circ}$ wooden pege for npiderweb coils. Winder is mounted on rugged cast-iron base with holes for bench mountige. With extension ehaft for winding solenoid coils up to $31 /{ }^{\circ}$ 'long. Leus wire and forms. Base size.

4.95

##  <br> [ <br> © <br> "DESIGNED FOR APPLICATION" COMPONENTS Precision Components for Finest Performance

Famous Millen components for use in original equipment and for replacement purposes in exlsting equipment. Made to exacting specifications to assure extremely dependable service in all industrial. Amateur and experimental applications. Type 10008 instrument dial (not illustrated) has logging scale spread over 180 degrees. In 69000 series slug-tuned coil forms, copper slug decreases inductance as slug is turned into coil; iron slug increases inductance.

Series 80000 CRT bezels have satin-black finish, neoprene cushlons and green lucite filters. 37200 Series binding posts, plates and plugs provide a number of combinations to meet the most varied requirements. For extensive listlngs of Millen high-quality RF chokes, see page 155. *Items not illustrated Coil dimensions are winding lengths. Refer to manufacturers' index on page 400 for the many other Millen products listed in this Catalog.

## National Components

## CALIBRATED AND UNCALIBRATED DIALS <br> VERNIER DIALS FOR INDIVIDUAL CALIBRATION

Popular blank dials. Feature the famous "Velvet Vernier" with $5: 1$ drive ratio. Pointers are clear plastic, with centered hairlines and pinholes for casy, accurate calibration of each scale.

Type ACN. The famous original of this type. Large-size vernier dial. $5^{\prime \prime}$ high, $71 / 4^{\circ}$ wide Shpg. wt., $11 / \mathrm{H}$ libs.
7.04

Type ICN. Large, illuminated vernier dial, With standard wide. Lights in upper corners screws. Less lamps. Shpg. wt., $11 / 4$ Ibs. 6.90

All have one $0-100$ logging scale. Black, wrin-kle-finished escutcheons. Clear-vlew plastic windows. With instructions, extra scales, hardware. and hub for $1 / 4^{*}$ shafts.
Type SCN. Intermediate size vernier dial, $47 / 6^{\circ} \mathrm{hish}, 61 / 6^{\circ}$ wide. Ideal for use where space 71 H088 NET Wi., 1 ib
6.47

Type MCN. Small size vernier diat. only $21 /{ }^{*}{ }^{*}$ high, $37 / 8^{\prime \prime}$ wide. Perfect for mobile sear and other small units. Mechanism extends $1 / 4^{*}$ below frame. Shpe wt., 10 oz.

## 12-VOLT VIBRATORS

Popular Mallory replacement vibrators for 12 vole applications. Type $12-3$ has 3 -pin base; Type $12-4,4$-pin base. Size. $11 / 2 \times 27 /{ }^{\circ}$. Shpg wr., 8 oz. Type 12-3. Replaces Mallory G683.
56P154. 5 -UP, EA... $1.30 \quad 1-4$, EA... 1.44 Type 12-4. Replace Mallory G659. 56 P $155.5-U_{P}, E A \ldots 1.30 \quad 1-4$, EA.... 1.44

## TYPE $4-4$ 6-VOLT VIBRATOR

One of the most popular replacement vibrators 659 vibrator. Each unit is individually tested under load condítions for output, starting voleage, etc. Used as original equipment in many auto radios. Fits standard 4 -prong socket. $11 / 2 x$
 56 P OOO. 1 \&O
5 or more,

## TYPE GC7 GROUND CUP

Efficient, ground cup noise suppressor. For use tively elimizais radio inter vibrator vibrator hash. Provides an excellent caused by pedance connection between the shield can of the vibrator and the car frame. Fits most auto radios in present-day use. Easy to install.

These ruggedly built capacitors are designed to prevent interference with radio reception caused by generators, vibrators, switches and other spark-producing devices within the auto, marine or aircraft equipment. All units are wax impresnated. AG types are well protected from moisture, but are not hermetically sealed. AS types are enclosed in metal pedance, recommended for extreme climate conditions. Both AG and AS types are designed for noise suppression use on generators, ammeters, and many other types of electrical equipment where there is contact spark or noise radiation.
Type AG442 also used in midget alrcraft motors. Type AG4S3 bas slifelded lead. Types FM 441 and FM442 for Ford generators. Type AM454 for ammeter and gauges-han waxed-paner case, can be held in place whth vibrator hash and seneral noise suppression (have very low RF imped vibrator hash and seneral noise suppression (have very low RFimped-ance)-both have waxed-papef case. Type RF481 regtires Mallory TH-
19 mountiug clip (see Page 138). CA275X, hermetically sealed bathtub type is used for general noise suppression in marine and aircraft equipment. Av. shps. Wt., 3 oz.

AC PLUGS AND RECEPTACLES
U. L. Approved. All are rated at 15 amps, 110 v , or $10 \mathrm{amps}, 250 \mathrm{v}$ High-dielectric black bakelite. Fig. G mounts with retainer ring. Requires $11 /{ }^{\prime \prime}$ bole. Fig. 11 has mus. plate. Requires $110^{\circ}$ hole. mitg. centers. slotted $11 / 2^{\circ}{ }^{10} 1 \frac{1}{6}$. Fig. \& is recessed type. Requires $11 / \%^{\circ}$ hole, mtg . centers. $13 / 4^{\text {. Fix. } K}$ is shtelded type with clamp. FFor standard or polarized plugs. All are 2 pole except $\uparrow 3$ pole. Av. shpg. wt., 3 oz

SUBMINAX RF CONNECTORS

## SUBMINIATURE RF CONNECTORS

Subminiature RF connectors for use with Amplienol subminiature coaxial cable. Feature high efficiency, plus space-saving design. Use screw75 types with each other: push-on connectors only with push-on types -ohm and 50 ohm types cannot be inter-mixed. Plums fit Jacks, buhk acks for chassis or panel mounting if plugs and jacks. cornal wiring is coax: use re ceptacles if internal wiring is noncoas. Feed-through types are for pes manent feed-through connection. All connectors have sold-plated bodies and contacts. Slipg. wt. 302

MULTI-CONTACT PLUGS AND SOCKETS
(ersatile, shielded connectors with 11.15 and
20 contacts. Two-types-cable and classis.
May be combined for "pull-out" rack thounting, iuter-connecting several units, and extending conductors. Mica-filled phenolic plastic has high impact strength, low loss and low slirinkage. Non-rotating contacts are silverplated with . 00002 lard sold shell. Fating
 asier and faster-no pretinning of solder cups is required. All hav eyelets Inserted in mounting holes for added strengeln, and interlocking *arers on ath * Insert only; all others with can. Cable type. 4 oz.. chassis type, 2 oz

## blue ribbon connectors

Amphenol Type 26 Blue Ribbon connectors for heavy-duty operation. Provide an excellent solution to mult-circuit connection. switching and re-routing problems. Unique, self-cleaning spring contacts maintain coatinuity even under conditions of severe vibration. Do not require Houitive polarization prevents in hidden, hard-to-reach locations. insertion and withdrawal force, but provide exceptionally firm, positive contact Exclusive apriny-tension contacts are heavily silver base plated and sold finished; will not tarnish or corrode. Plug contacts are supported

## SERIES 165 AN-TYPE CONNECTORS

The Amphenol Series 165 electrical connectors feature compact design 5,9 or 12 cont dependability. Two sizes are available a gmall size with aectors are avallable with either male or female inserts installed in plus or receptacle. Connectors remain waterproof whether mated or apart. Bronze contacts are sold-plated over a silver base and shells are made of aluminumt. Small receptacles mount in i3/16 hole and are secured through $4, .125^{\circ}$ equally spaced holes on the flange. Flange is only $11 / 0^{*}$

## BARRIER TERMINALS

Barriers between each terminal provide increased insulation. Excellent for industrial and experlmental applicalons. Barriers follow edge of strips and terminate at base. Make a long leakage path and prevent direct shorts caused by frayed wires at the terminals. Base is molded bakelite, with mounting holes at ends. Eyelets and binder screws of nickel-plated brass; terminais of hot tin-finish brass. Barrier-type terminals and fanning strips. when used cogether, insure positive contace and firm connections. No. 140 terminal strips have $5-40 \mathrm{x} 3 / 6$ " binder that screws, $1 / 4$ "metal-to-metal spacing. No. $1+1$ terminal strips have $6-32 \times 1 / 4$ " binder head screws. $3 / 8$ metal-to-metal spacing. No. 142 terminal strips have $8.32 \times 5 / 16^{\circ}$ binder head screws, $96{ }^{\circ}$ metal-to-metal spacing. Av hppe. Wi.t $5^{2}$
Series 40 . Metal-to-metal spacing over bakelite $1 / 4{ }^{\prime \prime}$. Base $7 / 8$ " wide $x \not 1 n^{\prime \prime}$ high. $1 / 3^{\prime \prime}$ centers. Use with Series 160 fanning strips.

## MULTIPLE-CONDUCTOR MIKE AND POWER CABLE

Formicrophone and interconnecting power cable requiremente. No. 20 stranded (26x34), tinned copper conductor, and color-coded conducrubber insulation, rayon braid, tinned copper braid shield. and black ubber outer jacket. Types 8403, 8404, and 8405 have polyethylene nsulation, rayon, tinned copper braid shield, and chrome vinyl plastic jacket. Types 8403. 8404, 8423, and 8424 for all low-impedance mikes; all others for general interconnecting power cable uses. Lengths under 100 ft . avallable only in spool sires listed below.

## 2－CONDUCTOR BROADCAST AUDIO CABLE

All have timned，solid－conper conductors． 8436. 8437 and 8440 have No． 22 solid copper ground wire parallel to twisted pair under copper
splral－wrapped shield（8437，copper braid shield）．All others have 2 conductors under cop－ per brald slield．Onter jackets：Ty pe 8436 and 8437 ，black vinyl plast ic； 8438 and 8439 ，copper braid：8440，chrome vinyl plastic．Type 8438 and 8440 have waxed cotton braid over cotton wrap； 8436 and 8439 ． cellulose－acetate yarn braid over cellulose－acetate yarn wrap； 8437 waxed cotton braid over cellulose－acetate yarn wrap．

## MH MINIATURE TELEPHONE RELAYS

Extremely fast acting, long life telephonc-type relays. The size, sensitivity and abllity to carry a large number of poles, plus the wide variety of coils avanable make these relays ideal for automation, weight are critical fapplications where space and signed for intermittent duty only. Sealed AC models operate with a built-in rectifier. DC modwithstand 10 G vibration $10-55$ cycles. Units are 4 PDT, except DPDDT, 4.5 ma current actuated; 10,000 ohm coil resistance. All relays have $1 / \mathbf{0}^{\circ} \mathrm{sll}$. ver contacts rated at 5 amps; break-before-make. Stack insulation, laminated plienolic. Bobbin is
constructed of bakellte to provide 500 v . ms break.

Sealed down. Indicates hermetically sealed in metal houslng. Header in glass with solder terminals; min. leakage resistance of $10,000 \mathrm{megs}$ at $50 \%$ humidity. Sizes: Open type, $15 / 6 x^{25} / 38 \times 1960$; sealed type, $111 / 16 \times 11 / 2 \times 21 / 2^{\prime \prime}$. Mounting: MH11L model has a No, $9 / 2$ tapped stud $11 / 2 z^{\prime}$ long, plus a locating boss. All other open models have four No. $3-48$ holes on $3 / 183 / 8$ a | Stock Av. shog. wis.: Open type. 5 oz.; sealed type. 6 oz. |

## ABC MEDIUM POWER RELAYS

ABC series medium duty power relays with dust covers. Typically used with small motors, industrial controls, and similar applications. All relays have DPDT silver conpacked with ampere current rating. Snap-on terminals packed with each relay. Size: $1216 \times 3 \times 23 / 3^{2}$ high above chas-
sis. Mounting: One No. $8-32$ stud $3 /{ }^{*}$ long. Shpg. Wt., 12 oz.

Amphenol Sockets for KCP Relays. Type 146-103 octal for all above enclosed relays except KCP14. Barrier type. Meets N.E.M.A and insulating redurements. Has convenient screw-type tie points, separated 40 H 180 . NET
Type 77 MIP11 Soeket. For Type KCP14 relays above. Molded

## LM PLATE CIRCUIT RELAYS

Quality, medium-cost plate circuit relays. For photoelectric control, counting, and similar circuits. Armature ppring tenslon adjustment and adjustable residual screw permits settings for specific voltages or currents. Has H0 fine silver contacts rated at 5 amperes. 115 volts 60 cycles, non-inductive load. Sizes: LM5. $25 / 16 \times 1 / 4 \mathrm{I}$
$2 \% 6{ }^{\circ} ; \mathrm{LM} 11.23 / 16 \times 25 / 2 \times 21 / 2^{\prime \prime}$. Av. shpg. wt., 9 oz .

## SSSD SUPER-SENSITIVE DC RELAY

An ultra-sensitive 1 ma relay SPDT contacts are pure silver. Rated at 2 amps 115 v . AC or 28 v . DC non-inductive load. Precision-balanced armature and pin hinge assembly pivot in needle-poin bearings-virtually friction-free movement. Coi resistance, 10,000 ohms. Dual series coils with yarnish-impregnated coll windings. Mounting is
by 2 tapped 6,32 holes on $23 a^{*}$ centers. Size $11 / 6^{\circ}$ long, $15 / 5^{\circ}$ wide and $111^{\circ} 6^{\prime}$ high. Shpg. wt 8 oz $\begin{array}{lll}75 \text { P 844. 1-24, EACH. } 12.00 & 25-50, \text { EACH } \\ 51-74, ~ E A C H .\end{array}$ 51-74, EACH........... 10.80 76.99, EACH.

## GENERAL PURPOSE RELAYS

## KA GENERAL PURPOSE RELAYS

Highoquality, general purpose relay. Particularly useful for transmitters, power supply control and remote switching applications. Have heavy-duty contacts rated at 5 amps. AC coils are for 60 cycles. Moisture resistant against humidity. Withstands

Amphenol Sockots for KRP Relays. Type 146-103 octal for all above enclosed relaya except KRP14. Bartier type. Meets N.E.M.A and U.L. reguirements. Has convenient screw-type tie points, separated by insulating barriers. Mtg. centers. $111 / 6{ }^{\circ}$. Shpg. wi., 5 oz. 40 H 180 . NET
Amphenol Tyoe 77M1P11 Socket, For Type KRP14 relays Molded bakelite body. Mounts in $111 / \mathrm{s}^{\circ}$ hole. With retainer ring. 2 oz

## GA MULTIPLE LEAF RELAYS

A rugged. multiple leaf relay for general circuit and power control applications. Designed to withstand shock and vibration encountered in mobile operation. very useful for remote power bitching. Morsture-resistant coil prevents damage by high humidity. Con$1 \times 1115^{25} 1^{25}$ hioh. Hies tapped core 10 permit mounting with single $18-32$.

## KL MULTIPLE-CONTACT RELAYS

Higluly versatile midget relays. Ideal for limited space applications. Extra-long actuating coil permits double the ampere turns; provides more power to
actuate contacts and maintain 25 grams hold-down pressure. High dielectric phenolic insulation. Fine silver contacts; rated 5 amperes at 115 volts, 60 cycle AC, mon-inductive load. Coil volts: *DC; $\uparrow 60$ cycle AC. $111 / 15 \times 15 / 15 \times 119 / 6^{\circ}$. Av. shpg. wi.. 4 oz .

## MP SNAP ACTION RELAYS

Snap action relays designed for starting split-phase capacitor-type motors of up to $11 / 2^{\text {-hp }}$ capacity. SPDT silver contacts are rated at 25 amps-large enough for many applications. AC coils are for 60 cycles. Mounts with 4- $\$ 6-32$ screw's, $3 / 4 x^{\prime \prime} / 0^{\circ}$ ctrs. Size. $17 / \mathrm{x} \times 21 / 4 \times 11 / 4^{\circ}$. Av. shpg. wt., 4 oz .

## KE SERIES SUBMINIATURES

Sub-miniature latching relay with mechanical latch and electric release. Operates on monentary Mounting: 3 No. $6-32$ stude. Pure silver contact rated 2 amps. Useful where relay:operation is based upon single pulse signals, or where it is preferable that relay coil draws no current while remaining in "elosed" periods, eapecially for considerable length of time. Especially suited to applications requiring a latching relay of amall size i $1 / 22 \times 111 / 16 \times 2 / / 32^{\prime \prime}$. "Sealed. Shpg. wt., 6 oz

## KM SERIES SUBMINIATURES

Sub-miniature relay for multiple switching applications. Relay win simultaneously switch one, two or threc electrically actuated devices; exceptionally easy to install and wire into circuit. Especially well suited for use where size and weight are critical factors; weight is only $7 / 10$ oz. per relay. Contacts rated 2 amps. Solder lug terminals are all located at one end of relay. Size, $11 / 6 x$

## Relays and Contact Protectors

## GUARDIAN RELAYS \& SOLENOIDS

## 2200-U POWER RELAYS

DPDT power relay featuring interchangeable coils. Relay may be modified by finserting replacement coil of another voltage. For motor starting, heater loads and other heavy-duty uses. Contacts rated at 25 amps, conrequirement, 9.5 va; coil drain, approx. 080 amps at 115 v ., 60 cycles. $33 / 1 \times 21 / 2 \times 21 / 16^{*}$. Av. shpg. wt., relays, 12 oz.; coils, 6 oz.

Allied olso stocks a complete selection of Amperite Regulator
Tubes for industrial applitations. See page 110 for listing.

## UNIVERSAL " 200" SERIES

Universal interchangeable parts for assembling custom relays. Listings nclude AC, DC, and plate coils, and swith contact assemblies. Complete relay requires one coll and one contact assembly. For additional contacts use the contact switch parts kit. Contact ratings given are att 115 v .60 cycle AC, non-inductive load. Use two $0-32$ screws for mounting. Overall size: With standard contact assembly $27 / 8 \times 11 / 8 \times 11 / 4^{\circ}$; midget contact assembly, $21 / 16 \times 11 / 8 \times 11 / 2^{\circ}$. Av. shpg. wt., 40 oz.

## Industrial Relays

Precision time-dclay relay's. Provide adjustable delays-down to $1 / 10$ th second, or delays up to 5 minutes, varied by outside serew adjust ment on ciming head. For vertical operation only. Consist of sealed timing head, solenoid assembly. snap-action switch with fine silver contacts, loads. DB sufix indicates double-break type with is amp contact rating; SB indicates single-break, with 8 amp rating. "Use" column numbers mean that delay gtarts when (1) coil is energized, (2) coil is de-enerzized (3) lever is released manually, (4) coil is energized and de-energized, (5) delay starts on main contacts when coil is energized but no delay on auxiliary SPDT contacts; main contacts transfer at end of time delay. (6) Instant transfer on main and aux. contacta when energized. Instant retransfer on aux.; adjustable time delay on main when de-energized. (7) Depressing lever starts time delay, after which contacts are automatically energized. Contacts reset to normal when lever is released. NED-13 is double-head type for adjustable delay in both directions. NEL-11QT is remote push-button type with hold-in awitch. All relays isted may be mounted from front or back. NET relays provide 2 -step delay: first delay period from 0 to 15 sec . 2 nd period from 01 sec. to 5 min. NET-15Q, NET-160, NET-25Q and NET-26Q consist of standard Agastat plus SPDT aux. switch at bottom of terminal block. NEU-11QT is U.L. Approved. Types G,GY and GZ are general-purpose enclosures similar to NEMA Type 1: GY for NEL-11QT. GZ for NET and G for all others. Coil voltages are $50-60$ cyc. AC. Av. slze, $21 / 2 \times 21 / 2 \times 43 / 4$, except $\dagger 21 / 2 \times 21 / 2 \times 6^{\circ}$. Av. shpg. wt. $21 / 4$ lbs.

## BARBER-COLMAN TYPE "O" ULTRA-SENSITIVE RELAYS

Ultra-sensitive, DC-polarized relays. Feature extremely high sensitivity. Ideal for use wherever power supply is limited. Will operate for years with mercury cells. Widely used in plate circuits. High-speed re sponse; can be operated in excess of 100 cps . Fine tion. Polarity of signal determines which contact closes. Sensitivity is adjustable for precise setiting Two Alnico magnets are used for polarizing field Balanced armature is mounted on torsional supports in air gap, assuring high resistance to physical shock. Normal tolerance on pull-in current at in bases for chassis installation. $1 Y_{6} \times 31 / 1 \times 17 / 8^{\circ}$. Shpg. wt., 10 oz .

## EBERT HEAVY-DUTY MERCURY-PIUNGER RELAYS

Heavy duty mercury relays, similar to above. Types HD-1 and HD-2 are rated at 60 amps for 115 volts $A C$ and 35 amps for 230 volts $A C$ 60 cycle. DC rating is 12 amps at 120 volts and 7 amps at 240 volts Type HD-4 2-pole relay: Each tube controla 60 amps at 115 volts AC and 35 amps at 230 v. AC, 60 cycles. DC rating for each tube is 12 armps at 120 volts and 7 amps at 230 volts. Type HD-7 3 -pole relay Each of the 3 tubes can control up to 60 amps at 115 volts AC and 35 mpss at 230 v . AC, 60 cycles. DC rating for each tube is 12 amps at 20 volts and amps at 20 volts. Al Uderwriter's Laboratories Ap proved. NO indicates normally open; NC, normally closed. Shipped by express only

## EBERT MINIRELAY

Extremely compact in size. Meets critical space requirements and is capable of handling load capacities nearly twice that of ordinary armature-type mechanical relays equal size. Rated at 20 amps or 1.5 HP at 115 volts (NC) types. In either normally open (NO) or closed contacts."Make" and "break," 45 ms . Actuating coil operates from $115 \mathrm{v} . .60$ cycle AC. Size, $37 / 8 \times 17 / 3 \times 11 / 2$ Shipped by express only.

## EBERT SPST MICRELAY

Highly sensitive relay for handling highpower, high-current loads. Uses a 2 D 21 thyratron to control a built-in mercury-plunger relay. Actuated by control sipnals as low as $3 \mu \mathrm{a}$. For control circuits, ito 10 megohms impedance. Contacts: Standard Type-35
amps, 115 v . AC; 25 amps, 230 v . AC and
 12 amps, 120 v . DC. Heavy-Duty Type-
60 amps at 115 v . AC. 35 amps at 230 v . AC.
Provide normally open operation. $5 \times 81 / 2 \times 4^{4}$. For $115 / 230 \mathrm{v} ., 60$ cycles Shpg. wt. $81 / 2 \mathrm{lbs}$. Express onlv. 41.25 75 P 256. Standard Ty pe. NET... 43.00

## DOW-KEY COAXIAL ANTENNA RELAYS

Typo OKC-G. Precislon-built coaxial antenma re lays. Re-designed magnet provides thrust pressure In excess of 200 grams-prevents intermittent failure in closing of receiver circuit. Shielded magnet. AC type completely free of hum or chatter. Contacts rated 1000 watts. Negligible change in SWR up to 300 mc . Built-in automatic receiver antenna shorting device. Grounds contact leading to receiver berore tongue makes contact with transmitter-prevents RF from reaching receiver circuit. Breakdown voltage: over 1000 volts rms. Iakes operating B+ of receiver. Connectors, relay tongues and brass parts
75 P
75 P
747 . For 110 v. AC. NET.
F
SPDT Swltoh. For above relays. Actuated by plunger on relay. 2 oz
 Type DKM. Smaller coarial 6 v. DC relay without external SPDT switch and receiver shorting device. For mobile use, $31 / 4 \times 21 / 2^{\circ}$. Wh.. 7 oz . 75 Pl49. NET
Type DKF-2 Connector. Double male. For mounting relays directly to output of transmitter, Designed for UHF. Heavy silver plating. Recommended for indoor use. Non-locking type. Shpg. wt., $60 z$.
75 P 136. NET
1.85

12VDC Coll. Model DK C-M. 12 volt relay coil for converting DKM 6 volt $D C$ relay or DKC-G 6 and 110 volt AC relays for 12 volt $D C$ use. Ideal for the new 12 v . automotive systems. Shpg. wt. 3 oz . 75 P/38. NET.

## Interference Filters

## PLUG-IN TYPE FILTERS

Eosy Installotion of Rodio, TV, Appliance

## CORNELL-DUBILIER "QUIETONE" FILTERS

Type IF-18. Highly effective all-wave capacitive-ind uctive type of A filter for buppression of severe interference. Used where ventilating or air conditioning units, wasling machines, or machine toon interfere with reception on radio or cord and plug attached. Binding post rot attachment ofif used. Kated at 115 volts. AC-DC, 5 amps. Stipg. wt., 4 lbs .5 .41 70 E 120 . List, $\$ 9.20$. NET
(8. Type IF-19. Effective capacitive-inductive type filter for use Where interference is severe. Used to eliminate meerierence from permancnt diatherny machines, neon signs. etc. Mor any convenient location. Terminal for Eround connection. Ratell 1 is volts AC-DC.

4.53
C. Type IF-4. Plug-in, cylindrical filter for euppression of mediumC. intensity interference produced by fluorescent lights, electric shavers and similar devices. Well-suited for use with small receivers such as AC-DC midget sets, portable TV kets, etc. Filter pugs directic-into $5^{\text {wall; appliance or receiver plugs into filter. Rated }}$

$73 c$
C Typo IF-6. Convenient plug-in filter for elimination of moderate C interference. Eispecially suitable for suppression of interference caused by fluorescens lights. electric slavers, and similar devices. nects between power line and appliance, or betwern, power line and long. Shpg. wt. 6 oz. NET
1.15

## MALLORY INTERFERENCE FILTERS

D. Type LCE. Capacitive-inductive filter for eliminating extreme forms appliance. Rated $110-220$ volts. AC-DP ${ }^{\text {Prounding }} 5$ to motor or frame of thh mounting flanges Size. $215 / 46 \times 31 / 16 \times 39 / 6{ }^{\prime \prime}$ Shpg. wt., $11 / 4 \mathrm{lbs}$ 70 B 328. # Clock Timers and Foot Switches 

INTERMATIC CLOCK TIMERS FOR HOME, OFFICE \& SCHOOL

(A)

## MODEL RC 2021-4 UNMOUNTED TIME SWITCH

A Automatically turns on radios, television sets, toasters, coffeemakers and other electrical devices-at any pre-set time within a 12 -hour period. Also serves as an accurate. highly attractive timepiece. Converts any radio to a modern clock-radio-an excellent musical alarm. An ideal service replacement for clock-radios. May be installed in a small case with an AC outlet and line cord for use with appliances anywhere in the house. All controls, off-automaticon, time adjust and timer set, conveniently located on chrome outer dial face. Easy to install. Requires $31 / 2^{\prime \prime}$ diameter hole; overall size. $31 / 2 \times 31 / 2 \times 115 / 16^{\prime \prime}$ deep. Built-in single-pole switch handles up to 15 amps. 1650 -watt load. Mounting centers, $313 / 5^{\prime \prime}$. U.L. Approved. For operation from $110-120$ volts, 60 cycle AC. Shps. wt.. 1 lb . 78 B 399. List. $\$ 9.00$. I to 5, NET EACH. 6 or More, EACH.

## MONTGOMERY MODEL M-24 PROGRAM CLOCK

Ideal for schools, industrial and service organizations. Provides dependable automatic control and operation of buzzers, bells or horns, on a 24 -hour schedule. Permits manual operation at any time for special program schedules, personnel paging or sounding emergency alarm, without affect ing accuracy of preset schedule. Eliminates clock watching and button pushing. Program scliedules can easily be set or changed by inserting pins in desired time slots of 24 -hour mechanism. Program disks have 288 time slots--permit actuating sig-
 nal at up to 5 minute intervals. Duration of signal nal at up to 5 minute intervals. Duration of signal
is adjustable from 4 to 20 seconds. I'rogram mechanism is automatically set to correct lime by turning the clock hands-assures perfect synchronization. Switch for automatic silencing of signals during any days or nights of the week. Single-circuit timer contacts rated at 10 amperes. Gray enameled steel case. $11 \times 8 \times 4^{\prime \prime}$. For $110-120$ volts, 60 cycle AC. Shpg. wt., 12 lbs.

## Build Your Oun Quality Electionic Equipment at Bia Sawings

## BULD Allue's own knight-kits

## and get the most for your money

Knight-Kits are available only from Allied. Creatively engineered and styled by top-notch professionals, these famous kits incorporate every desirable feature that 37 years of experience in kit design can provide. Progressive in every way, while retaining traditionally high standards of quality, more new Knight-Kits are continuously being released, than any other brand. You can always look to Allied for the latest and best in money-saving Knight-Kits.

here's why you get more for your money in

## knight-kits

## AhEAD OF THE FIELD WITH

 MORE, NEWER FEATURESWide use of printed circuit boards and transistors; ultra-new, printed circuit switches; newest premiumtype tubes and circuitry; smart, modern styling these and other features put Knight-Kits far in front!

THERE IS A MONEY-SAVING KNIGHT-KII FOR EVERY NEED It pays to check these supervalue kits before you buy. For example, in high fidelity and test equipment, you can save up to half of the cost of equivalent factory-built units, when you buy Knight-Kits!

## PEAK PERFORMANCE AND YEARS OF SERVICE

You get performance plus! All circuits are designed to operate well within rated limits for every part-rigid quality control assures you of trouble-free operation and years of service from any Knight-Kit you choose.

## KNIGHT-KITS ARE EASIEST TO ASSEMBLE-BY FAR!

No technical experience is required toassemble KnightKit equipment. Carefully written instruction manuals, with "Step-and-Chek" directions and "Wall-Size" pictorial diagrams, make assembly remarkably easy.

YOU DO THE EASY BUILDING -AND EARN BIG SAVINGS! When you choose famous Knight-Kits, you save because our giant buying power makes it possible to present these kits at lowest cost-and in addition, you save because you do the assembly yourself.

## YOU GET THE FINEST

## PREMIUM-QUALITY PARTS

Only the finest, brand-new parts are used in KnightKits. Caulmium-plated steel chassis-extra-strong steel casesand panels-solidbakelite knobs plus spring-looded, disappearing handles on test units for easy stacking.

the set-screw

(il) Registered Trade-Mark of Allied Radio Corp.

## EASY PAYMENT PLAN FITS YOUR BUDGET

Knight-Kit electronic kits and accessory equipment nay be purchased under our Easy Payment Plan-the most liberal plan in electronics. Your order need total only $\$ 45.00$ or more, and a down payment of only $10 \%$ is required-you then complete the balance in small easy-on-t he-budget monthly payments. Carrying charges are low and there's no "red tape"-no finance companies to deal with. If the balance is paid within 60 days, carrying charges are refunded in full. For complete
 Easy Pay Plan details, see page 396.

# knight-kits 

are backed by AILIED-

$\rightarrow 1 A^{\circ}$America's Pioneer in Electronic Kits Backed by Allied's 37 years in the electronics industry, the name of Knight-Kit on electronic kits has come to mean the mark of incomparable quality and dependability. Only Allied, with its unlimited buying power, can offer expertly engineered kits at unbeatably low prices. To assure you of rop performance, each new Knight-Kit must pass Allied's rigid standards for day-in, day-out operation. Every kit goes through many stages of development and is thoroughly field tested. It is no wonder that experienced technicians and engineers, as well as students, look to Knight-Kits for the latest design and unsurpassed performance.

## KNIGHT-KITS are easiest to build-you do the easy, satisfying assembly and SAVE

Whether you're a beginner, or have years of electronic experience, you'll find that it's really fun to build a Knight-Kit. All the hard work has already been donemany kits have printed circuitry and our latest exclusive printed-circuit switches. You'll have only the highest praise for Knight-Kits, in ease of assembly and outstanding quality and low cost.

## IT'S LIKE HAVING A GOOD INSTRUCTOR AT YOUR SIDE

"STEP-AND-CHECK" INSTRUCTIONS. No experience is needed to assemble any Knight-Kit. Clearly written any Knight-Kit: Clearly written you when and how to mount each part; tell you exactly when to solder. As each step is completed. check it off-you know just what you've done every step of the way.

KING-SIZE DIAGRAMS. Wall-size pictorial diagrams are another reason Knight-K its are so easy to assemble. Every kit contains at least one "King-Size" picture diagram-you don't have to know how to read schematic symbols. Diagrams may be tacked over your work table for convenient reference.

CLEARLY MARKEO PARTS. Resistors are neatly mounied on cards with identifying symbols (no need to know color-coding)-canacitors have plainly marked values-wires are poe-cut to size. pre-stripped and col-pre-cut to size. pre-strioped and col-
ored for easy selection. Everything you need is included-there's nothing else to buy, not even solder!

## Knight-Kirs ARE IDEAL FOR SCHOOL USE

Schools everywhere use Knight-Kits for easier, more effective electronics instruction. KnightKits maintain a high level of class interest and make the job of teaching easier. Give every student a chance to produce something he can point to with pride. Knight-Kit offers hi-fi units, lab kits, Amateur gear and test equipment. Allied offers special arrangements on large-quantity purchases. Let us know your requirementsaddress our Commercial Division.

SENSATIONAL NEW EASY-TO-BUILD

## HI-FI knight-kits

now everyone can afford true hi-fi comparable to the best

A COMPLETE LINE OF ALL-NEW MATCHED HI-FI COMPONENT KITS

Now you can build your own professionally styled hi-fi equipment at tremendous savings. Painstaking design and highest quality components guarantee exceptional performance and dependability comparable to the finest factory-built units. Enjoy the best in hi-fi music reproduction for less. You're sure to find just the components you want in the complete listings offered.

FIRST TRULY CUSTOM-STYLED HI-FI KITS

Knight-Kit hi-fi components are designed to take their place alongside the finest of home furnishings. Beautiful as well as functional, Knight-Kit hi-fi units are as easy to look at as they are to use. Highest-quality materials and workmanship insure that they will stay that way!

## BUILD YOUR OWN COMPLETE HI-FI <br> MUSIC SYSTEM-SAVE UP TO 50\%

Now, with Knight-Kits anyone can afford to bring breathtaking new musical adventures into his home. Knight-Kits offer a hi-fi music system to fit any budget-a system that's right for you. Build with Knight-Kits and save up to $50 \%$.

## KNIGHT-KIT 18-Watt Complete Amplifier Kit

## ONLY <br> \$3995

- New, RCA 6973 High-Fidelity Audio Tubes
- Only $0.5 \%$ Distortion at Full 18 Watts
- Exclusive Printed Circuit Switches
- Two Printed Circuit Boards
- Response, $\pm 1 \mathrm{db}, 20$ to $30,000 \mathrm{cps}$

The new Knight-Kit 18 -watt high-fidelity amplifier kit provides brilliant performance and custom styling at exceptionally low cost. Here is an amplifier designed to bring flawless high fidelity sound into your home at half the cost of comparable commercially assembled units-an excellent unit around which a fine home music system can be built. Delivers a full 18 -watts output at only $.5 \%$ distortion using the new 6973 high fidelity output tubes-designed by RCA for unparalleled high-fidelity sound reproduction. Construction is simplified through use of a Knight-Kit exclusive printed circuit switch and two printed circuit boards-most of the wiring has already been done for you. With the Knight-Kit "Step-and-Chek" instructions you'll find this amplifier fun to build-even if you have no previous electronic experience.

SPECIFICATIONS: Frequency Resporse: $\pm 1 \mathrm{db}, 20$ to $30,000 \mathrm{cps}$ at rated output. Distortion: Only $.5 \%$ at $1 \overline{8}$ watts. Ium \& Noise Level: Better than 60 db below 18 watts. Sensitivily (tape head and magnetic cartridge): 5 mv for 18 watts output. In puts: Microphone; Auxiliary; Tuner; Tape player; Magnetic (GE, Pickering); Ceramic; Tape Head. Conirols: Selector-Equalizer (Mic, Aux, Tuner, Tape, Magnetic, Ceramic, Tape Head Equalization-RIAA, FFRR, NARTB, AES, RCA, 500 cps, COL); Bass Boost and Attenuate; Treble Boost and Attenuate; Off-On/Volume. Oulput Impedance: 4, 8, or 16 ohms. Tubes: 1-ECC83/12AX7 preamplifier-equalizer driver and tone control driver, 1-ECC83/12AX7 voltage amplifier and phase inverter, 1 -ECC83/12AX7 push-pull driver, 2-6973 push-pull power output amplifiers; 1-EZ81 rectifier.
Complete with all parts, wire and solder, tubes, deluxe cabinet and step-by-step instructions. Size, $4 \times 13 \times 8^{\prime \prime}$. For operation from 110-120 v., $50-60$ cycle AC. Shpg. wt., 15 lbs.

PRINTED CIRCUIT SWITCHES
Another Knight-Kit first! This exclusive Knight-Kit development simplifies kit construction - eliminates critical switch wiring, one of the major stumbling blocks encountered by the inexperienced kit builder

## 2 PRINTED CIRCUIT BOARDS

All the critical, complex wiring is already completed. Two printed circuit boards contain the wiring for all tubes except the rectifier. With $90 \%$ of the wiring completed, assembly time is reduced to a minimum.

## PROOF OF SUPERIOR

## Knight-Kit PERFORMANCE

The frequency response and power curves at left, graphically illustrate the superiority of Knight-Kit hi-fi components. Before you buy, compare these curves with other kits or assembled units. You'll agree that Knight-Kits are the finest values available anywhere.

## hl-fi knight-kits equal to the best

3 printed circuit boards. Assembly is quick and easy the KnightKit way-printed circuits trim wiring to a minimum and eliminate errors-you'll get perfect results.

EXCIUSIVE PRINTED CIRCUIT SWITCHES. An important KnightKit development that makes short work of the most tedious part of amplifier kit building-assembling equalization circuits.

accurate equalization. By laboratory measurement, within $1 / 2 \mathrm{db}$ of manufacturer's recording curvesbetter than all but the most expensive of assembled amplifiers!

## IDEAL FOR USE WITH Knight-Kif TUNERS!

Use the Knight-Kit 30 -watt amplifier as the heart of a hi-fi system; it's a perfect match, in quality and styling, to the Knight-Kit FM tuner, or the FM-AM tuner listed on the opposite page.

\author{

- Exclusive Printed Circuit Switches-3 Printed Circuil Boords <br> - 8 Different Inputs plus A-AB-B Speaker Selector <br> - Record Equalizotion Within $1 / 2 \mathrm{db}$ of Recommended Settings <br> - Frequency Response, $\pm 0.5 \mathrm{db}$ from 15 to $100,000 \mathrm{cps}$
}

Entirely new in concept and design, the Knight 30 -watt amplifier is the finest complete hi-fi amplifier you can buy in kit form! It is exceptionally easy to assemble, and its superb specifications put it in a class by itself; its performance matches that of commercially assembled units costing up to twice as much. Every necessary control is provided in the preamplifier section, including 16 combinations of equalization, each accurate within $1 / 2 \mathrm{db}$ of the record manufacturer's actual recording curve. Components are of the finest quality, and include easy-to-solder printed circuit boards, exclusive printed circuit switches, premium 12AY7 tube and oversized transformers. Damping factor is continuously variable from -4 to +35 .
SPECIFICATIONS: Power A mplifier Response: $\pm 0.5 \mathrm{db}, 15$ to $100,000 \mathrm{cps}$ at 30 watts output. Harmonic Distortion: $0.55 \%$ at mid-frequencies; never exceeds $1 \%$ from 20 to $40,000 \mathrm{cps}$ at 30 watts. I.M.: $0.74 \%$ at 20 watts. Hum and Noise: Better than 60 db below 30 watts at all high-gain inputs; 75 db at all low-gain inputs. 8 Inputs: Tape Head, Tape Preamp, G.E. and Pickering Cartridges. Ceramic Cartridge, Microphone, Auxiliary, Tuner (with level set control). Tubes: 12AY7, 4-ECC82/12AU7, 2-5881; GZ34 rectifier. Controls: Input Selector-Turnover (Tape, Tuner, Mic, Aux, FFRR, RIAA, Eur, AES); Rolloff (AES, Eur, RIAA, FFRR); Bass ( $\pm 15 \mathrm{db}$ at 20 cps ); Treble ( $\pm 15 \mathrm{db}$ at 20 kc ); Level; Off-On/Loudness (continuously variable); A-AB-B Speaker Selector (impedances may be mixed without misnatcl1); Tape-Phono Switch; Rumble Filter Switch. Output Impedances: 8 and 16 ohms. Balance adjustment is provided for output tubes. DC on all preamp filaments. All specifications absolutely guaranteed.
You'll find the Knight-Kit 30 -watt amplifier easy to assemble, even if you have never built an electronic kit before. The 3 printed circuit boards and exclusive Knight-Kit printed circuit switches make assenbly easy, because most of the wiring is already done! Step-by-step instruction manual is thoroughly illustrated, and nontechnical. In addition to the manual, there are wall-size picture-diagrams to make every step completely clear.
Size, $4 \frac{1}{4} \times 15 \times 15^{\prime \prime}$. Includes French gray cabinet; control panel is finished in bright aluminum and ebony. With tubes, wire, solder and all parts. For $110-120$ v., $50-60$ cycles AC. Shpg. wt., 32 lbs.

76.95

ADVANCED CIRCUIT WITH $A F C$. Effortless, drift-free FM tuning is assured by Autonatic Frequency Con-trol-it "locks in" stations, keeps them tuned electronically!

EASY FLYWHEEL TUNING. A gentle touch moves the neon glow tuning pointer to the station you select, smoot hly and quietly.

PRINTED CIRCUIT WIRING. The tuner of the futuretoday! Except for power leads, all wiring is done for you on the printed circuits.

## Top-Performing KNIGHT-KIT Hi-Fi FM-AM Tuner Kit

- Modern Printed Circuit-Mast of the Wiring ls Already Done
- Exceptional Sensitivity- $2.5 \mu$ r for 20 db Quieling On FM
- Flywheel Tuning Plus AFC-Lacks In Stations Automatically
- Completely Pre-Aligned-No Further Adjustment Necessary

Easy to look at -easy to use-here's a high fidelity tuner with every feature required for top performance on both FM and AM! You'll be proud to place it where everyone can see its smart contemporary styling. It's easy to assemble, too; the entire unit has been carefully designed for quick, easy construction. Superior performance, advanced design and elementary, step-by-step assembly make it the greatest tuner value ever!
A tuned RF stage on FM provides high sensitivity - 2.5 microvolts for 20 db quieting. Wide-range, flat frequency response guarantees true highfidelity FM reception that vividly re-creates the full sonority of broadcast music. The built-in ferrite antenna may be rotated to improve reception of a favorite AM station that may be very weak. Smooth, professional flywheel tuning enables you to glide from station to station, effortlessly; automatic frequency control (AFC) locks in FM stations, eliminating distortion due to mis-tuning. AFC defeat switch helps tune weak stations. Cathode follower output, with extra output jack for convenient "off-theair" recording directly from the tuner.
The Knight-Kit FM-AM tuner is styled to take its place alongside the very finest high-fidelity equuipment; it is completely enclosed in a beautiful French gray case, supported on tapered, chrome-finished feet. Centered on the ebony-and-aluminum control panel is an easy-to-read slide rule scale; stations are located by the self-illuminated neon glow pointer, as it moves across the scale with jewel-like orange brilliance.
fM SPECIFICATIONS: Sensitivity: $2.5 \mu \mathrm{v}$ for 20 db quieting. Hum and Noise: -60 db . IF Bandroidth: 200 kc at $50 \%$ down on curve. Frequency Response: $\pm 0.5 \mathrm{db}, 20-20,000 \mathrm{cps}$. Distortion: Under $0.6 \%$. AM SPECIFICATIONS: Sensitivity: $3 \mu \mathrm{v}$ for 10 db signal-to-noise ratio. LF Bandwidth: 8 kc at $50 \%$ down on curve. Frequency Response: 20 to 8000 cps .
Most of the wiring is already done on the single large printed circuit board; pre-aligned RF and IF sections mean that you can play the tuner-without further adjustment-as soon as assembly is complete! Simple, nontechnical instructions take you through the entire assembly, a step at a time. Everything is supplied-all parts, pre-cut wire, solder, output cable, and the at tractive French gray steel cabinet. Size, $8 \times 41 / 4 \times 131 / 4^{\prime \prime}$. For 110 120 v., $50-60$ cycles AC. Shpg. wt., 12 lbs. 83 YX 787. NET.

## KNIGHT-KIT 10-Watt Hi-Fi Amplifier Kit

NET $\$ 23^{50}$

- Ideal for Low-Cost Home Music Systams
- Response, $\pm 1 \mathrm{db}, 30-20,000 \mathrm{cps}$
- Separate Bass and Treble Tone Controls
- Fine Fidelity, Very Low Distortion

The Knight-Kit 10-watt high-ficlelity amplifier kit provides wide response and smooth reproduction at exceptionally low cost. Construction is greatly simplified by an easy-to-follow manual, complete with schematic diagrams and clear illustrations-anyone can easily assemble this fine amplifier.
Frequency Response: $\pm 1 \mathrm{db}, 30-20,000 \mathrm{cps}$ at 10 watts. Marmonic Distortion: Less than 0.5\% at 10 watts. Intermodulation Distortion: I.ess than $1.5 \%$ at 10 watts output. Controls: Volume, Bass, Treble, and Off-On. With input for crystal phono or tuner. Chassis is punched for preamp kit below (for use wit h magnetic cartridges). Matches 8 ohm speakers. Tubes: 2-6SN7GT, 2-6V6(:T, 5 Y 3 Cl rectifier. Kit is complete with tubes, all parts, wire, solder, and chrome-plated chassis. Leess only preamp parts and black finished enclosure (below). Size: $7 \times 13 \times 6^{\circ}$ deep. For operation from $110-120 \mathrm{v}$., 50.60 cycle AC. Shpg. wit., 14 lbs. 83 YX753. Net

## ChOOSE FROM OUR NEW SELECTION OF KNIGHT-KIT HI-FI SYSTEMS

Be sure to see pages 12 and 13 for a selection of complete high-fidelity systems featuring Knight-Kit components. Each system brings you genuine hi-fi at unsurpassed savings: You save because the cost of these systems is far less than the total cost of components purchased separately-and you save by doing the easy assembly yourself. No previous experience is necessary when you build Knight-Kit hi-fi components.

## save money! build your own knight-kit speaker system

EASY TO ASSEMbLE. No experience is required to assemble Knight-Kit speaker system kits. Illustrated, clearly written instructions make assembly a marvel of simplicity. Build any system in minimum time-you'll be proud of the results.

COMPLETE. You'll find everything you need in a Knight-Kit speaker system kit-highest-quality speakers, pre-finished cabinetry work, all hardware, acoustic material and easy-to-follow instructions. There's nothing else to buy.

KNIGHT-KIT Economy 2-Way Speaker System

NET<br>- Response, 45-14,000 cps<br>s4995<br>- $12^{\text {F }}$ Woofer<br>- Horn-Type Tweeter<br>- Only 7 Pieces to Assemble

Introducing the new Knight-Kit 2-way speaker system kit-pre-finished, and complete with Jensen $12^{\prime \prime}$ woofer and Jensen compression-type tweeter-at remarkably low cost. Absolutely nofurniture finishing is required-all parts have been pre-finished by expert cabinet craftsmen in full-grained, high-luster blonde or mahogany. You do the easy part-just assemble only 7 pieces, mount the speaker components, and enjoy rich, thrilling sound! Special, Jensen-engineered baffle features "ductedport" construction to bring out the full beauty of bass notes. A genuine L-pad tweeter control permits easy adjustment of tweeter for best tonal balance. The assembled unit offers a frequency response of 45 to $14,000 \mathrm{cps}$. Grille-cloth has neutral-tan background with gold-metallic threading-and comes pre-fitted on the front panel! Beautifully styled to complement the decor of any home. Includes high-quality Jensen $12^{\prime \prime}$ woofer. Jensen compression-type tweeter, pre-finished wood parts (with grille-cloth installed), acoustic material, glue, hardware and step-by-step instructions. 26x19x 14". KNIGHT-KIT Deluxe 3-Way Speaker System

## NET <br> $\$ 89^{50}$

- You Save $\$ 9.50$
- Famous Knight 3-Way Speaker
- Knight "Quik-Craft" Corner Enclosure
- Choice of 3 Finishes

An outstanding value in a deluxe, 3-way high-fidelity speaker system-the new Knight "Quik-Craft" KN1300 corner folded-horn enclosure kit and high-quality Knight 12" 3-way speaker. Assembling the enclosure is simplicity itself-all you need is a screwdriver; there's no gluing, sanding, drilling or sawing! There's no finishing to do, either-all exposed surfaces are finished in hand-rubbed Korina blonde, mahogany or walnut. The speaker is of the new 3 -way type-it has a $12^{\prime \prime}$ cone for bass, a specially designed conical radiator for mid-frequencies and a built-in compression-type tweeter (with wired level control and calibrated dial) for highest frequencies. The woofer magnet weighs a full $13 / 4$ pounds for solid bass response. Unexcelled efficiency of the enclosure and superb performance of the speaker combine to cover the whole spectrum of audible sound-from 35 to $15,000 \mathrm{cps}, \pm 5 \mathrm{db}$; and you save $\$ 9.50$ on the regular price of the two units! Includes 3 -way speaker, pre-finished panels, grille cloth, hardware, accessories and instructions. $32 \times 21 \mathrm{x}$ $141 / 2^{\prime \prime}$. Specify Korina blonde, mahogany or walnul when ordering. Shpg. wt., 44 lbs.

## KNIGHT-KIT 2-Transistor Pocket Radio Kit

ONIY - Receives Local Stations Loud and Clear
$\$ 1465$

- Employs Newest Printed Circuit Board
- Operates from Built-In Loop Antenna
- Plays for Months from Single Battery

You'll be delighted with the performance of this outstanding pocket radio! The miniature dynamic earphone, patterned after professional hearing-aid types, provides exceptionally good tonal quality. The two low-drain tronsistors will enable you to operate it for months and months from its long-life, alkaline-cell battery.

You'll enjoy building this extremely efficient, 2-transistor pocket radio-and your enjoyment will be doubled when you start listening to its crystal-clear, local broadcast reception wherever you go. Compact and portable, it fits easily into your pocket and button-down flap allows it to be suspended from your belt. Only $4^{*}$ high, $33 / 4^{*}$ wide, and $134^{\prime \prime}$ deep! You'll find hundreds of uses for this precisely designed, low-cost pocket radioperfect for baseball and football games, picnics, hikes and many other ourdoor activities, as well as private listening indoors.
Employs an extremely efficient, reflex-type, 2-transistor circuit that actually does the work of 3 transistors! It's complete with everything you need-there's nothing else to buy. Works from a built-in, high-gain ferrite core antenna-no external antenna is needed to pick up local stationsl You'll get months and months of service from the new-type alkaline battery, since transistors require an incredibly small amount of power.

Other important features of the pocket radio include the use of an air-dielectric, variable capacitor for smooth, accurate tuning. The printed circuit board, with all critical wiring already completed, simplifies assembly, reduces building time, and almost completely eliminates chance of wiring error. Everything you need, down to the finest detail, is supplied. "Step-andChek" instructions are marvelously clear and won't let you go wrong. Even with no previous building experience, the entire radio can be assembled in just one eve-ning-it's ready for use the instant you finish!
Only two controls: On-Off-Volume and Tuning. Carrying weight is only 11 ounces! Handsome tan carrying case is plastic-impregnated and styled to resemble leather. Size, $4^{" 1}$ high, $33 / 4^{/ 4}$ wide, $13 / 4^{\prime \prime}$ deep. Kit includes two transistors, carrying case, earphone with 3 -ft. cord, battery, wire, solder, all parts, and easy-to-follow instructions. Shpg. wt. $11 / 2 \mathrm{lbs}$.

# TRANSISTORIZED PORTABLE SUPERHET RECEIVER 

## Easiest-to-Build for Thrilling Radio Reception Anywhere

Knight-Kit's newest portable superhet receiver! Up-to-the-minute circuitry employs 5 transistors and pushpull audio output stage for excellent reception of broadcast stations, and remarkably clear tonal quality. Printed circuit for easy assembly. It's a top value!

Highly attractive and compact carrying case, made of durable, impact-resistant extruded plastic, is colorstyled in eye-pleasing ivory and gold. Gold finished end plate has convenient, pull-out carrying handle. Plastic tuning dial has gold insert.

## CLASS B PUSH-PULL AUDIO OUTPUT STAGE AND BIG $31 / 2^{\prime \prime}$ SPEAKER

5-TRANSISTOR SUPERHET RADIO

CHASSIS VIEW

## New KNIGHT-KIT 5-Transistor Superhet Radio Kit

## ONLY <br> \$2995

- Extra-Sensitive, 5-Transistor Superhet
- Uses Texas Instrument Co. Transistors
- Printed Circuit for Easy Building
- Average Battery Playing Life, 200 Hours

Excellent design and efficient circuitry are combined in this handsome, new portable radio kit. Ulira-simple chassis layout, plus use of printed circuit board, provide the utmost in accessibility to all parts and battery - and make assembly unusually easy for afmast anyone. No technical skill is required-you can build it in one evening!

A convincing example of elegant, functional styling and precise design, the new Knight-Kit 5-Transistor Superhet Radio Kit easily ranks with the best of battery-operated portable radios. Among its many excellent features, you'll find: A big $31 / 2^{\prime \prime}$ speaker, larger than is ordinarily used in portable radios of this type; premium-quality transistors and component parts, your assurance of a finished radio kit equivalent in performance to more expensive, pre-wired units; Class $B$ pushpull audio output stage, for clear voice and music reproduction and extremely low battery drain; buill-in, high-gain ferrite loopstick antenna, for top-notch broadcast reception; phone jack oulpul, for private listening if desired.

In a matter of hours, and using only the simplest of tools, you can build yourself a smooth-operating, professionally styled portable radio that will give you up to 200 hours of playing time, from just a single, 9 -volt battery, which is also included!

The orderly layout of parts, as well as the trim styling of the carrying case, reflects the painstaking care that has gone into the design of the Knight-Kit 5 -transistor portable superhet radio. Its smart appearance and highly dependable operation, will make you proud to own it, and equally proud to have built it yourself. Carrying weight of the finished kit is only 22 ounces, and its pull-out, end-handle will enable you to carry it comfortably anywhere
The printed circuit board simplifies and speeds building, and eliminates chance of wiring error. Two controls: Off-On-Volume and Tuning. Volume control is a handy, recessed thumbwheel. Handsome ivory and gold st $y$ ling is accented by the use of ebony black panel trint. Size: $33 / 4^{*}$ high, $716^{\prime \prime}$ wide, $13 / 4^{\prime \prime}$ deep. With all parts, wire, solder, battery and inst ructions. 2 lbs.

FASCINATING HOBBY KIT

An amazing radio-small enough to fit into the palm of your hand-and it operates for months and mont hs on just one penlight battery! This popular kit introduces you to the latest marvels of electronics-the transistor and the printed circuit-and delivers excellent lieadphone reception on the entire $A M$ band. The transistor is highly efficient-uses remarkably little current-lasts indefinitely-and is extremely small in size. The printed circuit eliminates wiring-makes assembly the last word in simplicity. Kit includes specially designed coil for exceptionally good sensitivily and selectivity. A ball bearing variable capacitor assures smooth, effortless tuning. With all paris, transistor, battery, solder, etc. Less headphones ( 4000 ohins or more) and antenna, above right. Size, $31 / 8 \times 37 / 8 \times 3^{\prime \prime}$. Shpg. wt., 1 lb . 83 Y 765. NET

## KNIGHT-KIT "Trans-Midge" 1-Transistor Radio Kił

NET
${ }^{5} 2^{45}$

Here's a tiny, 1-transistor radio kit that's just slightly larger than a pack of cigarettes! Designed to provide a fascinating, fun-filled evening for both experienced and beginning kit builders. You'll be amazed at how easily it goes together and you'll enjoy its exceptionally fine performance. Small enough to fit easily into the palm of your hand, this efficient radio will give clear reception throughout the standard AM broadcast band. Using a high-efficiency transitor, the "Trans-Midge" has excellent selectivity and displays remarkable sensitivity-pulls in stations loud and clear. Requires external antenna.

Features of this expertly engineered little radio include: Efficient, slug-tuned coil for high sensitivity and excellent separation of stations; external knob to permit tuning in stations without opening the case; low-drain transistor which operates for months and months on the single penlight cell supplied; durable, positive-locking, red plastic case. Highest-quality parts are used.
Supplied complete with plastic case, all parts, transistor, wire, solder, battery and step-by-step instructions. Less headphones and antenna kit (see below). Size, $35 / 8 \times 25 / 8 x$ $15 /$ rt $^{*}$. Shpg. wt., 8 oz .

Remarkable Transistor Lab Value For Hobbyists

## NET <br> $\$ 15^{75}$

Amazing, versatile Knight-Kit 10 -Circuit Transistorized Electronic Lab-one of the most rewarding kits ever designed. It's unexcelled in simplicity of construction-truly a marvel of ingenious kit design! One side of the printed circuit board is screen-printed to indicate where all components go-after you solder these basic parts in place, you change from one circuit to the next by merely inserting "plug-in" leads into the proper jacks on the board-no additional soldering! Jacks are already mounted and "plug-in" leads of uniform length already have plugs permanently fastened on the ends. You learn how transistors operate by "plugging in" any one of 10 circuits that really work! An AM radio that gives loud, clear headphone reception-a wireless broadcaster that lets you "broadcast" to any nearby radio-a versatile electronic switch of many uses-a capac-ity-operated relay that may be used as a burglar alarm, etc.
This top-value kit is supplied complete-you get dual headphones (also serve as mike), "plug-in" circuit leads, guide cards, two transistors, solder, relay and photocell everything you need, with nothing else to buy! You'll be delighted with the big, easy-to-understand instruction manual that comes with this kit. It tells you exactly what to do to complete initial wiring-then gives you an understanding of transistors by explaining just how each of the 10 circuits works. The perfect kit for the beginner-student - hobbyist - or experimenter. Uses for the circuits in the Transistorized Electronic Lab are limited only by the imagination! Battery-powered. With battery and solder. Shpg. wt., 3 lbs. 83 Y 299. NET
15.75

## SPECIAL GUIDE CARDS FOR EACH EXPERIMENT

Simply place these guide cards on the board, and plug in the circuit leads where indicated to get a working circuit! Holes for "plug-in" leads are num-ber-coded-it's easy-it's fun-it's practical!

## EACH CIRCUIT IS

## CLEARIY EXPLAINED

Written in easy-to-follow terms, the instruction manual not only tells you exactly what to do to build the basic chassis, but also fully explains the opera tion of the transistors in each circuit.

LOW-COST, EASY-TO-BUILD INTERCOM SYSTEM

KNIGHT-KIT 2-Way Intercommunication System Kit

NET - Low Cost-Easy-to-Assemble<br>$\$ 14^{75}$<br>- Handsome Melal Cabinets<br>- High Gain-Clear Tone

Efficient, versatile 2 -station intercom kit consisting of a Master and a Remote unit-at remarkably low cost! Has high gain and plenty of volume-responds to even a whisper-person at remote unit can answer from across the room. Hundreds of uses in the home, office, school, shop, etc. Use it as a step-saving means of communication hetween house and garage, backyard, attic or hasement, "balyy sitter" (picks up the slightest sound) for the chidren's room, etc. In the office, factory or store, use it for rapid cont rol of operations bet ween widely separated departments. Provides private or non-private operation at the flick of a switch. In non-private position Master can "listen in" on Remote. Master unit has a "press-totalk" switch: Remote unit has al "talk-listen" switch. Switch on Remote can be left in "talk" position to permit continuous listening-in by Master unit.

Master can communicate with Remote regardless of position of switch on Remote unit and can handle up to three Remote units in parallel. Combination volume control and on-off switch, plus pilot light, on Master.

Only the Master station need be connected to an AC or () ( power source: Remote station can therefore be located at any desired spot. Kit has a high-gain, 2 -stage amplifier and $4^{\prime \prime}$ P'M speakers. The audio amplifier uses a 12AV'6 voltage amplifier and 50C5 power amplifier: rectifier is a 351 it . In antique white. Ifith parts, tubes, $50-\mathrm{ft}$. cible, hook-up wire, solder, and easy-to-follow instructions. Size each unit, $43 / 6 \times 1 / 2 \times 43 / x^{\prime \prime}$. For $110-120$ v., $50-60$ cycle AC , or DC. Shpg. wt., 8 liss. 83 Y 295. NET.

## KNIGHT-KIT High-Speed Electronic Photoflash Kit

- 1/700th-of-a-Second Flash
- 50 Walt/Seconds
- Daylight Spectral Quality
- Ideal for Color and B \& W

The feature-packed Knight-Kit electronic flash gun kit is perfect for indoor, outdoor, black-and-white, and color photography. Quality-engineered and proven acceptance-provides excellent service and reliable performance for the economy-minded photography enthusiast. The bulb gives over 10,00 flashes at just a fraction of a cent per flash! No more buiky, costly flashbulbs-no more lost shots-no more misfires. Freezes fastest action with 1/700-second tlash. Light approaches daylight in spectral quality -permits using daylight-type color film indoors. Film guide number on average black and white film (ASA 80) is 200; for color film (ASA 10) guide number is 45 . ()ut put is full 50 watt-seconds.
Features include: Xenon-filled reflector-bulb assembly; selfcontained trigger transformer; pre-assembled reflector-bulh socket ; and heavy-duty, plastic-impregnated case. Each kit comes complete with universal mounting bracket that fits all cameras, all parts, case, pre-cut wire, solder, and step-by-step instructions with clearly illustrated diagrams. Ideal for use with "X" or "O" shutters only. Requires sync cable (obtainathle from any photo supply dealer) and either battery or AC power supply (below). Shpg. wt., 4 lbs.

## KNIGHT-KIT Wireless Broadcaster Kit

NET<br>$\$ \$ 50$

- Broadcasts Clear Signal
- Use with Phono or Mike
- High Gain Stage with Equalizer
- No Connections to Radio

Set up your own "broadcast" station. Use the KnightKit Wireless Broadcaster with mike or phono to make announcements or play music through one or more standard radios in the house-without any need for direct connection to the sets! May be used with crystal cartridge, magnetic cart ridge, or mike (crystal or highimpedance dynamic). Has Class A Heising modulator and inverse feedback-puts out a clear, full-toned signal. Volume may be controlled at broadcaster or at any radio picking up its signal. Broadcaster is continuously adjustable from 600 to 1600 kc -can easily be tuned to any clear frequency on your set.
High-gain stage with equalizer permits using magnetic cartridge without external preamp; equalizer may be disconnected for use with mike. Tubes: 12AX7, 250 C 5 . With selenium rectifier. Kit is supplied complete with tubes, chassis, all parts, wire, solder and easy-tofollow instructions. Size, $41 / 2 \times 5 \times 6$. For $110-120$ volts, $50-60$ cycle AC, or DC. Shpg. wt., 3 lbs̄. 83 Y 705. NET 9.50 KNIGHT CRYSTAL MIKE. Quality mike for use with above. With 5 -ft. cable. Shpg. wt., 1 lb . 995 519. NET.

KNIGHT-KIT Phono Oscillator Kit<br>NET<br>- Extremely Low Cost<br><br>- "Broadcasts" Up to 50 Feel<br>- No Connections to Radio<br>- For Any Crystal Phono

The popular, easy-to-build Knight-Kit economy-model phono oscillator. Use this top-performing kit with any crystal phono for "broadcasting" recorded music to any standard radio set up to 50 feet a way. Requires no direct connection to radio set. Compact phono oscillator kit may be easily installed in the phonograph cabinet or mounted behind a wooden panel. Operates on any frequency between 600 and 800 kc . Delivers excellent tonal quality. Has controls for adjustment of modulation level and selection of clear frequency on radio set.

Uses 50L6GT tube as a modulated oscillator and also $3525 G T$ rectifier. Kit is supplied complete with all parts, wire, solder, tubes, and easy-to-follow assembly instructions. Instructions include schematic and pictorial diagrams - can quickly and easily be wired from pictorial diagram alone. Size, $41 / 4 \times 41 / 4 \times 41 / 2^{\prime \prime}$. For operation from $110-120$ volts, $50-60$ cycle AC, or DC. Shpg. wt. 2 lbs. 83 Y 760 . NET

## QUALITYknight-kits FOR THE RADIO AMATEUR

## YOU GET MORE FOR YOUR HAM DOLLAR IN EVERY WAY

There are no finer values for the Amateur station than Knight-Kit equipment. These outstanding kits are designed to the highest standards of Amateur performance by skilled engineers, who are themselves licensed Amateurs with a thorough understanding of your needs and problems. When you outfit your station with Knight-Kits you can be sure of equipment that's designed for maximum efficiency, versatility and operating ease-plus the ultimate in dependability. Nowhere can you find greater value.

## New KNIGHT-KIT Deluxe All-Band Amateur Receiver

NET

\$10.45 Down

Here's one of the most sensational values ever offered in a communications receiver! The new Knight-Kit receiver offers high selectivity, sensitivity and stability to meet the needs of all Amateurs. Has an array of feat ures, many of which are found only in receivers costing much more. Uses printed circuitry throughout, including the revolutionary Knight-Kit printed circuit bandswitch, to make assembly remarkably easy. Covers 540 kc to 31 mc in 4 ranges; calibrated electrical bandspread on the 80-10 meter Amateur bands; slugtuned hi- $Q$ coils; continuous $\mathrm{B}^{1}+$ applied to HFO -lets you switch from standby to receive with no drift; $\mathrm{B}+$ to HFO is voltage regulated; built-in Q-multiplier peaks desired signal or nulls interference; delayed AVC: provision for Knight-Kit crystal calibrator (below). Sensitivity: $1.5 \mu \mathrm{v}$ for 10 db signal-to-noise ratio. Selectivity: Variable from 300 cps to 4.5 kc at 6 dh down. Exalted 13 FO injection.
TUBES: $6 \mathrm{BZ6}$ RF amp.; 6BH8 mixer and HF osc.; 6AZ8 1st IF and 1st audio; 6AZ8 2nd IF and S-meter amp.; 6BC7 delayed AV'C, 2nd det., and noise limiter; 6AW8 audio output and BFO; 12AX7 Q-multiplier; 6X4 rectifier; O132 voltage regulator.
CONTROLS: Main tuning, bandspread tuning, band selector, $(\mathcal{Q}$-multiplier selectivity, Q-multiplier tune, null-off-peak, BFO pitch, RF gain, AF gain, BFO-MVC-AVC-ANL, off-stby-recv-cal, antenna trimmer; also includes headphone jack.
With tubes, all parts, wire, solder, instructions and sturdy metal cabinet. Less phones, 8 -ohm loudspeaker and S-meter. $10 \times 10 \times 161 / 2^{\prime \prime}$. For $110-120 \mathrm{v}$., $50-60$ cycle AC. Shpg. wt. 23 lbs.

2 Printed Circuit Boords. Critical wiring is already completed. Eliminates problems of "lead-dress" -greatly simplifies assembly, reduces wiring time and eliminates costly wiring errors.

Printed Circuit Bandswitch. Annther KnightKit exclusive! The printed circuit band switch, used for the first time in any communications receiver regardless of cost, assures exact reproduction of laboratory model and cuts assembly time.

NEW KNIGHT-KIT 100 kc Crystal Calibrator Kit
Crystal frequency standard at very low cost. Gives marker every $100 \mathrm{kc} u p$ to 32 mc . An Amateur "must" for marking band edges. Mounting flanges permit installation in, or in back of, receiver cabinet. Measures only $11 / 2 \times 11 / 2 \times 3^{\prime \prime}$. Requires 6.3 v . at 0.15 amp and $150-300 \mathrm{v}$. DC at 3-6 ma. Trimmer for zero-beating with IV'W'V; On-Off switch. With tube, crystal, all parts, wire, solder, and instructions. 1 lb . 83 Y 256. NET
10.50

## KNIGHT-KIT Low-Cost VFO Kit

$\mathbf{\$ 2 8 5 0} \begin{gathered}\text { NET } \\ 50\end{gathered} \begin{gathered}\text { : Exceptional Stability } \\ \text { : Compact Design } \\ \text { Excellent Keying } \\ \text { ETVI Suppression }\end{gathered}$
WITH BUILT-IN POWER SUPPLY
A deluxe, high-quality VFO kit at an incomparably low price. Calibrated for $80,40,20,15,11$ and 10 meters; out put on 80 and 40 meters. 40 -volt out put on 80 meters and 20 -volt output on 40 meters is more than adequate to excite oscillator stage of any transmitter. An ideal companion to the Knight-Kit 50 -watt transmitter at right. Drift-free, series-tuned Clapp oscillator uses $1 \%$ silver mica capacitors. Tank coil is wound on heavy ceranic form. Features TVI suppression; vernier drive. Frequency stability is achieved by careful design and rigid mechanical construction. Two chassis design keeps heat from oscillator circuit Voltage regulated for stable output. Tubes: 6BL.6, 6AK6; $6 \mathrm{X}+$ rectifier, 0 A2 regularor. With all parts, tubes, wire, solder, and inst ructions. Gray and blue steel cabinet, $6 \times 6 \times 8 \frac{3}{4}$ " For $110-120$ volts, $50-60$ cycle AC Shpg. wt., 11 lbs.

28.50

Special Value KNIGHT-KIT 50-Watt CW Transmitter Kif NET \$3895

- Ideal Transmifter for the Novice Amoteur
- Long-Life Transmitting Tubes-Effective TVI Suppression
- Convenient Bandswitching-80 through 10 meters
- Efficient Pi-Network Antenna Coupler

Here's a low-cost 50 -watt 1 ransmitter kit that features high-quality transmitting components throughout. Uses the popular 807 tube in the final, ceramic coil forms, double-spatced tank capacitor and heavy copper-finish chassis aids TVI suppression. Ideal as a "first rig" for the Novice becanse assembly is simplicity itself. Excellent, too, as a low-power standby rig for the advanced Amateur. The Knight-Kit transmitter kit is a completely self-contained, bandswitching CW transmitter that can be operated crystalcontrolled or with a VFO such as the Knight-Kit VFO at left.
OUTSTANDING CIRCUIT. Features a 6 AG 7 as a modified-Pierce runed-plate oscillator-multiplier when cryst als are used; as a buffer-multiplier when used with a VFO. 50 watts input to an 807 final. 5U4G rectifier. Transmitter is completely shielded in rugged metal cabinet for TVI suppression. Firm metal-to-metal seals are provided at all junctions. Filtering and bypassing of AC, keying, meter and heater circuits are provided. Pi-section antenna output permits operation with any type of antenna. Matches antenna impedances from 50 to 2000 ohms. Eliminates need for external type of antenna tuner. Other features include: Bandswitching on all bands; cathode keying of oscillator and final; metering of final plate and grid circuits; provisions for external modulator: and power plug for supplying voltages 10 VFO and ot her accessonies. In addition to the final plate and grid current meter, the front panel includes the following controls: Oscillator Tuning; Antennal Loading; Grid-Plate Meter switch: and Off-On switch. Key jack, VFO and crystal sockets are also on front panel.
Kit is supplied complete with all parts. tubes, wire and solder. Assembly is simple with the step-by-step instructions included. Less crystal and key. $8 \frac{1}{2} \times 101 / 2 \times 81 /{ }^{\prime \prime}$. For $110-120 \mathrm{v}$., $50-60$ cycle AC. Wt., 18 lbs.

## KNIGHT-KIT RF Z-Bridge Kit

NET - For Measuring SWR $\$ 585^{\text {• Reads Antennalmpedance }} \begin{gathered}\text { For } 20-400 \text { Ohm Lines } \\ \text { - Cooxial Input, Output }\end{gathered}$

An excellent value in a high-efficiency, low-cost KF 2-brilge kit. Now every Amateur can achieve peak antenna efficiency-inexpensively. Completely eliminates guesswork accurately measures Standing Wave Ratio (SWR) from 1 mc to 150 mc . Also for measuring impedance on frefuencies up to 100 me. Use your own VOM as a null indicator. For sharpest null indications a $5,000 \mathrm{ohm} / \mathrm{v}$ or hetter VOM is recommended. Has low-loss coaxial input and output connectors. Can be used with transmission lines having characteristic impedances between 20 and 400 ohnis. Two convenient meter inputs for metering both input voltage and bridge voltage. Accurately calibrated dial gives direct impedance reading. Kit includes $1 \%$ precision resistor for calibration use and plasticized chart for converting meter reading to standing wave ratio. Size, $21 / 2 \times 31 / 2 \times 4^{\prime \prime}$. With all parts, SWR chart, wire, solder, and inst ructions. Less meter. Wi., $11 / 2 \mathrm{lbs}$.

# QUALITY knight-kit TEST INSTRUMENTS 

## YOU DO THE EASY ASSEMBLY AND SAVE OVER 50\%

TOP PERFORMANCE. You can be sure of top performance and advanced design when you build Knight-Kit test equipment kits. Expert engineering, careful quality control through every stage of development, and long, rigid field testing assure you of the ultimate in reliability and operating ease. Feature for feature, Knight-Kit test instruments are equal or superior to factory-built equipment costing far more.

Knight-Kit SCOPES SAVE YOU MONEY

Knight-Kit scopes feature printed circuit boards and a laced wiring harness to simplify assembly and assure maximum operating efficiency.

## KNIGHT-KIT 5" ${ }^{\text {" }}$ General-Purpose Oscilloscope Kit

- Phantastron Linear Sweep Generator
- Printed Circuit Boord Speeds Assembly
- Excellent Sensitivity-25 mv/inch
- Retrace Blanking on all Ranges

Feature for feature the world's best oscilloscope kit value. This 5" general-purpose scope delivers performance equal to or better than factory-wired units several times its price-defies comparison with other scope kits at anywhere near its price. The ideal choice for radioTV servicing, audio work and hundreds of other usesmeets at least $90 \%$ of all oscilloscope requirements.

Up-to-the-minute circuit design featuring a printed circuit wiring board and a laced wiring harness to reduce wiring to a minimum. Directly coupled positioning controls assure fast positioning of trace - free of overshoot.

Other important features include: Blanking circuit to eliminate retrace lines on all ranges; frequency-compensated vertical input attenuator; internal and external, positive and negative synchronization: Phantastron linear sweep generator; and high 2 nd-anode voltage for high-intensity trace. Vertical sensitivity is $\mathbf{3}$ times that of similarly priced scope kits!

SPECIFICATIONS: Vertical Response: $\pm 3 \mathrm{db}, 3 \mathrm{cps}$ to $1.5 \mathrm{mc} ; \pm 6 \mathrm{db}$ to 2.5 mc . Vertical Sensitivity: .025 rms v/inch. Sweep: $15-150,000 \mathrm{cps}$ in 4 ranges. Horizontal Sensitivity: $.07 \mathrm{rms} \mathrm{v} / \mathrm{inch}$; response of horizontal amplifier is down only 3 db at 200 kc ( 1000 cycle reference). Vertical Input Impedance: $\mathbf{3 . 3}$ megs shunted by 45 mm . Calibrating Voliage: 1 -volt peak-to-peak, square wave (voltage regulated)-applied by pushbutton switch.
Supplied complete with all tubes including $5^{*}$ CRT, chassis, printed circuit board, laced wiring harness, rugged steel case with convenient disappearing handle (permits stacking of other test equipment units on top of scope), graph screen, all parts, wire and solder, and easy-to-follow "Step-and-Chek" instructions with pictorial and schematic diagrams. Case has handsome blue finish; panel is finished in gray. Size, $91 / 2 \times 133 / 4 \times 173 / 4$ For operation from $110-120$ volts, $50-60$ cycle AC. Shpg. wt., 26 lbs.
83 YZ 146. NET
42.00

## KNIGHT-KIT RF Demodulator Probe Kir

Use with Knight-Kit oscilloscopes to permit observation of modulation envelopes of amplitude modulated RF carriers at frequencies up to 250 mc . Complete with all parts, 4 -ft. shielded cable, wire, solder, and instructions. Wt., 2 lbs. 83 Y 148. NET
3.45

Service shops, labs, and production lines rely on the versatility and outstanding performance of the Knight-Kit wide band scope-a marvel of engineering skill.

## KNIGHT-KIT $5^{\prime \prime}$ Wide-Band Oscilloscope Kit

NET<br>- Two Printed Circuit Boards Greatly Speed Assembly<br>$\$ 600$<br>- 5-mc Bandwidth—Ideal for Color TV Servicing<br>- High Vertical Sensitivity-25 mv/inch<br>- Exceptionally Wide Sweep Range- 15 to 600 Ke

An outstanding value in a highly efficient, printed circuit, 5" oscilloscope featuring wide-band design. Its performance is equal to or better than commercially wired oscilloscopes costing far more. Wiring this fine Knight-Kit instrument is simplicity itself-two printed circuit boards cut assembly time to a minimum by eliminating a large percentage of the circuit wiring. Also includes a laced wiring harness to further simplify assembly. Single-chassis construction and careful placement of components allow use of shortest possible lead lengths to assure maximum operating efficiency.
This exceptionally fine instrument is ideal for color TV servicing and many other high-frequency applications. In addition to its great utility as a servicing instrument, the Knight-Kit wide-band scope will perform hundreds of jobs-on a par with factory-built unitsin the laboratory, on the production line, and in the maintenance shop. Notable among its fine array of features are its extremely wide sweep range, wide frequency response, and very high sensitivity.
Cathode-follower vertical and horizontal inputs assure minimum circuit loading. Has 5UP1 cat hode ray tube; interchangeable with other 5UP type tubes for scope photography and many other specialized laboratory applications. 2nd anode voltage of 1400 volts provides high intensity trace. Uses push-pull vertical and horizontal amplifiers to assure mininum waveform distortion. Excellent synchronization on complex waveforms is achieved by oscilloscope's positive and negative locking. Provides faithful square-wave response.

Many other important features make this scope an extremely valuable lab instrument. Has frequency-compensated input attenuator. The $Z$-axis input permits intensity modulation of trace. One volt peak-to-peak calibrating voltage. Uses internal astigmatism control for precision adjustment of symmetry. Retrace lines are effectively eliminated by blanking circuit. Directly coupled positioning controls permit fast, overshoot-free positioning of trace.

SPECIFICATIONS: Vertical Response: $\pm 3 \mathrm{db}, 5 \mathrm{cps}$ to 5 mc ; only 1 db down at 3.58 -mc color burst frequency. Verfical Sensitivity: .025 rms v /inch. Input Impedance: 2.9 megs and 20 mmf . Morizontal Amplifier: 0.6 rms $\mathrm{v} /$ inch; Response, down only 3 db at $600 \mathrm{kc}, 4 \mathrm{db}$ at 1 mc : Sweep range exceptionally wide, from 15 to $600,000 \mathrm{cps}$. Locks in at frequencies as high as 9 mc .

Supplied complete with all tubes including CRT, all parts, punched chassis, blue case with disappearing handle and gray panel, pre-cur wire, and solder. CRT tube is shaded and protected by molded rubber mount. Green plastic graph screen. Assembly is simplified with step-by-step instructions, giant-size pictorial diagrams and schematics. Size, $141 / 2 \times 91 / 2 \times 16^{\prime \prime}$ deep. For $110-120$ volts, $50-60$ cycle AC. Shpg. wt., 40 lbs.
83 YZ 144. NET.
69.00

Probes for use with the Knight-Kit
Wide-Band Oscilloscope are described on the preceding page.

## KNIGHT-KIT Voltage Calibrator Kit for Scopes

This easy-to-assemble calibrator permits using any scope as a precision peak-to-peak AC voltmeter-tremendously increases scope versatility. Puts a true square-wave voltage on scope screen. Has range switch and calibrated potentiometer to permit selecting any voltage between .01 and 100 volts, in 4 ranges. Fifth position of range switch feeds external signal directly to scope for instant comparison. Voltage regulator tube provides extremely high stability: output voltage stays constant with a power line variation from 80 to 135 volts. Accuracy of $\pm 6 \%$ on all ranges. Shunt capacitance is only 15 mmf . Use any 20,000 ohms/volt VOM or a VTVM for initial calibration. Direct coupling of output provides ground reference for DC scopes. Handsome blue metal case with gray panel. Size, $73 / 4 \times 51 / 4 x$ 43 /6". Supplied complete with pre-cut wire; solder; giant-size pictorial diagrams; schematics; and easy-to-follow, step-by-step instructions. For operation from $110-120$ volts $50-60$ cycle AC. ## KNIGHT-KIT Printed-Circuit VTVM Kit

Here's a top buy in an extremely stable and highly accurate VTVM. Wiring and assembly are greatly simplified -the entire chassis is a printed circuit board. Performance is equal to factory-wired instruments costing much more. An outstanding choice for radio-TV service shop, lab, Amareur use, etc. Uses low-leakage type switches; film-type, $1 \%$ precision resistors. Balanced-bridge, pushpull circuit permits switching to any range without readjusting zero set. Has zero-center scale and directreading db scale; polarity reversing switch.
SPECIFICATIONS: Input Resistance: 11 megs. DC and AC rms volts: 0-1.5-5-15-50-150-500-1500. AC Peak to Peak Volis: 0-4-14-40-140-400-1400-4000. Resistance: 0-1000-10K-100K ohıns; 1-10-100-1000 megohns. Decibels: -10 to +5 . Response: 30 cycles to 3 mc.
With tubes, blue case, gray front panel, battery, all parts, pre-cut wire, solder, test leads and easy-rofollow instructions. Size, $73 / 4 \times 51 / 4 \times 43 / 66^{\prime \prime}$. For $110-120 \mathrm{v}$., 60 cycle AC. Shpg. wt., 6 lbs. 83 Y 125. NET.

The chassis is a printed circuit board-wiring time is reduced to a minimum. VTVM is enclosed in a handsome blue metal case with gray front panel.

## Accessory Probe Kits for KNIGHT-KIT VTVM

high-voltage probe kit. Extends $D C$ voltage range to 50,000 v. Shpg. wt., $11 / 2$ Ibs. 83 Y 126. NET

## KNIGHT-KIT Low-Cost Tube Checker-With 16 Filament Voltages

$\$ 275$ : Lorge "Good-2-Replace" Meter<br>- Tests Series-String TV Tubes<br>- 600 Tube Types Listed<br>- Designed to Stay Up-To-Date

This expertly designed tube checker kit has now been improved for completely up-to-date coverage of tube types. Includes provision for checking series-string TV tubes. Tests 4, 5, 6, and 7 -pin large, regular and miniature types, octals, loctals, 9 -pin miniatures and pilor lamps. Tube performance is measured by the amount of cathode emission. Easy-to-read $41 / 2^{\prime \prime}$ square meter has three-color "GOOD-?-REPLACE" scale. Also provides rests for shorts, open elements, cathode-to-flament leakage, and heater continuity
Provides continuity check for other components, electrical appliances, motors, etc. Has line-voltage inslicator and line-adjust control to compensate for line voltage variations; may be adjusted from the front panelassures greater test accuracy and correct voltage for each tube test. Choice of 16 filament voltages from 0.63 to 117 volts to check virtually all receiving tubes. With adapter listed at right, tester checks TV picture tubes without removal from set.

Special circuit features assure years of dependable service without obsolescence. Blank panel socket accommodates future tube types. Universal-type selector switches permit setting up for any new tube pin connections without wiring changes. Single-unit, pre-assembled 10 -lever function swich simplifies and speeds assembly. $11 l u m$ mated roll chart lists 600 rube types. With all parts, wire and solder. $5 \times 14 \times 10^{\prime \prime}$. For 110 120) v., $50-60$ cycle AC. Shpg. wt., 14 ths 83 YX 143. NET

## KNIGHT-KIT Resistor-Capacitor Tester Kit

- Shows Capacitance, Resistance
- Indicates Power Factor
- Balanced-Bridge Circuil
- Tests Capacitors at Rated Voltage

An extremely useful instrument-skillfuily engineered for top-notch performance in the service shop and laboratory. Measures resistance and capacitance by the highly dependable bridge method; checks for opens and shorts in paper, mica and ceramic capacitors; and indicates the power factor of electrolytics. Its large, easy-to-read dial, used in conjunction with the "magic eye" null indicator, shows resistance and capacitance at a glance. The "magic eye" is also used in test ing for opens, shorts, intermittents, and in checking power factor Capacitors are tested at act ual working voltages.
SPECIFICATIONS. Test Voltages: $50,150,250,350$ and 450 volts. Capacity Ranges: 10 mmf to .005 mfd , 001 to 0.5 mfd , 1 to 50 mfd , and 20 to 1000 mfd . Resistance Ranges: 100 to 50,000 ohms and 10,000 ohms to 5 megohnis. Accuracy: $\pm 10 \%$, Pouer Factor Range: $0-50 \%$. Uses 6E5 "magic eye"; 6X4 rectifier.
In portable metal case with blue-wrinkle finish. Size, $7 \times 10 \times 5$ ". With tubes, solder, pre-cut wire and instructions. For operation from $110-120$ volts, $50-60$ cycle AC. Shpg. wt. 10 lbs.

## Low-Cost KNIGHT-KIT Flyback Checker Kit

NET Widest Range In lts Field<br>$\$ 19^{50}$<br>- Exceptional Accuracy<br>- Large $41 / 2$-Inch Meter<br>- Invaluable For TV Servicing

Race through TV deflection circuit repairs-for bigger-than-ever servicing profits-with the new Knight-Kit Flyback and Yoke tester! Use it to check instantly on the condition of all types of horizontal output transformers and deflection yokes. as well as linearity and width coils in TV sets. Provides an accurate check of any standard unit. Positively indicates the presence of shorted turns for any coil with a " $Q$ " greater than 1, and an inductance bet ween .003 henry and 2 henries. Determines the continuity of any circuit with a resistance bet ween 0 and .5 megohms. Checks a wider range of inductances than any other similar unit! $41 / 2$-inch meter with 400 microamp movement provides clear readings and high accuracy. Circuit uses 6 S 4 A tube in pulsed oscillator arrangement. Self-contained power supply is of isolation transformer type, for full safety during servicing of any type of TV set. Durable metal case, $73 / 4 \times 55 / 8 \times 5^{\prime \prime}$, has leather handle. Supplied complete with all parts, test leads, solder, wire, 6S4A tube, step-by-step instructions, etc. For operation from 110-120 v., 50-60 cycle AC. Shpg. wt., 6 lbs.

## KNIGHT-KIT Resistance Substitution Box Kif

Find the correct resistance value required in a circuit-in minutes-with this convenient resistance substitution box. Saves time in radio and TV servicing as well as in equipment design. Low resistance range: 15 ohms to 10 K . High resistance range: 15 K to 10 megohms. Slide switch selects either range. Accuracy is within $\pm 10 \%$. 18-position rotary switch permits rapid setting to exact value needed. Switch has extra wafer to simplify wiring. All parts mount in compact case of bakelite with clearly calibrated aluminum panel; size, $5 \times 3 \times 2^{\prime \prime}$. Supplied complete with all parts, hard ware, $18^{\prime \prime}$ leads, heavy-duty insulated alligator clips, solder, wire and easy-tofollow, step-by-step instructions. Shpg. wt., 2 ibs. 83 Y 139. NET

## KNIGHT-KIT Capacitance Substitution Box Kit

## NET $\$ 5^{95}$

Cuts time and effort in finding correct values for replacement of badly damaged, illegible capacitors. Substitutes a wide range of RETMA values. Ideal for laboratory and service shop. Has 18 standard capacitor values from 0001 mfd to .22 mfd . Accuracy of $\pm 20 \%$. All values are 600 volts, except 15 and .22 which are 400 volts. An 18 -position switch permits fast, conyenient selection of values. In sturdy bakelite case with attractive anodized aluminum panel. Size, $5 \times 3 \times 2^{\prime \prime}$. Kit is supplied complete with all parts, $18^{*}$ leads, insulated alligator clips, solder, wire and step-by-step instructions. Shpg. wt., 2 lbs.

KNIGHT-KIT TV-FM Linear Sweep Generator

- Extreme Linearity
- Fundamentals to 250 mc
- Ouppur Flat Within 1 db
- Electronic Blanking
- Quick, Easy Assembly

An outstanding, low-cost instrument for TV and FM alignment-provides sweep linearity on a par with costly laboratory instruments. Covers 300 kc to 250 mc on fundamentals. Delivers up to 0.15 v . and has coarse and fine attenuators for precise output adjustment. The skillfully engineered sweep circuit provides output which is constant within 1 db over the swept range, on all bands. Step-down dial drive mechanism gives smooth-as-velvet tuning action. Large, clearly calibrated dial is easy to read on all ranges. Circuit utilizes electronic retrace blanking, and a highly effective automatic gain control to keep output voltage constant over swept range. Sweep width is continuously variable from 0 (no sweep) to full 13 megacycles. Built-in crystal marker and input for external marker-built-in and external marker can be mixed. The Knight-Kit signal generator (at right) is an excelfent variable marker for use with this unit. With all parts, tubes, precut wire, test cable, solder, and instructions. Less crystal (below). $81 / 2 \times 12 \times 71 / 2^{\prime \prime}$. For $110-120$ v., 60 cycle AC. Shpg. wt., 16 lbs.

## KNIGHT-KIT RF Signal Generator Kit

NET<br>$\$ 875$<br>- Precision-Wound Coils<br>- No Calibration Required<br>- Output to 112 mc on Fundamentals<br>- Modulated or Unmodulated Outpul<br>- 400-Cycle Sine Wave Outpur

Build this wide-range, extremely stable RF signal generator and save two-thirds the cost of a comparable wired instrument. You can quickly build it without difficulty; easy, fully illustrated Knight-Kit instructions enable you to get the job done in the least amount of time. The large, semi-circular dial is calibrated clearly; the signal generator's range is covered in five separate bands, permitting close accuracy in the setting of individual frequencies. You'll find that it's an ideal instrument for alignment of RF and IF stages in radio and TV sets, and for trouble-shooting audio equipment. Also serves as a TV marker generator when used with sweep generator listed at left. Delivers output on fundamentals from 160 kc all the way out to 112 mc ; provides useful harmonic output to 224 mc . Output can be modulated at 400 cycles-has built-in sine-wave audio oscillator with output jack for 400 -cycle output. Features the high-stability Colpitts circuit. Convenient jack for external modulation. Maximum audio output 10 volts. RF output, over 0.1 volt on all ranges. Step and continuous-type attenuator controls permit precise adjustment of output. With all parts, tubes, wire, solder and instructions. $7 \times 10 \times 5^{*}$. For operation from $110-120$ volts, $50-60$ cycle. AC. Shpg. wt. 11 lbs. 83 Y 145 . NET

## KNIGHT-KIT 6V-12V Battery Eliminator

## NET <br> \$32 ${ }^{95}$

- Most Power Per Dollar!
- Continuously Variable Output Voltage
- Delivers 15 A at $6 \mathrm{~V}-10 \mathrm{~A}$ af 12 V
- May Be Used as Battery Charger

This heavy-duty DC power supply is ideal for testing auto radios, as well as Amateur and commercial mobile radio equipment. Continuously variable output from 0 to 15 volts at higher current than any similarly priced battery eliminator kit. Handles current requirements of any 6 or 12 -volt radio. Dual filter for low-ripple output. Can be used to charge any 6 or 12 -volt battery overnight. Low in price-high in performance-the Knight-Kit battery eliminator is a test and service instrument that will quickly pay for itself.
Provides DC output at $0-8$ volts or $0-15$ volts. Continuous current rating: 15 amps at 6 volts, 10 amps at 12 volts. Intermittent current rating: 17.5 amps at 6 volts, 12.5 amps at 12 volts. Two meters provide current and voltage readings. Meter ranges: 0-15 volts $D C ; 0-20$ amps DC. Portable metal case with blue-wrinkle finish and disappearing handle. $9 \times 121 / 8 \times 73 / 8^{7}$. With all parts, wire, solder and instructions. For 110-120 v., 50-60 cycle AC. ## WV-77C JUNIOR VOLTOHMYST

1 mproved model of the popular WV-77BVTVM. Features WG-29\%B DC/AC-Ohms probe with built-in selector switch. Redesigned front panel with easy-to-read $41 / 2^{\prime \prime}$ meter. 5 ranges on all functions. Reads AC rms and DC to 1200 volts. Accuracy on AC and negative DC volts is $\pm 5 \%$; on positive DC volts. $\pm 3 \%$. Measures resistance from 0.2 ohms to 1000 megohms. AC input impedance 0.2 megohms and 75 mms to 2 megohms and 50 mmf . Input resistance is 11 megohms. Size. $8 \times 53 / 4 \times 41 / 2^{\prime \prime}$. Complete with WG-299B probe. For $105-125$ volts $50-60$ cycle AC. Shpg. wt.. 5 lbs. 87 F 051 . NET
59.50

## WV-87B MASTER VOLTOHMYST

New, deluxe VTVM with $71 / 2^{*}$ mirroredscale meter. Reads peak-to-peak to 4200 volts. Response: $30 \mathrm{cps}-3 \mathrm{me}$. Has zero-center for $\mathbf{F M}$ discriminator alignment. Reads DC current to 15 amps . Measures DC voltage to 1500 in 7 ranges. Reads AC mms to 1500 volts; AC Input impedances from 0.83 meg and 85 mmf to 1.5 meg and 75 mmf . DC resistance to 1000 megs in 7 ranges. DC resistance to full scale for DC; $\pm 3 \%$ Accuracy, $\pm 3 \%$ of full scale for DC ; $\pm 3 \%$ of full scale for AC. $10 \times 131 / 2 \times 7$ " With
WG-299C probe and cables. For ios-125 volts. $50-60$ rycle AC. Wt., 9 lbs. 87 FZ 066. NET
137.50

## WR-49B RF SIGNAL GENERATOR

New, accurate RF signal generator. Continuous coverage from $85 \mathrm{kc}-30 \mathrm{mc}$, in 6 ranges. all on fundamentals. Excellent for aligning AM and FM receivers. Dial calibration accurate within $1 \%$. Built-in 400 -cycle oscillator for internal or external modulation. Attenuator for positive control of RF level. Approximate range: 2000 to 1 . Cathodefollower output stare isolates oscillator from effects of load; assures high stability. RF output voltages at least 0.05 v . $\mathbf{r m s}$ and RF output voltages at least low connectors respectively. With cable. Size: $71 / 2 \times 101 / 2 \times 6^{\circ}$. For operation from 105.125 v. $50-60$ cycle AC. Shpg. wt.. 10 lbs.
87 FZ 079. NET
79.50

## WA-44B AUDIO SIGNAL GENERATOR

For measuring intermodulation, response, input and output impedances, resonant requency of speakers, etc. 4 ranges: 11 -110 and $110-1100 \mathrm{cps} ; 1.1-11$ and $11-100 \mathrm{kc}$. Has eparate 00 -cycle, variable-amplitude output. Cathode-follower output. "Hi" and "Lo" outputs: $0-2.5$ and $0-15$ volts (rms). Frequency stability. 3\%. Response, $\pm 1 \mathrm{db}$ ( 1100 cps reference). Tota! harmonic distortion. $2 \%$ (max:) from 30 cps to 15 kc . Hum level, $0.1 \%$ or less. Size, $7 \times 101 / 2 \times 6^{\prime \prime}$. For operation from $105-125$ v.. $50-60$ cycle AC. Shpg. wt., 12 lbs.
87 FZ 053. NET
107.50

## WR-69A TV-FM SWEEP GENERATOR

New sweep generator provides test and alignment signals for TV video. 1F. and RF channels 2.13--plus $1 F$ and RF signals for FM radio Continuous IF coverage from 50 tre to 50 me. Pre-set switch for channels 50 te 1050 mc . Pre-set switch for channels jable. Output flat within 0.1 db per mc of sweep width. Fundamental oscillator output on TV channels; filtered beat-frequency fundamental output on IF NF range. Output. 1 volt RMS or better at all frequencies. Blanking circuit. Size: $10 \times 133 / 4 \times 71 / 4$. With cables. for $105-125$ volts. $50-60$ cycle IC. Shpg. wt. 17 lbs .
87 FZ 070 . NET
295.00

## OTHER RCA INSTRUMENTS

WR-70A RF-IF-VF-MARKER ADDER. For RF 1F and video sweed alignment of black and-white and color sets. 4 differently shaped markers. Use with mapker and sweep generators. Marker signal is added after sweep passes through receiver-elim inates distortion of marker or sweep curve $0-60 \mathrm{db}$ attenuation of 1F sweep signal for 1 F or video alignment. $101 / 2 \times 71 / 2 \times 1 / 4^{\prime \prime}$. For $105-125$ v., 50-60 C. AC. 12 lbs. 87 FX 055. NET.
97.50

WG-295B VIDEO MULTIMARKER. For use with sweep generator on black-and-white and color sets. Checks response of chrominance bandpass filter, and alignment of I and 0 filters. 7 simultaneous absorption-type markers (me): $0.5,1.5,2.5,3,3.58,4.1$, and 4.5. Size: $5 \times 23 / \mathrm{s} \times 21 / 2^{\circ}$. Wi.. I 1 b . 87 F 054. NET
32.50

WG-307A TV BIAS SUPPLY. New. For black-and-white and color TV. 3 output voltages for RF, IF and AGC adjustable from 0 to 15 v.i 1 output, 100 v.. for chrominance circuitry. Size: $21 / 2 \times 3 \times 51 / 4$. For $105-125 \mathrm{v}$. . $50-60$ cycles AC. Wit., 2 lbs. 87 F 067. NET
22.50

WG-304A RF MODULATOR. Crystal-type mixer. For use with WR-69A and WR-99A to check TV response from antenna to picto check ture tube, $15 / 8 \times 4 \times 21 / 3^{\prime \prime}$. Wt., I Ib.

## WR-6IB COLOR-BAR GENERATOR

For checking color TV sets, and for adjusting color plasing and matrixing. Produces 10 bars of different colors, simultaneously. Provides picture-carrier, color-subcarrie and sound-carrier frequencies on claannel 3 Lurinance signals at edges of bars for checking registration of luminance and chrominance signals. "Sync leve! Pedestals" for checking signal ratio through the three chrominance channels to indicate potential troubles. Size: $93 / 4 \times 131 / 2 \times 71 / 2^{\prime \prime}$. For operation from $105-125$ volts. $50-60$ cycle AC. Sbpg. wt., 18 lbs.
87 FZ 065 . NET
259.50

## WR-46A DOT-BAR GENERATOR

This dot-bat-crosshatch generator features a high level video output for driving the picture tube directly: or, the video amplifier of color or black-and-white receivers. Provides interlaced pattern of small dots and a choice of vertical or horizontal bars and a crosshatcl. Vertical bars adjustable from 8 to 26 bars- 15 horizontal bars only 2 lines wide. Fully adjustable video out put voltage. Direct sync from TV signal allou: con vergence adjustment independent of receiver claracteristics. Polarify reversal switelı. With all leads and cables. $10 \times 131 / 2 \times 8^{8}$. For $110-120$ v., 60 cycle AC. 20 lbs. $110-120$ v., 60 cyc

## NEW WR-99A MARKER-GENERATOR

Crystal-calibrated marker-gencrator for aligning TV sets and other electronic equip ment in the $19-216$ me range. Crystal calibrator provides 240 clieck points for accurate calibration at 1 or 10 mc intervals. Modulation frequencies: 1, 10. 4.5 mc . 6of cycles. Sound and picture carrier markers available simultaneously. Output: At least 0.1 v.rms on all frequencies. Double-shielded oscillator for reduced leakage. $10 x 131 / a x$ $71 / 4^{\prime \prime}$. For operation from 105.125 v., $5 c \cdot 60$ cycle AC. Slipg. wt. 18 lbs. 87 FZ 069. NET
242.50

## WP-25A TV ISOTAP

Isplation and autotransformer. For cleck ing TV sets at high, medium and low volt age. Selects $105-130$ volts in 5 -volt steps Outputs: 105, 115 and 130 v. 6a 500 VA from antotransformier winding; 105 . 115 and 130 v . © 275 VA from isolated sec ondary. $5 \times 53 / 4 \times 43 / 3 \%$. For $50-60$ cycle 1 C With 5 ft . line cord. Wt., 15 fb 62 G 516 . NET
22.00

## WO-56A TV FM-AM OSCILLOSCOPE

Big $7^{\prime \prime}$ screen. DC or AC input. Frequency. compensated, voltage-calibrated attenua tors. Vertical response flat, within 2 db , to 500 kc , useful beyond 2 mc . Input impedance: One megolim. 75 mmf with direct probe 9.5 mm with low-capacity probe Sensitivity: $10.6 \mathrm{rms} \mathrm{mv} / \mathrm{inch}$ or 30 mv p-to-p using direct probe; 106 rmis mu/inch or 300 mv . p-to-p. using low-capacitance or 30 mv . p-to-p. using low-capacitance
probe. Sweep: Variable, $3-30,000 \mathrm{cps}$ with probe. Sweep: Variable, $\mathbf{3 - 3 0 , 0 0 0} \mathrm{cps}$ with
fast retrace and preset fixed ponsitions for $T V$-vertical ( 30 cps ) and TV-horizontal ( 7875 cps ). Has peak-to-peak calibrating voltage source. $133 / 3 \times 9 \times 16^{5} /{ }^{\circ}$. With WG 300A probe. 7VP1 CRT. For 105-125 v $50-60$ cyc. AC. Shpp. wt., 38 lbs. 84 FZ 085. NET
289.50

## LAB ACCURACY INSTRUMENTS

WT-I00A MICRO-MHO-METER. Laboratory quality tube testing instrument for produc tion line and laboratory use. Check pen eral-purpose and industrial-type receiving tubes and low-power transmitting tubes. Measures control grid-to-plate and sup. pressor grid-to-plate transconductance with better than $\$ \%$ accuracy. Regulated power upply for DC voltages. Measures individual electrode currents. AC heater currents. voltage drop across electron tubes, dry-disc rectifiers and crystal diodes. Blue-gray case. Size: $8 \times 181 / 2 \times 231 / 2^{\prime \prime}$. For $105-125$ v.. 50.60 cycle IC. Slipg. wt . 110 lbs 84 FZ 021 . NET

## PROBES FOR RCA OSCILLOSCOPES

[^13]WG-302A DEMODULATOR PROBE. Use witl WG-300A to extend scope range to 250 mc Input. 2.2 mmf. Shpr. wt.. 1 lb. 87 F 060. NET

## WO-91A 5 OSCILLOSCOPE

5" wide-band oscilloscope for black-and white and color TV servicing. Features Dual-band response; wide-band position hat within $\pm$ do from 10 cps to 4.5 mc and narrow-band position flat within -6 db from 10 cDs to 1.5 mc , and voltage.calibrated, frequency-compensated $3-t 0-1$ step attenuator. Removable. multi-scale graph screen. Vertical polarity reversal switch. Preset vertical and horizontal sweep positions. Built-in calibration for peak-to-peak voltage measurements. Plus or minus in ternal sync selector. Positive-Jock internal sync. Seusitivity is 0.05 vols-peak-to-peal per inch ( 0.018 volt rms ) in narrow-band per itch ( 0.018 volt rms ) in narrow-band inch ( 0.053 volt rms ) in wide-band position. Vertical input impedance 75 mmf and meg direct, and 11 mmf and 10 meg low capacity position, with WG-300A probe supplied. Type 5UPI CRT. Size: 131/2x9x $16 \frac{1}{2 \prime \prime}$. For operation from $105-125$ v.. $50-60$ cycle AC. Slipg. W.., 33 lhs.

## WO-88A OSCILLOSCOPE

Popular priced $5^{\prime \prime}$ oscilloscope featuring a direct-coupled. push-pull vertical amplifier to provide flat response within 3 db from $0-500,000$ cps-excellent reproduction of square waves and sync pulses. Sensitivity square waves and sync pulses. Sensitivity:
vertical with direct probe. 25 mis millivertical with direct probe, 25 enns mant-
volts/incli; vertical witli low-capacitance probe. 0.25 rms volts/inch. Impedance Vertical direct pobe. 1 meg and 75 mmif ; vertical with low capacitance probe. 10 megs and 9.5 mmf ; horizontal, 2.2 meg and 55 mmif. Sweep: variable from $15-30,000$ cps. Frequency-compensated step attenuator. Green graph screen is calibrated for peak-to-peak voltage. Excellent shielding liroughout. lloused in blue Hammeroid throughout. Housed in blue Hammeroid
casc. Size. $131 / 2 \times 9 \times 161 / 2^{*}$ deep. Supplied complete with WG-300A direct/low-capacitance probe. ground lead, alligator clip and instructions. For 105-125 voles. 50-60 rycle AC. Shpg. wt.. 32 ltos.
84 FZ 089. NET
179.50

WG-388A WIDE-BAND MODIFICATION KIT. To adapt WO-88A scopes for color tele vision use. Includes all parts and instruc tions for modification. No special tools reguired. Provides wide and narrow-band operation from DC to 4.5 mc . Sensitivity: 700 mv peak-to-peak per inch witli direct probe. Shpg. wt., I lb.

- Speedy Transconductance Readings
- 1-2-3 Push-Button Operation Saves Time
- New Socket-Plote Design

Dynamic mutual conductance tester. Features accurate. high-speed testing. Roll chart grouns most cominonly-used tubes separately-minimizes cime-wasting seareh ing! Constant line voltage indication for quick adjustment. All shorted elements indicated and identified at the same time without rotary switching. One-button grid current test ineasures gas content accurately in micro amps. Fihament consinnity cleck made instantly beiore warm-up. Socket plate design perinits pling-in socket replaceinent or change without re-wiring. $5^{\prime \prime}$ neter has 0-3000-6000-15.00) micromthos and REPLACF-? GOOD" rankes. $163 / 4 x$ $71 / 2 \times 113 / 4^{\prime \prime}$. For 110 -120 N.. Slipg. wt.. 21 lbs
87 FZ 181 . NET
182.25

MODEL 6005 TUBE TESTER AND VOM. Same as above, but with built-in 20,000 ohm-pervolt inultimeter. Slipg. wt.. 22 lbs.
87 FZ 182. NET
224.00 CRT TESTER ADAPTER. For use with all Hickok tube testers to test picture tubes. Wit/t cable. plug, and dual socket. Shpg. wt.. I Ib. 84 F 184. NET
10.25

## MODEL GOOA TUBE TESTER

Dynamic mutual conductance type-cliecks bites under simulated operating conditions. Tests all the latest tube types including min.. sub-min.. and $6(0)$ ma series lieater types. Has these outstanding features: easily portable; tests for gas content; reads directly in micromhos; applies separate voltage to each element ; easily detects hard-to-locate weak tubes. Predicts probable tube life. Easy-to-read triple-scale 5 " lucitecase meter has ranges of 0-3000-6000-15.000 micromlios and "REPLACE-?-GOOD" micromlios and REPLACE- Size $163 / 4$ Red leatherette-covered case. Size: $163 / 4 x$ $71 / 2 \times 113 / 4^{\prime \prime}$. For $110-120$ volts. $50-60$ cycle AC. Slipg. wt.. 21 lbs .
84 FZ 185. NET

## MODEL 5398 TUBE TESTER

Laboratory-type dynamic mutual conduc tance tube tester. Accurately measures mutual conductance under simulated operatimg conditions. Tests all receiving-type tubes, voluage regulators. selenium and gernaninm diodes.
I'ses 3 meters. Micromhometer with 8 ratiges: $60,(000)-30,(000-15.000-6001-3000-400$ inicrombos: Rectifier Diode Range; Voltage Regulator Rance. Separate AC meter for line voltage cleck and separate DC voltmeter for wrid bias readings. Bias control meter for hrid bias readings. Cice of 4 AC lias vernier adjustment. Reads leakage up signals (.25. .5. 1. 2.5 v .). Reads leakage up
to 50 megolims. Permits tube matchink: lests future life of tube. noise and gas con tent. Fias clooice of low or normal plate and screen volts. Black leatherette covered nortable case. Size: $163 / 4 \times 183 / 3 \times 71 / 2{ }^{2}$. For operation from $110-125$ volts. $50-60$ cycle AC. Slipg. wt. 39 lbs .
84 FZ 608 . NET
392.95

## MODEL 750 TUBE TESTER

Portable dynamic mutual conductance tester for accurately testing all types of radio and TV receiving tubes-including the 600) ina series-string iypes. Also checks ruggedized types used by airlines, hearimg aid tubes and voltage regulator tubes-accurate DC voltmeter measures ()-2(M) volis: IDC inilliameter, 0-200 ma. Permits matehing of tubes such as 6 SNi for critical circuits. 5 meter reads $0-1500-30(1)-6000-15,000-30$,
 ma DC scales. Has two "Keplace-Gwod" ranges. Tests for shorts, gas, noise and gives probable tube life. Provides a clioice of two plate and screen voltages and four $A C$ signal voltages-as low as 25 volt. Leatherette. covered case. Size: $181 / 0 \times 163 / 4 \times 71 / 2^{\prime \prime}$. For preration from 110-125 v. 50.(6) cycle AC. Sheration. wt., 24 lbs, 84 FZ 633 . NET
257.25

## MODEL 660 DOT-BAR GENERATOR

Vew, portable white dot-bar color-display generator desigued for "on-the-spot" adInstment of color TV receivers. All fre. duencies generated are crystal-controlled and locked together for extreme stabilityreduces possibility of alignment error. Features switch selection of RF output up to. 05 v . on TV clannels 2 to 6.300 white tots, less those in blankiug: 20 vertical and totsions chow inditel lines less 15 horizontal white crosshatel lifes. less those in blanking. Color display pattern; crystal accurate in sequence of red. blue and
green. KF modulated ( $60 \%$ ) by all video outputs. Iloused in sturdy, black leatherette. portable case. With 2 crystals, output cable and instructions. Size, $101 / 2 \times 101 / 2 x$ $51 /{ }^{\prime \prime}$ For operation (rom $105-125 \mathrm{v}, 50-60$ cycle dC. Slipg. wt. 20 lbs.
87 FZ 175 . NET
243.00

## MODEL 123 AUTOMATIC TUBE TESTER

Automatic dynamic inutual conductance precision tester lises perforated vinyl cards which slide in easily to instantly trip automation circuit. One card sets up entire cir cuit for testing each function of tube automatically. without roll charts. Ideal for fast. accurate laboratory or industrial use.

Features: Altomatic short test: direct reading leakage clieck; sensitive gas test: $0.22 \mathrm{v} . \mathrm{rms}$ grid signal variable volt ages for each tube element. "Knee test" quickly evaluates tube's ability to perform in TV evaluates tube's abifty win periorm in
sweep circuit. 5 neter. With 50) cards covering all popular tube types and metal rack for easy filing. In ventilated. counter-type steel case. $163 / 4 \times 18 \frac{1}{6} \times 7 \frac{1}{2 \prime}$. For $110-120$ v. (o) cycle AC. Shps. w't. SI lbs.

## 656XC TV COLOR BAR GENERATOR

Highly accurate, white dot crosshatch and color bar generator, for color TV servicing Supplies the same type of color signal that is unpmitted over the air; a self-cliecking. Transmited $100 \%$ fully satnrated NTSC color standard $100 \%$ fulty satnrated 3.58 mc bar pattern. Crystal-controlled 3.58 mc
color burst. Provides signats for demodu. lator alignment; I, Q. and $K-Y^{\prime}$ and $B-Y$ signals. Video output, $0-2$ volts p-to-p open circuit. KF output. modulated with color bar paltern, on channels 2 to 6 . Produces barie dol crowhutch. 20 vertical and 15 horizontal. less those in blanking; $3(6)$ dots. less those in blanking: also provides vertical and horizontal lines. Sound carrier for setting local oscillator. Leatherette-covered carrying case. Size. $71 / 2 \times 163 / 4 \times 183 / 3^{\prime \prime}$. For operation from $110 \cdot 120$ volts, 60 cycle AC. Shpg. wt., 42 lbs. 87 FZ 176 . NET
495.00

## 615 SWEEP \& MARKER GENERATOR

Combination sweep and marker generator or visual alignment of TV receivers. Continuous IF coverage from 0 to 50 mc . Fine uning adjustment pinpoints frequency. Swecp widil variable from 0 to 15 mc . Marker frequencies. 25 to 5.5 mc : 19 to 50 Marker irequencies 2.5 formentalo 108 me; 54 to 108 me , all o 216 me on harmonics. Built-in 4.5-me rystal provides dual markers for tF or RF alignment; and $4.5-\mathrm{mc}$ signal for intercarrier sound alignment. o(o)-cycle internal modulator for both marker and crystal oscillaors Built-in retrace blanking panelcontrolled for zero reference. External sweep arible phasing ( $170^{\circ}$ ) for use with scopes variable phasibe phas fore 131 scopes without variable phasing. Size. $31 / 4 \times 16 / 4 x$ $8^{*}$. For $110-120$ volts, $50-60$ cycle AC. Shpg. wt.. 39 lbs.
87 FZ 177. NET
299.00

## MODEL 675A WIDE-BAND SCOPE

Wide-band, high sensitivity. $5^{\text {" }}$ oscilloscope for color TV as well as $F M$ and $A M$ use. Features $4.5-\mathrm{mc}$ bandwidth and 20 rms my/inch vertical sensitivity. Illuminated, calibrated screen with astigmatic focus provides exceptional trace detail. Vertical response within 3 db from 1 cps to 4.5 mc liat through $3.58-\mathrm{mc}$ color burst freguency. Excellent pulse response with a rise time of 08 microseconds. Switch for reversing polarity of vertical trace. Built-in voltage calibrator. Horizontal response within 3 db from I cps to 450 kc -sensitivity is 250 rms mv /inch. Sweep frequency. 10 cps to 100 kc . Has input for Intensity modulation. $13 \times 10 \mathrm{x}$ $16^{\circ}$. For operation from $110-120$ v.. $50-400$ cycle AC. Shpg. wt. 43 lbs.
278.25

## NEW MODEL 685 INDUSTRIAL SCOPE

$5^{\text {s }}$ oscilloscope for industrial or laboratory use. DC or AC input. Illuminated, calibrated screen backed with green filter reduces incidental reflections for accurate measurements. Astigmatic focus control provides sharp, undistorted trace. Excellent pulse response with rise time of approx. 0.5 microseconds.
Vertical frequency response. 0 to 750 kc within 3 db . Sensitivity is 20 rms mv/inch. Input impedance. 1 megohm, 40 mmf . Horizontal amplifier response is within 3 db rom 0 to 750 kc -sensitivity of 30 rms mv/inch. Sweep frequency, 1 cps to 100 kc in 5 calibrated ranges, with fine tuning vernier control of 10 to 1 ratio. Includes provision for even lower sweep frequencies With external capacitors (not supplied). Choice of recurring or triggered sweep functions; internal or external locking. Has input for intensity modulation. Size, $171 / 2 x$ $93 / 4 \times 131 / 4^{\circ}$. For $105-125$ v., $50-400$ cycle AC. Shpg, wt., 46 lbs .

## 87 FZ 184. NET

345.00

## MODEL 770 LABORATORY SCOPE

Wide-band, $5^{\prime \prime}$ escilloscope for professional use including color TV servicing. Dual bandwidth for fat response and maximum sensitivlty. Wide band: Frequency resyonse 0 to 5 mc within 3 db ; vertical sensitivity, $35 \mathrm{rms} \mathrm{mv} /$ Inch. Narrow band: Frequency response. 0 to $2.5 \mathrm{mc}, 3 \mathrm{db}$ down: sensitlvity, 10 rms mv/inch. Horizontal response, 3 db from 0 to 500 kc sensitivily, $75 \mathrm{rms} \mathrm{mv} / \mathrm{Inch}$. Sweep frequency from 2 to $30.000 \mathrm{cps} .14 \times 12 \times 18^{\prime \prime}$ For operation from $110-120$ v., $50-400$ cycle AC. Slipg. wt., 60 lbs.

## 84 FZ 606 . NET

398.00 MODEL 34 DEMODULATOR PROBE. Extends RF range to 500 mc . Shpg. wt., $11 / 2$ lbs. 84 F138. NET.
5.75 MODEL TVP-1 PROBE. Low impedance for reduced loading. Shpg. wt., 2 lbs . 84 F 162. NET
11.50

NEW MODEL 760 VIDEO SCANNER A complete cable-connected TV transmitting station. Instantly scans and produces a video or RF signal from slide. Extremely useful for TV servicing; can also be used by dealers for projecting information on TV sets in the store. Reproduces your own test patterns, pictures, messages, advertising displays, paging, etc. in any closed-circuit or community antenna TV system. Will operate any black-andwhite or color TV receiver. Enables rapid frequency response analysis of picture definition capablitites.
RF output, 100,000 microvolts-enough to drive several receivers simultaneously. Video output. 2 volts peak-to-peak; choice of positive or negative output. Variable sync level; permits test of how well a TV receiver locks-in on high or low sync levels. Completely crystal controlled. Supplied with bar, dot. standard test pattern. and transparent blank slides. Size. $191 / 2 \times 17 x$ $81 / 4^{\prime \prime}$. For $105-125,50-60$ cycle AC. Shpg. ut. 50 lbs
87 FZ 185. NET
299.90

## MODEL 415 VTVM

Compact vacuum tube voltmeter. Ideal for radio-TV servicing and industrial laboratory use. Features modern "laydown" design. Ranges: AC (rms) and DC volts, $0-1.5-5$. 15-50-150-500-1500. Zero center DC ranges for instant polarity identification. DC input impedance is 13.3 megohms. AC input capacity is 10 megohms shunted by 150 mmf .; frequency response, 50 cps to 2.5 mc . Ohmmeter is readable from 0.2 ohms to 2000 megohms. Resistance ranges: 0-2000-20,000-200.000 ohms and 0-2-200-2000 megohms. Center-scale reading, 10 ohms. With test leads. Requires no batteries. $3 \times 57 / 3 \times$ $81 / 2^{\prime \prime}$. For $110-120$ v. $50-60$ cycle AC. Shpg. wt., 6 lbs.

82.00

## MODEL 209A VTVM

- Light Looding-Only 7 mmf.
- Flar Response to 300 mc .
- Big, Zero-Center 9" Meter

Professional-quality VTVM and capacitance checker. Large, zero-center $9^{\prime \prime}$ meter. Flat response from 30 cps to 300 mc . Input impedance: DC, 12 megs; AC, 12 megs shumted by 7 mmf ( 3 megs on $1200 \%$. scale). Ranges: AC-DC volts, 0-3-12-30-120-3001200; DC current, 0-3-12-30-120-300-1200 ma; Resistance, .1 ohm to 10.000 megs in 8 ranges; capacitance; 1 mmf . to 1000 mfd . in 7 ranges; inductance, 50 mh to 100 henries (with conversion chart provided); db, -20 to +25 in 3 ranges; $A C$ peak-to-peak, 0-3-12-30-120-300. $131 / 4 \times 161 / 4 \times 7^{\prime \prime}$. With AC and DC probes. test leads. For 105-125 v., 50-60 cycle AC. Shpg. wt.. 25 lbs.
84 FZ 136. NET
140.25

PR-30KVA PROBE. For above. Extends range to 30 KV DC. Shpg. wt., $11 / 2 \mathrm{lbs}$.

14.35

## MODEL 455 INDUSTRIAL VOM

Compact, portable VOM. Rugred design withstands hard use. Unique overload circuit cut-out and fuse system protects meter and components against burn-out on any function including ohms. Single switch selects function and range. Sensitivity: 20,000 ohms-per-volt AC-DC. Ranges: ACDC v.. 0-3-12-30-120-600-1200; resistances, 0 to 100 megs in 4 rangeo- 5 ohms center scale; current. 0-50 ta, 0-1-10-100-1000 ma, 0.10 amps . $3 \times 57 / \mathrm{a}^{2} \times 1 / 2^{\prime \prime}$. With test leads. Less batteries. Shps. wt., $51 / 2 \mathrm{lbs}$.

JERROLD

## 704B Portable VHF Field Strength Meter

Extremely versatile, portable VHF field strength meter. Useful for field intensity surveys, checking per cent of AM and FM modulation, locating and measuring noise and losses, testing anterma color response. calibrating signal generators, adjusting traps, and numerous other applications. Continuously tunable, $54-220 \mathrm{mc}, \pm 11 / 2 \mathrm{db}$ accuracy. Sensitivity, $5 \mu \mathrm{v}$. Ranges: $\mathbf{0 - 3 0 0}$ $1000-3000-10,000-30,000$ /v RF; with built-in attenuator, measures 0-.1-.3-1-3 v. RF. Db meter scale and dbj scale on range 9 witch for easy conversion to dbj (gain) Band width. 600 kc at 3 db down. $12 \times 12^{3 / 4} \mathrm{x}$ $8^{*}$. For operation from $105-125$ v.. 50-60 cycle AC. Shipg. wt.. 24 lbs.

## RIPLET/

## TEST EQUIPMENT

NEW MODEL 310-10 WITH ADAPTER
Versatile, miniature combination VOM and IC ammeter clamp-on adapter. Clamp-on jaws of ammeter adapter fit around any single conductor to pernit direct reading of C-6-12-30-60 - 120-300 amps AC, with out breaking circuit or piercing the insula tion. Adapter securely locks to VOM body; can be left on permanently while using VOM ranges, or removed. VOM ranges DC volis. 0-3-12-60-300-1200 at 20.000 ohms/volt: AC volts, 0-3-12-60-300-1200 at 5000 ohms/volt; DC $\mu \mathrm{a}, 0-600$; DC ma 0-6-60-610; olims, $0-20,000-200,000$; megohms, $0-2-20$. Size. $81 / 2 \times 31 / 4 \times 11 / 4^{\prime \prime}$. With hatteries, leads. Wt., $31 / 4$ lbs. 66 F 588. NET
48.02

MODEL 310 VOM ONLY. Miniature, hand sized VOM with 18 ranges. Same as above, but without AC ammeter clamp-on adapt er. $41 / 4 \times 23 / 4 \times 11 / 4^{\prime \prime}$. Shpg. wt. 1 lb .

## MODEL 630-A VOM

Laboratory type, highly accurate VOM. Features unit construction; series ohmmeter circuits; special $1 / 2 \%$ resistors for greater accuracy: long, mirrored meter scales for reduced parallax. Accuracy: $11 / 2 \%$ on ohms and $0-1200$ DC volts; $4 \dot{\%}$ on 6000 $D C$ volts and all AC ranges. Ranges: DC and AC volts 0-3-12-60-300-1200-6000 (DC at 20,000 olims per volt. AC at 5000 ohms per volt); $D C$ current. 0-60 inicroamps. 0-1.2-12-120 milliamps. and 0-12 amps; resistance, $0-1000-10,000$ ohms, and $0-1-100$ megohms; db. -30 to +70 in 7 ranges; output volts, 0-3-12-60-300.1200-6000. $51 / 2^{\prime \prime}$ meter with $43 / 3^{\prime \prime}$ scale. $71 / 2 \times 51 / 2 \times 37 / 32^{\prime \prime}$. Complete with batteries and $48^{\prime \prime}$ leads. Shpg. wt.. 6 lbs .
84 F 574. NET
53.41

## MODEL 660 LOAD-CHEK

Wattmeter-voltmeter. Detects overloads and underloads. Load-Chek shows if power drawn from line exceeds or is less than the proper value. Power cord of unit under test plugs into receptacle on Load-Chek. Two $3^{\prime \prime}$ meters provide simultancous wattage and voltage readings. Two watt-meter ranges. Toggle switch changes watt scale. Ranges: $0-500-1000$ AC-DC watts: $0-150$ IC.DC volts. Black plastic case. Sire, 6x $51 / 2 \times 21 / 2^{n}$. Shpg. Wt., 4 lbs. 84 F 537. NET
33.81

## MODEL 630-NA VOM

Offers unusually high accuracy. 70 ranges: $\pm 11 / 2 \%$ on DC to $1200 \mathrm{v}, \mathrm{i} \pm 3 \%$ on AC to $1200 \%$ Features: DC volts: 8 ranges to 6000 ( $10.000 \mathrm{ohms} / \mathrm{v}$.) ; 8 ranges to 3000 (20.000 ohins/v.). AC volts: 6 ranges to 6000 ( 5000 olims/v.); 6 ranges to 3000 ( 10,000 ohms/v.). DB: -30 to +70 in 12 ranges. DC microamps: 1 range to 120 ( 240 $\mathrm{mv})$; 2 rankes to $600(120 \mathrm{mv}$ ). DC milliminpu: 2 ranges to 1200 ( 240 my); 3 ránges amps: 4 ranges to $1200(240 \mathrm{mv}) ; 3$ ranges ( 240 mv ); 1 range to 6 ( 120 mv ). Kesistance: 3 ranges to 100,000 ohms: 3 ranges to 100 megohms. Output: All 12 AC volt ranges. $71 / 2 \times 51 / 2 \times 35 / 16^{\prime \prime}$. Mirror scale. With leads. batteries. Slipg. wt.. 6 lbs.
84 F 512 . NET
73.01

## MODEL 666-R VOM

Compact VOM. Single range-function switch and olims adjust. 1000 ohms/volt sensitivity. Has $3^{\prime \prime}$ meter. Ranges: DC sensitiv volts. 0-10-50-250-1000-5000; DC and 0:10-100; DC amps, 0-1; ohms, 0-3000 300,000: megs., $0-3$. Black plastic rase, $5 \% / 8 \times 31 / 16 \times 2 \% / 16^{\prime \prime}$. With batteries. $48^{\prime \prime}$ test leads. Shpg. wt.. 4 lbs

MODEL 3441-A TV-FM OSCILLOSCOPE
Wide-range $5^{\prime \prime}$ TV-FM oscilloscope. Suitable for color TV. Push-pull vertical and hori zontal output amplifiers. 4.5 megacycle bandwidth, usable 10.9 mc . Vertical sensi tivity: $10 \mathrm{rms} \mathrm{mv} / \mathrm{iach}$ maximum. Horizon tal response, 20 cpsto 150 kc . Peak-to-peak $23 / 8^{n}$ voltmeter reads $0-1000$ volts in 8 ranges. Phased 60 -cycle horizontal sweep and return trace eliminator for use with sweep generators. Phone jack on panel for audio check of waveform under observa tion: for audio circuit tracing. Variable saw tooth output from 10 to 60.000 cycles With coaxial cable. Size: $1511 / 32 \times 16 \times 111 / 3 z^{\prime \prime}$ For $110-120$ volts. $50-60$ cycle AC. Shpg. wt., 42 lbs.

MODEL 3432-A SIGNAL GENERATOR Quality signal generator for AM-FM radio. biack-and-white and color TV servicing. Covers complete range from 160 kc to 110 me ( 220 mc using harmonles) with no skips in frequency. $\sigma 3 / 4$ " etched dial. Jacks provided for either internal modulation or audio output. Internal modulation vari able $0.100 \%$ at 400 cps . Ranges selected by 7-position switch. Coaxial output cable. Size: $1511 / 32 \times 111 / 32 \times 61 / 4^{\prime \prime}$. For $110-120$ v. $50-60$ cycle AC. Shpg. wt.. 12 lbs. 84 FZ 677. NET
97.51

## MODEL 3438 DOT GENERATOR

High-quality dot-bar generator for check ing video, RF. IF, sync and color circuits Provides standard vertical and horizonta sync pulses; horizontal bars (480-600 cos) and vertical bars ( 189 kc , crystal-control led); white dot pattern; and square block cross hatch. Crystal controlled accuracy for varylng colors throngh approx. $330^{\circ}$ of the color spectrum with any combination of the function selector. Will produce red, blue and gieen color spectrum and colors cor responding to $\mathrm{K}-\mathrm{Y}, \mathrm{B}-1,1$ and Q axis. Has hoth positive and negative video outputs. Completely self-contained. $61 / 4 \times 111 / 32 \times$ $151 / z^{\prime \prime}$. For $110-120$ v. $50-60$ evele AC. Slipg. wt.. 16 lbs
84 FZ 598. NET
224.91

MODEL 3434-A TV-FM GENERATOR For TV and FM receiver servicing. Continuous tuning to 243 mc . Regulated power supply for greater oscillator stability. Sweep center frequency: 0-60, 60-120 and 120-24.3 mc. Sweep width: 0.1 to 12 mc . contimuousy variable. Marker frequencies: 3.5-4.9. 19.5-29.3. 29-48.6 (fundamentals); 48.6-243 ne on liarmonics. Crystal frequency: to 20 mc on fundamentals; harmonics to 216 mc (crystais not supplied). Modulation: 600 cycles in both crystal and marker frequencies. Crystal and variable marker permits simultaneous preselitation of two markers. $1511 / 32 \times 111 / 23 \times 81 / 4^{\prime \prime}$. For $110-120$ v. $50-50 \mathrm{cy}-$ cie AC. Shpg. wt., 27 lbs.

## Sprague Quality Test Equipment

## MODEL KT-1 CAPACITOR CHECKER

An up-to-the-minute capacitor tester. Pernits checking capacitors while they are wired into the equipment being serviced. No unsoldering is necessary-not even when capacitor is wired in parallel with a resistor. Instantly cliecks for direct sloort. open or intermittent conditions in all types of capacitors. Bypass. coupling, and blocking capacitors from 30 mmf . to 2000 mmf . can be checked even when wired in parallel witls resistances as low as 10 ohms . Capacitors between 1 mfd . and 2000 mfd . can be checked even when wired in parallel with resistances as low as 2 ohms. Sturdy steel case with medium sray wrinkle finish. Size. $9 \times 6 \times 51 / 4^{n}$. For $110-120$ v.. $50-60$ cycle AC. Slipg. wt., 7 lbs.
84 FX005. NET
33.81

## NEW MODEL TO-5 TEL-OHMIKE

Multi-purpose bridge-type capacitor ana lyzer. Quickly detects open. shorted, or in termittent capacitors. Provides an accu rate. multi-range capacitance and power actor measuring bridge; an insulation re sistance checker for paper. mica, and ce ramic capacitors; a leakage current indi cator for electrolytics (tests at rated volt. ages): and a turns ratio scale to measure turns ratio of power and audio transformers. Measures capacitance from 1 mmf . to 2000 mfd . in 5 ranges; electrolyt ic leakage from $0-60$ ma in 2 ranges; power factor of electrolytics to $55 \%$ in 3 rauges Up to 000 volts $D C$ for electrolytic test. Slze. $87 / 0 x$ $145 / 0 \times 61 / \mathrm{m}^{\prime \prime}$. For $110-120$ v.. $50-60$ cycle AC. Shpg. wt., $121 / 2 \mathrm{lbs}$
66 FX 591 . NET.
82.22

## NEW MODEL LF-I TRANSIMULATOR

Unique transistor circuit simulator, Simul lates any 1 -transistor amplifier stage, AC or DC. except high-power audio stages Useful for testing experimental circuits quickly and easily-without time-consum. ing soldering or messy breadboards. Excellent for lab and quality control applications -predicts transistor performanice in various types of circuits. Includes all variable components necessary for an RC amplifier. With 5 -way binding posts for tramsformer con-
pling and metering circuits. Has self-con tained separate bias and load battery sup plies: negative or positive voltages. Can be used with PNP. NPN iunction or surface barrier transistors; common or grounded emitter. base or collector. For circuits using more than one transistor. Transimulators may be cross-coupled. Less batteries (re quires 8- KCA VSO 3 c cells; see pase 286) $51 / 3 \times 143 / 4 \times 81 / 2^{\prime 2}$. Wt.. $111 / 2 \mathrm{lbs}$.

## MODEL 382 ANALYZER

In-circult horizontal system analyzer and capacitance clrecker. Only piate cap of ontput tube need be removed for tests! Checks High-Z systems on sood-bad scale; checks Low-Z system on comparative logging scale. Tests any transformer or yoke winding for continuity; tests transformers and yokes for opens. Checks individual windings on flyback system for shorts or partial shorts. Measures capacitance and checks for opens in any capacitor of horizontal system. Direct-reading from 10 mmf to 0.1 mfd (emecks any capacitor in chassis falling in this range). $41 / 2^{\prime \prime}$ meter. With test leads. Size: $73 / 4 \times 71 / 2 \times 111 / 4^{\#}$. For $110-120$ v.. $50-60$ cycle AC. Shpg, wt.. 12 tbs .
87 FX 103. NET
68.55

## MODEL 1000 TUBE TESTER

Accurate, plate-conductance tube tester. Teats all receiving tubes. Including 9 -piu miniature and sub-miniatures with a linear and circular base arrangement. Tests are made under conditions simulating actual use. $41 / 2^{\prime \prime}$ dial indicates percentage of rated plate conductance for an accurate indication of tube condition. Also provides quick. dependable sliort and leakage tests-shows exact resistance values of sloorts and interelement leakage. Fach tube element is individually connected to the correct voltage tap-Insures against tube dainake during lesting. Size, $153 / 4 \times 113 / 4 \times 6$. For operation from $110-120$ v.. 60 cycle AC. Shpg. wt. 19 Ihs.

## MODEL 383-A CAPACOHMETER

"In-or-out-of-rircuit" capacitor leakage tester. Indicates leakage and measures capacitance of paper. mica or ceramic capacitors. Permits checking capacitors while they are wired into the equipment being serviced by means of special pulsing circuit. No unsoldering is necessary-not even when capacitor is wired in parallel with a resistor. Pulse test quickly detects "borderline" capacitors.

Easy-to-read $41 / 2^{\prime \prime}$ meter. Indicates leakage in ohms-checks for direct short, open. or intermittent conditions in all types of bypass, coupling and blocking capacitors from 10 mmt to 10 mfd . Also detects leaks in wiring, sockets, transformers, etc. and measures distributed capacity to ground No need for adjustment of bridge cfrcuit and balancing controls. All measurements made under load conditions. Size: $83 / 8 x$ $113 / 0 \times 81 / 2^{\prime \prime}$. With test leads. For $110-120$ volts. 60 cycle AC. Shpes. wit., 11 lbs. 84 FX630. NET

## MODEL 388-3L THERM-O-METER

Thermocouple thermometer. For gasen. liguids or solids. Reads $-50^{\circ}$ to $1000^{\circ} \mathrm{F}$, on 7 scale. Has $71 / 2-\mathrm{ft}$. general-purpose intercliangeable probe (Type 0190), with provisions for 3 probes. Allows temperature readings in 3 different areas by rotating switch. Size: $6 \times 715 / 16 \times 215 / 16^{\prime \prime}$. With battery. Shpg. wt.. 6 lbs .

## Cornell-Dubilier Test Instruments

## BF-60 CAPACITOR-RESISTOR BRIDGE

Precision instrument for industrial and electronic labs. Checks for opens, shorts. intermittents, capacity and power factor of electrolytics as well as insulation resistance of papers, micas and ceramics. Measures capacity between wires and shielding. transformer windings. wires in cables, etc. Capacity ranges are: $10 \mathrm{mmf}-.005 \mathrm{mfd}, .001-5$ $\mathrm{mfd}, 1-50 \mathrm{mfd}, 20-1000 \mathrm{mid}$ Resistance ranges: $100-50,000$ ohms and 10,000 ohms to 5 megohms. Hamniered-enamel finish. Size: $51 / 2 \times 7 \times 10^{\prime \prime}$. For $110-125$ volts, $50-60$ cycle AC. Shpg, wt., 10 lbs.
84 FX 457. NET
42.85

## RESISTANCE DECADES

Provide a rapid and dependable source of resistance for substitution purposes. Each of the instruments below permits a possible selection of 110 resistance values. Series connected. they cover a range from I ohm to $1,111.110$ ohms in steps of 1 ohm. Each box utilizes 2 rotary-type switches with 11 positions for quick change in resistance values. Heavy-duty, insulated binding values. Heavy-duty, insulated binding
posts. Black enamel finish. Less leads. $35 / \mathrm{g} \times \mathrm{x}$ $5 \times 3$ ".

## MODEL BF-90 "HANDICHECK" CAPACITOR CHECKER

Quick ly checks capacitors without removing them from the circuit by means of a 60 cycle circuit incorporating an electron-ray indicator tube. Checks capactiors from 30 mmf to 2000 mid or open. short or Intermittent conditions even if connected in mittent conditions even if connected in
parallel witha resistance as low as 50 ohms. paralef with a resistance as $20 w$ as 50 ohms. checked for short circuits. Size: $7 \times 10 \times 51 / 2^{\prime \prime}$. With leads and test clips. For $110-125$ volts. 6) cycle AC. Shpg. wt., 8 lbs.

84 FX 619 . NET

## BF-80 FLYBACK-YOKE CHECKER

For rapidly locating defects in flyback transformers and yokes. Employs an oscillator circuit incorporating a 6 V 6 tube. Extremely sensitive-detects short circuited vacuum tube elements and windings. Will detect a single shorted turn. Also indicates open circuits in transformers. yokes. coils and switches. $41 / 2^{\prime \prime}$ microammeter; 50 mi croamp full-scale sensitivity. Meter scale indicates "GOOD" and "REPLACE" scale is also numbered for quantitative readings. Sturdy metal case: recessed carry las bandle. $51 / 2 \times 7 \times 10^{-}$. With test leads. For lag handle. $51 / 2 \times 7 \times 10^{-}$. With test leads. For
operation from $110-125$ v.. 60 cycles AC. Shpg. wh. $91 / 2 \mathrm{lbs}$.

## MODEL 88 VTVM

Highly sensitive vacuum tube voltmeter for laboratory and service-sliop use. Employs full-bridge VTVM circuit with i \% multi pliers and shunts for extremely accurate readings. Extra-large. wide-angle $51 / 4$ " meter with easy-to-read. 3 -color scales. 200 microanp sensitivity. $\pm 2 \%$ accuracy. Reads AC rmis in 6 ranges: 0-1.2-6-12-60-300-1200 volts. 6 peak-to-peak AC volt ranges: 0-3.2-16-32-160-800-3200. 5 resistance ranges: 0-1(000-10.000 ohms; 0-1-1001000 megohms. 6 zero-center DC ranges: $1200-300 \cdot 60-12-6-1.2-0-1.2-6-12-60$-300-1200 volts with $262 / 3$ meg input resistance. Also $6-$ DC volt and $6+$ DC volt rankes: $0-1.2-6$ -12-60-300-1200, with $131 / 3$ rieg input resistance. In compact, custom-molded plienolic case; with convenient, sure-grip carrying strap. Overall size, $53 / 8 \times 7 \times 31 / 3^{\prime \prime}$.
Complete with detaclable AC line cord. internal ohmmeter battery. three-way coaxial VTVM prohe. For operation from 110-120 volts. 50 60 cycle AC. Wt., 8 lbs.

## MODEL 120 MULTI-RANGE TESTER

- Low-Cost, Highly Versotile
- 20,000 Ohms/Volt DC Sensitivity
- Covers 36 Ranges

Highly sensitive VOM. Has more ranges than most meters of its type and size. Ranges: AC. DC. and output volts. 0-1.2-3-12-60-300-600-1 20C-6000 with 5000 ohms per volt on AC and 20,000 ohins per volt on DC: DC current. $0-60-300$ нa, 0-1.2-12-$120-600$ na, 012 a inps; resistance, $0-200-$ 2000-200.000 ohins. $0-2-20$ megs; 8 db ranges. -20 to $+77.51 / 4^{\prime \prime}$ meter. Complete with batteries and test leads. Size. $51 / 8 \times 7 \times$ $3^{\prime \prime}$. Shpx, wt., 5 lbs.

## MODEL 78 BATTERY VTVM

Battery powered VTVM-can be used anywhere. $51 / 4^{*}$ meter-rated at 100 micro amperes sensitivity. $\pm 2 \%$ accuracy. Mul$t$ ipliers rated for $\pm 1 \%$ accuracy. High input resistance- 13.3 megohms on all DC ranges. Extra-high input impedance on AC ranges - 8 megohms, 67 mmf . Ranges: Rexistance $0-1000-100.000$ ohms; $0-1-100 \cdot 1000$ meg. olims. Zero-center DC volts, 0.1.5-6-30-150-600-1500. AC volts (rms), o-3 12-60-3001200. Resistors are deposited-film and wirewound types. Blue-gray ripple case. $57 / 8 \times 73 / 4$ $\times 31 / 2^{\prime \prime}$. Complete with batteries and probe. Shpg. wt.. 9 lbs.

## MODEL 107 ULTRA-COMPACT PORTABLE TUBE TESTER

- Provides Thorough Checking of Wide Range of Tube Types
- Extremely Compact; Weighs Only $111 / 4 \mathrm{Lbs}$.
- Simple, Fast, Accurate Operotion For Positive Checking

Remarkably compact, precision tube tester. Provides all essential lests for wide range of tube types, including sub-miniature types. "Good-? Bad" meter shows results of dynamic mutual conductance test and cathode emission test, electron-eye indicates "control-gridemission" test. Also checks for filament continuity, element leakage. open elements, and gassiness. Only $6 \times 9 \times 131 / 2^{7}$. Weight is only a fraction over 11 pounds! Handy "flip-chart" cube index. For 110 120 volts, 60 cycle AC. Slipg. Wt.. $141 / 2 \mathrm{lbs}$.
136.71

## MODEL GCT-5 GRID CIRCUIT TUBE TESTER

Exceptionally lightweighe, higlly compact. grid circuit tube tester. 1-las 7 wired sockets for testing receiving ispe tubes with flament voltages from 3 to 12 volts, Check: Control grid emission; grid-tocathode shorts; cathode-to-heater shorts: gassy lubes. Has "Magic Eye" Bad-OK-Bad indicator Size, $61 / 2 \times 61 / 2 \times 21 / 2^{\prime \prime}$. For operation from $110-120$ volts. $50-60$ cycle AC. Shpg. wt., 4 lbs. 84F639. NET
29.35

## preciso

## MODEL III-K TUBE TESTER KIT

Advanced-design tube tester kit. Checks emission and mutual conductance separately. Tests all receiving tubes; also tests CRT's with PTA-K adapter. Features rotary type switches; gas check; single-switeh short check; latest type roll clart. Filament current and tube bias measured on the meter. Has spare switch for future tube types. Steel cabinet with atuminurn panel. Size. $14 \times 16 \times 6^{\circ}$. Less solder. For $110-120$ v.. 60 eycle AC. Shpg. wt.. 25 lbs. 83 FZ 133. NET
79.95 MODEL 111 w . As above, but factory-wired. 84 FZ 692. NET

## 630-KA SIGNAL GENERATOR KIT

RF-AF-TV signal generator and marker kit. Reaches 110 mc on fundamentals; 330 mc on harmonics. Pre-assembled and calibrated RF heads; audio of 20-20.000 cycles; cathode follower output; variable percent modulation; external modulation; speech amplifier; crystal marker; RF and AF stand-by; Wien bridge AF osc.; Colpitts RF osc.; filtered line; separate RF section; coax fittings. Other features include constant out put impedance; vernier tuning on RF and AF, plus complete shielding. Steel cabinel. Size. $8 \times 11 \times 5^{\circ}$. With all parts and lnstructions, less solder. For $110-120$ v.. 60 cycles AC. Shpg. wt.. 11 lbs. 83 FX 130. NET
38.95

## MODEL 9071-K VIVM KIT

Deluxe VTVM kit designed to meet industrial specifications. Features: Voltage regulation; $71 / 2^{2}$ meter, precision $1 \%$ resistors. zero alignment scale for FM and TV discriminators, and burnout-proof circuit. Ranges: DC and AC volts, 0-5-25-250-5001000 ( 25 mess input imp. on DC) ; ohms. $0-1000-10.000$; megohms, 0.1-10-1000; db. -20 to +55 . Separate 5 -volt AC scale for - 20 to ${ }^{+5 s}$. Soparattages. Steel cabinet; etched panel. $12 \times 81 / 2 \times 5^{7}$. With test leads. battery and instructions; less solder, For $110-120 \mathrm{~s} . .60 \mathrm{cycle}$ AC. Wt.. 11 lbs . 83 F902. NET
35.95 MODEt 912A RF PROBE. For use with above. Extends frequency range up to 250 megacycles. Shpg. wt., $1 / 2 \mathrm{lb}$.

## MODEL 116-K TUBE TESTER KIT

Accurate. ultra-fast tube tester kit for simplified testing of all receiving-type tubes and transistors. Unique. multiple-socket design and Tube Bank Switch permit comparison tests on up to 5 similar tubes in 20 seconds. Makes emission. mutual conductance, gas, life, and short tests. Function switel permits checking individual sections of multisection tubes. Employs emission test for power tubes and mutnal-conductance test for IF amplifiers-fool proof method of determining a tube's efficiency. Simple to operate-has only 3 basic knobs. May be modified to measure filament current. Chart in cover lists all tubes, including the new $(000$-ma series-string types. and gives switch settings. Handsome, ruggedly constructed wood carrying case; etched panel. $71 / 2 \times 161 / 2 \times 141 / 2^{\prime \prime}$. Lasy-to-follow instructions. With all parts; less solder. For operation from $110-120$ volts, 60 cycle AC. Slipg. wt.. 16 lbs .

## MODEL 300-K $7^{\prime \prime}$ SCOPE KIT

Higli-quality $7^{\prime \prime}$ scope kit. Vertical response, $\pm 3 \mathrm{db}$ up to 5 megacycles with sensitivity of 10 millivolts. Frequency-compensated vertical and horizontal stepping attenuators. Push-pull DC amplifiers; push-pull horizontal. Astlgmatic focus control. Linear sweep from 1 cycle to 80 kc . Internal square wave calibrator with pot. Electronic magnifier circuit allows any portion of signal to be magnified up to 10 times. Screen is edge lighted-may be switched on or off. 5 -way binding posts for easy hookup. Has plug gate and sawtooth outputs on fromt panel. Bridge type positioning on vertical panel. Bridge type positioning on vertical
and horizontal does not vary tulse characteristics. Extra-heavy, fused power supply. Steel cabinet. $11 \times 14 \times 17^{\prime \prime}$. With all parts; less solder. For $110-120$ v., 60 cycle AC. Shpg. wt.. 35 lbs.

## MODEL 713-K POWER LAB KIT

New, extremely versatile bench power sup-ply-ideal for service shops and labs. Combines variable low and high-voltage AC and and DC supplies, a wattmeter, voltmeter. AC and DC ammeter, and an isolation transformer in one compact unit. Performs function of 11 different pieces of equipment. DC power available is $0-30 \mathrm{v}$. at 10 amps and $110-180 \mathrm{v}$. at .75 amps . ( 1 amp intermittent). AC power available is $0-24 \mathrm{v}$. at $20 \mathrm{amps} ; 90-140 \mathrm{v}$. at 10 amps ( 1000 watts concinuous) and 20 amps ( 2000 watts inter. mittent) (no isolation) and $90-140 \mathrm{v}$. at 3 amps, 300 watts (with isolation). Meter reads AC and DC current to 20 amps . $A C$ and DC voltage to 180 v , and power to 2000 watts. Size, $12 \times 81 / 2 \times 51 / 4$ ". For $110-120 \mathrm{~V}$. 60 cycle AC. Shpg. wt., 22 lbs.

## MODEL 308-K $81 / 2 "$ SCOPE KIT

Unusually fine, easily assembled, $81 / 2^{\prime \prime}$ scope kit at very moderate cost. Many deluxe features; excellent for any radio-TV servicing or laboratory application. Fdge-[11uminated $81 / 2^{\prime \prime}$ screen and magnifier positioner permit extremely accurate waveform anal ysis. A 3rd anode intenslfier ring, as well as a separate HV supply provide increased picture sharpness and tracing speed. Has push-pull inputs for internally mixing 2 signals or observing push-pull waveforms. Exceptional vertical response: $\pm 1.5 \mathrm{db}$ to 5 mc . Sensltivity, $10 \mathrm{mv} / \mathrm{inch}$. Return trace eliminator. Linear sweep. 1 cycle to 80 kc . Square-wave calibrator with pot. External, internal negative or positive sync. or internal 60 or 120 cycle sync. Steel cabinet. 11x $14 \times 19^{\circ \prime}$. With all parts. wire, tubes and instructions; less solder. For $110-120$ volts. 60 cycle AC. Shpz. wt.. 36 lbs
83 FZ 132. NET
129.50

## CHICAGO INDUSTRIAL TEST EQUIPMENT

## MODEL $431 A$ VOM

Accurate 18 -range volt-ohmmeter. Has $860 \mu \mathrm{~m}$ meter movement. Ranges: AC-DC volts. $0-15-30-150-300-1500-3000$ (at 1000 olims per volt): DC current. 0-1.5-150 ma and 0-7.5 amps; resistance, $0-10,000$ 100,000 ohms $0-1$ meg. (center sale readings. 50,600 and 6000 hms) Gray hammerloid case. Size, $61 / 8 \times 31 / 4 \times 51 / 4^{\prime \prime}$. Supplied complete with penlight cells, carrying strap and leads. Shpg. wt., $31 / 2 \mathrm{lbs}$
84 F 309. NET

## MODEL 312 VOM

Pocket-size. 6-function VOM. $2^{\prime \prime}$ meter. Reads: DC volts. 0-25-50-125-250, AC volts. $0-25$ -$50-125-250$. DC ma. 0-50. AC ma, $0-50$. Resistance. 100.000 ohms full scale, with 1600 ohms half-scale reading. Capacitance. . $05-15 \mathrm{mfd}$. Resistance ranges operate from AC power-no batteries nequired. In sturdy bakelite case, $37 / 2 \times 21 / 4 \times 13 / 4^{\prime \prime}$. Less test leads. For peration from $110-120 \mathrm{v} .60$ cycles AC. Shpg. wt., $11 / 4 \mathrm{lbs}$
84 F 306. NET
8.82

## MODEL 124 FLYBACKER

in extremely valuable, versatile TV test unit. Tests capacitors, flyback transformers and yokes without disconnecting them from the circuit. Shows leakage and sloorts in all capacitors; tests for continuity in all flyback transformers, deflection yokes, width coils, solenoids, relays, etc. Instantly slows up a single shorted turn in a flyback transformer or yoke. Tests high-impedance sections of all transformers. Over 200 volts applied to components under test. 5 easy-to-read scales. 4 illuminated GOOD-BAD scales-calibrated direct reading numbered cale for transformers. In steel case. $10 \times 6 x$ $5^{\prime \prime}$. For operation from $105-125$ volts, $50-60$ cycle 1 C . Slipg. wt.. 8 lbs
84 F625. NET
41.94

## MODEL 750 GENERATOR

Combination signal, marker and pattern generator. Covers all UHF-VHF channels for FM and TV receiver servicing. Checks and aligns front ends, sound IF's $^{\prime}$ and picture traps, linearity. sync circuits, sweep circuits, focus and deflection. Accuracy of $0.5 \%$. All VHF frequencies are covered on fundamental. Ranges: 9-11, 21-47, 51-220. $465-690$ and $650-900 \mathrm{mc}$. RF's and IF's are clearly calibrated on large etched dial. Provides horizontal or vertical bars or crosshatch pattern on all clannels. Internal modulation: 360 eps and 141.75 kc . Promodulation: 360 eds and 141.75 kc . Pro-
vides unmodulated carrier slgnal. $41 / 2$ dial, With unmodulated carrier signal. $41 / 2 \times 1 / 2 \times 1 / 2 \times$ $5 \%{ }^{*}$. For operation from $105-125$ voles, 60 cycle AC. Shpg. wt.. 10 Jbs.
84 FX 338. NET
77.91

MODEL 706A RF SIGNAL GENERATOR
High-quality performance. construction and appearance. Special electron-coupled circult design. permeabllity adjusted coils, and air rimmer capacitors assure stability and constancy of calibration. Accurate within $1 \%$ of calibration adjustment. Ladder-type step attenuator consisting of a multiplier and fine ttenuator control. Planetary drive for vernier tuning without backlash. Covers 150 kc to $\mathbf{2 2 0} \mathbf{~ m c}$ in eight ranges. Six fundamenal ranges throush 55 mc .400 cycle audio at 50 ohms for external use. Thorough shielding of all critical circuits. For operation from $105-125$ v., $50-60$ cycle AC. Size. $15 x$ $9 \times 7^{\circ}$. Shpg, wt., 14 lbs.
84 FX 331 . NET
66.15

## MODEL 655 DO-ALL VTVM

41/2" meter reads peak-to-peak and rms waveshapes. 7 rangés on all functions. DC volts, 0-1.5-5-15-50-150-500-1500. Input resistance. 11 megolims. Accuracy on DC ranges $\pm 3 \%$. AC voltage ranges: peak-topeak, 0-4.2-14-42-140-420-1400-4200; rms. 0-1.5-5-15-50-150-500-1500. Aceuracy on AC ranges $\pm 5 \%$. Response: 30 cDs to 3 mc for $1.5,5,15,50,150$ and 500 volt ranges (voltage source having low impedance output). Resistance ranges: 0 1000-10,000 ohms, 00.1-1-10 100-1000 megohms. Center scale: 10. 100, 1000, 10,000 ohms and $0.1,1,10$ megohms. Balanced bridge-type circuit. With test leads. Size, 10x6x5". For operation from $105-125$ volts, $50-60$ cycle AC. Shpg, wt., 8 lbs
84 F 324 . NET
58.31

MODEL HVMP-2 HIGH VOLTAGE MULTIPLIER PROBE. For use with above. Extends DC volts range to 30 KV , Shpg. wt.. 1 lb . 84 F 622. NET

## MODEL 555 OSCILLOSCOPE

Wide-band 5-inch oscilloscope for black and-white and color TV servicing. Push pull. 3 -stage vertical amplifier has 25 mv / pull. 3 -stage vertical amplifier has $25 \mathrm{mv} /$
inch sensitivity; frequency response up to 4 me. Horizontal amplifier rated at 0.3 volts inch sensitivity; frequency response up to 700 kc . Features: Multivibrator-type sweep generator; compensated stod attentator. $Z$-axis modulation, internal and external sweep synchronizatlon; built-in 60 cycle phasing with adjustable front panel cycle phasing with adjustable front panel
control; retrace blanking; built-in spot slze control; retrace blanking; buift-in spot slze
control and versatile 5 -way binding posts. control and versatile 5 -way binding posts.
Metal cabinet. Size: $91 / 2 \times 121 / 2 \times 18^{*}$. For operation from $105-125$ volts, $50-60$ cycle AC. Shpg. wt., 23 lbs .
87 FZ 202. NET
87.71

## MODEL 480 VOM

1000 ohm-per-volt, multitester. $3^{*}$ square meter. Bakelfte case and panel. DC voltage meter. Bakelte case and pancl. DC voltage
ranges: $0-5-50-250-500-1000$ volts. AC readings at $0-10-100-500-1000$ volts. Output voltage readings over same ranges as AC Milliammeter reads 0-1-10-100 ma and 0-1 ampere. Ohmmeter has 4 resistance ranges: $0-10.000-100,000$ ohms, 0 i megohm and 0-10 megohins external. Decibel meter reads from -10 to $+55 \mathrm{db} .7 \times 43 / 3 \times 23 / 16^{\text {m }}$. reads irom -10 to $+55 \mathrm{db} .7 \times 42$
With batterles. Shpg. wt., $21 / 4 \mathrm{lbs}$.

RADIO CITY PRODUCTS TEST EQUIPMENT

## MODEL 325 TUBE TESTER

Dynamic mutual conductance tester for accurately checking tubes and transistors. Tests all $\mathbf{N}-\mathbf{P}-\mathbf{N}$ or $\mathbf{P}-\mathbf{N}-\mathrm{P}$ transistors, all radio and TV recelving tuben-including hearing aid and magic eye types, pilot liglits, and many industrial and transmitting types, Checks tubes under actual operating conditions-adjustable controls for heater, plate, screen and grid voltages simulate actual tube operation. Tests for shorts and leakage between each element. Also tests picture tubes when used with Model PTA CRT adapters, below.
Illuminated $41 / 2$ " meter indicates "GOOD ?-REPLACE," plate conductance, grid conductance, and transistor gain. Lever switches prevent obsolescence. Transistor current gain is measured under full load by a unique constant-current bridge circuit. Separate controls for transistor tests; special diode limiter protects meter against shorted transistors. Safety buttons protect meter against misuse. Easy-to-read, fastaction roll chart. Bullt-in pin straighteners for 7 and 9 -pin tubes. Housed in an at tractive steel cabinet with etched aluminum panel-ideal for counter or portable use. Size, $151 / 4 \times 14 \times 53 / 4^{\prime \prime}$. For $105-125$ v.. $50-60$ cycle AC. Shpg. wt.. 17 lbs.
84 FX 682 . NET
127.35

## MODEL 327P TUBE TESTER

A modern, accurate tube tester. Cliecks all tubes currently used in radio and TV receivers. Will check transmitting, hearimg aid, ballast, gaseous rectifier and tuning indicator types. Checks tubes for emission and shorts. Slide-lever switches permit fast, easy testing. Will also check both black-and-white and color tubes with CRT adapters listed below. Dim or weak black and white tubes can be reactivated with this tester. "Finger-flip" tube index-permits tester. "Finger-flip" tube index-permits
rapid insertion of new tube data. 3-color meter provides POOR-?-GOOD tests. CRT scale indicates DIM-BRIGHT readings. In handsome oak combination counterportable case. Size, $91 / 2 \times 11 \times 51 / 2^{\circ}$. For operation from $105-125$ volts, $50-60$ cycle AC. Shpg, wt., 11 lbs.
84 FX 339. NET
50.91

## PRECISION SIGNAL TRACER

MODEL 202. All-purpose signal tracer for servicing radio, television. TV, audio, and electronic equipment. For quick checking all stages from antenna to speaker or picture tube. Also checks mikes, transformers, etc. Locates intermittents, open circuits, hum, noise and distortion. Provides both visual and aural tracing with sensitive "magic-eye" and built-in $5^{\prime \prime}$ speaker. RF response to 300 mc . 3 -stage preamplifier. Preamp provides voltage gain of 400 for scope or VTVM. Audio input flat from 2 cps to 200 kc . Selector switch for using instrument as RF probe, audio probe, noise test. or wattmeter, Size: $71 / 2 \times 101 / 2 \times 61 / 2^{\circ}$. For operation from $110-120$ volts, 60 cycle AC. Shpg. wt., 11 lbs .
84 FX 197. NET
36.75

MODEL B RF DEMODULATOR-AMPLIFIER PROBE. For use with Model 202 Signal Tracer described above. Shipg. wt.. I lb.

MODEL 460-K $5^{*}$ OSCILLOSCOPE KIT
Wide-band scope for lab and color TV use. Response flat from DC to 4.5 mc -usable to 10 mc . Accurately reproduces $3.58-\mathrm{mc}$ color TV sync burst. 4 -step attenuator in both DC and AC position. Vertical seusitivity 25 mv /inch. Built in voltage calibrator. Full-screen DC vertical positioning and 2X full-screen horizontal positioning. Automatic sync limiter and amplifier eliminates sync voltage adjustment. Sweep: 10 cps to 100 kc . plus low frequency sweep with external capacitor. Graph screen has variable illumination. Push-pull vertical amplifier. voltage regulated. Cathode follower inputs. With all tubes. CRT, all parts, Instructions. $13 \times 81 / 2 \times 16^{\prime \prime}$. Less solder. For $105-125 \mathrm{v}$.. $50-60$ cycle AC. Shpg. wt.. 26 lbe. 83 FZ 193. NET
79.95 MODEL 460. As above, but factory-wired. 84 FZ 668. NET

## MODEL 368-K SWEEP \& MARKER GENERATOR KIT

Sweep generator and marker for highly accurate alignment of FM . color and black-and-white TV. Covers 3 to 216 mc in 5 ranges. Variable frequency marker provides output from 2 to 75 mc on fundamentals; to 225 mc on harmonics. Sweep width is variable from $0-30 \mathrm{mc}$. Supplied with built-in $4.5-\mathrm{mc}$ erystal marker for oscillator. Provides dual markers for RF or IF allgnment. Provision for adding external marker. Continuously variable sweep and marker attenuators. Has retrace blanking. Output impedance, 50 ohms. Edge-lit hairlines for high tuning accuracy. 6:1 vernier tuning mechanism. Tubes used: $12 \mathrm{AT7}, 12 \mathrm{AV7}$, 12AX7, 6AU6, 12B4; 6x4. rectifier, selenium bias rectifier. $81 / 4 \times 131 / 2 x$ $71 / 4^{\prime \prime}$. With all tubes. parts and instructions. Less solder. For 105-125 v., 50-60 cycles AC. Shpg. wt., 16 lbs .

MODEL 324-K

## RF SIGNAL GENERATOR KIT

Provides modulated or unmodulated RF signal. For signal tracing and IF-RF alignment of AM, FM, TV receivers. Has expanded frequency range of 6 fundamental bands: $150-400 \mathrm{kc}, 400-1200 \mathrm{kc}, 1.2-3.5$ mc, 3.5-11 mc. $11-37 \mathrm{mc}$ and $37-145 \mathrm{mc}$. One harmonic band covers 111.435 mc . Calibration accuracy is $\pm 1.5 \%$. Output impedance, 50 ohms. Internal modulation of 400 cps variable from 0 to $50 \%$; can be used for audio testing. Input has gain control for use with external modulator. Colpitts RF oscillator is directly modulated by cathode follower. Fine and coarse RF at tenuators. With tubes and all parts. Less solder. $8 \times 10 \times 43 / 4$ ". For $105-125$ v., $50-60$ cycle AC. Shpg. wit., $10,1 \mathrm{bs}$.

## TEST EQUIPMENT

## MODEL 95OB-K RESISTANCECAPACITANCE BRIDGE KIT

I precision lnstrument for the laboratory or service shop. This unit provides for uick, accurate tests of component values. Combines a resistance-capacitance bridge and R-C-L comparator in one unit.
Measures and tests resistors from 0.5 ohm o 500 megolms in 4 ranges, and capacitors from 10 nm mf to 5000 mid in 4 ranges. One direct-reading scale gives both resistance and capacitance values. A ratio scaie is provided for comparison of resistance. capacitance. or inductance values to any external stiundard. Reads ratios from 05 to 20 (400 to 1.) Substitution boxes and decades, also listed on this page, make good external standards. "Magic eye" tube serves as null indicator. Continuously varjable $0-500$ volt DC source permits clecking capacitors under rated voltage. Tests capacitors for shorts. leakage, and (in the case of electrolytics) power factor. $6^{\prime \prime}$ dial. Tubes: $1-1629$. $1-6.55$ (rectifier). Trans-former-type power supply provides line former-type power supply provides ime
isolation. Sat in finished etched aluminum panel gray-wrinkle case, $10 \times 8 \times 43 / 4^{\prime \prime}$.
With case. panel. parts, tubes, wire and instructions. Less solder and leads. For instructions. Less solder and leads. $\mathbf{o l}$ sycle operation from 105-12.
AC. Shpg.-wt., 10 lbes.

MODEL II00-K RESISTANCE SUBSTITUTIÓN BOX KIT
A handy, versatile. time-saving instrument with a wide variety of applications. Helps to determine the value of an uninarked or illegible resistor. With a circuit in operation. resistance values can be changed to give optimum performance. In servicing or development. several Model 1100's give the flexibulity needed to change circuit values flexibily. Easy to use-simply disconnect one end of the resistor In question, and attach the substitution box with test leads. The best resistance value can then be selected by adjusting the box. This value of resistance can then be wired into the circuit. Resistance range from 15 ohms to 10 megs in decade multiples of $15,22,33,47$, 68 and 100 olms. 36 RETMA 1 -watt $10 \%$ resistors. 5 -way jack-top binding posts for connecting any type test leads. Black bakelite case. with 2 -color etched aluninum pancl. $31 / 4 \times 61 / 2 \times 31 / 2^{\prime \prime}$. Less solder and leads. Shpg. wt., 2 lbs.

## MODEL 540-K "REDI-TESTER" KIT

A very useful device for simplified repair work on home appliances and for checking automobile electrical systems. It is a combination $\mathrm{AC} / \mathrm{DC}$ voltmeter, ammeter ohn meter, wattmeter. and leakage tester A rotary switch range selector provides easier, sures, and faster operation than comparable units. The instruction book contains an introduction 20 electricity. complete operating instructions, and pro. cedures for common repalr jobs. This versatile tester locates defects in irons. refrigerators. electric blankets, house wiring. furnace control systems, heaters, fans, etc. Will also check auto batteries, regulators starters, ignition coils. direction signals, horns. switcles, etc.
Ranges: AC-DC volts, $0.7 .5,15,150,300$. Current (AC or DC). 0-15 amps. Resistance $0-1000$ ohms. Leakage test of capacitors above 0005 mfd and resisturs between 1000 and 2 megohms. $31 / 2^{\prime \prime}$ meter. Has hand some. etclied aluminum panel and black bakelite case. With leads. Less solder. Size. $61 / 2 x$ $31 / 4 \times 31 / 2^{\prime \prime}$. Shipg we.. 3 lbs .

## MODEL 630-K CATHODE RAY TUBE CHECKER KIT

Tests television picture tubes in the set or the shipping carton-speeds servicing, saves time. Indicates sliorted or open elements in he election gun assembly. Can be used with any cathode ray tube having either electrostatic or magnetic deflection and focus.
Uses balanced bridge circuit to measure peak beam current (which is proportional to screen brightness). Neon laind acts as a sensitive bridge balance indicator. Balancing control dial is calibrated to Indicate tube condition directly. Supplied with two test sockets, each with $21 / 2 \mathrm{ft}$. of cable. for duodecal (12-pin) and diheptal (14-pin) tuber Adapter cables plug into an octal socket on the panel. Cables are stored in case. Less solder. $61 / 2 \times 91 / 2 \times 3{ }^{\prime \prime}$. For $105-125$ volis. 50 60 cycle AC. Shpg. wh., 6 lbs. 83 F 177. NET
13.95

MODEL 630. As above, but factory-wired.

## MODEL 145-K MULTI-SIGNAL TRACER KIT

A useful aid to the serviceman and experimenter. Provides a quick method for locat ing the source of trouble in any radio. television set or audio amplifier. RFF probe incorforates a germanium crystal diode with response to over 200 mc . Probe can be with response to over 200 mc . Probe can be
used for stage-by-stage clieck of IF, RF. video and audio circuits. Front panel jacks for external oscilloscope or VTVM-permits visual signal tracing. Built -in $41 / 2^{\prime \prime}$ PM speaker and audio amplifier with volume control; can also be used as a low-power utility sound system for phonograph, intercom. public address. etc. Supplied with tubes. RF probe. and speaker. Less solder. Aluminum panel is handsomely styled, satin finished. For operation from $105-125$ volts, $50-60$ cycle AC. Size, $8 \times 10 \times 41 / 4^{\prime \prime}$. Shpg. wt.. 11 lbs

## TEST EQUIPMENT

## NEW MODEL 1060-K DELUXE BATTERY ELIMINATOR KIT

A rugked, powerful unit for operating any auto radio. including transistor models. Conibines Model $1050 . \mathrm{K}$ battery eliminator and $1055-\mathrm{K}$ filter (at left) in a single unit Fits conveniently on the work bench or wall. Can be used as a battery charger or eliminator. An excellent addition towards a well-equipped service shop.
Features: 2 DC ranges with extra filtering and continuous adjustment by a variac; separate volt meter and dual rarige ammeter for simultaneous readings; heavy duty selenium rectifiers; fused primary; auto matic reset overload relay in secondary; strong, well rentilated steel case.
Specifications: Low range. $0-8$ v.. 10 ampe continuous, 20 amps intermittent. $0.3 \%$ ripple at 2 ainps. $1.5 \%$ at 10 amps; hish range, $0-16$ v., 6 amps continuous. 12 ampe intermitient. $1.5 \%$ ripple at 2 amps. $2 \%$ at 6 amps; voltmeter range, $0-20$ v.: ammeter.
 cycle AC. Size: $83 / 4 \times 101 / 2 \times 73 / 4^{n}$. With case. parts, and instructions. less solder. Shpg. wt. 19 Ibs.

## Pyramid "Snap Around" AC Volt-Ammeters

Amprobes measure current without breaking the circuit or the insulation of conductors. Press trigger to open probe jaws. then close them around conductor. Meter instantly gives correct reading. One-hand operation. Jaws fully insulated. Dust proof D'Arsonval movements. precision balanced, $1 \%$ resistors. Accuracy. $\pm 3 \%$ of full scale. Voleage measured with new safety test leads which automatically insulate plugs when test lead is removed. Units are designed for 60 -cycle operat ion, and will give dependable results from 50 to 70 cps . Current readings tend to be low if frequency is low. or high if frequency is high.
(K) MODEL RS-1. New multi-range Amprobe Recessed range selector permits selection of any one of 4 current and 2 voltage ranges by flick of the thumb. Only one scale visible at a time. Pointer-lock locks needle in position when reading is taken in difficult locations. $2.36^{\prime \prime}$ dial with close magnifying dial window. Ranges: Amps.: 0-5-15-40-100; Volts: 0-150-600 AC. Impact-proof case has non-slip ribbing. Printed-circuit design and shielded-core nagnet movement. Supplied with test leads and storage case for easy carrying. Shpg. wi.. 2 lbs.
87 F 268 . NET
39.85

H AMPROBE JUNIORS. Small versions of H. Amprobe "snap around" meters. Convenient 1.8 -inch scale. Plastic case and window are molded in one piece. With test leads for making voltage measurements. Less carrying case (listed below). Size: 21/2x $43 / 4 \times 13 / 8^{n}$. Shpg. wt.. 1 lb .

## 84 F 488 . NET

MODEL CR-118. As above. but with $81 \times P 4$. Slipg. wt.. $111 / 2$ lbs 87 FX 297 . NET

Pyramid Model CRA-2 Capacitor-Resisior Analyzer
Extrennely versatile capacitor-resistor analyzer. Ideal for the lab. serviceman and engineer. Makes "In-Circuit" checks to quickly locate open and shorted capacitors. Also measures resistance, capacitance, pow er factor, leakage and insulation resistance. The analyzer contains a combination Wien and Wheatstone bridge circuit for quick. accurate capacitance ( 10 mmf to 2000 mfd ). resistance ( 100 ohms to 25 megohms). and power factor ( $0-65 \%$ ) ineasurenients. $41 / 2^{\prime \prime}$ meter reads leakage current ( $0-50 \mathrm{ma}$ ) and insulation resistance ( $5-20.000$ megolams). Rotary switel permits rapid selection of desired test function and range; meter also indicates test voltage applied by built-in nower supply (adjustable froin 0-600 volts) Can be used in any application where a capacitance bridge is needer. Black enamel case with leatirer handle. Size: $14 \times 91 / 4 \times 51 / 2^{\prime \prime}$ Complete with leads and instruction man Hal. For operation from $110-120$ volt, 50 60 cycle AC. Slipg. wt.. 15 lbs . 84 FZ 642 . NET
92.50

RF-2C

Sturdy panel meters. Black enamel steel cases. Have screw terminal blnding posts and lugs for soldered connections. Model NF-2C (round): Flange, $21 / 4^{\prime \prime}$; overall depth. $11 / 4^{\prime \prime}$. Model RF-2C (square): Flange, $21 / 4^{\circ}$; overall depth $13 / 16^{\circ}$. With mounting bracket. Both types mount in $21 / 6_{6}$ hole. $5 \%$ accuracy. Av. shpg. wt., 9 oz .

## JBT

METERS

23-JP-1

## MODEL 3I-EX ELAPSED TIME METER

Records operating time of AC equipment in . 1 hour steps to 9999.9 hours, then automatically resets. Self-starting symchronous inotor. Flange. $31 / 2^{\prime \prime}$. Mounts in $23 / 4^{\prime \prime}$ hole; overall depth, $31 / 4^{\prime \prime}$. For $110-120$ v. 60 cycle AC. Shpg. wt., $11 / 4$ lbs.

66 F689. NET
15.63

## MODEL 34-FX FREQUENCY METER

Vibrating reed frequency meter. Measures AC írequency from 56-64 cycles in 1 -cycle steps. $\pm 0.3 \%$ accuracy at $77^{\circ} \mathrm{F}$. For $100-130$ volts. Flush mounting. Flange, $31 / 2^{\prime \prime}$; body, $2^{11 / 15^{\prime \prime} ; ~ o v e r a l l ~ d e p t h . ~}$ $31 / \mathrm{s}^{\prime \prime}$. Shpg. wt., 12 oz.
26.70

## MODEL 23-JP-1 TEMPERATURE METER

Accurate. portable temperature meter. Tests oven thermostats in appliances. $23 / /^{\circ}$ scale reads from $0-650^{\circ} \mathrm{F}$. in $10^{\circ}$ divisions. Automatically compensated for ambient temperature changes. Meter is inounted on a black metal panel. With attached $51 / 2-\mathrm{ft}$. calibrated thermocouple, clip, and convection shield. Black top-grain leather case, $41 / 2 \times 23 / 4 \times 41 / 4^{\prime \prime}$. Shpg. wt., $21 / 4$ lbs.
66 F 688. NET
25.48

## BENCH-TYPE METER CASE

Compact. sloping-front metal case with rounded corners. Top binding posts. Size. $31 / 4 \times 4^{\prime \prime}$; $21 / 4$ " dia. hole. Less meter. Slipg. wt.. I lb. 66 F 506. NET

VOLTAGE
AND
BATTERY testers

## EMICO HEARING AID BATTERY TESTER

(A) $\mathbf{2}^{\prime \prime}$ DC voltmeter. Designed to clieck learing aid batteries. SepA arate ranges for " $A$ " and " $B$ " types assure reliable. accurate readings. " $A$ " scale reads 0.2 volts in . 1 -volt divisions; " $B$ " scale reads $0-50$ volts in 2 -volt divisions. Meter movement housed in durable metal case. Will not drain batteries. Supplied complete with test leads. Shpg. wt. 8 oz .
67 F 627. NET
2.94

## EMICO AC VOLTAGE TESTER

(B) Handy, low-cost, AC line-voltage tester. Gives accurate. instanB taneous check at receptacle. Has 2-prong male plug to fit conventional outlets-no test leads are required. Features convenient 0)-degree swivel head for easier reading at angle. Rance: $0-150$ volis. Scale has 5 -volt graduations between 50 and is0 volts. Meter volts. Scale has $\mathbf{2}^{\text {n }}$. Damped movement. Overall accuracy: $5 \%$ of full scale. Black metal case. Shpg. wt. 8 oz.
67 F 626 . NET
2.94

## STERLING BATTERY TESTERS

C. Accurate battery testers in sturdy, watch-type nickel-finished C] cases. For checking hearing aid batteries. "B" batteries. dry cells: etc. All are designed to correctly load small batteries. Handy pocket size. White dial face with easy-to-read scales. Size, $21 / 4^{\prime \prime}$ dia.. $5 / \mathbf{"}^{\prime \prime}$ thick. Av. shipg. wit., 6 oz .
TYPE 31 A HEARING AID BATTERY TESTER. For testing $221 / 2,30$ or 45volt " $B$ " " and $1 / 2$-volt " $A$ " batteries. Scales: $0-50$ volts. 0.2 volts.

With plug and fexible leads. 78 F031. NET

Copper-oxide rectifiers for relay and meter circuits and replacement purposes. Easy to select correct replacement-body color indicates circuit type. Maximum AC input. all units. 5 volts. Series 500: For up to 30 ma max. Reverse voltage: 2.25 DC. Frequency response: $0-1 \mathrm{mc}$. Diameter . $500^{\prime \prime}$ with $.166^{\prime \prime}$ center hole. $0.038^{\prime \prime}$ thick. Copper oxide with pure silver face. $3^{\prime \prime}$ lead wires. Phillips head 6-32 mounting stud. Synthetic lacquer-enamel finish. Series 160: For up to 5 ma max. Reverse voltage: 2.25 DC . Frequency response: 0.75 mc . Diameter; $0.166^{\circ}$; $.038^{*}$ thick. Copper-oxide with pure silver contact tace. $3^{\prime \prime}$ lead wires. Two holes for No. 2 mounting screw. Sealed in housing with polystyrene base; moisture-proofed. Series 100-C: Same as Series 160 except stack is housed in welded brass case. Has convenient. clip-type mount. Synthetic lacquer finish. Av. shpg. wt.. 5 oz .

PANEL METERS

## TYPE PL PLASTIC-FRONT PANEL METERS

Advanced-design panel meters with wrap-around fronts of clear, unbreakable plastic. Have many advantages over conventional style panel meters. Full open dial provides much longer, more readable scale in same size case. Attractive design enhances appearance of test instruments and panels. All have stud mountings. Raised plastic "coverglass" allows full natural lighting from top, sides, and bottom. Durable, white enamel finish metal meter faces with black scales and characters.

Accuracy within $\pm 2 \%$ on full scale. DC types have D'Arsonval movements with extra-light moving coil. AC types have air-damped, iron-vane movements. All types have selected jewel bearings, highly polished and specially-treated pivots. Mounting template provided with each meter for accurately determining necessary cut-out. Spade-type pointers; molded zero adjusters; and ceramic pointer stops. Av. shpg. wt., $1 / 2 \mathrm{lbs}$. Be sure to include Range and Madel Number on all meter orders.

## DB METER

Decibel meter. 6 millivatts. $5 \%$ accuracy. Has internal resistance of 50100 ohms. 1.73 volts at zero $\mathrm{db} .31 / 2^{\prime \prime}$ round.

## VOLUME UNIT METER ("A" SCALE)

Volume unit meter. 3900 olims impedance. Steady state reference. 1 milliwatt. For 600 -ohm line. Also has $0-100 \%$ scale.

GLASS-FRONT PANEL METERS

SPECIFICATIONS. Accuracy, within $2 \%$ of full scale. DC meters have D'Arsonval moving coil movements. AC meters have double, iron repulsion-type movements. leweled bearings and hardened alloy steel pivots. Metal dial faces, finished in white enamel, will not warp, crack or discolor under normal conditions. Have molded zeroadjusters and cushioned ceramic pointer stops.

All parts are heat-treated to eliminate strains and stresses, and to assure accurate aligument. Rigidity and alignment of bearing supports provide protection against vibrations. Steel parts are rustproofed. Black bakelite cases. Av. shpg. wt., 11/2 lbs. When ordering include Range and Model No. of meter. *Indicates overall depth but does not include terminals.

## VOLUME UNIT METERS

Highly damped meters for broadcast monitoring, public address or communications systems. " $A$ " scale: 20 to 30 volume units on top of are; $0.100 \%$ modulation on bottom of arc. Have D'Arsonval elements with Anico-V magnets. Sensitive rectifiers operate under wide frequency variations. Steady state ref., 1 mw . Zero adjustment. Internal impedance. $\mathbf{3 9 0 0}$ ohms. For $\mathbf{6 0 0}$ - ohm lines Metal dial is yellow with black and red let tering. In rugged black cases of molded bakelite. "Illuminated.

DECIBEL METERS ( +6 to -10 db ) Power level indicators. For measuring sound or noise level in broadcasting, public ad dress and recording systems. Read up 6 and down 10 db . Zero db is 1.73 volts. Calibrated for use with 500 -ohm line. Keference level is 6 milliwatts. Internal resistance is 5000 ohms. White enameled metal dial with black lettering. In black bakelite molded cases tlluminated.

## PRECISE MULTI-RANGE PANEL METER KITS

Versatile, new, multi-range panel meter kits. Lets you choose from 4 to 18 different meter ranges using only one meter movement! Features interchangeable dial faces which slide in or out casily, and plug-in shunt or multiplier resistors. Each kit is supplied complete with higli-quality. jewelled D'Arsonval meter movement, precision resistors, $41 / 2^{\prime \prime}$ mirror scales, inserts. meter case ( $41 / 0^{\prime \prime} \times 45 / 0^{\prime}$ ) and full instructions. Shpg. wt.. $13 / 4 \mathrm{ibs}$

| Stock No. | Type | Ranges | EACH |

| 83 F960 | AC Volts; $1000 \mathrm{ohm} /$ volt; 1 v. to 1000 v . | 16 | 35.95 |
| 83 F961 | DC Amp.; 05 to 1 amp . | 6 | 14.95 |
| $83 F 962$ | DC ma.; $50 \mu \mathrm{Amp}$. to $400 \mu \mathrm{Amp}$. | - | 18.95 |
| 83 F963 | AC Amp.; . 001 to 1 amp. | 10 | 29.95 |

PANEL METERS

An excellent selection of high quality panel meters. Spade type pointers move through a wide scale arc of $100^{\circ}$. New, "Wide-Vue meters (listed below) have longer scales for maximum readability self-shielded meter movements. Models 27. 29, 37 and 39 have D' Arsonval movements. Models 57 and 59 have iron-vane movements. 27,37 and 57 are $31 / 2^{\prime \prime}$ meters; 29,39 and 59 are $41 / 2^{* \prime}$ meters. Polished and shock-mounted jewels. Accuracy: $\pm 2 \%$. DC voitmeters. 1000

## VU METERS

Volume unit meters for power amplifiers and broadcast equipment. Scales show level both in VU and percentage modulation. D'Arsonval movement. Highly damped. Accuracy, $\pm 5 \%$. Dials have $100^{\circ}$ $\operatorname{arc} \mathrm{VU}$ scale $\mathrm{A},-20$ to +3 . $\mathbf{3 9 0 0} \mathrm{ohm}$ internal impedance across $\mathbf{6 0 0}$ ohm lines (zero reference, 1 milliwatt). Model 47 has $29 / 6$ scale; case size. $31 / 2^{\prime \prime} \times 21 / 4^{\prime \prime}$ deep (mounts in $23 / 4^{\prime \prime}$ hole). Model 142 has $31 / 2^{2}$ scale; case size, $41 / 4^{\prime \prime} \times 113 / 44^{\prime \prime}$ deep (mounts in $31 / 4^{"}$ hole). "llluminated. $23 / \mathrm{s}^{2}$ deep. Have bakelite case. Av. shpg. wt., $11 / 4 \mathrm{lbs}$.

## Phaostron Custom Panel Meters

High quality. netal-cased panel meters. Carefully designed for long service and reliable performance Precision-cast, anti-magnetic drawn steel cases shield meter movements from stray magnetic fields. Permit mounting on bakelite or steel panels without calibration. Accuracy under constant use and high slock and vibration conditions is positively assured. Large, easy-to-read scales with clear increments and numerals. $6^{\prime \prime}$ meters have mirrored scales. All have insulated zero adjust screws. Accuracy: $6^{\circ}$ instruments. $1 \%$; others, $2 \%$. Shock-mounted jewels and polished pivots. Sizes: ( $6^{*}$ rect.) 41/2" high. 6" wide. $21 / 0^{\prime \prime}$ deep; ( $41 / 2^{\prime \prime}$ rect.) $43 / 6^{\circ}$ high. $5^{\circ}$ wide. $23 / 4^{\prime \prime}$ deep; ( $31 / 2^{\circ}$ rect.) $33 / 0^{\circ}$ high. $31 / 4^{\prime \prime}$ wide, $21 / 4^{\prime \prime}$ deep: ( $31 / 2^{\circ}$ round) $31 / 2^{\prime \prime}$ dia., $2^{\prime \prime}$ deep; ( $31 / 2^{\prime \prime}$ square) $31 / 2^{\prime \prime}$ square. $2^{\prime \prime}$ deep; ( $21 / 2^{\prime \prime}$ round) $21 / 4^{\prime \prime}$ dia.. $2^{\prime \prime}$ deep; ( $21 / 2^{\circ}$ square) $23 / 4^{\prime \prime}$ square, $2^{\prime \prime}$ deep. $6^{\circ}$ instruınents have $100^{\circ}$ scale arc. except 20 microampere type. which has $60^{\circ}$ arc. 20 and 30 microampere $21 / 2^{\prime \prime}$ and $31 / 2^{\prime \prime}$ meters have $60^{\circ}$ arc. Av. shpg. wt.. $13 / 4 \mathrm{lbs}$.

## VOLUME UNIT METER-SCALE A

## There's More For The Amateur At Allied

- We're Trading High
- Easiest Payment Terms
- Money-Back Guarantee
- World's Largest Stocks
- Fastest and Best Service
- Staff of Experienced Amateurs
- GIANT TRADE-INS

Allied is making bigger and better trade-in deals that ever. Now's the time to cash in on our "king-size" trade-in allowances for your old receiver or transinitter and bring your "shack" right up to date with the latest transmitting and receiving equipment. Just drop a card to Allied's Ham Shacis-tell us the unit you'd like to trade and the new gear you want. You'll agree and the new gear you want. when youreceive our offer. Do business with Allied and enjoy the latest in Amateur gear.

## - ONLY 10\% DOWN

You can bring your "Shack" right up to date without straining your budget when you buy from Allied. Order new Amateur equipment on our Fasy Payment Plat there's no red tape-and no finance companies to deal with. Pay only $10 \%$ down and the balance in small. easy-on-the budget monthly payments. If you have Amateur equipment to trade, it should cover the down payment and you can pay the balance while payment and you can pay the falance whils on enjoying the latest gear. For full details on
Allied Fasy Payment Plan. see page 306 .

- 15-DAY TRIAL

Order Amateur equipment on our regular terms and try it under your own operating conditions. If within 15 days you're not completely satisfed with the perforinance of the equipment, return it and we will refund your full purchase price, less transportation charges. Allied's money-back guarantee. which applies to all factory-built units, offers you complete protection. In addition. this Guarantee is further backed by the standard RETMA Warranty against defects in materials and workinanship.

# knight-kits FOR THE AMATEUR 

## Amateurs Get More For Their Money With KNIGHT-KITS

## New! KNIGHT-KIT Amateur Communications Receiver <br>  <br> - Covers 540 ke to 31 mc in Four Bands <br> - New Printed Circuit Switches for Ease of Assembly <br> - Extremely High Sensitivity-1.5 Microvolts

Revolutionary new Amateur communications receiver kit. Employs printed circuitry in every stage-even bas printed circuit switchesi Makes possible quick and easy assembly; virtually eliminates wiring errors. Absence of lead "dress" variations gives positive assurance that every kit must equal or surpass specifications. Covers 540 kc to 31 mc in four bands; electrical bandspread calibrated for Amateur bands. Sensitivity, $1.5 \mu \mathrm{v}$ for 10 db SNR. Selectivity, $300 \mathrm{cps}-4.5 \mathrm{kc}$ at 6 db . Includes: AVC; ANL; antenna trimmer: variable BFO; $Q$ multiplier; constant-running, voltage-regulated HF oscillator. Coaxial input. Has phone jack. Knight-Kit $100-\mathrm{kc}$ Crystal Calibrator can be mounted inside cabinet; controlled from front panel. Provision for $\mathbf{S}$ incter. Less 8 -obm speaker. 7 tubes. VR and rectifier. Complete with all parts, tubes, wire, solder, and instructions. For $110-120$ v., $50-60$ cycle AC. $10 \times 10 \times 161 / 2^{\prime \prime}$. Shpg. wt. 23 lbs.

KWM-I Unique in Design No "Zeroing In"

## KWS-1 TRANSMITTER

Bandswitching Amateur transmitter for SSB, CW, and AM. Covers 80-75, 40, 20 15. 11 and 10 meters. 1 kw P.E.P. on SSB. i kw on CWV. AM emission is carrier plus one sideband; equivalent to i kw with a narrow-band width receiver. VFO has dial calibration of 1 ke per division. Extrente stability-uses low -frequency VFO and crystal-controlled mixer stages. Pi-L output network- 52 ohms RF impedance. High impedance mike input. Voice-operated or push-to-talk keying. Mechanical filter on SSB provldes 50 db rejection of unwanted sideband. limits audio to 3000 cps . Balanced modulator. mechanical fitter reduce carrier 60 db . Linear RF power amplifier uses two $4 \times 250 B$ 's in class ABI. RF feedback for improved linearity. All power supplies are housed in cabinet which serves astransmitter base. Size. Transmitter. 101/2x $173 / 8 \times 151 / 2^{\prime \prime}$ deep: power supply section. $30 \times 173 / 1 \times 151 / 2^{\prime \prime}$ deep. For $110-120$ v.. 50.60 cycle AC. Shipg. wt. 210 tbs. 98 SZ 774 . NET

## 75A-4 RECEIVER

Top-performing receiver for AM, CW. SSB and RTTY. Covers Amateur bands only160 through 10 meters. Double conversion gives image rejection of 50 db or more. Precision dial calibration and high stability are provided by the hermetically sealed VFO and crystal-controlled second HFO. Very fast acting AVC requires no carrierideal for SSB. Separate SSB detector for minimum intermodulation distortion. Desired signal can be moved within the bandwidth without a change in CW beat notepushing nearby interference off edge of pushing nearby interierence of edge of Built-in 100 ke crystal calibrator. With 3.1 ke mechanical filter: sockets for 2 additional filters. Sensitivity. $1 \mu v$ for 6 db SNR. Less speaker. For $110-120$ v.. 5060 cycle AC. $101 / 2 \times 171 / 4 \times 151 / 2^{\prime \prime}, 70 \mathrm{lbs}$.

## MAKE ALLIED YOUR AMATEUR HEADQUARTERS

Allied offers the Amateur every buying advantage. Select the equipment you want from the largest and most complete stocks of Amateur equipment in the world and be sure of prompt, efficient service. Amateurs everywhere rely on Allied's famous "Ham-to-Ham" service-our staff of experienced Amateurs will be glad to answer any questions you may have regarding installation or operation of your equipment. And Allied's "King-Size" trade-in offers and Easy Payment Plan make it easy to own the latest in station equipment

## POPULAR S-53A RECEIVER

A highly sensitive and selective receiver at low cost. Covers: 6 Amateur bands, Police. Aircraft. Marine. Foreign and domestic shortwave broadeasts and standard broad cast programs. Has high signal-to-noise ratio. Built-in $5^{\sim}$ PM speaker.

TUNES TO 54.5 MC . Range $1.540-16.30 \mathrm{kc}$ Range 2, 2.5-6.3 mc; Range 3, 6.3-16 mc; Range 4, 14-31 mc; Range 5, $48-54.5 \mathrm{mc}$. Provides excellent Amateur 6 -meter reception on Range 5. Edge-illuminated sliderule dial. Panel controls: Main Tuning. Bandspread, Bandswitch. Volume-On-Of. Sensitivity-Phono. Standby. Tone. Auto-Sensitivity-Phono. Standby. Tone, Auto-
matic Noise Limiter, and Plione-Code natic Noise Limiter, and Plione-Code plifies tuning on crowded bands. SpeakerHeadplone switch. Jeadphone and phono jacks on rear pancl.

MODERN SUPERHET CIRCUIT. Uses: $1-6 C_{4}$ osc. (temperature compensated for minimum drift), 1-6BA6 mixer. 2-6BA6 IF's. 1- 6 H 6 detector-AVC-noise limiter, 1 6SC7 BFO-ist AF. 1-6K6GT output ( 2.5 watts). Rectifier is 5Y3GT. 5" PM speaker. Satin black steel cabinet with bruslied chronte trim. Size. $127 / 8 \times 7 \times 73 / 4^{\prime \prime}$ deep. Piano-hinge top. For $105-125$ volts. $50-60$ cycles AC. Slopg. wt., 20 lbs.
97 SZ 573 . NET

## TOP-VALUE SX-99 RECEIVER

An outstanding value in a medium-priced communications receiver. Offers features usually found only in high priced communi. ations receivers. Crystal filter-Calibrated electrical bandspread-" $\mathbf{S}^{\text {" }}$ meter. Also separate RF and AF gain controls.
FREQUENCY COVERAGE. Full coverage of all frequencies from 540 kc to 34 mc in 4 ranges; the standard AM broadcast band plus 3 short-wave ranges. Provides reception of broadcasts from all over the world.
FEATURES: Bandspread dial calibrated for 80, 40, 20, 15, 11 and 10 meter Amateur bands for excellent tuning accuracy: "S" meter is calibrated in units of 6 db to S 9 and in db above S 9 for accurate signal reports: Crystal filter for razor-sharp selectivity; RF stage and two IF stages for very high sensitivity; Terminals for $\mathbf{3 . 2 - o l m m}$ or 500-olim speaker. Separate BFO with pitch control; automatic noise limiter and 3-position tone control. $\%$ tubes; plus rectifier.

CONSTRUCTION: The SX-99 has the famous Hallicrafters precision construction and expert craftsmanship-known the world over. Use of higlt-quality components assures years of depesidable performance. Steel cabinet is finished in gray and black with brushed chrome trim. $81 / 2 \times 183 / 4 \times 11^{\prime \prime}$ deep. For $105-$ 125 volts. $50-60$ cycles AC. Less speaker (see R-46B matching speaker on page 265). Shpg. wi.. 36 lbs
98 SZ 714 . NET
149.95

## SX-62A ALL.WAVE RECEIVER

The SX-62A offers peak performance on AM broadcast, short wave and hi-fi FM. Precision buit to meet the most exacting standards-incorporates every modern refinement in all-wave receiver engineering. Six ranges: $540-1620 \mathrm{kc} ; 1620 \mathrm{kc}-4.9 \mathrm{mc}$ $4.9-15 \mathrm{mc} ; 15-32 \mathrm{mc} ; 27.56 \mathrm{mc}(\mathrm{AM}-\mathrm{FM})$; $54-109 \mathrm{mc}$ (AM-FM). Beautifully styled.
HIGH-FIDEIITY AUDIO. Push-pull oV' output furnishes 10 watts of audio power. Fourpusition tone control; phono jack.
FOR SWL'S AND OX FANS. Red dots identify proper settings of controls for AM and SW reception; sreen dots for FM. Wide-vision slide-rule dial. 60-to-1 ratio tuning knob. 500 -ke calibrating crystal, with dial pointer for pin-point reset accuracy. Has BFO for reception of code signals.
MODERN CIRCUIT. Three IF and two RF stages provide maximum usable sensitivity. Crystal filter provides 6 -step selectivity. Separate RF and AF gain controls; AVC; BFO; ANL; temperature-compensated. voltage-regulated oacillator. $3(\mathrm{~m})$-ohm antenna input. 3.2, 8 and 500 ohm outputs. Black steel cabinct with gray panel. Size. $101 / 4 \times 20 \times 16^{\circ}$. Less speaker. (See R-46B, p. 265.) For $105-125$ volts. $50-60$ cycles AC. Shpg. wt.. 77 Ibs.
97 SZ 540 NET
349.95

## FAMOUS S-85 RECEIVER

Popular S-85 communications receiver Supersedes the renowned S. 40 series. Completely restyled for improved operating ease and greater tuning accuracy. Puts worldwide communications at your finger tips. Tunes from 540 kc to 34 mc continuously in 4 ranges.
FEATURES: Bandspread dial calibrated for 80. 40, 20, 15. 11 and 10 meters. RF amplifier; 2-IF amplifiers; BFO with variable pitch control; automatic noise limiter; 3 . pusition tone control; built-in $5^{\circ}{ }^{\circ} \mathrm{M}$ peaker; 4 tuning ranges-standard broadcast plus 3 short wave.
TUBES USED: 6SG7 RF amplifier, 6S 17 converter, 2-6SK7 IF amplifiers. 6SC7 BFO and audio amplifier. 6K6GT audio output. 6 H6 ANL.AVC detector: rectifier is 5 Y3GT.
FRONT PANEL CONTROLS: Sensitivity, band selector switch, volume. main tuning. bandspread AVC on-off, noise limiter on-off A.M.CW, tone (high-medium-low) and AC on-off, pitch control. standby-receive. Panel ack for headphones.
Steel cabinet finished in gray and black. $87 / 1 \times 181 / 2 \times 10^{\prime \prime}$. For $105-125$ v. $50-60$ cycle AC. Slipg. we., 36 ibs.

HT-32

## HT-32 TRANSMITTER

New, higb-efficiency transmitter-exciter for SSB-AM, or CW operation. Used alone, the HT-32 with 144 watts P.E.P. input, is an excellent, completely self-contained transmitter for the $80,40,20,15,11$ and 10 meter Amateur bands. As an exciter, the HT-32 is ideal for use with the HT-33 power amplifier (at right). or any other similar unit.
FEATURES: New piezo-electric sideband fitters; new, extremely stable bridged-ter modulator develops almost perfect sideband modulation; precision gear-driven VFO reads directly in kilocycles to within 300 cycles of reference point; distortion products down 30 db ; carrier suppressed 50 db ; unwanted sideband down 50 db ; full voice control; clean, break-in keying; 52 -olum pinetwork output for harmonic suppression.
TUBE FUNCTIONS: 12AX7 speech amplifier: $12 \mathrm{AU7}$ speech amplifier and 4.95 -mc carrier osc.; $12 \wedge \times 7$ voice control and ist anti-trip amplifier; 6AL5 voice control and anti-trip diodes; 12 AT 7 relay tube 2 nd anti-trip amplifier; 12AU7 diode modulator: 6AH6 4.95 -me amplifier; 12 AT7 sideband switching oscillator; 6 A ifo ist mixer; 6 AU U 9 -me amplifier; 6 AB4 crystal oscillator; 6 AH6 2nd mixer; 6AH6 3rd mixer; 6CB6 VFO; 12BY7 driver amplifier; two parallel 6146's in final; 5R4GV HV rectifier; 5 V 4 LV rectifier: OA2 voltage regulator.
CONTROLS: Operation (Power Off, Standby, Mox. Cal. Vox); Audio Level; RF Level; Final Tuning, Function (Upper Sideband. Lower Sideband, DSB, CW); Meter Compression; Callibration Level; Driver Tuning; Band Selector; VFO.
Ruggedly constructed steel cablinet is handsomely finished in gray and black with brushed chrome trim. Size. $101 / 4 \times 20 \times 17^{\circ}$ For operation from 105-125 volts. $\mathbf{5 0 - 6 0}$ cycles AC. Shpg. wt.. 86 lbs. 94 SZ 807. NET.
675.00

## R-46B MATCHING SPEAKER

$10^{\circ}$ PM-type speaker in handsome cabinet to match Hallicrafters receivers. Has power handling capacity more than adequate for even the SX-62A and provides excellent tonal quality. Also a fine companion unit for use with the SX-96, SX-99. SX-100, SX-101, or any other receiver having 3.2ohm output impedance. Features heavyduty construction throughout; has rugged steel frame to maintain precse voice coil alignment; also Alnico $V$ magnet and highquality seamless-type cone. Frame is predrilled to permit mounting of output transformer, if desired. Speaker cabinet is of sturdy metal and finished in black with smart, contrasting satin-chrome trim. All seams are spot-welded for high strength. Four rubber feet prevent marring of desk. table or receiver top. Size, $107 / 2 \times 15 \times 81 / 2^{\prime \prime}$. Supplied complete with $5-\mathrm{ft}$. 2 -conductor cable. Shpg, wt., 15 lbs. cable. Shpg, wt..

## HT-33 LINEAR AMPLIFIER

A kilowatt of flextble, efficient table-top performance is yours with the new, uitracompact HT- $\mathbf{3 3}$ linear amplifier. A perfect mate to the HT-32 (at left) or any other low-power transmitter.
FEATURES: Covers $80,40.20,15,11$ and 10 meter Amateur bands; 52 -ohm pi-network output for efficient harmonic suppression; built-in TVI suppression includes filtered control leads; one knob bandswitchlng; ceramic tubes.
CIRCUIT: Two parallel-connected 4 CX 300 A power tetrodes in class $\mathrm{AB}_{1}$; two 866 A reclifiers; two OB2 voltage-regulators; one OA2 voltage regulator. 52 -ohm coax input. Bandswitch simultaneously selects oroper grid and plate tank inductances. large meter measures plate and screen current
SPECIFICATIONS, Power Input, 1000 watts SSB and CW; 700 watts AM. Power Output. 625 watts P.E.P. with 8 watts P.E.P. drive; 575 watts CW with 6.5 wates drive; 285 watts AM with 6 watts drive.
CONTROLS: Band Selector, Grid Tuning. Plate Tuning, Power Of -On. Tune-Operate, High Voltage, Of-On. Meter (plate and screen).
Beautfully finished satin-hlack steel cabinet with chrome trim. $20 \times 123 / 5 \times 161 / 4^{\prime \prime}$. For $105-$ 125 v., $50-60$ cycle AC. We., $12,3 \mathrm{lbs}$

## SX-101 AMATEUR RECEIVER

The $\mathbf{S X}-101$ is a super-deluxe communications receiver incorporating every essential for first-class coverage of the A mateur bands. A dual-conversion, selectable-sideband receiver, ft has $1-\mu v$ sensltivity on all bands and 5 steps of selectivity from 500 to 5000 cps. 7 bands cover: $1.8-2.0 \mathrm{mc} ; 3.5-4.0 \mathrm{mc}$; $7.0-7.3 \mathrm{mc}$; $14.0-14.4 \mathrm{mc}$; $21.0-21.5 \mathrm{mc}$; $26.95-27.35$ and $28.0-29.7 \mathrm{mc} .10-\mathrm{me}$ position for zero-beating crystal calibrator with WWV.
deluxe features: Crystal-controlled 2nd conversion oscillators; Tee-notch filter: gear drive tuning miechanism with $50: 1$ ratio; vernier dial-pointer adjustment; 100 kc crystal calibrator; Individually illumiated band scales; dual-scale $S$ meter with zero point independent of sensitivliy control -functions with AVC off or on; directcoupled series noise IImiter.
CONTROLS: Tuning; Pointer Reset; Antenna Timmer; Tee-Notch frequency; TeeNotch Depth. Sensitivity; Band Selector; AC Off /On-volume; Selectivity; BFO Pitch: Response (Upper or lower-Sideband and Tone): AVC Of-On; BFO Off-On; ANL Off-On; Marker (crystal calibrator) Of-On; Standby-Receive.
Circuit employs 14 tubes plus voltage regulator and rectifier. Size, $101 / 2 \times 20 \times 16^{\prime \prime}$. Less speaker; Sce R-46B matching speaker, at left. For $105-125$ volts, $50-60$ cycle AC. Shpp. wt., 85 lbs .

## THE RADIO MAN'S RADIO

## SX-100 SELECTABLE RECEIVER

Tbe SX-100 communications receiver offers an array of outstanding feat ures. In addition to selectable sideband operation and double conversion, it features a 50 kc "Tee-Notch" system of selectivity. Covers 538 to 1530 kc and 1720 kc to 34 mc in 4 ranges.
OTHER FEATURES: 100 - kc crystal calibrator logging scale and gear drive on main and band-spread tuning; and crystal controlled 2nd conversion oscillator.
TUBES AND FUNCTIONS: 6CB6 RF amplifier, 6AU6 1st mixer, 6C4 HF oscillator, 6BA6 1650-ke 1F, 6BA6 2nd mixer, 124 T7 dual crystal 2 nd conversion oscillator, $6 \mathrm{C} 450-\mathrm{kc}$ IF, 6BA6 50 kc IF, 6BJ7 detector-AVC ANL .6 SC 7 ist audio and BFO. 6K6GT audio output, $6 \mathrm{AU6} 100$ - kc calibrator; 5 Y 3 GT rectifier and OA2 voltage regulator. CONTROLS: Antenna trimmer, Notch Frequency, Notch Depth, Calibrator Off-On, Sensitivity. Band Selector, Volume, Tuning, AVC Off-On. Noise Limiter Off-On. Bandspread, Selectivity, Pitch, Reception. Standby. Headphone Jack; 3.2-ohm out put. Black cabinet with satin-clırome trim. Size. $81 / 2 \times 181 / 1 \times 105 / 0^{\circ}$. For $105-125$ v., $50-60 \mathrm{cy}$ cle AC. Less speaker. (See R46B below left.) Shipg. wit., 43 lbs.

## "S" METER KIT

A handsome, easily installed " S " meter for panel mounting. For use with Hallicrafters S-40B, S-20R, S 40 A, SX 62 . S-77, S-77A. etc., as well as communications recelvers of other manufacturers. Can be installed in any RF or IF stage with AVC action. Ruged, attractively styled $3^{\circ}$ sollare meter has black dial with easy-to-read white transucent markings with provision for internal back lighting. Two scales; reads in microvolts from 0 to 20,000 ; " $\mathrm{S}^{\prime \prime}$ units to S 9 at mid-scale and then in db up to 50 db over S9. Essential to the Amateur operator and SWL for giving accurate signal strength re-ports-aids in recelver tuning. Requires $23 / 4$ "dlameter round hole for meter barrel and four $1 / 8^{\prime \prime}$ holes for mounting studs. Can be separately mounted in individual meter case (see page 296). Kit consists of $0-5 \mathrm{mil}-$ liampere meter, 500 -ohm potentiometer for electrical zero-set, one 82 -ohm $1 / 2$-watt $10 \%$ resistor, one $330-$ ohm $1 / 2$-watt $10 \%$ resistor, and complete installation instructions covering all recent Hallicrafters communications recelvers. ## NEW NC-66 AND RDF-66

Versatile 3 -way portable receiver covers Imateur, marine, and shortwave bandsoperates on AC. DC or from its own, selfcontained hatteries. Five bands nrovide continuous coverage from 150 kc . to 23 mc ; ong-scale electrical bandspread permits tuning and loggligg with great accuracy Compact case-beautifully styled-also includes two antennas: highly sensitive ferrite oop for DF (see below) and broadcast bands. plus a telescoping whip antenna for hain and shortwave bands. Easy to carry anywhere; it's even been salt-spray tested! Built-in fixed-tuned CW oscillator for code reception. Quality $5^{n}$ PM speaker is housed behind front panel; phone jack on front pancl automatically cuts out speaker when phones are used. Dial calibrations are exceptionally clear, with Amateur and shortwave bands plainly marked in color. Low filament-voltage tubes provide nearly instantaneous warm-up. Tube lineup: 1 U RF. 1 L 6 converter, 1 U 4 CW oscillator/IF amplifier. 1 U5 2nd detector/AVC/1st audio amplifier. 3 V 4 audio output: selenium rectifier. Chrome-trimmed case measures $911 / 6$ $\times 125 / 15 \times 10^{\prime \prime}$. For operation from $110-120$ volts. $50-60$ cycle AC, or DC, or batteries (supplied less battery, see listing below) Stsps. wt.. 16 lbs.

## NEW NATIONAL NC- 109

Low-price, general coverage receiver for AM. CW or SSB recention. Incorporates exclusive "Microtome crystal filter, which provides five degrees of selectivity, in addftion to normal bandwidth for voice. Sharp phasing notch over 00 db deep for effective interference rejection. Separate product detector for excellent reception of single sideband and CIV signals. Input for phono or crystal calibrator.
Covers 540 kc to 40 mc in four bands. Calibrated electrical bandspread for Amateur $10,11,15,20,40$ and 80 meter bands. Indirectly illuminated lucite dial is designed for legibility; amateur and shortwave bands are clearly marked. " S " meter on front panel for signal strength indication and more accurate tuning. Gang-tuned RF amplifier stage, plus two if and two AF stages. Stability is Increased by separate IIF oscillator tube; ceramic oscillator coil forms and temperature compensation further iniprove stability. Separate RJ and AF gain controls. Tube lineup: 6BA6 RF amp.. 6BE6 frext uency converter, 6C4 HF oscillator. 6BA6 ist IF amplifier, 6 BA 6 2nd iF ainplifier 6BE6 product detector, 6ALS detector AVC and ANL, 12AT7 ist AF amplifier and $\mathrm{BFO} / \mathrm{S}$ meter amplifier, 6105 AF out put 5Y3GT rectifier and OB2 voltage regulator.
Controls: Main tuning: bandspread tuning antenna trimmer; band selector switch RF gain control; AC Off-On and AF gain control; stand-by switch; noode selector switcl. (ANL AM CW SSB and ACC) one control; BFO pitch; selectivity; phas ing, Size, $10 \times 16^{13 / 15 \times 10^{7} / s^{\prime \prime}}$ deep. Less speaker. For $110-120$ volts, $50-60$ cycle AC Shipg. wt., 3.5 lbs

## LOW-COST SW-54 RECEIVER

A smart, ultra-compact communications receiver at low cost. Perfect for the beginning Anateur or short wave listener; a real DX-getter. Provides sensitive, selective reception over a full range of frequencies from 540 kc 1030 mc . Receives standard AM broadcasts. ships, aircraft and Amateur signals. Single knob drives separate main tuning and bandspread dials; all important channels are clearly marked on the well-illuminated main tuning dial. Bandspread dial simplifies tuning of crowded short wave bands; has $0-100$ logging scale which makes it easy to reset, dial. Receives voice or code
Built with the same precision and ruggedness that has made National communications receivers world-famous. Modern superleterodyne circuit uses 12BE6 converter. 12BA6 CW oscillator/1F amplifier. 12AV6 2nd detector/1st audio amplifier/AVC. 50C5 audio output. and 3525 rectifier. Buitt-in 5 -inch PM speaker provides clear, intelligible reproduction of voice and music; pin jacks on rear perinit use of lieadphones for late listening or greater clarity under conditions of strong interference. A convenient switch cuts out the speaker when headphones are being used.
Fasy-to-read slide-rule scale is indirectly illuminated; four bands are used to cover operating range. Band $A$ covers $540-1600 \mathrm{ke}$.; Band B, 1.6 mc to 4.7 mc ; Band C. 4.6 nic to 14.5 mc ; Band D, $12-30 \mathrm{mc}$. Attractively designed cabinet maintains professional appearance, yet looks handsome; knobs and switches are spaced for easy, accurate operation with out crowding. Controls: Main-Bandspread tuning, Off-On, Volume, Receive-Standby. Band Selector. AM-CW Switch. Speaker-Headphones Switch. Cabinet is $7 \times 11 \times 7^{\prime \prime}$. finished in Na tional gray enamel. For $110-120$ v.. 50-60 cycle AC. Shpg, wt.. 15 lbs.

## NATIONAL NC-300

Designed specifically for Amateur band coverage. the superb NC-300 provides the ultimate in flexibility and outstanding performance. Covers 7 Ariateur bands. from 60 tlurough 10 meters, with dial scales for 50. 144 and 220 mc plug-in converters (below). Double conversion: 2215 ke 1 st IF and $80 \mathrm{kC} 2 \mathrm{nd} \mid F$, with three positions of selectivity, $8 \mathrm{kc}, 3.5 \mathrm{kc}$. and 0.5 kc . Separate linear detector for optimum SSB performance. Crystal filter for lieterodyne elimination. Foot-long slide-rule dial spreads out each band to 2 kc per division. or less Sensitivity: $1 u y$ or better on all bands. HF and L.F oscillators are temperature-compensated and rock-stable. Inertia tuning mechanism. fast-acting ' $S$ ' meter, separate RF and IF gain controls. Less speaker (below). For operation froms $110-120$ volts. $50-60$ cycle AC. Size. $111 / 4 \times 191 / 2 \times 15^{\prime \prime}$. Shipg. wt. ( 10 lbs.

## NATIONAL NC-183D

Double-conversion conmmunicat ions receiver superseding the renowned NC-183. Features razor-sharp selectivity, extreme sensitivity and "solid-as-a-rock" stability. Covers 540 ke to 31 mc and 47-55 me in 5 ranges; calibrated electrical bandspread for 80-75, 40 20 15, 11-10 and 6 meter Amateur bands. Bi-metallic tuning capacitor automatically compensates for temperature change.
Double-conversion above 4.4 mc , witb 3 If stages and 16 tuned circuits. Single conversion below 4.4 mc . Six selectivity positions: 5 crystal and 1 non-crystal. Selectivity is 80 cycles at 6 db and 7.0 kc at 60 db . Better than $11 / 2 \mu \mathrm{v}$ sensitivity.
Two RF stages; amplified and delayed AVC: noise limiter; and push-pull 8 -watt audio. Has edge-lighted lucite dials: auxiliary power socket: phono input: and $500 / 8$ olim output. 15 tubes plus VR and rectifier Gray cabinet. $101 / 4 \times 191 / 4 \times 163 / 4^{\prime \prime}$. For 110 120 or $220-240$ volts, 50 -60 cycle AC. Less speaker. Shipg. wt., 6.5 Jbs .

## NATIONAL NC-188

New general-coverage receiver featurlng excellent design and construction combined with new, modern styling. Continuous coverage from 540 kc to $40 \mathrm{mc}, \mathrm{AM}$, SSB or CW. Calibrated bandspread for Amateur 10, 11, 15, 20, 40 and 80 meter bands; separate tuning capacitors, knobs and scales for general coverage and bandspread. Large, easy-to-read 12 -inch slide-rule dial with combination edge and back-lighting; large tuning knobs. Sensitivity: Under $2.5 \mu \mathrm{v}$ required for ${ }^{10-t 0^{11}}$ signal-to-noise ratio. Built-in "S" meter on front panel.
Tube lineup: 6BA6 RF amplifier, 6BE6 frequency converter, 6C4 HF oscillator, 2 6BA6 IF amplifiers, 6AL5 detector/AVC/ ANL, 12 AT 7 ist AF and BFO, 6AQ5 AF output; 5 Y3GT rectifier. Antenna input, $50-300$ olms, batanced or unbalanced. Handsome two-tone gray wrinkle finish
Oscillator is temperature compensated and ventilated for maximum stability. Separate antenna trlmmer on front panel. Series-type automatic noise limiter. ${ }^{\text {BFO }}$ provided for reception of CW and SSB signals. Separate RF and AF gain controls. Noise Ilmíter switch. Size: $10^{7}$ high. $16^{13 / 46^{\prime \prime}}$. Wide, and 107 " deep. Less speaker. For $110-120$ v. $50-60$ cycle AC. We., 35 lbs.

## HAMMARLUND HQ-150

Precision Hammarlund receiver packed with features. including built-in $Q$ multiplier and built-in crystal calibrator. The $H Q-150$ pro vides high selectivity and outstanding stability. Provides continuous coverage from 540 kc to 31 me in six ranges. Calibrated electrical bandspread for the Amateur 80 40,20 . 15 and 10 meter bands. Famous 40, 20, 15 and 10 meter bands. Famous Hammarlund crystal fiter for sharp selec-
tivity. Six different bandwidth positions may be selected: 1 crystal "off" position; 3 phone crystal posstions. and 2 CW positions. Fast acting AVC on RF, two $1 F$ stages.
Series type nolse limiter greatly minimizes ignition and other pulsetype noise; has negligible effect on modulation of phone signals. Antenna trimmer permits peaking RF stage for highest gain.
Tube lineup: 6BA6 RF amp, 6BE6 mixer. 6C4 HF oscillator. ${ }^{3-6 B A 6} 1 F$ amp. 6 AL5 2nd detector/AVC/ANL, 12AY7 BFO-audio, 6V6GT audio output; SU4G rectifier, VR105 regulator. 6826 calibrator. ## HAMMARLUND HQ-140-XA

Up-to-date version of the world-famous HQ-140-provides Amateurs. commercial radio operators and short wave listeners with all of the advantages of modern professional design and reliability. Covers 540 kc to 31 me in 6 ranges. Crystal filter provides high selectivity required to separate signals on crowded bands. "S" meter reads to 20 db over S9. Sensitivity, $1 \mu \mathrm{v}$ for 10 db signal-to noise ratio. Electrical bandspread is calibrated for Amateur 8C, 40, 20, 15 and 10 brated for Amateur 86,40 , 20 , 15 and 10 meter bands. 3 watts audio output. Six se-
lectivity positions from 8 kc to 600 cycles . Separate HF oscillator and mixer, 3 stages of IF amplification, and self-adjusting noise imiter. Drift is less than $0.01 \%$
Tube lineup: 6BA6 RF, 6C4 oscillator, 6BE6 mixer, 3-6BA6 $1 F^{*}$ s, 6ALS 2nd detector/AVC/ANL, $12 \mathrm{AU7}$ ist audio/BFO, 6V6GT/G audio output; 5 U4GB rectifier. and OC3/VR105 voltage regulator. 3 phone crystal positions, 2 CW crystal positions. and one crystal "off" position.
Two-tone gray cabinet with large and conveniently positioned controls. Size, $11 \times 201 / 4$ $\times 131 / 2^{\prime \prime}$ deep. For operation from $110-120$ olts, $50-60$ cycle AC. Less speaker (see below). Shpg. wt., 75 tbs.

## $x$ <br> JOHNSON AMATEUR EQUIPMENT <br> 

VIKING "PACEMAKER" SSB TRANSMITTER MODEL 240-301-2. Completely self-contained AM-CW-SSB transmitter of 90 watts in put-enough to pack a real on-the-air signal or to drive any amplifier. Bandswitched, 80 through 10 meters. VFO controlled. with VFO always in the $3-4 \mathrm{mc}$ range for maximum stability on all bands. Five crystals provide heterodyning frequencies to reach the desired bands. SSB is generated by phasing method. with upper sideband or lower sideband at the flick of a switch. Final amplifier is a 6146 witls pinetwork tank for loading fiexibility and harmonic suppression. Break-in keying with excellent waveform inakes for tops in CW operating. Audio system takes hi-Z mikes. Has up-to-the-minute VOX and anti irip circuits for full voice-operated phone operation; audio output can be used to feed higher-power amplifier for high-power AM phone. Husky triple-section power supply provides high and low voltages as well as control voltages for an external higlt-power amplifier. Meter on panel for grid and plate current, modulation and carrier balance. Controls: Carrier Insert. Balance Modulator, Carrier Balance. Bandswitch. Exciter Tuning. Amplifer Tuning, Fine Coupling, Auxillary Coupling. Audio Gain, Meter, Operate, VFO. Tubes: 5-12AT7. 12AU7. 2-6AL5. 6BF6. 36AU6, 6CL6, 6146, 12BH7; 5U4G, 5R4GY rectifiers; OA2, 2-OB2 voltage regulators. Withcrystals; less mike and key. For 110-120 volts, $50-60$ cycle AC. $115 / 8 \times 21 \times 141 / 2^{\prime \prime}$. Shipg. wt.. 73 lbs.

VIKING "GN2" TRANSMITTER. MODEL 240 -201-2. Efficient, compact VHF transinitter offering instant bandswitching coverage of 6 and 2 meters. Makes use of the existing power supplies and audio of the Amateur's low-frequency transmitter. Requires 6.3 v at 3.5 amps, 300 v. DC at 70 ma. $300-750$ v. DC at 200 ma . plus 30 or more watts of audio. Viking "Ranger" or Viking I or II are ideally snited as power sources. Input power at full voltage: 150 watts CW or FM 100 watts $\triangle \mathrm{M}$ plione. Built-in crystal oscillator for 8 to $9-\mathrm{mc}$ crystals, or may be driven by $8-9$ me VFO. Final amplifier uses 5894 dual tetrode, with dual-band tank circuit, silver plated for highest efficiency. Parallel lines used on 2 meters. Extremely fexible link coupling output. All circuits metered for quick tune-up. TV I-suppressed. Tubes; $6 \mathbf{8}$ osc-doubler. 6360 tripler-driver, 5894 final. 6AQ5 clamper. Size: $131 / 0 \times 83 / 3 \times 81 / 2^{\prime \prime}$. Less crystal, key, and nicrophone. Shpg. wt.. I4 lbs. 94 SZ 851 . NET

VIKING "RANGER" TRANSMITTER. MODEL 240-161-2. Latest model of this extremely popilar. phone-CW transmitter. Highly efpopular. phone-CW transmitter. Highly ef 75 watts on CW: 65 watts on AM phone. 75 watts on CW: 65 watts on AM phone.
Offers single-knob bandswitching orr 160 , Offers single-knob bandswitching ory 160 .
$80-75,40,20,15$, and $11-10$ meters. Frequency selection with built-in VFO. or crystals. Pi-net work out put matches 50-500 ohin loads; tunes out large amounts of reactance. Time-sequence (grid-block) keying provides excellent keying characteristic and allows quick, clean break-in operation. The built-in VFO' is temperature-compensated for high stability. Separate, accurately calibrated. VFO bandspread scales for each band- $9^{\prime \prime}$ of dial scale on 10 meters. A 6 -to- 1 planetary drive mechanism allows accurate tuning with velvet smooth control. $100 \%$ AM modulation; response limited to 250 3000 cycles for maximum communication effectiveness. Full meter switching for accurate tune-up. Tubes: 6AU6 VFO, 6CL6 crystal oscillator. 6 CL . 6 buffer 6146 final, $6 \mathrm{AQ5}$ clamper, $12 \mathrm{AU7}$ keyer. 12AK7 speech amplifier, 12AU7 audio driver, 2-1614 modulators; OA2 voltage regulator, $5 \mathrm{R4GY}$. 6ALS and $6 A \times 5$ rectifiers. Less crystal, key and mike Size 15x115hx9* For 105-125 $50-60$ cycle AC. Slipg. wt.. 54 lbs.

VIKING "FIVE HUNDRED" TRANSMITTER. MODEL 240-500-2. A full half-kw all-band rig for tops in Amateur enjoyment. ClV input is 600 watts, SSB (with auxiliary exciter) is 500 watts PEP. Transmitter is in two units-all controls are in RF section. receiver-size for convenience. Power supply and modulators are in second cabinet. All exciter stages gang-tuned to highly-stable exciter stages sang-tuned to highy-stable
VFO; safety and protective features include cabinet interlocks. voltake failure protection. fuses, time delay. Final amplifier operates into very efficient pi-L network for extreme harmonic suppression. Two meters provide complete monitoring of all transmitter functions. Audio system includes phone patch and low-level clipping. Coniplete filtering and shielding insure against TV1. Time-sequence keying for fast CW break-in. Tubes: 6AU6 VFO 6CL6 buffer, 6CL6 inultiplier. 5763 RF driver, 4-400A final, 807 clamper. 12 AU 7 keyer, 12AX7 speech amplifier, bUL5 audio clipper, 6 B4G audio driver. 2-8114 modulators. $64 \times 5 \mathrm{GT}$ bias rectifier. 5 H 4 G low voltage rectifier, $2-866 / 866$ \ high voltage rectifiers. VR-105 and 4-VR-150 final screen voltage regulators. O.A2 VFO voltage regulators. Size: RF unit, $115 / 1 \times 21 x$ $141 / 4^{\prime \prime}$. Power unit. $107 / 3 \times 203 / 8 \times 1.53 / 4^{\prime \prime}$. Less mike. key, and crystals. For 115 v . or $230 \mathrm{v} .$, $50-60$ cycle AC. Wt.. 200 lbs.

VIKING "VALIANT" TRANSMITTER. MODEL 240-104-2. A husky and compact all-band ransmitter. 200 watts in put on AM phone. 275 watts CW, Bandswitching from 160 through 10 meters. Can be used with auxilary SSB exciter for 275 watts SSB power, Retains the famous Johnson features-extra-stable VFO, TVJ suppression, timesequence keying, in addtion, audio clipping and filtering provide maximum "punch" through OR M. Can easily be used as driver for kilowatt amplifier, or power source for VHF transmitters. Final amplifier operates into very efficient pi-net work antenna output designed to match $50-600$ ohm loads; unes out large amounts of reactance. VFO and modulator screens are voltage regulated. Tubes: 6AU6 VFO. 6CL. 6 crystal oscillator/VFO isolator, 5763 RF driver, 3-6146 final amplifier. 12AU7 keyer, 6AQ5 clamper. $12 A \times 7$ speech amplifier, 6AL5 audio cllpper, 6C4 audio amplifier, $12 \mathrm{Alj7}$ audio driver, 2 - 6146 modualtors. 2-860A highvoltage rectlifers, $5 V 4 \mathrm{G}$ low-voltage rectifier. 6 BY5GA bias rectifier. 2-VR 105 modulator screen voltage regulators. and OA2 VFO voltage regualtor. Size: $115 / 6 \times 21 \times 141 / 4^{\circ}$. Less crystal, key and mike. For operation from 105-125 v., $50-60$ cycle AC. Shpg. wt., 85 lbs

VIKING "NAVIGATOR" TRANSMITTER. MODEL 240-126-2. New transmitter-exciter for the Novice or advanced Amateur who desires a fexible. low-power CW rig. 40 watts input. Bandswitching coverage of the 160.80 .40 , 20, 15, 11 and 10 meter bands. Built-in. highly stable VFO features timed-sequence keying for chirp-iree. clean. Crisp signals. Transmitter may be crystal-controlledlias front-panel provision for 2 crystals. TVI suppression includes filtering and bypassing: aluminuin cabinet effect ively shields unit. Wide-range pi-network antenna coupler matches transmission line impedances for $50-600$ ohms. Accurate meter on front panel can be switched to read final grid and plate currents.
TUBE COMPLEMENT: 6AU6 VFO, 6CL.6 crys-tal-oscillator/buffer-doubler; 6146 final ainplifier; 12AU7 time-sequence keyer: 6. 4 bias rectifier; $5 \mathrm{U}_{4}$ high voltage rectifier: OA2 regulator.
CONTROLS: Operate (Off, Tune. Standby, Trans); Oscillator (C1. C2, VFO. Zero); Crystals; Bandswitcl; Exciter, VFO: Final; Coupling; Meter switch (Grid Plate)
Aluminum cabinet measures $131 / 4 \times 91 / 3 \times$ $101 / 16^{\circ}$, and is attractively finished in maroon and gray. Completely iactory - wired and tested. With tubes; less crystals and key. For operation from $110-120 \mathrm{v}$., $50-60$ cycle AC. Shipg. wt.. 27 lbs.

Voice-operated control and speaker anti-trip are built-in. Tubes: 2-12AT7, 6CL6. 6V6; 4-12AT7 bAL5. 75 -olmm unbalanced output. Requires 6.3 v . (a) 3.2 amp . and 250 v . DC @ 130 ma . Size, $111 / 2 \times 10 \times 143 / 4^{\circ}$. Shpg. Wt., 27 lbs . 97 SZ 607. NET
265.00

51008 TRANSMITTER. A self-contained 150 -watt all-band transmit ter of superlor periormance. Operates on 80-75, 40, 20, 15, 11 and 0 meters with built-in VFO or with crystal control. With SSB generator (above) the 5100 B produces clean SSSC transmission. VFO dial can be read to 1 kc on all bands. 80 -meter crystals can be used, making the rig useful to the Novice Amateur. Final amplifier s two $6146^{\prime} s$ in parallel, feeding a pi-net work tank. Another pair of 6146 tubes in $\mathrm{AB}_{3}$ provide modulation, and can be used to drive a higher-power modulator. Multiplier and driver stages are ganged for fast simplified tune-up. Grid-block CW keying is clean, crisp Has built-in filtering for TVI reduction. Tubes: 6BH6, 2-6B16 5-6SQ5, 6U8, 4-6146, 5U4GB, 2-5R4GY, OD3. For $110-120$ v. $50-60$ cycle AC. Size, $111 / 2 \times 22 \times 143 / 4^{\prime \prime}$. Shpg. wt., 88 lbs.
97 SZ 606. NET
475.00

600 GRID-DIP METER. A valuable instrument in any ham shack or laboratory. Covers 1.75 to 200 mc in 5 ranges, with colorcoded plug-in coils. Can be used as grid-dip meter, absorption wavemeter, auxiliary signal generator, etc. Size, $3 \times 3 \times 7$ ". With rack or holding unused coils. For operation from $110-120$ v.. $50-60$ cycle AC. Slipg. wt., 3 lbs.
84 S 487. NET
39.75

380-B TR SWITCH. Provides fully automatic electronic antenna changeover. Handles up to 1 kw in 52 or 75 -ohm lines only. Idea for SSB. AM and CW. Requires Amphenol 83-1T fitting. Size, $37 / 8 \times 31 / 2 \times 5^{\circ}$. Shpg. wt. 2 lbs.
98 S 775 . NET
23.70

2Q4 AUDIO PHASE-SHIFT NETWORK, For use in phasing-type SSB generators. Will split any audio signal in the $300-3000 \mathrm{cDs}$ range nto two components, equal in amplitude, but $90^{\circ} \pm 1.5^{\circ}$ out of phase with respect to each other. Extremely compact-mounted in octal-based shell no larger than a 6 J 5 . Ideal for the "build-ityourself" SSB ham. Shipg. wt.. 1 lb
99 S 122 . NET

## RME Amateur Equipment

F MODEL 4350A RECEIVER. New, dual-conversion receiver designed specifically for Amateur-band coverage. Offers many deluxe features usually found only in higher-priced units. Extremely high sensitivity and selectivity, plus exceptional ease of tuning. Covers $160,80-75,40,20,15$ and 11-10 meters; frequency ranges: 1.8-2. 3.5-4, 7-7.3, 14-14.35, 21-21.5 and 27-29.7 mc.

Features include: 2 microvolt sensitivity for 10 db signal-to-noise ratio; 100 -kc crystal calibrator; 4 positions of selectivity ( 3 positions with crystal filter; one non-crystal position); up to 35 db of notch rejection with crystal filter; drift of only $0.01 \%$ for first 20 minutes with practically zero drift after warm-up; temperature compensated components and rugged mechanical construction for excellent stability. Large $81 / 2^{\prime \prime}$ evenly graduated dial has differential mechanism which provides choice of $75: 1$ or $1: 1$ tuning ratio. Has " $S$ " meter; two coaxial jacks for Model 4301 SSB adapter (below); terminals for transmitter relay and break-in circuits.

Controls: Tuning, AF gain, BFO pitch, BFO injection, antenna trimmer, calibration adjust band selector, RF gain, function (CW AGC, SSB/AGC, SSB/MGC), standby switch, crystal selectivity switch, crystal phasing/rejector. ANL off-on. Tubes: 6BZ6, 3$6 \mathrm{U8}, 2-6 \mathrm{CB6}, 6 \mathrm{~T} 8,6 \mathrm{AQS}$; 5 Y 3 GT rectifier and OA 2 regulator Gray cabinet. $10 \times 161 / 2 \times 10^{\circ}$. For operation from $110-120 \mathrm{v} .50-$. cycle AC. Shpg, wt. 36 lbs.

MODEL 4302 MATCHING SPEAKER. PM speaker in handsome case to match 4350 A receiver. $10 \times 81 / 2 \times 51 / 2^{\prime \prime}$. Shpg. wit., 6 lbs .
99 SX049. NET
17.50

MODEL 4301 SIDEBAND DETECTOR-SELECTOR. Sideband detectorselector for outstanding. easy-to-tune SSB reception. Plugs directly into the RME Model 4350A receiver listed above. Easy to connect to other receivers.
Contains built-in power supply feeding extremely stable BFO balanced detector circuit. accurate plase slift network. and adder and subtracter circuits. Front panel control selects upper or lower sideband, double-sideband exalted carrier reception or norma receiver operation. Switching bet ween upper and lower sideband is instantaneous and provides 40 db suppression of unwanted sideband Improves the selectivity and signal-to-noise ratio for SSB, AM or CW reception. Housed in handsome metal cabinet. Size, $10 \times 81 / 2 x$ $10^{\circ}$. With all cables for connection to RME4350A. For $110-120$ volts $50-60$ cycle AC. Shpz. wt. 16 lbs.
99 SX 023. NET
75.00

H MODEL DB23 PRESELECTOR. This broadband preselector tre mendously boosts the gain and signal-to-noise ratio of Amateur receivers. Covers $80-75,40,20,15$, and $11-10$ meter bands. Average overall gain, 25 db . Improves signal-to-noise ratio to better than 7.5 db over that of the receiver alone. Allows optimum use of crystal filters. Input circuits accurately match any standard antenna. Operation is simple-broadband circuit requires no tuning. Controls: Off-On. Band Selector and Antenna Peaking. Tubes $3-6 \mathrm{~J} 6$ 's plus rectifier. Unit is completely self-contained. Handsome steel cabinet is fimished in blue-gray to match RME equipment Size, $5 \times 75 / 8 \times 60^{\prime \prime}$. For operation from 110.120 volts, $50-60$ cycle AC Shpg. we.. $61 / 2 \mathrm{lbs}$.

## ALL-TRANSISTOR RADIO RECEIVER

MODEL TCR-2. Versatile new, transistorized Dortable recelver. A complete broadcast receiver, with a 5 -transistor circuit and builtin speaker for fult-toned output with plenty of volume. Can be used in the bome, in a car, or as a personal portable. A perfect companion unit for the ATC-1 (at right), for Amateur use. Ideal for a quick and easy mobile installation. or for portable or emergency use. The TCR-2 is provided with an input matching network terminating in an auto-type jack at rear of receiver. Provides optimum coupling to the ATC-1 for reception of $80,40,20,15$ and 10 -meter Amateur bands. Operates for up to 200 hours from a single battery. Size, only $31 / 4 \times 43 / 4 \times 41 / 6^{*}$. Less battery. Shpg. wt., $31 / 2 \mathrm{lbs}$. 99 S 174. NET

## NEW HAMMARLUND HC-10 CONVERTER

## Unlque converter providesdual conver-

 ston operation for increased selectlvity and higher gain with any superhet having an IF between 450 and 500 Kc . Basically an IF and audio system with all the electrical and mechanical alds ior the ultimate in SSB/CW and AM, ACW reception. Compact and completely self-contained-all connections are plug-In ype except ppeaker. Choice tancously. $60-\mathrm{Kc} 15$ has 3 positions of select vity rositions from s on 10 kcon both with 60 db suppression of co-channel Intericrence. Vernicr passband tuning, $\pm 3 \mathrm{ke}$. Combination noise limiter and squelch control. LInear product detector for CW and SSB reception. BFO has linear range of product detector $\quad 2 \mathrm{kc}$. Fastoattack, 3 -apeed delayed AVC circuit. Manual volume control. AC nower take-off for receiver. 9 tubes plus rectifier. Less speaker Size, $91 / 2 \times 91 / 4 \times 71 / 8^{\circ}$. For operation from $105-125 \mathrm{v} ., 50-60$ cycle AC 94 SXEL 23 . NET

## "E-Z WAY" TILT-OVER TOWER

Model GPRES 50-60. Here's a tower that really goes way up to snag the DX. but which can be
cranked down and laid over on its cranked down and laid over on fts side for work on the antenna,
Made of cylindrical steel rod and Made of cylindrical steel rod and
structural pipe to glve greatest strength. Full height, 65 ft Mounts in a single, 5-ft. deep hole without concrete. Requires no guy wires. Will support a 3-element 20-meter "Minibeam" or a 2 -element 40 -meter "Minibeam" in winds up to 50 miles per hour. Tower is electrically welded and corrosion. Tower locks into posi corrosion. Tower locks into position at any height up to maximum rotator; specify type of rotator to be used, and the proper mount will be supplied. Furnished complete with ground jost, crank-up mechanism for raising or lowerlng tower, mast and full instructions. Shpg. wt. 480 lbs.
92 Sz 246 . NET..... 260.00 NOTE: Shipped F.O.B. Tampa, Florida, or Chicago, whichever is nearer. E-Z Way tower is also avaitable under Allied's Easy Payment Plon. On cash orders. please send full remiltance - no C.O.D. shipments. Allied can supply E-Z. Way towers in other sizes, including the largest power, 120 feet in height. Write for further information and
literature concerning these models.

## CD AMATEUR ROTATORS

Brand-new, heavy-duty rotator with control unit-speclally designed for exacting Amateur applications. Solenoid-operated elecsition. Takes wind or racking load from gear train or motor when rotor is at rest. Rotator delivers 360 inch-pounds torque. For masts from (10 $2^{\prime \prime}$.D. For control cable AC. Shpg. wt., 23 libs. 181 . For 110 v.. 60 cycle Model HAM-A. Stops at pre-set direction. Use Belden 18447 cable.

## Industrial Communication Equipment

 hallicrafters

FM RECEIVERS

- High-Performance Receivers for Commercial Use
- Receive Police Calls, Fire Trucks, Taxis, Etc.
- Excellent signal-to-noise Ratio
- Compact-Easy to Install and Operate
- Choice of Standard or Deluxe Models

SX-104 SX-105
"CIVIC PATROL" RECEIVERS. Two high-performance FM receivers for excellent reception on public service or commercial frequencies. Model S-94 provides full coverage of all frequencies from 30 to 50 nc. Model S-95 covers all frequencies between 152 and 173 mc Both models are carefully designed to assure exceptionally high sensitivity throughout their tuning range. These compact, easy-to operate units cover police, fire, taxicab, inter-city bus, railroad private telephone mobile, and other industrial and emergency service communications.
FEATURES. Advanced circuit design assures minimum drift, highs signal-to-noise ratio and exceptional sensitivity. Circuit refinements include: Low-noise, grounded-grid RF amplifier; 2 IF stages; separate high-gain DC amplifier for squelch system; and wide-range an moa input impedance for excellent results with any type antenna. Designed for oscillator radiation. Adjustable builtin, relay-type squelch system silences entire audio system until signal is receivedpermits quiet standby operation. Built-in $\mathbf{S}^{\prime \prime}$ PM speaker. Audio output, 1.5 watts.
CONTROLS AND CONNECTIONS. Controls: Tuning; Off-On/Volume; Squelch-Off. Phone tips jacks are provided for headphone operation. Switch selects speaker or headphone output. Terminals for single or twin lead antenna (external antenna supplied). Dial is calibrated in megacycles and service channels.
Circuit employs 8 tubes plus selenium rectifier. In professional -type gray steel cabinet with silver trim and panel. Size, $7^{\prime \prime}$ hight, 127/8" wide, and $71 / 4^{\prime \prime}$ deep. For $110-120$ volts, $50-60$ cycle AC, or DC. Shag. wt., $121 / 2 \mathrm{lbs}$.
MODEL $\mathrm{S}-94$. For 30 to 50 mc FM coverage.

DELUXE "CIVIC PATROL" RECEIVERS. These outstanding new FM receivers cover the same frequencies as the S-94 and S-95 (described at left), but they incorporate many deluxe extras for improved performance and operating convenience.
DELUXE FEATURES. Choice of crystal controlled (fixed frequency) or tunable operation by means of front panel selector switch. In fixed frequency use the receiver is "locked in" to the frequency determined by the crystal employed. Tuned RF stage assures extreme sensitivity. Carrier-operated relay with external switch contacts for connecting warning light or buzzer system to alert operator when signal is received. Dual, edge-lighted, slide-rule dial.
OTHER FEATURES. Builtin squelch for quiet standby operation. High stability in tunable position- no drift in crystal position. High signal-to-noise ratio. Low oscillator radiation. Wide-range antenna input impedance for excellent results with all types of antennas. Builtin $5^{\prime \prime}$ PM speaker. Over 3 watts of audio.
CONTROLS. Front panel controls include: Tuning; Selector switch (tunable-crystal); Squelch-Of/On; Off/On-Volume. Headphone jack with built-in speaker cutout switch.
Circuit employs 9 tubes plus rectifier. Gray steel cabinet. Size. $7 \times 127 / 8 \times 73 / 4^{\prime \prime}$. For $110-120$ volts, $50-60$ cycle AC. Less crystal. Ships. wt., $181 / 2$ lbs. Crystal for fixed frequency operation available on special order at $\$ 5.29$ each for the $S X-104$ and $\$ 7.72$ each for the SX-105. Specify receiving frequency required. Allow 3 weeks for delivery.

## MONITORADIO FM RECEIVERS

(4)MODEL MR-10. Deluxe FM receiver for outstanding coverage of the $152-174 \mathrm{mc}$ band. Excellent for monitoring use in emergency commercial or industrial communications; assures an effectively coordinated overall communications network. Features include: Transformer-type power supply; tuned RF stage for better image rejection; builtin electronic squelch (adjustable from front panel) for absolute quieting; builtin $5^{\prime \prime}$ PM speaker; provision for adding external speaker; 4 microvolt sensitivity for 20 db quieting; illuminated slide-rule dial. 7 tubes; $6 \times 4$ rectifier. Metal cabinet. ${ }^{7 / 8} \times 111 / 4 \mathrm{x}$ $61 / 2^{\prime \prime}$. For operation from $110-120$ v., $50-60$ cycle AC. Ships. wt., 14 lbs.
99 SX002. NET
64.50

MODEL MR-33. Same as above, but for 30-50 megacycle FM coverage.
megacycle FM co
99 SX 003. NET
(B) MODEL PR-31 "POLICE-ALARM". Lowcost. quality-built FM receiver for dependable reception of police dispatches, fire, emergency service. etc., operating on frequencies between $\mathbf{3 0}$ and 50 mc . Employs superhet circuit with ratio detector; offers quiet operation of receiver under "signal" conditions. Temperature compensated to minimize frequency drift. Sensitivity is better than 10 microvolts for 50 milli-watts output. $100-\mathrm{kc}$ selectivity. Bullt-In $5^{\prime \prime}$ PM speaker. 5 tubes plus 35 iV 4 rectifier. Antana impedance, 72 ohms. In attractively styled plastic cabinet. Size, $7 \times 101 / 2 \times 61 / 2^{\prime \prime}$. For operation from $110-120$ v., $50-60$ cycle AC. or DC. Shag, wt., 5 lbs.

## SAAR "IMP" RADIOTELEPHONE

MODEL TR -426. New, highly versatile, low-power industrial mobile phone unit. Designed for communication in and about any plant. It's perfect for use on lift trucks and runabout, cranes, and other mobile units. Helps boost payload of any vehicle by eliminating wasteful "deadhead" trips. Average transmitt ing range, 2 miles. Consists of a complete transmitter and receiver in one compact case. Ruggedly built and easily installed, the "Imp has hundreds of uses in construction fields, alrports, rail yards, loading docks, warehouses, etc.
Unit operates from 6 or $12-\mathrm{v}$. battery or $110-120 \mathrm{v}$. AC source. Any "Imp" can be used as a fixed or mobile station. Crystal-controlled transmitter section operates on 154.57 mc . Receiver section is fixedtuned to this frequency -no tuning required; has adjustable squelch circult. Includes: Transmitter-receiver unit; shock mount base; cable for 6 or $12-\mathrm{v}$. DC operation; cable for $110-120$ v. AC operation; carbon mike with switch and antenna. $51 / 4 x$ $121 / 2 \times 81 / 4^{\prime \prime}$. Shag. wt.. 24 lbs. Requires FCC permit-application form included in carton.

## Burgess Batteries

## BURGESS PORTABLE RADIO BATTERIES

All Burgess batteries are carefully manufactured to assure peak performance from battery-operated electronic equipment. The selection of power-packed Burgess batteries listed below covers types for virtually all portatie radio needs. Latest "Featherweight" hearing-aid batteries are also listed. Because of Allied's extremely rapid turn-
over, you are always assured of factory-toyou freshness. If you are not able to find the batteries which you require, give the make and type number of the orisinal batteries, make and model number of your set. and we will supply the Burgess equivalents. *Standard type number assigned by National Electronic Distributors Association.

## Burgess Bafteries

## STANDARD DRY BATTERIES

Suitable for all radio and laboratory requirements. Allied's stock of Burgess batteries is always fresh, assuring you of full-rated efficient service. Burgess quallty construction and insulators allow use of very active ingredients, providing maximum useful life. Letters following battery type numbers denote terminals: PI.-plug-in: S.C.-spring clips. Others have screw terminals except "spring cllps where
S.C. is not included in Type No.; §heavyduty, industrial type.

## FLASHLIGHT BATTERIES

These top-quality, long-life cells deliver bighly depeadable performance in all poputar sizes of dasblights. All are double-protected against leakagesealed in plastic and steel on the outside and chrome protected on the inside. Curbs harmful interior action for new, longer life. Type 1-for baby tubular flashlights; Type 2-for standard flashlights; Type Z-for standard penlights; Type 7-for slim penilghts; Type N -for miniature and novelty lights.

## IGNITION AND TELEPHONE BATTERIES

Famous "Metalclad"' weather-resistant batterics. Have strap-handle for casler carrying. Designed for emergency illumination, portable lighting, alarm
setems. Used by rallroads, police, fire systems. Used by rallroads, police, fre departments and emergency crews. Dependable, leakproof metal container. Types 4 F2H and 4 FH recommended or service as well as electronic devices, etc.

## LANTERN BATTERIES

For use with railroad-type lanterns. Type F4H has durable and positive coilspring contacts-a favorite of rallroadmen.

## EVEREADY GEIGER COUNTER 300 VOLT BATTERY

Typo 493. A very compact, highly dependable power source. Especially designed for lowdrain, high-voitage applications such as: Geiger drain, high-voltake applications such as: Geiger
counters, photoflash units (gas discharge type). counters. photootiash units gas discharke typer insulation testers. Supplies 300 volts. Size:

.7 .70

## SWITCHBOARD TESTING BATTERY

Typo 766 T . $221 / 2$-volt battery for switchboard testing. Replaces Burgess Type 2156 and RCA Type VS1 37 batterics. Size, 61/4x41/8x $315 / 6^{\circ}$. Shpg. wt., 4 lbs.
$80{ }^{674} \mathbf{N E T}$.
.704

WILLARD RECHARGEABLE BATTERIES
Compact rechargeable wet batteries. Excellent for portable equipment. Non-spill construction. In likhtweight polystyrenc containers immune to corrosion. Fibrite insulation retards plate shedding. Builtin charge indicator. For 2 -volt power supplies, but can be connected in series for higher
voltages. Shipped wet. Exvoltages
Type 26-2. For Portable Radios. Supplies 2 Volts for 21 ampere-hours. Plug-in terminals. Size, $6 \times 21 / 2 \times 21 / 4^{\circ}$. Wt., $31 / 4 \mathrm{lbs}$. 98 J 023. List. \$11.15. NET.
 8.08

Typo ER 6-2B For Photo-Flath. Supplies 2 volts for 6 ampere-hours. 125 to 250 Hashes per cycle of charge. Gives maximum peak cur-
rent for positive bulb flash and split-second shutter synchronization. Has plain post termlnals. $11 / 16 \times 23 / 8 \times 41 / 4^{\circ}$. Shpg. we., $11 / 2$ 1bs. 98 J 024. List, $\$ 7.55$. NET.
5.52

Type ER-34-2. For Portable Radloz. Supplies 2 volts for 34 ampere-hours. Battery has plain pouts. Original equipment in RCA radio
model 65 BR9. Length, $41 / 2^{\circ}$; width, $311 / 6^{\circ}$ : height, 41/2". Shpg. wt., $51 / 4$ lbs.
98 J 025 . List, $\$ 14.85$. NET.

## RCA Batteries

## RCA RADIO, TRANSISTOR \& INDUSTRIAL BATTERIES

RCA batteries are scientifically designed to give maximum performance. The extensive selection of long-life RCA batteries in the listing below covers types for hundreds of industrial applications and virtually all portable radios in use today. If you cannot determine which batteries you require, give us the make and type number of the original
batteries, plus the make and model number of your set. Because of our rapid stock turn. over, you can always be sure of fresh batteries when you order from Allied. *Standard number assigned by National Elecronic Distributors' Assn. \$Sealed in steel. Other voltage taps: $11 / 2,3,41 / 2,6$. $\ddagger$ Other voltage taps: $3,41 / 2,6,9,101 / 2,161 / 2$.

Cell Clip

## GRID BIAS CELLS

Used to bias class A audio tubes; and RF. IF, and AVC stages. Can be stacked uslng bias cell clips listed below. Accuracy: $=10 \%$.
Blas Celle Size

## 6 AND 12-VOLT BATTERY CHARGERS

Higlily efficient selenium-rectifier battery chargers, Nay also be used as power supplies for electro plating, model trains, telegraph systems. Vending machines, relays, solenoids, etc. Charging rate 6SAC4. Equipped with socket for use with R675 charging cord below. All have DC cord with battery clips. Pilot light on all units excent 6SAC4. Pilot light dims as battery becomes charged and blinks if charger connections are shorted or reversed. For 6 v . batteries except 12 v. For 105-125 v. 60 cycle AC.

## TYPE VP VIBRAPACKS

PORTABLE AND MOBILE HIGH-VOLTAGE DC POWER SUPPLIES
Mallory vibrapacks provide high-voltage DC from low-voltage storage batteries. Excellent as source of " $B$ " power for portable radios, transmitters and receivers, mobile P.A. systems, etc. Have filter for vibrator hash. All are tube-rectifying types for use in circuits where self-blas is obtained through a resistor or choke between
B-negative and ground. VP6-260. VP' $2-260$ and B-negative and ground. VP6-260, VP12-260 and
VP24-260 can be converted to 200 v. DC output at 60 ma with simple wiring change. All require external filter circuit. Size. S $1 / 3 \times 31 / 4 \times 41 / 2$

## POWER SUPPLIES

## 12RSGDF BENCH POWER SUPPIY

Dual-range nower supply for servicing car, truck and transistor radlos. Range " $A$ " supplics 0-16 $v$ at 6 amps continuously or 0.8 $v$. at 10 amps continously or 20 amps intermittently. $21 / /^{\prime \prime}$ voltmeter and ammeter; ranges: $0-10 \mathrm{v}$. DC and $0-20 \mathrm{amps} \mathrm{DC}$. Provision for plukging in external ammeter. Includes buitt-in filter pack similar to Type
 MA-6-provides filtered output up 106 amps at less than $0.5 \%$ ripple; 6 volts at less than 11 With automatic overload protection. Size. $6 \frac{3}{4} \times 103 / \mathrm{e}^{2} 5 \frac{1}{2} 2^{\circ}$. For $110-120$ 80. 60 cycle AC Shpg. we., $121 / 2 \mathrm{lbs}$.
58.75

## 12RS14D "RECTOPOWER" SUPPLY

Efficient versatile power supply. Provides filtered and continuously adjustable power for electronic equipment operating on 6 or 12 volts. Supplies 6 volts at 25 amps continuous or 40 amps intermittent; 12 voles at 14 amps continuous or 20 amps intermittent. Automatic voltage regulating system maintains constant output under varying load. Includes DC voltmeter and DC ammeter. Overioad protection. Has large-capacity electrolytic capacitors that provide power storage for operation of vilirator powered equipmetut. Uses selenium rec-
tificrs. Size, $11 \times 101 / 2 \times 81 / 4^{\circ}$. For $110-120$ volts, 60 cycle AC. Shpg. wt. 80 PZ 132. NET.

## NEW MA-6 FILTER PACK

## Converters and Power Supplies

## ATR INVERTERS AND POWER SUPPLIES dC TO AC UNIVERSAL INVERTERS

New, universal inverters for operating 110 -v.. 60 cycle $A C$ equipment from DC voltages in autos, buses, trucks. boats, trains, planes and DC districts. Designed especially for standard 110 volt AC tape recorders. are carefully ensineered and ruggedly constructed to provide long life operation. All feature complete RF interference suppression and exceptional frequency stablity. Have operating efficiency in excess of $75 \%$ four-polnt voltage regulator corrects output voltage for minimum and maximum loads, and also helps compensate for input voltages lower or hisher than normal. Inverters are recommended for use with loads having power factors itt excess of $70 \%$. Built-in toggle switch selects most effictent operation for use with TV sets or tape recorders. Inverters are not recommended for use wis switches. Iloused in tiractive gray Hammerloid metal cabinet with convenient leather carrying strap. Sizes: Standard Iodel RSF $81 / 2 \times 97 / 3 \times 51 / 4^{\prime \prime}$; Heavy-Duty Model RHG. $67 / 4 \times 111 / 4 \times 81 / 2^{\prime \prime}$; Extra-Heavy-Duty Mode $\mathrm{HSJ}, 61 / 2 \times 12^{7} / 2 \times 81 / 2$ ". With' battery clips for instant connection to power source. Models with " $\mathbf{P}$ " suffix equipped with, adapter cord for use in auto cigarette lighter receptacles. Recommended for 24 volt battery operation. Before ordering, check waltage of equipment with which inverter will. be used.

## PORTABLE PLUG-IN TYPE INVERTERS

Lightweight inverters for operating 110 v . AC entipment from DC voltage sources. Feature excellent frequency stability and higlt efficiency. 6 and 12 -volt units plug into cisarette lighter receptacle of any velicle; others are equipped with standard 2 -prong plugs. All are designed especially for use with dictating machlnesi record players. electric razors. test equipment, etc. Not recommended for tape recorders and large motor driven appliances such as refrigerators, washing machines. etc. Gray Haininerlofd case with leather carrying strap. Sizes: DME, $51 / 4 \times 41 / 4 \times 21 / 4^{*}$ : RME and RMF.
$81 / 4 \times 8 \times 31 / 4^{*}$. ${ }^{\text {Recommended for } 24 \text {-volt operation. Check wattage }}$. $8108 \times 31 / 4$. *Recommended for 24
ralimg of equipment before ordering.

## 6-12 V. DC POWER SUPPLIES

A Type 610C-ELIF. Features either 6 volts (a) 10 amperes continuous, or 12 volts @ 6 amperes contisuous. Has volt meter and ammeter. Togkle switch selects 6 or 12 volts output. 80sition voltage selector control. For $61 / 2 \times 91 / 3 \times 81 / 2^{2}$. Shpg wt., 22 ibs.
80 PZ 243. NET.
42.95
(A) Type 620C-ELIT. Heavy-duty model. Uses A dual rectlifers-full wave assures noiseless operation. Rated output: 6 voles at 20 ampperes or 12 volts at 10 amperes. Has vole handle. 8 and ammeter. Gray steri case voltage selector control. Size, $61 / 2 x$ $127 / \mathrm{s}^{2} \times 812^{\prime \prime}$. For $105-125$ volts, $50-60$ cycle $A C$. Shpg, wt., 33 lbs .
59.95

## NEW SHAV-PAKS

B. Miniature Inverters especially designed to from 6 and 12 -volt storaze batterles in autos. from 6 and 12 -volt storage batterles in autos. men. sportsmen. Plugs into cigarette hghter receptacle. Both 6 and 12 -volt models provide 115 volts 60 cycle AC output at 15 watts. In attractively finished Hammerloid steel case. $4 \times 25 / 4 \times 21 / 4^{2}$. Wt. $21 / 2 \mathrm{lbs}$.
MODEL 6-SPB. For 6 -volt operation. O1 P 944 . List. $\$ 9.95$. NET
6.63

MODEL 12 -SPB. For 12 -volt operation. 6.63

## NEW BATTERY CHARGER

Model 612CA6 Charges 6 or 12 -volt storage batteries through clgarette lighter receptacle of any vehicle. 6 ams charge rate tapers to 3 amp. Circuit-breaker eliminates need for fuses. For use in negaground vehieles. Has On-Off and Voltage Selec. tor switches. Full-wave selenium rectifier. Sh/2 $x$ -60 cy cle AC. Shpg. Wt. P 846 . List. $\$ 27.95$. NET
20.96

## ELECTRO-PRODUCTS POWER SUPPLIES

## MODEL D-612T DC POWER SUPPLY

## 6 AND 12 VOLT, 10 AMP

Designed for servicing transistor auto sets as well as 6 and 12 -volt tube-vibrator types. Also suitable for servicing transistor radios. Two randes. $0-16$ volts. 10 amperes continuous duty up and $0-16$ volts. 10 amperes continuous duty up to 12 volts. Up to 20 amperes intermittent duty. Less than $0.5 \%$ ripple up to 6 amperes and less than $2 \%$ ripple at 10 amperes. Chokeinput filter circuit; four bridge-type selenium rectifiers; 10.000 mfd . capacitor. Two panel meters provide constant check on output volt-$0-16$ volt selector switch. Keadily accessible fuseholder on panel. Patented conduction cooling provides large margin of eafety. Built to withstand highi overloads. Rugged 18-gauge steel cabinet with baked-on blue 1 lammerlold finish, Supplied with terminal connector clips. Size, $12 \times 7 \times 8 \frac{1 / 2}{}$. For $105-125$ v. $50-60$ cycle AC. Shpg. wt: 22 lbs.
.44 .95

MODEL NFB POWER SUPPLY 32-VOLT, 15 AMP
Filtered DC power unit for continuous heavyduty operation. Output continuously variable. 0. 32 volts for loads to 15 amperes and 40 volts for loads to 5 amp. $2 \%$ Arsonval movement meters. Ripple: Less than amp. Filter circuit consists of two chokes and $16 \%$ no load to full load. Circuit breaker for overload protection. Variable voltage transformer provides smooth increment control. 5 -way output terminals; carrying handles on sides. Power drain: $730^{\circ} \mathrm{w}$., with 32 -volt, 15 ampere output. Bridge-type germanium rectifiers. Blue Hammerloid steel cabinet. $141 / \mathrm{x}$. $141 / 4 \times 91 / 4{ }^{\circ}$. For $105-125 \mathrm{v}$. $50-60$ cycle AC. Shpg. wl. 86 Ibs.
195.00 Model NFBR. Same as NFB unit above, but for rack mounting. Has $1 / s^{" 1}$ steel panel 19x
$1012^{*}$. Shpg. wt. 100 lbs.
 for reduction of eddy
for reduction of eddy
current and hysteresis losses. Heavy. tripleinsulated magnet wire assures protection from winding shorts. Have power factor of 85 to $100 \%$. Average efficiency. $60 \%$. All have singlephase output only, with approximately $20 \%$ volts. 60 cycles AC. Supplied complete with plug-in AC receptacle and DC connecting cord. Size, $5 \times 81 / 4 \times 41 / 2^{*}$. Shpg. wt., 15 lbs .

Type B1080CBW. 12 volts DC to 115 volts AC, 80 watts. Designed for all mobile applica-tions-ideal for rallroad and marlne use. Features drip-proof ventilated construction. Extra-long-life brushes. $70 \%$ power factor up to 80
watts for operating most recorders. Easily carwatts for operating most recorders. Easily car-
ried from place to place; provided with extraried from place to place; provided with extra80 P 058. List $\$ 108.00$. NET........ 79.38

## Converters and Chargers

## NEW PERMA-POWER A. 400

 POWER SUPPLY

Exceptionally precise, versatile power supply for testing, servicing and operating all types of power transistorized equipment inuously variable output uses autoformer control; two voltage ranges for exact setting of voltage required. Continuous current monitoring of single transistor or entire set. Meters provide laboratory accuracy; have precision D'Arsonval movement. Input Voltage: 115 v, 50-60 cycles. Output Voltage: $0-15$ and $0-30$ volts DC. Output Current: $0-15$ and $0-60 \mathrm{ma}$. Ripple
iess than $0.002 \%$. Size, $10 \times 61 / 2 \times 53 / 4$ deep. Shpg. wit., 16 lbs .
63.21

PERMA-POWER 11/2-VOLT RADIO BATTERY ELIMINATOR
Modol "A". Converts battery-operated radlos and other appliances requiring low nower for operation from 110 volts AC house current Uses efficient selenium rectifiers; output is well-fittered direct current. Maintains rated power under widely varying tubc loads. "A" power: 1.35 volts to 1.5 volts DC, depending upon current drain ${ }^{\prime \prime}$, power: 90 volts DC at 13 milliamperes. Will operate any 4,5 or Getube rario with filaments designed for tery operation. Fits easily in back of case of battery tadios, as well as in battery compart-
ments of most portables. Extremely compact $21 / 0^{-5 i g h}, 61 / 4^{2}$ wide and $41 / 2^{\circ}$ deep. Variety of sockets permit use with most portable radios. Fully automatic operation, noiseless and interference.free. Shpg. wt., ${ }^{4}$ lbs. . . . . . . . 14.

## CORNELL-DUBILIER DC TO AC CONVERTERS

The famous line of Cornell-Dubilier "Powercon" DC to AC converters. Efficient vibrator-type recommended for operating AC appliances from DC power sources. All units have well-regulated Now Now have a higher rating for intertnittent overloads. Wattage fisures for intermittent use are rated for power factors from in cese of size Indicated, providing room for 12 v . battery (supplied less battery). Frequency stability regardless of load. Instant starting under load-no warm-up period needed. Output has complete RF under ioad-no warm-up period needed. Output has complete RF
 Choice of 17 sizes for wide variety of applications. "For small portChoice of sizes for wide variety of applications. For small port- volt battery or 110 volts DC. Models 110 H 25 and 110 H 35 are approved for TV sets and are TVl-proofed.

## Bud Metal Products

## STANDARD CHASSIS BASES

High-quality, sturdily constructed chassis bases. Available in ainc-plated and black-wrinkle steel, and lightweight aluminum types. Carefully formed, onepiece construction; corners are reinforced and spot-welded. The four sides are folded at the bottom to provide additonal strength; bottom fold also permits easy addition of bottom plate. Aluminum types are spot-welded with government approved equipment; same as used for velding aluminum aircraft parts. Stee
chassls gauses: No. $22 ;$ No. $20 ;$ No. 18 . Aluminum chassis gauges (aluminum gauge) : $\ddagger$ No. 18 ; *No. $16 ; \uparrow \uparrow$ No. 14 . Less bottom plates. AC-403: $2 \times 91 / 2 \times 5$ ".

## MINIATURE ALUMINUM CHASSIS

## Bud Mefal Products

## METAL UTILITY CABINETS

General-purpose cabinets for all types of electronic equipment. In welded steel or bigh-grade sheet aluminum construction for rigidity. Two removable sides for easy, quick access to interior. Sides attached to flange of cabinet frame with self-tapping, screws. Excellent for building receivers, monitors, frequency meters, VFO's, transmitters, etc. Well adapted for shielding of high-gain pre-amplificr stakes. RF sections and other special circuits. Stee! cabinets in black-wrinkle or gray
have natural aluminum finish.

## ALUMINUM MINIBOXES

Two-piece boxes with handsome gray Hammertone or matural alumlnum finish-offered in a wide selection of sizes to accommodate literally thousands of electronic devices. Particularly suited for housing above-chassis or below-chassis sub-assemblies-also excellent for complete, self-contained units where highly effective shielding as well as protection from dust and dirt is desired. May be used for phono ampliurement units etc. Valuable for experimenters, Amateurs and labourement units, etc. Valuable for experimenters, Almateurs and abonumber of components than would be possible in a conventional box; number of components than would be possible in a conventional wiring modifications. Flanges assure extremely low RF leakage and also provide high rixidity. Self-tapping screws (supplied) hold sections firmly together. Made of high quality aluminum; strong. easy to cut and drill. Stock up on several of these mini-bozes. Be ready for any small construction project.

INSTRUMENT AND RECEIVER CABINETS
High-quality, moderately priced steel cabinets. Offered in a wide selection of sizes to accommodate many different types of electronic equipment. Particularly suitable for housing Amateur communications receivers, transmitters, signal generators, etc. Each unit has smooth-working, recessed hinged cover to permit easy access for tube replacement, circuit alignment, etc. Front panel is held securely in place with' 4 self-tapping screws. Panel extends full width of cabinet-provides maximum space for installation of controls. Louvers on cacli side of cabinct assure ample Durable tion of circuitry Rugged construction throushout. Durable highly attractive, black-wrinkle enamel finish.

## MINIATURE AMPLIFIER FOUNDATION

Typo CA-1754. An extremely compact, sturdily built amplifier foundation. Designed expressly to meet the requirements of builders em ploying miniature tubes, transistors, capacitors, small transformers, and other miniaturized components. Excellent for small, portable-type public address amplifiers, recordlng preamplifiers, etc. Chassis, which Wis in integral part of the unit, is only $2^{\circ}$ high, $7^{\circ}$ wide, and $5^{\circ}$ deep. With foundation cover fastened in place, entire unit stands only $6^{\circ}$ high! Removable cover includes a carrying handle for comfortable hand grip and convenient carrying. Cover is heavily perforated to tntire is formil or ot appratu.
Entire unit is made from cold rolled steel; welded construction assures

maximum strength, rigidity and full protection for components. Foundation cover is securely astened to the chassis sides by means of four self-tapping screws. Has durable, highly attractive, 86 P 214 . NET............ Shpg. wt.. 2 lbs.

## "PRESTIGE" STEEL CABINETS

Stock cabinets of advanced design suitable for housing higheat qualit
instruments. Soundly engincered to provide versatile convenient usage. Hinged cover swings back completely for easy access to interior of cabinet. Covers are available solid or perforated; have added relnGrommeted fingerforated style. Entire cover may be removed if desired. Grommeted finger lioles are provided for quick, easy lifting. Cover snaps fightly closed by means of pressure fasteners. Cabinet can be comfortably and safely carried by use of two deeply recessed handle slots. desighed to prevent contact with equipment housed within. Each cabinet includes two supporting channels which can be moved from platforms. Height of clannels permits free erent widths or mounting plamponents, and provides eaty removal of entire cabinet contents

through front opening. Accommodates standard size relay rack panels. Sturdily built of 16 -gauge

## DELUXE METER CASES

Inexpensive meter case. Designed to harmonize with modern, streamlined equipment. Finishfed in blue-gray ripple enamel, trimmed with an attractive chrome band. Neat rounded top. Extremely compact-easily placed with $21 / 2^{\prime \prime}$ and $31 / 2^{\prime}$ meters. Sloping front panel provides maximum meter visibility Excellent for " S " meters test upits, etc. Dependable heavy-gauge pressed test units, etc. Dependable heavy-gauge pressed durability. Overal| size, $41 / 2^{\circ}$ high by $41 / 4^{*}$ wide by $41 / 4^{\circ}$ deep. Shpg. wt., $11 / 4 \mathrm{lbs}$.

Type 3995. $21 / 66^{\prime \prime}$ hole. For $21 / 2^{\circ}$ round or rectangular meters.
86 P 390 NET.
.1 .06
Type 3996. $213 / 6^{\circ}$ hole. For use with $3^{\circ}$ rectangular or $31 / 2$ round meters.
1.06

## ALUMINUM CHASSIS BASES

High-quality aluminum chassis bases; ruggedy constructed for usc. Easily
 punched and
formed of one-piece 16 gauge aluminum. Have reinforced welded corners. Sides have folded lips on the bottoin for added strength and rigidity. Lips are drifled to permit using chassis bottom plates listed below.

## PUBLICATIONS

MATHEMATICS FOR ELECTRICIANS AND RADIOMEN. BY N. M. Cooke, Lt. Commander. U.S. Navy Teaches elementary algebra; quadratic equations; logs; trig; plane vectors; and elementary vector algebra as applied to electricity and radio. 3,000 problems and answers. Typical chapters: Exponents and Radicals; Simultaneous Linear Equations: 37 K 691 . Postpald in U.S.A...
5.39

HANOBOOK OF INDUSTRIAL ELECTRONIC CIRCUITS. By Markus and Zeluff. Invaluable reference manual on 433 industrial electronic circuits. Excellent for en fineers, technlcians, etc. Dlagrams included. Chapters cover circuite on: Capacitance control, counting, electronic switching, motor control, timing,
multivibrators. 272 pages $81 / 2 \times 11^{\circ}$.
37 K 655 . Postpald in U.S.A......7. 35

RADIO ENGINEERS' HANDBOOK. BY F. E. Terman. A wealth of technical information for solving practical radto problems. Typical chapters: Fundamental Components of a Circuits and Circuit Analygis. Fundamental Propertles of Vacuum Tubes; Vacuum Tube Amplifiers; Oscillators; Power Amplifiersi Propagation of Radio Waves; Power Supply Systems; Antennas. 1.019 pages $6 \times 9^{9} . .$. II. 76

ELECTRONICS DICTIONARY. By Cooke and Markus. Definitions of almost 6500 terms in addition to a complete listing of common abbrevialions. A concensed ibrary or cechnical knowledie. Eady for the instructor and technfeal writer. Recommended for the student and technician. A worthwhile addition to your book shelf. 433 pages. Size, $53 / x^{x} \times 1 / 4^{"}$
37 K 983 . Postpald in U.S.A.....
6.37

REPAIRING RECORD CHANGERS. BY Eugene Ecklund. Clearly explains how to service record changer mechanlsms. WellHustrated to show operation and repair of pickups; needles; record chansing actions; motors; drives; tripping, droppling and shutorf mechanisms. Chapers cover: Handing Record Counial 45 mpm Changers and Spindles; Special $45-\mathrm{rpm}$ Chankers and Spindles; Amplification and Compensation; Cycling the Fault Location and Tests; Masnetic Tape Fault Location and Tests; Masnetic Tape
Recorders. 278 pages, $6 \times 9$.
$37 K 423$. Postpaid in U.S.A....... 5.83

PRACTICAL ELECTRICITY AND HOUSE WIRING. By H. P. Richter. A practical bouk of instruction covering in detail every branch
of electrical work as applied to the wiring of of electrical work as applied to the wiring of small buildings. Includes basic circuits. wiring methods, polarizing, conduit. fuses, wire sizes, switches, Underwriters, and the National
Electrical Codes, eic. Typical chapters: Wiring Electrical Codes, ete. Typical chapters: Wiring with Armored Cable; Circult Breakers and Circuits; Wiring with Conduit; Polarizing and Grounding; Appliances, Home Repairs.
illustrations. 313

37 K 651. Postpald in U.S.A.
2.25

THE SLIDE RULEAND LOGARITHMIC TABLES. By J. J. Clark, M. E. Explains the use of the slide rule for all purposes as employed by draftsmen. engineers, electricians, mechanics, etc. Partial contents: Slide Rule Principles; Use of the Silde Rule; Polyphase Slide Rules; Circular Slide Rules; Calculations Involving Angles; Using Tables of Losarithms; Operation Plagarithms, rigonometric Logaritams; Four Place Loritumic Tables, sen Contains 222

## VAN NOSTRAND BOOKS

THE DESIGN OF SWITCHING CIRCUITS. By W. Keister. A. E. Ritchie, and S. H. Washburn. of the Bell Telephone Labs Technical Staff. Covers basic techniques of switching elrcuit design. such as telepbone switching ctrcuits, digitai computers, iarge control systems, as well as simple control
circuits. More than 400 ilfustrations and circuits. More than 400 illustrations and charls. 576 pages. Size, 6 x9
8.57

CAPACITORS: THEIR USE IN ELECTRONIC CIRCUITS. By M. Brotherton. Tells how to choose and use capacitors for electronic circuits. Discusacs voltage and temperature Hmitations of mica. paper, ceramic absorption and dlelectric polarization effecta alsorption and delectric polarization effect.
37 K 482 . Pos Popaid In U.S.A........ 3.43

THE RADIO MANUAL. By Sterling and Monroe. Fourth Edition. Begins with eiementary electric and radio theory and progresses to given. Dlagrams cover all types of modern radio equlpment. Typical chapters: Elementary Electriciey and Masnetism; Motors and Generators; The Electron Tube; Amplifiers and Oscillators; Amplteude Modulation; Fre quency Modulation Systems; Radio Frequency Measurements and Monitors; Transmitters; Television; Marine Radio; etc. 820 pages, cloth 37 K 669 . Postpaid in U.S.A....... 12.49
TVANDFM RECEIVERSERVICING. BY Milton S. Kiver. Extensive coverage of problems encountered by the serviceman. Chapters on: Antenna System; Receiver Instailation; UHF TV Equipment, Usink Test Patterns; UHF TV. Deffections Systems; RF Stares; Video Amplifiers FM and IV Receiver Alignmemt; FM Receiver Servicing. Paper bound $37 \mathrm{~K} 9 / 3$. Postpaid in U.S.A.
4.51

TELEVISION SIMPLIFIED. By Milton S. Kiver. Fifth Edition. Completely revised and Covers the news all the latest developments. intercarrier sound system, and color teleision. Lasy-to-read chapters explain circuit analysis and operating fundamentals of frequency modulation on through to the theory, peration and repairing of lelevision receivers. Aninciples of television. Well 引llustrated. 608 pages. Size. $6 \times 9^{9}$
37 K 907 . Postpaid In U.S.A..........6.81

## RINEHART BOOKS

LICENSE MANUAL FOR RADIO OPERATORS. By J. Richard Johneon. A thorough explanation of all cight elements covered in the FCC Study Guide. Recommended for those preparing for FCC Commercial Radiotelephone and-Radiotelegraph License examtext. Hach of the eight elements is covered in text. Each of the eight elements is covered in a separate chapter. Data in appendix covers
international communications Treaties. Laws and Regulations. 142 ithustrations. 448 pages. $37 K 448$. Postpaid in U.S.A. 5.00

## PRACTICAL TELEVISION SERVICING

 By J. R. Jolanson and J. H. Newitt. Includes: Common Troubles In TV Receivers; Antennas and Wave Propaxation; Synchronizing and Sweep Circuits; Color Televiaion; Case 11 antories; Test Equipment and Allignment. Clearlywrititen text is very well illustrated. 334 pages. written text is very well illustrated. 334 pages. Size. ${ }^{6 \pi 90}$. 734 . Postpald in U.S.A. 4.00

## BASIC ELECTRONIC TEST INSTRU.

 MENTS, By Rufus Turner, Written for servicemen. Covers the design. function and operatlon of test equipment of all types. Contains 171 illustrations. Including schematic diagramsof cypical test equipment clrcuits. 272 pages. of eypical test equipment clrcuits. 272 pages. 37 K 778 . Postpald in U.S.A.
4.95

## TROUBLESHOOTER'S HANDBOOK, BY

 A. A. Ghirardi. Third revlsed and enlarged edition. A practical handhook, packed with valuable, servicing hints. Covers 4820 models(202 brands) of home and auto radios. Gives IF alisnment peaks of 20,816 superhet receivers. Other sectlons: Trouble-Shooting Reminder Charts, Electrical Wiring Diagrams of 88 Automobiles Vibrator Buffer-Capacitor Replace37 K 731. Postpald in U.S.A...
6.95

PIX-O-FIXTVTROUBLEFINDER GUIDE, VOLS. I AND II. By A. Ghirardi. Clever way of handling TV service. Simply dial guide until TV screen photo appears in wives remedies. A unique trouble-shooting aid.

MODERN OSCILLOSCOPES AND Ruiter. Jr. Dumont Edition. By Jacob H. book on oscilloscopes. Contalns useful information on theory and applications of scopes. 390 illustratlons. 368 pages, $6 \times 91 /{ }^{\circ}{ }^{\circ}$.
37 K 757 . Postpald in U.S.A.
6.50

RADIO ANO TELEVISION RECEIVER CI RCUITRYANO OPERATION. BY Alfred A. Ghirardl. Covers modern radio and TV re ceivers. Based upon years of experience and book servicemen can trace trouble with a minimum of time and effort, repair sets promptly and effictently. A valuable additon to the service technician's library. 400 illustrations, 669
nages. Size. $61 / 4 \times 91 / 40$ pages. Size, $61 / 4 x 91 / 4^{\circ \prime}$
37 K 728 . Postpaid in U.S.A..
6.75

RADIO AND TELEVISION RECEIVER TROUBLE-SHOOTING AND REPAIR. By A. A, Ghirardf and J, R. Johnson, ComM and AM radios and record players, An excellent book for the experienced serviceman as well as the beginger, 417 illustrations. 820 pages. Size. $\begin{aligned} & \text { Kx9f. } \\ & \text { 7 } \\ & 759 \text {. Postpald in U.S.A... }\end{aligned}$
7.50

## Comblnation OHEer: Radlo and TV Recolver Clircultry and Operation plus Radio and TV Recelver Troubleshoot- <br> ing and Repair at a savings

## SYIVANIA TUBE MANUAL

SYLVANIA MANUAL OF ELECTRONIC TUEES. Latest editlon. Over 1000 tube types. Including new color TV tubes, kinescopes, binder opens flat for convenience; also permits addlng new data at any tine. 504, pages. Size $37 \times 1 / 2 \times 1 / 23$. Postpaid in U.S.A.

## WILEY RADIO AND ELECTRONICS PUBLICATIONS

PRINCIPLES OF RAOIO. By Henney and Richardson. 6 th Edition. Covers electrical fundamentals and radio theory. Includes laboratory experiments. Chapters on: Direct Current Circuits: Production of Current; Inductance; Capactance; Properties of Colls and Condensers, Rectifiers and Power Suppiles: Detecmannetic Radlatlon: Frenuency Modutation: etc. Illustrated, 655 pages, $51 / 0 \times 8^{\circ}$. 6 37 K 860 . Posedald $\ln$ U. $5 / \mathrm{A}^{2} . \ldots$
6.61

ELEMENTS OF ELECTRICITY, BY W. H. Timble. Fourth Edition. Ideal first text for radio training courses. Typlcal chapters: Ohm's Law; Magnets and Masnetism; The GeneraCor: Inductance; Capacitance; Alternating Motors; The Generator; etc. Illustrated. 631 pages. $37 \mathrm{~K}^{1881 / 5}$.
ostpald In U.S.A.
6.37

TRANSISTOR AUDIO AMPLIFIERS. BY Richard $\mathbb{F}$. Shea. An excellent practical reference book for the ensineer, technician and experimenter. Contains detailed specifications on over 20 transistors. Clearly written and includes many illustrations. Explains transistor operating curves, signal-to-noise ratio, input and output impedances, high-temperature sign covers: Hearing aids; phonograph presign covers: amplifer; electronic mesaphone; high-power audio amplifier. Typical chapters: Transistor Stages; etc. 219 pages. Size, $6 x^{9}$. 686 37 K 422 . Postpald in U.S.A.
6.86

HOW TOPASS RADIOLICENSE EXAMINATIONS. By Charles E. Drew. 3 rd revised editlon. An excellent gulde for all radiomen interested in broad casting, television, marime, or other fields of transmission and reception. Cov-
ers sublects generally included on commercial ers sublects generally included on commercial
radio operator license exams. Ouestion-andradio operator license exams, Question-and-
answer chapters. 407 pages. $63 / 4 \times 9 \frac{1}{4}$. 37 K 858 . Postpald in U.S.A........ 6.37 MICROWAVES AND RADAR ELEC. TRONICS. By Pollard and Sturtevant. Explatus the essential facts about microwave covers microwe of electromagnetic principles. Chapters Include: Electromagnetic Fleds and Microwaves; Servo-mechanisms and Computera; etc. 426 pages, $5 \%$ \% $88 \%{ }^{8 \%} . . .7 .59$
PRINCIPLES OF TRANSISTOR CIR. CUITS. By R. F. Shea. Written by combinathion of nine G.E. transistor experts. Covers etc. Material publibhed for first time. Cloth 37 K 988 . Postpald in U.S.A.
12.49

## RCA SERVICE DATA BOOKS

PRACTICAL COLOR TELEVISION FOR tion.) By RCA Service Co. (Revised ed valuable book for TV servicemen engineers and technicians. Thoroughly covers: Color principles, transmission, test equipment. RCA compatible system, receiver circultry. installa-
tion, servieing, alignment, and other subjects tion, servicing, alipmment, and other subjects illuserated, 84 pages. Size, $81 / 2 \times 11^{\circ} \ldots . .200$
$37 \mathrm{~K} / 73$. Postpaid in U.S.A........ 2.00
RADIOTRON DESIGNERS HAND. Langford-Smith and a staff of 33 authorenginecrs. The most comprehensive volume ever published covering the design of radio design engineers, students, and service technicians interested in basic and advanced principles of circuit design. Comtains 1000 37 K 597 . Postpaid in U. $\$$.A.
7.00

RCA TUBE MANUAL. RC=18, Latest revised edition. Full technical data on all current recelving tubes and kinescopes including color and black and white. Has schematics on AM amplifiers, treble and bass control se receiver, ampiners, treble and bass control atage, voittube characteristics, interpretation of operating

PHOTOELECTRICITY ANO ITS APPLI. CATION. By Zworykin and Ramberg. A complete survey of the entire field of photoelectricaration, photocell circuits and appllication of aration, photocell circuits and application of photoelectric devices. Typical chapters: The Multiplier Phototube; The Photovoltaic Cell: etc. 494 pages. Size. $6391 / 4 . S . A$.
37 K 83. Post pald In U.S.A.
9.80

A GUIDE TO CATHODE RAY PAT. TEANS. By Merwin Bly. Handy reference book of cathode ray pattern types encountered Wrliten rectly interpreting all basic oscilloscope patterns. 154 illustrations of cypical cathode-ray patterns. 39 pages. $81 / 2 \times 103 / 4 . \dot{5} . \mathrm{A}$.
2.45

GIANT BRAINS. (Machines That Think.) By E. C. Berkley. A fascinating discussion of mechanical "brains"- machines that store and transfer information. Clearly written in easytounderstand terms. It shows the complete development of a simple "brain." Explaing operazzers, sepuence-controlled calculator, etc. Typieal chapters: Accuracy to 23 Digits; Reasoning: Speed- 5000 Additions A Second; Social Control. 270 pages ${ }^{5 \times 8^{\circ}} \mathbf{~ K ~} 460$. Postpald $\ln$ U.S.A........ 4.90
I NDUSTRIAL ELECTRONICS REFERENCE BOOK. Compiled by Electronics Engineers of the Westinghouse Electric Corporation. Anerhaustive, authoritative digest of the marked advances in the field of industrial technicians In judgios the possibilites and llmitatons of electronic devles accurately and well as to desigu successful equipment of their own. Presents basic theory and application principles of new industrial electronic equipment. 680 page, $87 / 21117 / 0^{\circ}$.S.A...... 17.64
ELECTRICALENGINEERS HANDBOOK VOLUME 2. (Communications-Electronice.) By Harold Pender and Knox McIlwain. Enlarged Fourth Edition. Excellent reference. 54 page index. Includes sections on: Electron Mathematics. Units and Symbols; Transmision Circuits: TV; Telephony; etc. Illustrated. 1618 pages, Size, $5 \times 8^{\circ}$ in U.S.A....... 9.80
ELECTRONICS FOR INDUSTRY. BY Waldetnar Bendz. A practical, non-mathematical. explanation of electronics for engineers. Places emphasls on the application of electronic principles to industrial equinnent. Chapters include: Electron Escape From Sollds; Thyratrons; etc. 501 pages, $5 \times 8^{\circ}$. 37 K B87. Poitpald In U.S.A.
6.86

TRANSMITTING TUEE MANUAL. TT-4. Latest edition. Contains technical data and operatist characteristics of currenty available Includes section covering power tube fundamentals. construction and materials. applications. design considerations, etc. Circuit dlagrams section graphically illustrates practical uses of transmitting tubes in oscillators, power aits, etc. Profusely illustrated. 256 pages. 37 K 222 . Posipald in U.S.A.

## AMATEUR BOOKS

MOSLEY QSO INDEX. A handy Amateur station accensory which permits the Amateur Therator to keep a record of each of his contacts, letters of the worked station. Enables the Amateur to quickly determine whether a siven tation has been determine whether a given name of the operator of the other station. 20 pages, Size, $81 / 2 \pi 11^{\circ}$ of 98 C BEAM ANTENNAMANDBOOK.By WIlliam S. Orr, WGSAI. A "must" for any Amateur who has or is building a heam. Complete and authoritative volume on parasitic antennas. Discusses wave propagation, lonosphere characteristics. sup-spota, angle of radiation, and ground reflections. Covers antenna nrinciples, the parasitic director and reflector, antenna heisht, transmission lines, and matche ing devices. Provides a wealth of design information for beam antennas, including alltion, antenna installation, and test equipment. Indexed. 128 pages. Size, $51 / 2 \times 81 / 2$, equpment. 37 K 41 I . Postpald In U.S.A........2.70
SINGLE SIDEBAND TECHNIQUES. By Jack N, Brown. W3SHY. A complete volume covering the theory, operation, and construction of SSB enuipment. A simple, straightforward introduction to the principles of SSB precedes the description of the filter and phasing methods of generating the SSB signal. Construction of both types of generators is described. Alwo covers linear amplification theory, including a high-power linear amplifier. Discusses balanced modulators and phase-shift networks. A 35-watt SSB transmitter is completely deacribed, with much useful data on the designent of SSB equipment. Also covers the design of an antenna T-R switch, and the use 112 pages. $61 / 2 \times 91 / 2$. 37 K 529. Postpiald In U.S.A.

HAM'S INTERPRETER. BY OH2SQ. An easily understond booklet for the Amateur "DXer." Provides radiotelephone phrases in English. French. Spanish, Italian, German. Swedish. and Finnish. Includes pronunciation of the alphabet In all seven languages, and lists common radiotelephone terms in all languages. Also includes sample shor 0 SO in all 7 lanm
gauges. 37 pages. Size. $51 / 4 \times 8 \mathrm{~m}$. gauges. 37 pages. Slze, $51 / 4 \pi 81 / 4$. 572 . Post pald in U.S.A......... 75 C

## COMMERCIAL Q \& A BOOKS

SO YOU WANT TO BE A HAM. (Howard Sams publication). By Robert Hertzherg. Excellent Information for those interested in Amateur radio and who would tike to get started in this fascinating hobby. Provides the reader with an understanding of the licensing regulalions governing A mateurs, and how to get your license. Covers learning the code, popular types of Amateur transmitting and receiving equipment, antennas, operating practices, and presents the various phasen of Amateur activlties. such as ragchewing". DX, experimenting. etc.
186 pages. $51 / 2 \times 81 / 2$ 37 K 446 . Post paid in U.S.A.

# You Get More in the All-New knight P.A. Line 

SUPREMACY IN PERFORMANCE AND VALUE

(3) Registered Trade-Mark of Allied Radio Corp.

## PUBLIC ADDRESS

more in performance, output, styling and rugged year-in, year-out operating dependability...

UNDERWRITERS' APPROVED
Knight P.A. amplifiers, from 16 to 60 watts (and our 60 -watt power booster too!), fully meet stringent Underwriters' Laboratories specifications for complete operating safety.

FULL YEAR GUARANTEE
All Knight amplifiers are guaranteed for one full year against defects in material and workmanship. Skillfully engineered and conservatively rated, they can be run 24 hours a day.

## BUY ON OUR EASY TERMS

The finest Sound Equipment in the P.A. field is readily available to you on our Easy Payment Plan. You pay just $10 \%$ down, and the balance in convenient monthly payments. Full Easy Pay details are on page 396.

SAVE ON A COMPLETE SYSTEM

The cost of a complete Knight Sound System is always less than the total cost of individual components purchased separately! Additionally, only top-yuality, nationally known parts and component products are used in the makeup of our P.A. systems.

## free consulting service

Our Audio experts are always ready to help you. Give us approximate audience figures, area coverage dimensions, noise level, and a rough sketch of area to be covered. Careful recommendations are promptly made.

## 15-DAY TRIAL OFFER WITH MONEY BACK GUARANTEE

We guarantee absolute satisfaction or your money back. Order any Knight Sound System you want, either for cash or on our Easy Payment Plan. Test it out for yourself, under your own operating conditions. If, after 15 days, it is not everything we claim it to be-send it back. We'll refund every penny of the purchase price, less only transportation charges!

## KNIGHT P.A. EQUIPMENT MEETS EVERY AUDIO NEED

## there is a knight amplifier FOR EVERY SOUND COVERAGE NEED

YOU GET SUPREME QUALITY. Ceaseless research, engineering skill, and 37 years of experience in Sound, go into every Knight P.A. amplifier Rugged and reliable, they're presented for use only after they fulfill our very highest standards your absolute assurance of top performance.

## CHECK THESE SUPERIOR FEATURES

Trumpet Protector Switch
NEW. Unique leature, controlled by fingertip slide switch, protects trumpets from low-frequency burnout by blocking frequencies which could harm the volce coil.

## Phono Fader Control

NEW. Valuable P.A. featurel By turning the Phono fader knob either to the left or to the right, you can increase or decrease the volume of either phono input. Returning knob to center cuts out both phono Inputs.

## Impedance Selector

NEW. Specially designed to odd greatly to the ease and speed with which you can change your speaker arrangement. Use alther speaker jacks or screw ferminals for fost, easy setup of equipment.

Magnetic Phono Input
Pioneered by Knighll Magnetic input for hi-fi phono cartridges offers you unexcelled voice and music reproduction from records. Sets a pace-making standard of realism for P.A. sound equipment.

## Rack Mounting Feature

## ACCESSORIES FOR KNIGHT KN. 3035 AMPLIFIER

PLUG-IN LO-Z TRANSFORMER. 50-600 ohmis input. 1 HP .
 - Flexibility Permits Use In Any Installation Contral Feature - Remote Contral Featur Adds Convenience - Handy "Pencil-In" Identification Strips

- Constant.Voltage

Taps

EXCEPTIONAL FLEXIBIIITY. Many accessories permit almost any type of installation: "Deluxe" series may be remotely controlled with accessory and has anti-feedback control, an exclusive Bogen feature. All units have plug-in sockets for low-impedance transformers; pencil-in identification strips for gain controls; constant-voltage output taps for use with 70.7 -volt transformers.

## "DELUXE" 30 AND 60-WATT FLEX-PAK AMPLIFIERS

These are the two brilliant leaders of Bogen's new "Flex-Pak'" series: a distinguished group of units that bring new versatility and electronic refinements to the P.A. field. Incorporated in the "Deluxe" amplifiers are such features as anti-feedback control. constant-voltage output taps, four Independently controlled microphone channels (one convertible to phono) and built-in circuitry for adaptation to remote control of gain at distances up to $\mathbf{2 , 0 0 0}$ feet. The anti-feedback control minimizes feedback noise without compromising tone or reducing gain. Constant-voltage output compromising tone or reducing gain. Constant-voltage output transformers. The circuitry is modern: screen regulation in the output stage provides higher power with greater efficiency; controlled positive feedback provides high output with ininimum distortion. Handsome case is finished in black and gray. Handy identification strips above each sain control may be marked in pencil; they are easily erased when the set-up is changed.
Frequency Response: $\pm 1.5 \mathrm{db}, 20-20,000 \mathrm{cps}$. $H$ um Level: 00 db below rated output. Conirois: 4-Gain; Mic.-Phono swltch; 2 -Sjeech Filters; Ofi-On-Treble; Bass; Anti-Feedback. Size: $5 \% \times 161 / 4 \times 13^{\circ}$. For operation from $110-120$ volts, $50-60$ cycles AC.
LX80 60 WATT AMPLIFIER. Pouer Output: 60 watts at less than $2 \%$ distortion; 90 watts peak. Tubes: 4-6AV5GA, 3-12AX7, 2-6U8, 6CM7: 3-5Y3GT rectifiers. Output Impedances: 4, 8, 16 ohms, balanced 25 -volt line, 70 -volt line: Shpg. w.t., 37 lbs . 91 SZ710. List 259.50. NET.
155.70 LX30 30 WATT AMPLIFIER. Power Oufput: 30 watts at less than $2 \%$ distortion; 45 watts peak. Tubes: 2 - 6AV5GA, 3-12AX7, 6CG7. 2-6U8; 2-5Y3GT rectifiers. Oulpul Impedances: 4, 8, 16 ohnis. balanced 25 volt line, 70 -volt line. Shpg. wt., 31 lbs .
91 SZ711. List 209.50. NET.
125.70

EXCEPTIONAL QUALITY. Controlled nositive feedback, plus screen regulation for higher output at lower distortion levels: XL-311 Cannon microphone connectors used throughout; new functional modern styling; easy attachment of accessories without tools; correct compensation for use with phono cartridges; speech filters for highest clarity.

## "SUPERB" 30 AND 60-WATT FLEX-PAK AMPLIFIERS

The two ampllfiers of the "Superb" group are ideal for high-quality P.A. work requiring unusual flexibility and excellent performance at moderate cont. They include many of the outstanding features of the "Deluxe", amplifiers at the left, and provide three independently controlled microphone channels, one of which is convertible to phono. Controlled positive feedback, screen regulation in the output stage, and constant-voltage output taps are also provided. The handsomely desinned cases of these amplifiers are black and gray; control panel markings are in red and black. A convenient leather carrying handle, easily removed, is attached to the side of the case with thumbscrews. No tools are needed for malntenance of Flex-pak amplifiers; the cage-type cover can be quickly removed after four thumbscrews are loosened. Pencil-in. erase-out labels are permanently bonded to the amplifier control panels above each gain control. The phono input is equalized for all types of cartridges.
Frequency Response: $\pm 2 \mathrm{db} .20-20,000 \mathrm{cps}$. $H$ um Level: 60 db below rated output. Controls: 3-Gain; Mic.-Phono switch; Speech Filter; Off-On-Treble; Bass. Size: 60 -watt. $53 / 8 \times 161 / 4 \times 13^{\circ} ; 30$-watt, $5 \frac{1}{3} \times$ $141 / 6 \times 13^{\circ}$. For $110-120$ v., $50-60$ cycles AC.
l60 80. WATT AMPLIFIER. Pover Output: 60 watts at less than $2 \%$ distortion; 90 watts peak. Tubes: 4-6AV5GA. 2-12AX7, 6U8, 6CM7. 6AU6; 3-5Y3GT rectifiers. Oufput Impedances: 4, 8. 16 ohms, balanced 25 -volt line, 70 -volt line. Shpg. wt., 37 lbs . 91 SZ713. List 189.50. NET.

## LOM PREAMP-CONTROL UNIT

A superbly engineered instrument for critical P.A. applications, or ligh-quality, professional recording on location. Five independentiy controlled microphone inputs are provided, one convertible to a pliono cartridge injut. An accurate level meter permits continuous monitoring of the combined output of all channels in use. Buile-in sockets accept plug-in low impedance transformers listed on opposite pare, for use with extra-long microphone leads. Outisut is high impedance, or may be easily converted to low impedance with T-165 600olim transformer, for remote broadcast or recording work. Mi-Z ontput for connection to boosters like KO series at right.
Output: 30 milliwatts at less than $2 \%$ distortion; 6 milliwatts at less than $0.5 \%$ distortion. Peak Output: 45 milliwatts. Controls: 5-Gain; 4-Speech Filter; Mi-crophone-Tuner-Piono; Bass; Treble; Orf-On-Master Gain. Tubes: 3-12AX7, 6CG7. 6AU6, 6HF6; 6X4 rectifier. Frequency Response: $\pm 1 \mathrm{db}, 20-20,000 \mathrm{cms}$. $H_{4} \mathrm{~m}$; 60 db sponse: $\pm 1$ db, $20-20,000 \mathrm{cps} . ~$
below rated output. For $11(1)-120$ volts, 50 ) 60 cycles AC. Size, $53 / / 3 \times 161 / 4 \times 13^{*}$. Shpg. 60 cycles A
99 SZ 183 . List 177.50. NET .... 106.50 t 165 OUTPUT TRANSFORMER. Converts output impedance to 600 -olim broadcast standard, Slipg. wt., 1 lb .

## KO POWER BOOSTERS

Powerful new P.A. boosters to increase system power as much as 100 watts by the acldition of a single unit. All three models feature controlled nositive feedback; distortion is less than $2 \%$ at rated output. May be used with plug in transformers for conversion to balanced low-inmedance line input. When combined with the I.OM mixer-preamp at left, any of these boosters makes a superb P.A. system. All are adaptable to rack panel monnting, with $k$ it listed on opposite page. Response: $\pm 1 \mathrm{db}, 20$. $20,000 \mathrm{cpss}$. Hum: 80 db below rated out put. Ceverall dimensions: $73 / 4 \times 17 \% \times 6 \frac{1}{4}$. For $110 \cdot 120$ volts. $50-60 \mathrm{cy}$. AC.
MODEL KO-30. Power Oulpul: 30 watts: treak, 45 watts. Output In prdance: 4, 8, 16 olims, 25, 70 volt line. 21 lbs. 91 SZ 701 . List 108.75. NET.
65.25

MODEL KO-60. Poner Oulpul: 60 watts; peak. 110 watts. Ouput Impedance: $2.5,10$ olams. 25, 70 -volt lines. Slapg. wt., 23 lbs.

# Bogen FLEX-PAK 

\author{

- EASY TO SERVICE <br> - EASY to Install <br> - EASY TO CARRY
}

No tools are needed to inspect, clean or maintain Bogen "Flex-Pal" amplifiers. Just loosen four thumb-screws and you hove complete and convenient occess fo the chassis.

Accessory wall-mount brackep makes a handsome, functional installation possible for any "Flex.Pal" unif; easily occes. sible when needed-alded bock when not in use.

Flex-Pak units are as portable as small luggage; convenient carrying handles are provided at the side of eoch unit, for maximmm ease of portability. Ther're light, roo!

Convenient write-in space Over each gain control pre. vents errors in balance ad. justment and volume setting. Markings are easily erased whenever necessory

TAKE ADVANTAGE OF OUR SPECIAL BOGEN CUSTOM INSTALLATION SERVICE

Allied specialists are ready to help you choose the equioment which will best suit your P.A.system requirements. Bogen will pre-assemble your cuspom sound system, supplying all necessary interconnecting cable; and your system will arrive ready for installation.

All Bogen equipment so sup. plied by the Custom Division is loctory tested to Insure per. lect performance. Units may be ordered mounted on stand. ard electronic equipment racks, or on shock-proof isolation bases, if desired. Any Bogen amplifier may be ordered for amplifier may be ordered for
photocell Input for theoler installations, through the Cusrom Division. Special audio and radio disfribution systems of this kind have been specially developed for industry, hotels. public bulldings, and military instollations. Submit complete specifications to Allied for prompt service.

## CARDIOID-PATTERN MICROPHONES

A cardioid microphone (also called Unidirectional) has a heart-shaped pickup pattern. It is far more sensitive at its front than rear; front-torear sensitivity ratio is 7 to 1. Permits a P.A. system to be operated at a higlier volume before acoustic feedback occurs.

## "UNIDYNE'" DYNAMIC MICROPHONE

MODEL 55S. Rugged, cardioid dynamic microphone designed to withstand severe mechanical shock as well as heat and moisture. Cardioid feature permits placement of microphone at a distance from teerformer $75 \%$ greater than all-directional microblones. An excellent choice as a singer's or announcer's microphone. Response from 50 to $15 .(00 \mathrm{cjss}$. Switch selects impedances of $35-50$ ohns. 150-250 ohms, aut high imperlance. Output is -00.5 db at high imsedance. Swivel mounting. Satin chrome finish. ${ }^{3}$ " ${ }^{\text {" }}-27$ thread Detachable. 18 -ft.. 2 -conductor shielded cable. Size, $4 \times 23 / 16^{3} \times 1 / 16^{*}$. Detachable. $18-1 \mathrm{t}$.
Slipg. wt. $4 / 4 \mathrm{lbs}$. 99 S 395 . List, \$83.00. NET
48.80

MODEL S56S. Deluxe version of above. Constructed and tested within extremely close tolerances to give improved frequency response and directivity. Smooth resjonse from 40 to 15.000 cps . Live rubber isolation unit in stand connector deacens vibrations from floor. Shng. Wi., 41/2 lbs.
99 S 396. List. \$135.00. NET

## -MONOPLEX" CRYSTAL MICROPHONE

MODEL 737A. High output, cardioid, crystal microphone. Cardioid features (above) make this a superior. moderate cost microphone in P.A. and tape recording applications. Head tilts to change pickup to all-directional. Crystal element is sealecl against adverse effects o moisture. Output is -53 db . high impedance. Response: 00 to $10,000 \mathrm{cps}$. Satin chrome finish. 5 g" ${ }^{\prime \prime}-27$ thread. Inetachable, 15 .ft. shielded cable. Size, $4 \times 33 / 32 \times 17 / \mathrm{s}^{\prime \prime}$. Shpg. wt., $21 / 4 \mathrm{lbs}$. 99 S 380 . List. \$46.00. NET
27.05

## "SONODYNE" DYNAMIC MICROPHONE

MODEL 51. For tape recorder and public address use. Immune to effects of temperature and humidity. Frequency response of 60 to $10,000 \mathrm{cns}$ for outstanding reproduction of music. Multi-impedance: $35-50 \mathrm{hmm}, 150-250 \mathrm{ohm}$, and high impedance, selected by screw Iriver adjustment. Output, $\mathbf{- 5 2} \mathrm{db}$. Satin clirome finisl. $\mathrm{s} / \mathrm{m}^{\prime \prime}-27$ thread. Swivel mount. Detachable, $15-\mathrm{ft}$., 2 -conductor shielded cable. $53 / 16 \times 31 / 1 \times 21 / 8^{\prime \prime}$. Wt., $31 / 2$ lbs.
99 S 378 . List, \$49.50. NET
29.11

## MODEL 707 A CRYSTAL MICROPHONE

Popular, low-cost, semi-directional microphone. Used extensively for Amateur radio communications, home recorders, low-cost public address systems and paging systems. Response from 30 to 7000 cps . Ont put is -50 db , light impedance. Gray enamel finislı
 cable. Shpg. wt., 2 lbs.
II. 47

99 S 361 . List, \$19.50. NET
MODEL 520 "GREEN BUILET." Controllecl-magnetic version of above. Practically immane to temperature conditions. Response, 100 to 0000 cpss . Output, -52.5 db ; high imsedance. Green enamel with chrome trim. $3 / /^{\prime \prime}-27$ thread. Size. $23 / /^{\prime \prime}$ diameter. $31 / /^{" 4}$ long. 7 -ft. cable attached. Shpg. wt., 11/2 lbs.
99 S 383. List, \$22.50. NET
13.23

## MODEL 708A "STRATOLINER"

Semi-directional crystal microphone for public address, lıme recording, paging, etc. Particularly good for voice. Response, 60 $10,000 \mathrm{cps}$. Outjut, -51 db . High impedance. Gray finish. $5 / \mathrm{s}^{\prime \prime}-27$ thread. 7 -ft. cable. $21 / \mathbf{y}^{\prime \prime}$ dia., $4^{\prime \prime}$ long. Wt. 2 lbs.
99 S 363. List, $\$ 31.00$. NET
18.23

MODEL 333. An ultra-cardioid micronhone made to extremely rigid tolerances and designed for the ultimate in wide response and directional characteristics. Ribbon element. Response: $\pm 2.5 \mathrm{db}$ from 30 to $15,000 \mathrm{cps}$ Minimizes jickup of moving mops, scuting feet, and other background noises. Jlas Voice-Music switch: also 3-posit lon switch to elect 50,150 or $\mathbf{2 5 0}$-olim, impedance. Output, -60 db . Has wind and blast filter, and live rubber isolation unit in stand connector. 5" 27 Iliread Non-reflecting bronze finisl3. $39 / 6 \times 11 / 6 \times 1 \mathrm{M"}$ ". With detachable, 20 -ft., 2 conductor shielded cable. Wt., 4 lbs. 99 S 456 . List, $\$ 250.00$. NET
147.00

MODEL 330. New "Unitron" mike, similar to above. Less VoiceMusic switch: satin-clirome finish. Shig. wt., 4 lbs.
94 S 090 . List, $\$ 120.00$. NET
70.56

## BI-DIRECTIONAL MICROPHONES

Figure " 8 " pattern permits picking up sound from front and rear while rejecting sound from the sides Ideal for radio and recording studios and for fixed installations on lecterns, pulpits, speaking platforms, etc

## "CONCERT-LINE" RIBBON MICROPHONES

MODEL 300. Deluxe Bi-directional microphone. Shock mount; VoiceMusic switch. Response, +2.5 db from 40 to $15,000 \mathrm{cps} .30-50$ ohins. $150-250$ ohins and high impedance. Output is -57 db at ligh impedance. Hronze finish. 5 - $^{\prime \prime}-27$ thread. Detachable, 18 -ft.. 2 concluctor shielded cable. $6 \times 17 / 16 \times 13 / 32^{7}$. Shpg. wt.. $33 / 4$ lbs. 99 S 397. List, \$150.00. NET
88.20

MODEL 315. As above, but less rubber shock mount and VoiceMusic switch. Frequency response, $50-12,000 \mathrm{cps}$. Output, -57 db . Satin-chrome finish. Slıpg. wt., $31 / 4 \mathrm{lbs}$.
995398 , List, $\$ 89.50$. NET
52.63

## MODEL 415 "COMMANDO'

New, slin-grip, controlled-magnetic, ligh impedance microphone. Has all-directional pick-up pattern. Excellent for use in public address systens, home recording, etc. Frefuency response from 60 to $10,000 \mathrm{cps}$ Ouput level is -55 db . Rugren dre cast metal case is satfob che fish for lasting beauty impact resstant polystruene in-chrome finished for lasting beauty, mpact-resistant polystyrene cap is non-reflecting gray. With $80^{-27}$ swivel stand adapter, and 7 -ft., single-conductor, non-detaclable shielded cable. $613 / 16^{\prime \prime}$ long. diameter of head, $13 / 4$ "; diameter of handle. ${ }^{11} \mathrm{is}{ }^{\prime \prime}$. Wt. 1 lb . 94 S 085 . List, $\$ 27.50$. NET
16.17

## MODEL 420 "COMMANDO"

New, low-cost controlled-magnetic lavalier microphone. All-directional pickup pattern. Especially suited for public address at auctions, demonstrations, etc., where freedom of hands is essential. Frequency response from 60 to $10,000 \mathrm{cps}$. Output is -55 db . I)ual impedance; $150-10-250$ ohms and ligh imperdance. Gray finish polystyrene case. 18-ft., 2-conductor, non-detachable shielded cable, and lavalier cord witla clif. $3^{11}$ is $11 /{ }^{\prime \prime}$. Shpg. wt., $1 / 2 \mathrm{lh}$. 94 S 086 . List. $\$ 30.00$. NET
17.64

## MODEL 430 "COMMANDO"

New, deluxe, controlled-magnetic microphone with press-totalk switch. All-directional wick-un pattern. Ideal for P.A.. recording, intercommunication, etc. Response, $60-10,000$ cps. Output. -55 ilb. Dual impedance: 150 to-250 ohms and high imperdance. Satinchrome, die-cast metal case; non-reflecting gray polystymene cap. Detachable, $15-\mathrm{ft}$. 2 -conductor shielded cable. Size, $611 / 16^{\prime \prime}$ long: diameter of head, $136^{\prime \prime}$; cliameter of handle, $1 / 16^{\prime \prime}$. With cover plate (may be attaclied for continuous "On" operation), E/6"- 27 swivel adapter. Shipg. wt., $11 / 1 \mathrm{~h}$ lbs.
945087 . List. $\$ 38.50$. NET
22.64

## ALL-DIRECTIONAL MICROPHONES

Kespond equally well to sounds from all directions ( $360^{\circ}$ ) in a plane nerpendicular to the axis of the microphone. Ideal for soloists, groups, orclies. tras, choirs, and stage productions. Small diameter makes them especially suitable for use where microphone must be hand held; or for lavalier use (suspended from neck). All-directional microphones are also called omni-directional.

MODEL 525 STUDIO MICROPHONE
All-directional, professional dynamic microplone. Dynamic range of 125 db . Response. $\pm 2.5 \mathrm{db}$ from 40 to $15,000 \mathrm{cos}$. Switch selects imperlance of 50 , 150 and 250 olims. Output, -61 db at all iniredances. Case is bronze; head is beige. With neekcorsl for lavalier use, belt-clip. A-25 swivel adapter for $3 / \int^{\prime \prime}-27$ thread stands, and detachable $20-\mathrm{ft}$. 2 -conductor shielded cable. $81 / 2^{\prime \prime}$ long and $1^{1}$ m" diam. Slipg. wt., $3^{1 / 4}$ /hs.
99 S 454 . List, \$200.00. NET
.117 .60
MODEL 535 "SLENDYNE" MICROPHONE Moderately-priced, all-directional dynamic micronlone. tispecially suitable for mublic address applications. 60-13,500 cjss. Builtin switch for selecting output impedances of $50-250$ olrms. and high impedance. Out put, -61 db . With lavalier cord and swive! adapter. $8 / /^{\prime \prime}-27$ thread. Detachable, $18-\mathrm{ft}$., 2 -conductor shielded cable. $11 / 8^{\prime \prime}$ diameter and $712 / 3 z^{2}$ long. Wt., 3 lbs . 99 S 657 . List, $\$ 72.50$. NET
42.63

MODEL 777 "SLIM-X'" MICROPHONE Multiple-purpose crystal microphone. Can be worn as a lavalier, hand-held or mounted on fioor or desk stand (see $\mathrm{S}-38$ and $\mathrm{A}-25$ below). For P.A. use, singers, eic. In vertical position piekup pattern is all-directional. Response, 60-10,000 cps. Outbut, -62 dh. High impedance. Satin chrome finish. Detachable, 7-ft. cable. With neck-strap and holder for ${ }^{5}{ }^{\prime \prime}$ " -27 thread stands. Size, $4^{3} \mathbf{x}^{4}$. Shing. wt., 1 lb .

## E001200/0155

## Variable "D" Cardioid Dynamic Mikes

MODEL 667. Widely used in net work TV. the Model 667 is ideal for all applications requiring critically uniform frequency response, high resistance to shock. or where high ambient noise or severe reverberation exists. It is supplied with a special transistor preamplifier providink twenty frequency response characteristics. individual bass and treble control. and four lesels of attenuation. Sound enters three apertures in the microphone case. and is then conbined in such a way as to assure extremely smooth frequency response and total absence of "proximity effect." Response is uniform, 35 to 16.010 cycles, Ont put level. variable. -30 to -48 db . Designed to work into 250 . 150 or 50 ollm circuits. No, ise level is -123 dbm : dynamic ranke at maximum sain setting is 120 db . Microphone is $11 / 4 \times 71 / 2^{\prime \prime}$ : prearnp. $9 \times 37 / 3 \times 311 / 2^{\prime \prime}$. Supplied with 50 .ft. and 20 ft. broadcast-type cables and connectors. $1 / 2^{40}$ pipe thread with $5 / /^{"-27}$ adapter. Shpp. wh., 4 liss.

## Variable "D" Dynamic Microphone

## For Finer Public Address,

## Tape Recording \& Communications Use

 MODEL 664. Skilffully designed and ruggedly constructed, uni-directional dynami= mike. I'icks up from front only - provides high front-to-back diserimination against unwanted soluds, without close-talking boominess. Employs variable "D" (variable distance) construction to produce cardioid distance) construction fo produce cardioid in locations where ambient noise and severe reverberations exist. Gives distinct. natural reproduction of voice and music-increases working distance from microplone-provides greater protection against feedback problems. Equipped with a "pop-proof" wire mesh grille, the 6ot minimizes wind and breath blastg-excellent for outdoor public address use in fixed or mobile installations. Diaphragm is shielded from dust and magnetic particles.Kugged construction and use of non-metalic diaphragm permits amooth response over a wide frenuency range. Withstands ligh bumidity. temperature extremes and severe mechanical shock.
Virtually indestructibie under normal use. Can be used on floor or desk stand, or carried in the hand. Frequency response from 40 to 15.000 cps . Oneput level. -55 db . 11 as 1.50 -ohm and high-impedance output. Supplied wired for high impedance. $5 / /^{\prime \prime}-27$ thread. Cast zinc case. finished in glistening chrome. Complete with on-off switch; and detachable. $18-\mathrm{ft}$., 2 -conductor cable. Diameter. $17 / 8^{\prime \prime} ; 73 / 6^{*}$ ong. Shipg. wt., 2 lbs.

- Ideal For Extending Home Sound Systems
- Excellent For Use in Schools, Plants, Offices, etc.
- Volume Control for Individual Control Of Sound Level
- Built-in High-Quolity Speaker For Voice and Music

## NEW 8-OHM SPEAKER-BAFFLE COMBINATION

New, rearly-to-use, steaker-batile combination for extending sound coverage of existing sonnd systems. Excellent for all indoor installations including public address systems in perinits coustrolling plants, large offices, auditoriums, stores, etc. Pre-wired volume control perinits coutrolling sound level at speaker-a very desirable feature in multiple speaker systems where a variety of sonnd levels must be maintained. Attractive, sloping-front baffle features rugged, deluxe-quality construction. Baffle is made of $1 / 0^{\prime}$ and $1 /$ opl$^{\circ}$ veneered voods. Rabbeted construction is featured throughout with liberal use of ghe bloneered additional strength. Atractive, plastic grille cloth matches lustrous mahogany finish of baffle hut does not affect sound dispersion. Built in heavy-duty $8^{\circ}$ speaker has 4.64 oz Unico $V$ inagnet to assure highly efficient reproduction of voice and music. Ias high-quality 10 watts speaker cone. Voice coil imperlance is 8 ohms; power handling capacity is a full of battle for screws or baffe is as easy as hanging a picture slots are provirled at the rear of batte for screws or nails. The speaker and volume control leads are pre-soldered-a screv-driver is the only tool required to connect your speaker cable to the terminals on the baffle. Size, $11 x^{9} 9^{9} \mathrm{i}_{6} \times 6^{1 / /^{\circ}}$. Slypg. wt., 6 lbs 93 D704. NET

## Quam Heavy-Duty P.A. Speakers

These heavy-duty permanent magnet speakers are specifically designed to deliver highly dependable service in public address installations. Offer high power handling capacity. excellent tonal quality, and rugged construction throughout. Complete dust-proofing and rigid welding assure permanent alignment of integral parts. Quam speakers feature two exclusive engineering developments. One is the [1-shaped field coil pot feature which provides an unbrokien flux path of sufficient cross section to carry the full energy of the mannetic field. The second feature is Quam's \djust-A-Cone suswenslon consisting of a clamping ring securely fastening the spider to the basket by means of two machine screw's rather than cement. as in other stueakers. This assures precision centering of the voice coil. Also use high-fuality Alnico $V$ magnets. Pot material is selected for low carbon content and high magnetic properifes. llasket is finislised in clurable baked aluminum enamel. Have convenient bracket for mounting of inatching transformer. All have 68 ohm voice coils.

## Bogen VP-17X Transcription Player

Portable, variable speed transcription player. Has built-in 10 -watt amplifier, plus microphone input with separate gain control-makes an excellent portable P.A. system. An extremely versatile combination of player, amplifier, and speaker in a portable unit. Useful for instruction, calisthenics, etc. Has outstanding Bogen B50-16 turn-table-features continuously variable speed fron 16 to 86 rpm . Plass aff records up $1016^{\circ}$ dia., with splendid sound quality and minimum record wear. Speed adjust ment is accomplished through a precision cone drive, regulated by a single lever with lock-in posi tions for accurate, instantaneous selection of conventional speeds (78, 45, $331 / 3$ and $16 \frac{1}{3} \mathrm{r} \mathrm{mm}$ ).

Incorporates heavy-duty 4 -pole motor, weighted ( $31 / 4 \mathrm{lbs}$ ) and balanced turntable: reduces wow, hum and rumble to negligible values wow to under $0.5 \%$ ! Die-cast nick-np arm has ball-bearing mount and "Feather-1)rop" action to protect recoud and stylus; equipped with G.E\%, variable reluctance cartridge with dual sapphire styli. IVith built-in compensated preamplifier for cartridge.
$12^{\prime \prime}$ heary-duty Alnico $V$ speaker is mounted in removable lid of carrying case; has 25 ft . of cable. Provides sufficient coverake for moflerate-size gymnasium or anditorium-has 2 jacks for external speakers. Separate bass and treble conerols are provided, as well as an effective scratch and noise filter. Attractive. compact carrying case is constructerl of $3 / \mathrm{m}^{\circ}$ plywood, and is aderuately shockmounted. fixpausled metal speaker grille; covered in two-tone luggage-type fabric.

Oufpm: 10 watts with less tlıan $3 \%$ harmonic distortion. HOW TO SELECT YOUR "CHIEF" SYSTEM It's casy-and economical-to select an intercom system when you follow sug gestions by Illied's experlenced intercom experts:
1.) Determine how many locat fons the sys tein will serve. Select "Chiff" master sta tions with capacity to handle all locations 2.) Select a "Chief1" Master for each loca tion that innst call every other station.
3.) Choose a Sub for each location that nust ansiver or call Masters only. (Subs connol talk to other Sub-stations.)
4.) There must be at least I Master in every system (only Masters have amplifiers and distribute audio power to the entire intercom system).
5.) Use a "Redi-Power" Master when you need extra power for noisy locations.

## OPTIONAL FEATURES

PRIVACY EARPHONES. For all stations listed on this and opposite pake. When litted from rest. cuts unt builtin speaker. In brown only. Add \$13.50 per station.
CRADLE PHONE. For Masters and bakelite-case Subs. except types CL-5. CL-10 and radio-int ercom units listed on page 304. Add $\$ 29.35$ per station when ordering.
BUSY SIGNAL. For "Chief" Masters. Gives visual indication that another Master you call. similarly equipper. is "busy." Add $\$ 7.00$ per unit.
executive gray finish. All Talk-i Phone Master and bakelite-cabinet Subs are available in executive gray Idd $\$ 1.80$ per suh: $\$ 2.70$ per maste and indicate "Special" in plate of Stock No. Nllow 10 days for delivery

## Automatically Opens and Closes Garage Doors from

 Interior of Any Car
## s $54^{\circ 0}$ <br> - Automatic Shut-Off <br> - Large Overhead Light

Just touch a pushbution on your car's dashboard-the garage door rolls up and the light goes on! Press pushbutton again to close and lock the door securely-or use the wall-mounted pushbutton at the garage exit. A tremendous convenience in bad weather-and it also offers protection for members of family coming home late at night. The transmitter sends out a signal when pushbutton on dash is pressed. Receiver in garage picks up signal, turns on the garage light and actuates the lifting mechanism. When pushbutton is pressed and actuates the lifting mechamism. Whe close the door and lock it the second time, the motor reversestly if obstruction blocks path of securely. Power shuts of automatlcally if obstruction blocks path of door travel. Door can be operated manually in event of power failure. Has thermal overload switch for complete electrical protection.
Transmitter operates from either 6 or 12 -volt car battery. Crystalcontrolled operation on FCC-authorized frequency of 27.255 mic. Recelver has only three tubes for low power drain and uses lowvoltage ( 24 -volt) control system. Handsome spun aluminum housing encloses motor mechanism. With 24 -volt pushbutton and 22 ft . of wire to permit operation of door without radio control. Fits overhead. residential garage doors up to 18 ft . wide and 8 ft . high using a horizontal or curved roller track. Designed for use with either 1 -plece or sectionalized doors. Clearance required between ceiling and high are of door travel. only $\mathbf{2}^{\prime \prime}$. All necessary parts and hardware are supplied-plus easy-to-follow instructions for quick. simplified installation. Mechanism and receiver operate from $110-120$ volts, $50-60$ cycle AC.

## RADIO CONTROL SYSTEM FOR INDUSTRIAL USE

## - Efficient and Safe-Has Hundreds of Industrial Applications

- Transmitter Operates Over Distances in Excess of One Hundred Feet
- Perfect For Remote-Control Opening and Closing of Warehouse Doors, Etc.

Extremely versatile radio-control system only. Actually a radio-controlled switch, the unit consists of transmitter, receiver, antennas, cable and bracket, all hardware and instructions. It may be used to actuate any electrical device drawing up to 3 amps; or may be used with it may be used to actuate any electrical device uxrent devices by the addition of an auxiliary relay or relays. Uses for this system are limited only by the imagination!
Radio control provides greater safety, efficiency and operating economy. Eliminates use of cables where they may be difficult or expensive to install. or easily damaged. Typical uses: Operating any door or hatch in any type of plant; turning on areaway, parking store or porch lights: turning on landing lights and operating hangar doors from an incoming plane; turning on dock or harbor lights from a boat; operating warehouse doors from a forklift or runabout plant truck; opening and closing of furnace doors; etc. In addition, the radiocontrol system can be added to present electrically operated garage or plant doors.
Transmitter fully meets all FCC requirements. Employs an extremely stable. crystal-controlled, tone-modulated circuit. Operates from any 6 or 12 -volt electrical system. Exceptionally compact, it is easily installed under the hood of a car or truck, or dashboard on panel of electric trucks. etc. Receiver operates from $100-120$ volts, $50-60$ cycle $A C$ and includes a built-in relay rated at 3 amps at 115 volts, Built-in filter and delay network prevents accidental operation from other signals or electrical disturbances. Sturdy construction and of top-quality. Conservatively rated components accounts for the exceptional reliability that users have achleved with this equipment. Size of transmitter and receiver, each: $41 / 2^{\prime \prime} \mathrm{high}, 55 / 2^{\prime \prime}$ wide, $43 / 3^{\prime \prime}$ deep. Shpg. wt.. 10 Jbs.

## Select Your TV Antenna From Allied's Complete Top-Quality Lines

Allied carries the world's largest stocks of TV antennas and accessories. On this and the following pages (through page 390), you'll find a complete selection of antennas for every use-indoor or outdoor installation, VHF and UHF, metropolitan, suburban or remotest fringe area use-all providing equally fine reception for color and black-and-white television receivers. Complete selections from nationally-known manufacturers, at lowest prevailing market prices, assure you of full value.

## WHEN SHOULD A TV ANTENNA BE REPLACED?

Often, poor picture quality is not the fault of the TV set, but of a weatherworn antenna. For this reason, antennas exposed to weather for an appreciable length of time should be considered for replacement. A new antenna, of latest design, often provides picture quality superior to the original. Depend on Allied for the best replacement antenna.

## How to Select Your TV Antenna

Today, most VHF TV broadcasts (channels 2 through 13) can be received at distances up to 200 miles when the proper antenna is used. While antennas of many sizes and shapes are available, each can be classified in one of the 4 general groups listed below. To assist you in selecting an antenna for vour particular location, the antennas on this page and the following pages have been identified with $1,2,3$, or 4 stars to indicate their useful range as given below. When in doubt, select an antenna in the next higher group.
$\star$ Metropolitan-Suburban (up to 35 miles).
$\star$ Semi-Fringe (up to 50 miles).
$\star \star$ Fringe (up to 75 miles).
$\star \star$ Deep-Fringe (up to 200 miles).

Stacking two of the same type antennas will give up to $50 \%$ more signal strength. Stacking is recommended in installations located over 100 miles from the TV station. Obstructions such as tall buildings or hills near your location may necessitate stacking at distances less than 100 miles. All of the TV antennas in this Catalog may be used for reception of black-and-white or color TV broadcasts.

Easy-to-Install Fringe-Area TV Antenna Kits

## $\star \star \star$ All-Channel's Super-Power "Riviera" UHF-VHF Antenna Kit ONLY <br> 53588

Famous "Riviera" all-directional antenna plus installation accessories. One of the finest for fringe areas where reception is possible from several different directions. Excellent signal-to-noise ratio. Construction utilizes 16 elements-each element of $1 / 2^{\prime \prime}$ aluminum tubing (with dowel inserts), $60^{\prime \prime}$ long. Solid aluminum stacking bars are $45^{\prime \prime}$ long. Triple-strength insulators. Features "electronic" rotation over $360^{\circ}$ (without a motor-driven rotator) through use of a selector switch located at TV receiver. The 9-position switch allows selection of the proper set of elements that will feed the strongest signal into the TV set. Simply set switch on position that gives best reception on channel desired. Kit includes: Chimney mount; two 5 -foot masts; 100 feet of 4 -conductor lead-in cable; 8 standoff insulators. An outstanding value for VHF-UHF reception. Shpg. wt., 15 lbs . See page 377 for individual listing of All-Channel's "Riviera" antenna.
92 CZ 137. ONLY.
35.88

Popular fringe-area TV antenna kit, complete with all installation accessories. Antenna is the famous Finney B-8 Geomatic, known for excellent reception in deep fringe areas. Features increased gain through the use of a combination of phased and parasitic elements. Directivity equals single channel yagis. Rugged box girder element brackets. Ideally suited for color reception. Kit also includes: Chimney mount; $5-\mathrm{ft}$. mast; 3 mast standoffs; 5 wall standoffs; and 100 feet of lead-in cable. Shpg. wt., 15 Ibs . See page 376 for individual listing of the Finney B-8 anienna.

\author{

- Rotator for Antenna Direction Contral <br> - Detailed Installation Instructions
}
- Complete with All Hardware
- Top Quality Throughout

These deluxe, value-packed kits have been selected by Allied's antenna experts to meet practically any TV antenna requirement. Complete in every detail-there's nothing clse to buy-and the package prices are actually less than the total cost of the components purchased individually. Provide outstanding fringe-area reception for color and black-and-white receivers.
CHOICE OF PACKAGES. Kits for "Semi-Fringe," "Fringe," and "DeepFringe" areas are listed with a choice of 20,30 or 40 -foot masts. The distance to TV stations determines which antenna to use, and local terrain (hills, trees, tall buildings, etc.) determines mast height. Rotator permits pointing antenna in any direction for excellent reception of any station. Meter on rotator control box indicates exact antenna direction.
All kits are complete with rugged, weather-resistant antenna; telescoping mast of heavy, galvanized steel; all-angle mast mount; guy wire; 100 ft . of twin line; 50 ft . of ground wire; ground rod; twin-line lightning arrester; guy wire hook-eyes; mast standoff insulators; woodscrew standoff insulators (plus 6 turnbuckles in $40-\mathrm{ft}$. antenna kits). Kits with rotator also include $10-\mathrm{ft}$. antenna mast; 100 ft . of rotator cable; and rotator cable lightning arrester. A complete set of instructions is supplied with each kit. Rotators are for $110-120 \mathrm{v} ., 60$ cycle AC.

## MODEL TA-147 UHF-VHF ANTENNA

Famous indoor antenna featuring smart styling combined with outstanding performance. Has high signal gain; minimizes interference and ghosts. Employs 6 -position impedance matching switch; permits adjustment for maximum efficiency on channel being received. Adjustable, 3 -section brass dipoles are easily positioned for clearest picture. Distinctive design matches any decor. Base is weighted and bala nced to prevent tipping. Has felt pad; will not mar fisish. Includes 5 ft . of
 300 -ohm twin line and spade lug terminals for quick, simple attachment to TV set. Shpg. wt., 2 lbs. 92 CX 124. List, $\$ 9.95$. NET

## MODEL TA-187 UHF ANTENNA

"Ultra-Loop" UHF indoor antenna for clear signal reception on channels 14-83. Circular, wide loop dipole provides flat, high-gain response across entire UHF band. Patterned after short-wave radio direction finding loop antenna, with adaptations for UHF. Adjustable for highest gain-dipole can be moved from vertical to horizontal angles for peak-
 ing at any point in the UHF spectrum. Rust-proof; red-gold, anodized aluminum dipole, with mahogany plastic base. Equipped with 4 ft . of 300 -ohm twin line. Ht., $91 / 2^{\prime \prime}$; dia., $9^{\prime \prime}$. Shpg. wt., $11 / 2 \mathrm{lbs}$.
98 C 376, List, $\$ 7.95$. NET.
2.20
brackets of antenna fit snugly and slide smoothly along extension bar. Antenna can be adjusted to proper position for best reception. With mounting hardwareready for quick, convenient installation. Less 300 -ohm twin line. Shpg. wt., 7 lbs.
97 CX 084. List, $\$ 8.95$. NET.
5.26

## KNIGHT VhF ANTENNA

Popular indoor television antenna at unusually low cost. Features efficient, time-proven "rabbit ear" design. For use on VHF channels from 2 to 13 quickly and easily adjusted for clear picture with minimum ghosts and interference. Also excellent for FM reception. Uses sturdy, 3 -section, brassplated telescoping elements for convenient adjustment to desired length. Bakelite base is weighted to prevent tipping. With 3 ft . of 300 -ohm twinline. Slipg. wt., 2 lbs.
92 CX 025 . NET.

## telco "hide-A-way" Vhf ANTENNA

Compact, plastic-cased "Hide-A. Way" antennas. Provide excellent allchannel metropolitan-area reception. Telescoping elements are made of durable, nickel-plated brass tubing. Elements are mounted on ball-joint swivels; rotate $360^{\circ}$ Yor excellent signal pickup from any direction. In models with 4 - or 5 -section elements. 4 -section elements are $291 / 4^{\prime \prime} ; 5$-section elements are $37^{\prime \prime}$. With 300 -ohm twin line. Shpg. wt., 1 lb .

EASY-TO-INSTALL VHF-UHF ANTENNAS FOR OUTSTANDING TV RECEPTION

## $\star \star \star \star$ MODEL WX811 "WONDER HELIX"

New, high-gain broadband antenna. Designed especially fot deepfringe areas. Also for use in strong UHF signal areas. "Wonder Helix" principle assures high gain and sharp directivity-provides clear iuterference-free pictures. Made of strong. drawn aluminum for durability and corrosipn resistance. Shipped preassembledjust flip elements in place and antemna is ready for operation. Engineered for close match to transmission line. Less mast and $300-$ olim twin line. Slopg wt.. $81 / 2 \mathrm{Ibs}$.
92 CZ 195. List. \$39.50. NET
23.23
$\star \star \star \star$ Model $W \times 811 \mathrm{~S}$. Same as WX811 above, except two bays for higher gain. Shpg. wt., 17 lbs .
92 CZ 282. List, \$82.50. NET

## $\star \star \star$ MODEL PX911 "POWER HELIX"

This high-gain, single-bay VHF antenna provides extremely fine sensitivity on all VHF TV channels. Excellent for fringe areas, the unique "Power Helix" principle brings in clear. snow-free pictures. Also for use in strong-signal UHF areas. Engineered for an extremely close impedance match to transmission line of receiver. Made of durable, corrosion-resistant aluminum irs the "in-line" style for pleasing appearance and low resistance to wind. Completely pre-as-sembled-practically installs itself, Elements flp into place. Less mast and 300 -ohm twin line. Shpg. wt., 10 lbs
20.58

92 CZ 141. List. S35.00. NET
$\star \star \star \star$ Model P.x911S. As above, but 2 bays for higlier gain. With stacking transformers. Requires $10^{\prime}$ mast. 17 lbs.

## $\star \star$ MODEL 2135 "SUPER POWER JET"

Stacked array for fringe-area VHF reception; also for local UHF reception. Provides exceptionally high gain on TV channels 2 to 13. Dual reflectors provide flat response on low claannels. Driven elements are of conical sliape for greatest bandwidth. Each liighband section consists of 2 drivep elements and 2 directors-spaced and phased for peak performance. Supplied complete with quarterwave stacking bars. Entirely pre-assembled of pure aluminum. Installed quickly. $1^{\prime \prime}$ square, rugged aluminum boom. Less .nnast and 300 -ohm line: Shpg. wt.. 14 lbs.
98 CZ.465. List, \$41.40. NET
24.34
$\star \star$ Model 213. Similar to 213 S antema above, but single-bay type. Shps. wt., 7 lbs.

30.87

## MODEL RX511 "SUPER HELIX'

Here is the new, modified version of the "Star Helix" antenna. Designed specifically for near-fringe area installation, the Super Helix makes use of the helix principle-developed for microwave work-which greatly steps up the gain of the antenna. Also for use in strong-signal UHF areas. Entire antenna is pre-assembled of high-tension aluminum tubing. In-line design reduces wind resistance. Performs equally well on all VHF channels. Less mast and twin line. Shpg. wt., 6 lbs.
92 CZ 138. List, $\$ 18.50$. NET
10.88
$\star \star$ Model R $\times 511 \mathrm{~S}$. As above; but 2 bays for higher gain. With stacking transformers. Requires $10^{\prime}$ mast. 12 lbs.

## tht MODEL SC3025 "SUPER DODO"

A high-gain, deep-fringe antenna. Bays are spaced $1 / 2$ wavelength for maximumgain and exceptional reception even in remote VHF areas. Provides peaked gain on channels 2 to 6; excellent gain on all VHF channels. Also for local UHF reception. High íront-to-back ratio. 6-dipole construction, with 15 reflectors. Shipped preassembled; elements pop into position. Takes masts up to $13 / \mathbf{m}^{\prime \prime}$ diameter, Less mast and 300 -olm twin line. Shpg wt., 17 lbs .

## SUPER-FRINGE ANTENNA

$\star \star \star$ Model F4. A super-fringe VHF antenna with exclusive "Fidelity-Phasing." Produces "in-phase" colinear currents on both low band and high band for superior combined performance on all VHF channels from 2 through 13. Excellent reception even at locations extremely distant from TV stations. Highly suitable for color: TV recep-tion-has very flat frequency response; less than 1 db variation in frequency response on any channel. 4 driven low-band, in-phase folded dipoles, plus 12 driven high-band, in-phase, folded dipoles form a highly effec-in-plase, folded dip
tive colinear array.
Fidelity phasing accomplishes both low band dipole and high band collnear operation without complicated phasing harnesses; permits easier, more weatherproof Installa. tions. Extremely high sensitivity and directivity. VHF gain exceeds that of famous Models 400-A and 400-SA. Rugged, light weight, aluminum construction to withstand heavy winds and ice loads. Antenna is pre-assembled for quick, simplified installation. Less mast and 300 -ohm twin line. Shige. wt. 13 lbs. 92 CZ 0772 . List, $\$ 46.00$. NET.
27.05

as. Feature twin drivers elements and "fidelity phasing." On channels $2-13$, surpass the directivity of single-channel, Yagi-type antennas. Exclusive self-locking and self-aligning construction. Oversize, extra-heavygauge aluminum boom plus "lock-tite" saddle bracket assure fast installation and high strength. Less mast and twin line.
$\star \star$ Model B-8. Deluxe antenna featuring 3 directors and 2 refiectors for maximum front-to-back ratio, and extremely high directivity. Very effective in eliminating cochannel interference. Ideally suited for color TV reception-has extremely flat response; less than 1 db variation on any channel. Shpg. wt., 10 lbs.

98 CZ 389 . Lisf, \$15.00. NET.
8.82
$\star \star$ Model 400-SA. Antenna similar to Model 400-A described above, but supplied with "Fro-Bac" full dimensional screen reflector. This special screen results in maximum signal gain plus extrenely high front-to-back ratio. Eliminates unwanted rear signal interference and ghosting in fringe areas. Antenna and "Fro-Bac" dimensional screen are both preassembled as one unit ready for quick and easy installation. Reflector screen elements are full length- 80 $\mathrm{sq} . \mathrm{ft}$. of highest efficiency reflector surface. Designed for minimum wind resistance and maximum strength. Reguires 10 ft . mast. Less mast and 300 -olim twin line. Shpg. wt., $161 / 2 \mathrm{lbs}$.
98 CZ 388. List. $\$ 54.50$. net..... 32.05

## $\star \star \star \star$ "GEOMATIC" TWIN DRIVEN $2-B A Y$ ANTENNAS

Model B-66-A. Deep fringe antenna featuring very great front-to-backe ratio and high gain on all channels. Utilizes dual-tuned folded dipoles, which operate as one length on lowband signals and as electrically different lengthis on high-band signals. Pcak performance is achieved on both bands. Low-band reflector, high-band colinear reflector and combination director further increase gain and sharpness of directivity. Antenna is completely preassembled. Less mast and twin line. Shipg. wt., 10 lbs .

## ALL-CHANNEL'S FAMOUS UHF-VHF ANTENNAS

- Deep-Fringe \& Semi-Fringe Models

## "RIVIERA" ANTENNA

$\star \star \star$ The latest version of this highly popular, extremely powerful UHF-VHF antenna. Provides exceptionally clear signal reception in decp-fringe signal areas. It features a 9 -position, ceramic switch at set for electronically "rotating". antenna without moving it. A turn of the switch conveniently selects the proper element combination for superior recention from any directlon. Superb for high-fidelity FM reception: performance on color TV signals is equal to that of black and white. Provides unusually sharp directivity, very high gain and excellent signal-to-noise ratio. Extremely rugged, weather-resistant construction. Incorporates 16 elements-each element of $1 / 2^{\prime \prime}$ aluminum tubing (with dowel inserts). $60^{\prime \prime}$ long. Has 4 solid aluminum stacking bars, $45^{\prime \prime}$ long. Low loss. pre-assembled switch-to-set coupler. Insulators are of switch-to-set coupler. Insulators are of
triple-strength design to assure dependable support of the antenna elements under conditions of high wind and icing. With 2 $71 / 2^{\prime \prime}$ stand-off insulators and instructions. Less mast and 4 -conductor polymicalene transmission line (listed at right). Shpg. wt. 10 lbs.

## Amphenol TV Antennas \& Accessories

## HIGHLY EFFICIENT VHF \& UHF ANTENNAS

## - INLINE VHF ANTENNA

Model 114-005. Covers all 12 VHF channels. Ideal for metropolitan and suburban use. Unusually broad frequency response. Uni-directional pattern and excellent impedance match on high and low-bands reduces stray reflections and "ghosts." Antenna elements constructed of sturdy aluminum tubing. Mast is heavy-gauge steel. Unique design permits large folded dipole (for $54-88 \mathrm{mc}$ band) to operate as reflector for the smaller dipole ( $174-216 \mathrm{mc}$ band). Includes one $5^{\prime} \times 3 / /^{\prime \prime}$ mast. guy ring, mounting bracket, hardware, stand-off insulators, 75 feet of high-qualfty 300 -ohm twin line, and easy-to-follow installation instructions. Shpg. wt., 7 lbs.
97 CZ 438 . List. $\$ 19.50$. NET.

Model $114-074$ "Trisonef." Permits coupling three antennas (low-band VHF, high-band VHF and UHF) to a single 300 -ohm transmission line.
51 C 277 . List, \$4.75. NET
2.79

## t'PIGGY-BACK" VHF ANTENNA

Model 114-026. Amphenol's extremely popular "Piggy-Back" VHF antenna-a particularly fine choice for locations where high and low-band TV signals are received from different directions. Eliminates the need for compromising low-band reception in order to obtain good high-band reception, and vice-versa. Consists of individual, 2-element high-band and low-band antenna sections to permit separate directional adjustments for peak performance and mininum "ghosts" on channels 2-6 (low band) and 7.13 (high band).
Eacl antenna section employs its own folded dipole element plas a reflector element to assure excellent signal gain and a very favorable front-to-back ratio. Provides clear, sharp reception in metropolitan as well as suburban areas.
Antenna is supplied with the following installation accessories: 5 -ft. steel mast, clamps, guy ring, isolating transmission harness, mounting support, stand-off insulators, 75 feet of $300-0 \mathrm{hm}$ twin line and instructions for quick. simplified installation. Sturdy, weather-resistant construction. Shpg. wt., 10 lbs.
97 CZ 360 . List, $\$ 19.50$. NET...... II. 47

## *UHF CORNER REFLECTOR

Model 114-058. Engineered for high gain over channels 14 to 83. UHF corner reflector design has proven most efficient antenna for botli strong and weak signal areas. Excellent horizontal and vertical characteristics reduce "ghosts" as well as interference due to simultaneous telecasting on the same
 channel or adjacent channels. Spacing and dimensions of the elements and reflectors assure maximum broadband reception from the front with rejection of reflected signals from the sides and back. Ascending signal gain of 8 to 13 db across the entire UHF range. Impedance matches 300 -ohm twin line. Flectro-galvanized steel reflectors designed to resist corrosion. Fits masts up to $11 / 2^{\prime \prime}$ O.D. With complete mounting hardware. Less mast and 300 olm twin line. Slipg. wt.. 8 lbs.
97 CZ 263 . List. $\$ 12.50$ NET......
7.35

## MATCHING TRANSFORMER

Matching transformer for con300 -ohm impedances. Matches 72-ohm line to 300 -olim antenna
 or receiver inputs; matches 300 -ohm line to 72 -ohm antenna or receiver inputs. Spade lugs for convenient installation. Shpg. wt., 14 oz . 51 C 292. NET.

## $t \rightarrow$ "POWERAY" FRINGE-AREA

 VHF ANTENNAModel 114-095. Designed for extreme sensitivity, the "Poweray" 2 bay fringe area VHF TV antenna produces outstanding signal reception even at distances to 75 miles from the transmitter. Features new "Sleeve Dipole" design for proper balance of gain and directivity. plus an extremely close impedance match between antenna, lead-in, and TV receiver. Exceptional gain due to high front to back ratio, sharp due to high rront to back ratio, sharp
directivity, and very high efficiency assure outstanding picture quality on all channels from 2 to 13. Exceptionally high directivity eliminates adjacent channel and co-channel interference, and greatly reduces ground refiections causing "ghosts." Pre-assembled for quick and easy installation-elements swing out and lock with positive springlock design. Heavy-duty, all-a luminum construction withstands severe weather condi-tions-high winds, snow, icing, etc. Requires $10-\mathrm{ft}$. mast. Less mast and 300 -ohm twin line. Shpg. wt., 14 lbs.

## TV and FM Antennas

## FINNEY FM ANTENNAS

## \& MODEL FMT- $]$ ANTENNA KIT

All-direction FM antenna kit. Provides unusually fine reception over the entire FM band. 88 to 108 mc . Incorporates two sturdy. well designed folded dipoles mounted at right angles to eaclı other for complete $360^{\circ}$ coverage without rotation. Dipoles are matched with a special guarter wave plasing stub for optimum gain in all directions. Simplified installation. Each folded dipole attaches easily to pre-drilled mast. Standoff insulators support line away from mast. Universal base will mount on any surface from horizontal flat roof to vertical side wall and allow mast to be adjusted to vertical position. Kit includes 50 -ft. $\mathbf{3 0 0}$-ohm transmission fine; heavy-duty 5 -ft. antenna mast; universal mounting base; 2 mast stand-off insulators; and 3 screw-eye stand-off insu!ators. Shpg. wt., 6 lbs .
92 CX 278 . List, \$13:95. NET.
8.20

## + MODEL FM-2 ANTENNA KIT

Here's an excellent-performing antenna kit. A particularly fine choice for use where all signals are received from approximately the same direction. Employs an efficient FM dipole plus a reflector element to achieve high signal gain and good directivity. Gain is 3.5 db . Features rugged, weat her-resist is 3.5 db . Features rugged, weather-resistboom and elements are completely preassembled with "snap-out," self-aligning aluminum brackets-designed for quick. simplified installation. Universal base will mount on any surface. Kit is supplied with $5-\mathrm{ft}$. antenna mast, heavy-duty mounting base, 50 -ft. 300 -ohm twin line, 2 mast-tyse stand-off insulators, and 3 screw-eye standoft insulators. Shpg. wt., $61 / 2 \mathrm{lbs}$.

## $\rightarrow$ MODEL FM-3 ANTENNA

(Not illustrated.) An extremely effective broad band fringe-area FM antenna at a very moderate cost. Features a highly directive 4-element yagi design for outstanding gain on the FM band, 88 to 108 mc . Allaluminum construction with square boom. Special "Lock-Tite-No-Tilt" saddle bracket for permanent horizontal aligument. Uses folded dipole driven element for closer impedance matching and maximum energy transfer. Double wall reinforced elements have snap-out brackets. Elements lock in open position. Less mast and 300 -ohm twin lead. Shpg. wt., 5 lbs.
92 CZ 281. List, $\$ 12.50$. NET. ... ... 7.35
$\star$ 大 $\boldsymbol{*} \boldsymbol{*}$ MODEL FM-4 ANTENNA
Deluxe, 6-element, high-gain antennaprovides superior fringe-area FM reception. Design is based on the famous "Geomatic" TV antenna principles. Features a specially engineered twin drive element with impe dance matching by the well known "T Match' system. Twin drive allows inaximum gain to be realized over the full 88 to 108 mc band. 3 extra wide spaced parasitic director elements, plus the wide spaced parasitic reflector, also contribute substantially to the gain and broad-band features. All of the parasitic elements lock into open position by "snap lock" brackets. On the twindrive dipoles it is only necessary to loosen nuts, swing into open.position until brackets snap closed and retighten nuts. Equipped with rugged square aluminum boom; exclusive "Lock-Tite-No-Tilt" saddle mounting; "box-girder" snap out self-aligning brackets. Completely pre-assembled with double wall reinforced, lightweight, all-aluminum elements. Slipg. wt., $61 / 2$ lbs.

## TV Rotators \& Distribution Amplifiers

CORNELL-DUBILIER-RADIART TELEVISION ANTENNA ROTATORS

MODEL AR-22 ROTATOR

## WITH AUTOMATIC-TYPE CONTROL UNIT

 (A)C Popular, fully automatic rotor for TV antennas up to 150 ibs. ForPopular, fully automatic rotor for TV antennas up to 150 lbs . For hold even large TV arrays steady in high winds. Rotor unit employs 12 large ball-bearinga in 2 wo $61 / 2^{\prime \prime}$ races. Motor reverses instantly-does not
drag or coast. Overshoot of desired direction in prevented by magnetic drag or coast. Overshoot of desired direction is prevented heamagnetic brake. Sereamlined bell-shaped housing is die-cast and heavily remps forced. Weather-sealed and factory lubricated for life, Reverslble clamps
on rotor unit take masts from $75^{\prime \prime}$ to $2^{*}$ O.D. Rotor unit has 3 husky guy wire lugs built-ln for convenience in installation.
Control unit dial is marked in compass points: N, S, E, W, NW, NE, SIV, and SE. Operation is extremely simple: Set control unit pointer to Siv, and Sect direction and antenna then automatically rotates to this position desired direction, and antenna then automaticaly rotates unit dial until and stops. Eliminates necessity of watching control unit hased in antenna has rotated to desired brown plastic cabinet which is equipped wifh rubber feet to atiractive brown plastic cabinet which fot finlsh. Complete with rotor control unit, and full set of instructlons. Requires 4 -wlre cable (see listlng below). For operation from $110-120$ voles, $50-60$ cycle AC. Shpg. wt., 14 lbs. 92 TX 150 List, $\$ 51.95$. NET
30.55

## MODEL TR-4 ROTATOR

 WITH METER-TYPE CONTROL UNITA DHeavy-duty antenna rotor; same as above except with meter-type Acontrol unit. Dial calibrated N, E, S, W, and N. Lever at front of pointer begins to turn as soon as starter lever is actuated. and can be stopped at any desired direction. Sturdy plastic cabinet with attractive mahogany finioh. For $110-120 \mathrm{v}$. $50-60$ cycle AC. Uses cable below. Shpg. wi. 16 lbs.

## WALDOM DISTRIBUTION AMPLIFIERS

Model DA-2000-A two-set electronic TV distribution ampllfier. Permits operaBroad bandwidet from one antenna of color TV. Signal delivered to each TV set is an averase of 3 db better than the signal available directly from the antenna. 300 -ohm inputs. Outputs: Two 300 -ohm twin-lead connections to TV sets. Uses two 6BK7A tubes as separate and independent broad-band amplifiers. UHF input converts both sets to UHF reception with a single UHF converter Size: $8 \times 51 / 0 \times 21 / 4^{\prime \prime}$. In sturdy gray metal cablnet. For operation from $110-120$ volts, 60 cycle AC. Shpg. Wit., 3 lbs. 98 T 473. List, \$45.45. NET
Model DA-1010. Distribution Amplifer. Similar to Model DA-2000 above, but for use with up to ten TV sets. Uses $1-6 \mathrm{BK} 7 \mathrm{~A}$ and $3-616$ tubes. Size: $121 / 2 \times 31 / 4 \times 71 /{ }^{\circ}$
cycle AC. Shpg. wt.
. 98 T 494. List, \$102.95. NET

## MODEL AR-2 ROTATOR

## WITH AUTOMATIC-TYPE CONTROL UNIT

[E]Completely automatic antenna rotator. To operate, place pointer E. on control unit dial to desired position. Antenna begins to rotate and dial lights up while rotation takes place. When antenna reaches elther direction. Mechanical brake, released masnetically, provides minimum overshoot and drifting in winds.

Quick-mounting antenna mast collet accepts masts up to $11 / 2^{\circ} O_{\text {O }}$ -self-centering sawtooth clamps grip mast securely. Rotator mechanism is streamlined for pleasing apnearance and low wind resistance. Installation is speedy and simplet kith no loose parts to assembie. Mounts on mast or pipe up to $2^{\circ}$ O.D. $360^{\circ}$ rotation; makes complete revolution in 45 sec onds. With control unit and thrust bearing. Attractive plantic control unit uses 4 -wire control cable (see below). For $110-120$ voles. $50-60$ cycle AC. Less control cable. Shpg. wt., $131 / 2 \mathrm{lbs}$.

## Blonder-Tongue TV Equipment

## TV BOOSTERS AND DISTRIBUTION SYSTEMS

## VHF ANTENSIFIERS

Two powerful TV boosters. Model HA-3 is for use with one TV receiver. Model CA-1B is for distribution systems and deluxe home installations. Both units are fully automatic.
(A) Model HA-3. Broadband booster featurA ing an advanced, 3-stage push-pull cascade circuit. Designed primarily for home operation of single receivers. Signal boost of greater than 16 db on all 12 VHF channels. No knobs, no tuning and no channel switching. Booster switches on and off with TV set. Employs three 6 J 6 lownoise, dual-triode tubes. Switch prevents overload on channels requiring no amplification. $5 \times 53 / 4 \times 4^{\prime \prime}$. For $105-125$ v., 60 cycles AC. Shpg. wt., 4 lbs.
98 T 22 I. List, $\$ 44.50$. NET...... 27.70
(B) Model CA-1B. Powerful commercial TV 24 VHF preamp- 26 db gain on low band; 24 db on hish band. May be used at any point of any distribution system. Ideal as line amplifier in master TV systems or community installations. Matching transformers for use with 75 and 300 -ohm lines. Dualtriodes used for best signal-to-noise ratio. Metal cabinet. $8 \times 41 / 2 \times 5^{\prime \prime}$. With 2-6J6"s and 2-6BQ7A's. For $105-125$ v., 60 cycles AC. Shpg. Wt., 7 lbs.

## 98 T 218 . List, $\$ 84.50$. NET.

## MLA VHF TV SIGNAL AMPLIFIER

C The "Masterline" VHF TV signal amplifier. Provides an effective signal boost of not less than 37 db . It is excellent where very long transmission lines weaken signal. May be installed in coax line going to single TV set, or used with antenna distribution system (described at far right). in installations feeding 2 or more TV sets from 1 antenna. Several "Masterlines" may be placed in cascade when extremely long transmission lines are used. May be used with MAGC unit (below), to virtually eliminate signal fluctuation. Offers maximum fidelity for color TV. Gain is adjustable on high and low bands. Response flat within $\pm .5 \mathrm{db}$ over any 6 me channel. Cascode amplifying circuits assure minimum nolse level. Coax input and output connectors. $9 \times 6 \times 5^{n}$ deep. In perforated gray metal cabinet. For operation from $110-120$ v., 60 cycie AC. Wt., 9 lbs.

92 T 090. List, $\$ 124.50$. NET.
77.30

## MAGC AUTOMATIC GAIN CONTROL

(0) For use with the Model MLA, above.

Maintains a constant output level of the amplifier, even with 20 db variation in signal strength. Effective from 14,000 to 140.000 mic rovolts. Also compensates for AC line variations. Radiation-resistant coax connectors. Takes operating voltages from Model MLA. Has controls to independently adjust signal levels on high and low bands. Gray hammertone. $6 \times 4 \times 5{ }^{\prime \prime} .6 \mathrm{lbs}$.
92 T 091. List. \$79.60. NET...... 49.40

## VHF DISTRIBUTION SYSTEM

E Model DA8-B. Combination booster and isolation-distribution system for use with up to 8 TV sets. Ideal for use in small apartment buildings, hotels. motels, etc. Permits operating up to 8 TV sets from a single antenna. 22 db minimum isolation between output circuits prevents interaction between TV receivers. Provides 10 db gain to each TV set to assure full-strength signals. Low-noise, all-triode circuit. Has inputs for 75 -or 300 -ohm line. Eight outputs accommodate 75 -or 300 -ohm line; one of these outputs may be used to feed another DA8-B to permit hook-up of additional TV sets. Screw terminals permit fast Installation. $53 / 4 \times 9 \times 51 / 2{ }^{\text {". . For }} 105-125$ v., 60 cycles AC. Shps. wt., 7 lbs.

## 98 T 220 . List, $\$ 94.50$ NET <br> 58.50

## MODEL AB VHF BOOSTER

TAntenna mounted TV booster. Efficient broadband circuit provides more than 25 db gain on all VHI channels. Includes indoor control box which steps down the regular line voltage to 24 volts to operate booster. Voltage is delivered to booster by same line that carries TV signal. Built-if filter network isolates AC from TV signal. Operation is automatic-booster turns on and off with TV set. Unit has 300 -ohm input and output. Amplifier unit is enclosed in weatherproof housing for installation at antenna. Supplied with mast mounting bracket. For $110-120$ v., $50-60$ cycle AC. Shpg. wt., 10 lbs .

## MODEL MA4-1 MIXER-AMPLIFIER

[

## TV signal mixer, for up to five anten

 $K$ nas. Amplifies and mixes up to five input signals into a common output. For either individual or master antenna systems. Permits the use of four separate high-gain Yagi antennas and one broadband antenna. Requires no rotators or boosters. Provides maximum ghost-free reception because each antenna can be individually oriented to the particular TV station desired when installed. Employs channel strips listed below. Any VHF and UHF antennas can be accommodated at any time with plug-in VHF strips and plug-in UHF converter strips. One input is broadband for signals requiring no preamplification, Remaining 4 single-channel inputs use separate plug-in strip assemblies with gain in excess of 17 db. Impedance: 75 - and 300 -ohms at all terminals. Gray case. Size of chassis with self-contained power supply, $4 \times 6 \times 83 / 4^{\text {" }}$. For 105-125 volts. 60 cycle AC. Less plug-in strips (listed below). Wt., 7 lbs.98 T 305. List, \$67.50. NET

## POPULAR TELEVISION BOOSTERS

## REGENCY MODEL DB- 550 VHF BOOSTER

Expertly designed booster which tremendously improves sensitivity and signal-to-noive ratio on all 12 VHF TV channels. Provides an average boost in gain of 17.5 db . Excellent for use in weak signal areas, the DB-550 provides greatly improved picture and sound. First stage uses 616 dual-triode in push-pull; second stage is 12AT7 grounded-grid. push-pull amplifier. Simple single-knob tuning. Advanced, triple-tuned circuit employs two stages in cascade, neutralized for maximum stability Power supply has transformer for isolation of unit from power line. On-off switch controls both booster and television set. Input and output impedance: 300 ohms. Housed in attractive, maliogany finish, plast ic cabinet. Size, $41 / 3 \times 6 \times 41^{\circ}$. U.L. Approved. For operation from $110-120$ volts. 60 eycle AC. Shpg. wt. 5 lbs.

## BLONDER-TONGUE UHF TV CONVERTERS

## MODEL 99 CONVERTER

New, modernly styled, lownoise UHF conyerter designed for use in metropolitan signal areas. One-knob tuning. Choice of Channel 4,5, or 6 as the if output to TV set. Extremely sharp input and oschlator tuning for every UHF channel-eliminates multple images and troublesome interference. Input circuit is tracked with oscillator to reject spurious signals and suppress osclllator radlation. Oscillator is thermally compensated to assure minimum drift. Precise input impedance match
assures maximura slgnal conversion; no line ghosts or picture smear. assures maximurn slgnal conversion; no line ghosts or picture smear. In "Of" position, VHF signals are passed directly to TV set to permit rexular $H$ reception. Uses GAF4A oscillator, cryatal diode mixer and selenium rectime exal soo simple and outpul mpedance mate handsome mahosany-finishet plastic cohinet Size $61 / 4 \times 43 / 4 \times 43 /{ }^{3}$ For handsome rom $110-120$ vols 60 cycle AC Wi 4 bs 98 T 586 . List, $\$ 22.95$. NET.
15.95

## MODEL BTU-2 CONVERTER

High-gain, low noise UHF converter. Adds all the new UHF stations to any TV set quickly and easily. Extra high signal-to-noise ratio xuarantees clear, steady pictures, even in weak-signal locations. Fully shielded tumer has 3-gangs. Continuous tuning type. Has dual-speed channel selector for precise, effortless tuning. Delivers VHF output on Channel 5 or 6. Antenna connects to converter; converter connects to TV set. Terminals for VHF or UHF transmission lines. Exact 300 -ohm impedance match at both UHF input and VHF output plus highly efficient triode amplification gives maximum usable signal power with no picture or sound distortlon. Oscillator drift is mimmized by thermal compensation. Highly selective, double-tuned Rompre-selector stage grovides maximum gaiz andianage comecton. Oscomatic turns on and off with TV set throush thermal relay lnetant changeover from UHF to VHF Ouickly and easily nermal relay. nstant changeover

## JERROLD TV SET COUPLERS

Exceptionally low-loss couplers for use in fringe and metropolitan areas. Allow 2. 3. or 4 receivers to operate on one antenna. Feature AC isolation between AC-DC TV sets and antenna. Positive matching. High suppression of set interaction. Unbreakable case. Universal mounting. Con nectors completely conceated and protected

## TV Towers and Accessories

## ALPRODCO ALUMINUM ANTENNA TOWER

- Buill-in Lodder Design
- Excellent for Fringe Areas

Lightweight, easy-to-install, 6 -ft. triangular tower sections. Exceptionally wellconstructed to provide long, reliable service. Ruggedly built of high-grade springtempered aircraft aiminum alloys and aluminum aircraft rivets. 6 -foot sections can be quekly and easily boited cogether permitting installation of TV antennas as hish as 90 feet. Ideal for application in extreme fringe areas where reception is
difficult due to high obstructions.
Likht and strong-weighs slightly over 1 lb . $/ \mathrm{ft}$. 90 -foot maximum height tower will carry vertical static load of 300 lbs . and over 200 lbs top loading in 100 mph Wind. Tower has extremely low wind reststance of only $6 \mathrm{tbs} . / \mathrm{ft}$. in 100 mph wind. Designed to save the installer valuable time-utilizes built-in ladder bars (note maxnified cut of illustration) for easy ellmbing. Tower requires guying every 30 feet. All 6 -foot units come two-t
rivets for final, easy assembly.

## 6-FOOT TOWER SECTION

Model $\mathrm{T}=6 \mathrm{~W}$. Standard triangular 6 -foot antenna tower section Ideal ly designed-requires a minimum of space for stocking. Units are shipped wo-thirds factory pre-assembledready for immediate, time-saving assembly at place of installation Measures $11 / 4^{\circ}$ wide on each side Special impact rivets for final assembly. Has built-in ladder construction. Sthpg. Wt.. 8 lbs.

## MILLER HIGH-FIDELITY AM TUBELESS TUNER

Mouel 565. Unique tubeless, high-fidelity AM tuner kit. Provides outstanding broadcast re ception at an unusually low price. Tuned radio that is limited only by circuit offers a response and the quality of the transmitted signal. The circuit uses no tubes and no operating nower is required. Designed for use with any bighfidelity amplifier, or TV audio section. Smooth tuning dial covers frequencies from 550 to 1700 kc. The output cable of the tunet is equipped with a atandard pin plug for direct connection to any standard, amplifier input jack
The tuner la fundamentally a germanium diode detector employing two tuned circuits. Negative mutual coupling is employed between the antenna circuit and the RF circuit for excepvoltage of the tuner is. $i$ he audio output to the input signal. Output voltage ranges from 07 to 7 volts on stations vothine ranges from dius (depending upon the signal strength of the ransmitting station). Output is equipped with a volume level control to permit adiusting the output voltage level to that required by the a mplifier heing used. With all parts, wire, hardware, cabinet, and easy-to-follow instructlons. Cabinet is ebony bakellte with brass 985525 . NET. ......................... 14.70

## HOW TO ORDER

Orders may be sent on our order blanks or your own purchase order forms or stationery. To speed handling, please fill in all information requested on our order blank. If you use your own order forms or station ery, please give our stock number, quantity desired, name of item, manufacturer's type number and price. Remit to cover the full amount of the merchandise, plus postage and insurance for parcel post shipments. Don't worry about sending too much. Every cent extra will be refunded.

## "Z" ITEMS SHIPPED BY EXPRESS

 The letter " $Z$ " in our stock numbers (as in 98 SZ 767) identifies items which are fragile or which exceed parcel post size or weight limits. To insure safe arrival, such items are shipped by express or the best lowcost method. See Parcel Post and Express information at right.
## HOW TO SEND MONEY

The best way to send money is by postoffice or express money order, bank draft or check. Avoid sending coin or currency, but if necessary, be sure to register your letter. Please do not remit in stamps except if necessary on very small orders. For rush handling, telegraph your order and money.

## ABOUT C.O.D. ORDERS

You will save money by sending cash in full with your orders. On parcel post C.O.D. shipments, the Postoffice charges a C.O.D. collection fee and also a money order fee for forwarding the C.O.D. amount to us (This is in addition to regular postage; see C.O.D. fee and money order tables below.) Similar fees are collected on express and freight C.O.D. shipments. It will pay you to remit in full and save the C.O.D. charges. We will refund every penny not used. If a C.O.D. shipment is unavoidable, your order should be for a minimum of $\$ 5.00$, with a deposit of at least $20 \%$. Please include full remittance with any orders for less than \$5.00.

## PARCEL POST C.O.D. FEES

$\$ 0.01$ to $\$ 5.00 \ldots 30 \mathrm{c} \mid \$ 50.01$ to $\$ 100.0080 \mathrm{c}$ 5.01 to $10.00 \ldots 40 \mathrm{c} 100.01$ to 150.0090 c 10.01 to $25.00 \ldots 60 \mathrm{c} 150.01$ to 200.001 .00 25.01 to $50.00 \ldots 70 \mathrm{c}$

From 5.01 to $10.00 \ldots \ldots . . . . . . .20 \mathrm{c}$
From 10.01 to 100.00 ................... . 30 c

## IT'S EASY TO ORDER FROM ALLIED

## SHIPPING INFORMATION AND HOW TO ESTIMATE CHARGES

PARCEL POST: Size and weight limits will vary depending on your postal zone from Chicago and the type of post office area in which you live. Items not mailable are identiffed by "Z" in our stock numbers (as in 98 SZ 767). See explanation in column at left.
Include Money for Postage and Insurance. Please send enough money to cover merchandise, postage and insurance on parcel post orders. Catalog gives approximate shipping weights. If you send too much, we will refund every penny not used. In case of insufficient remittance we ship C.O.D. for balance. To protect you we insure all parcel post. Allow for insurance:
 $\$ 5.01$ to $10.00 \ldots . . . . . .10$ e $\mid 25.01$ to $50.00 \ldots . .20$ e 100.01 to $200.00 \ldots . .35 \mathrm{e}$

## HOW TO ESTIMATE PARCEL POST CHARGES

Up to 8 ounces, all zones, allow 2 c for first ounce, 1 f for ach additional ounce
The post office charges a fraction of a pound as a full pound. For example, if the total weight is 5 pounds and 1 ounce to Zone 4, postage would be for 6 pounds (596).

EXPRESS: Please remit full amount for merchandise, but do not send any money for express charges with your order. All transportation charges are collected on delivery at no extra cost to you. All "Z" items (see column at left) are shipped by express. In addition, to assure safe arrival, we prefer to ship by express many hi-fi units, communications equipment, sound systems, transmitting and TV tubes, recorders, test units, and other fragile merchandise. If there is no express agent at your location, be sure to specify your nearest express office. Express rates include insurance.

## HOW TO ESTIMATE EXPRESS CHARGES

(Rates are about $10 \%$ higher to eastern stales. Add 3\% Federal Tax for each shipment.)

| Weight Pounds | Maximum Distance in Mlles |  |  |  |  |  |  |  |

FREIGHT: If speed is not essential, freight is cheapest on heavy shipments. Minimum charge is for 100 pounds. For truck freight, you may specify the truck line you preter,

## IMPORTANT INFORMATION

## OUR TERMS OF SALE

Cash Terms. Our general termis of sale are cash with order, You save payment of C.O.D. fees by including full remittance with your order. Every penny not used is refunded. If desired, we will ship C.O.D. See opposite page for C.O.D. orders.
Easy Payment Plan. Applies on everything in this catalog (except tubes and parts). Minimum order is for $\$ 45.00$; down payment only $10 \%$. See Page 396 for full details. Your application form is on the back of our order blanks: Additionalorder blanks will be supplied on request.
Open Accounts. Open account terms are extended to well-rated firms, schools, institutions and government agencies. Firms without a published rating may apply for an open account by submitting three trade or bank references. Terms are net, 10 days, E.O.M.

## AbOUT OUR PRICES

,You Pay NET Catalog Prices. Catalog prices are net, f.o.b. Chicago, except where otherwise indicated. All trade and cash discounts have already been deducted from every price. Our NET cata$\log$ prices are the prices you pay.

## Your Order is Shipped at the Current

 Price. Prices in this book replace prices in all previous Allied catalogs and are subject to change without notice. Orders will be filled at prices in effect at time of shipment.
## You Benefit From Any Price Reduc-

 tion. If prices are reduced during the life of this catalog, we always give you the advantage of the lower prices and refund the difference. We reserve the right to add any Federal, State or Local taxes now in effect or which may be levied after this book is printed.
## Your Satisfaction Is Guaranteed

Every item you buy from us must satisfy in every way-or we want you to return it at once for exchange or refund. See Page 1 for full details of our guarantees which protect you on every purchase.

- Allied radio

## IF YOU WRITE TO US

On cash orders, we return to you your original order and all related papers. Before writing us, please check explanations shown on your order and attached papers. If you do find it necessary to write, please include with your letter all order papers and correspondence that apply. If you do not have the order papers, be sure to give in detail the stock numbers and descriptions of the merchandise you ordered and the same name and address as on your original order. On Easy Payment or Open Account orders, only your invoice or account number is necessary.

## HOW TO RETURN MERCHANDISE

Please include your instructions with your shipment, pack the merchandise carefully and insure.
On parcel post, place your instructions, all order papers and correspondence in an envelope inside your package. On the outside, mark "First Class Mail Enclosed" and affix additional first class postage for the enclosure.
On express shipments, place all papers in a stamped and sealed envelope inside the package. Date this envelope a nd draw several lines across postage stamp with a pen.
Your name and address should be plainly marked on your enclosure as well as on the outside of your package. Note: Merchandise not regularly stocked, but obtained especially for you, may not be returned for refund or exchange.

## TELEPHONE ORDERS

We have a specially trained staff to handle your telephone orders. If you are in a hurry for any merchandise, telephone your order. It will be filled and shipped promptly. For extra-fast service, specify Air Shipment (see opposite page).

Phone: HAymarket I-6800

100 N. WESTERN AVE.
CHICAGO 80, ILL.

## VISIT OUR CENTRAL SALESROOMS AND HI-FI STUDIOS

Salesrooms where you can obtain all merchandise listed in this catalog, as well as High Fidelity demonstration studios, are located in our main building at 100 N . Western Ave. You are invited to come in to see us. Enjoy a thrilling Hi-Fi demonstration, check the Knight Kits wired for your inspection, and examine tape recorders, tools, test instruments, sound equipment, and the great variety of other merchandise we have on display.
Our location at Western Avenue and Washington Blvd. is only a short distance from Chicago's Loop.

[^18]
# ALLIED'S EASY PAYMENT PLAN 

Test Equipment
Books
Tools
TV Accessories

## BUY OUR EASY-PAY WAY-ONLY 10\% DOWN

Use Allied's Easy Pay Terms to get the equipment you want now, even if you don't have the ready cash. A small down payment is all you need on orders of $\$ 45$ or more.
Types of Merchandise Sold on Easy Payments. Included under the plan are High Fidelity Systems, separate Hi-Fi units and accessories; Recording, Public Address and Test Equipment; Cabinets, Phonographs and Record Changers; Amateur Gear; BuildYour. Own Kits, including Allied's Knight-Kit Electronic Kits; Radioactivity Detectors; TV Accessories; Chargers, Boosters and Converters; Power and Hand Tools; Manuals and Books; etc. Everything except tubes and parts may be purchased on Allied's Easy Terms.

## Our Easy Payment Terms

Minimum Order- $\$ 45.00$ total cash value.
Down Payment-10\%. A bigger down payment will reduce carrying charge and monthly payments.
Carrying Charge-See table. No carrying charges if paid in 60 days. See below.
Monthly Payments. See table. All monthly payments are for equal amounts, except for last payment which is for the odd amount remaining due. Minimum $\$ 5.00$ per month.

## No Charges if Paid in 60 Days

You get a full refund of carrying charges if you complete payments within sixty days after shipment, or $50 \%$ of the carrying charges if you finish payments in half the required time. Take the full time to pay if you wish. But if you decide to pay in 60 days or even in half the contract time, you get a refund.

## How to Buy on Allied's Easy Pay Plan

Use your Allied order blank to enter the merchandise you want to buy on easy terms. Fill in the answers to the simple questions on the back of the order blank and.sign it. Attach your remittance for the down payment ( $10 \%$ or more) and mail your order. It will be shipped as soon as your credit is approved. The first payment is not due until at least 30 days after shipment. Your invoice will have full details. No red tape-no finance companies to deal with -no hidden charges. Any responsible person of legal age, with a steady income, can get credit approved. Additional order blanks and our Easy Pay Bulletin explaining our Payment Plan in detail, will be sent on request.

## Additional Purchases

Once your credit is established with Allied, you can "add on" to your Easy Payment Account with purchases of $\$ 25$ or more. Simply list the items you want (except tubes or parts) on one of our order blanks, write "add to my account" and give your account number. Please be sure to sign the Easy Payment agreement on the reverse side. After your new purchase and the usual carrying charge are added to the amount you owe, you pay on only one account. In most cases, you will continue to pay the same amount monthly. If your new unpaid balance is substantially different from the original amount, a new monthly payment will be set up. "Add on" carrying charges: $\$ 25.00$ to $\$ 29.99, \$ 2.50$; $\$ 30.00$ to $\$ 34.99, \$ 3.40$. See table for charges over $\$ 35.00$.

WEBCOR

## verified high-fidelity diskchangers with "MAGIC-MIND" feature... automagically selects 33 or 45 rpm speeds!

## NEW "ECONOMV" BSIB42 SERIES 4-SPEED DISKCHANGERS

## AS LOW AS <br> $\$ 3950$

- Easy to Use-Simple to Install
- Exclusive "MaglC MInd"' Feature
- Stunning, New "Gold Tone" Styling
- Low In Cost-Tops in HI-FI Valuel

Outstanding values, these new, fow-cost rechrd changers feature Webcor's unique "Magic Mind". Stack up any assortment of $33.1 / 3$ and 45 rpm records in $7^{\prime \prime}, 10^{\prime \prime}$ and $12^{\prime \prime}$ sizes, and in any sequence-then let the "Magic Mind" go to work. As each record drops for playing, this ingenious device automagically selects the proper speed, then sets the arm down precisely on the starting groovel Plays 78 rpm records separately, with positive Intermix of $10^{\prime \prime}$ and $12^{\prime \prime}$ sizes.

Small in size, the BS1842 series of record changers fit in any. where. Replace your present changer with one of these outstanding units. Attractive "gold tone" styling complements any furniture finish or decorating motif. Include AC cord and plug, phono cable and pin plug, and instructions. For operation from $110-120$ v., 60 cycle AC. Shpg. wt., 15 lbs.
